Anoop Mathur is the President of Centre of Recognition and Excellence

Prior to founding Centre of Recognition and Excellence he was the Chairman & MD of Pacific & Strategic Media (India), a niche and leading Media Company specializing in the ICT domain. In this capacity, Anoop had the P&L responsibility for India and Middle East operations.

Through his extensive professional experience in the Healthcare, Insurance, Financial Services, BPO & IT Enabled Services business verticals, he has held senior positions with leading global organizations such as Prudential, Capita, ICICI OneSource, and United Healthcare.

Prior to joining the corporate business environment, Anoop was engaged in providing C&F services to the Government & State Trading Corporation of India.

He is a Six Sigma Professional & a Licentiate from the Insurance Institute of India.

INTRODUCTION

"CIO CHOICE" is a very powerful branding and marketing tool for organizations in the Information & Communications Technology space to promote and market their products, services & solutions.

Our Mission

"Successful branding programs are based on the concept of singularity. The objective is to create in the mind of the prospect the perception that there is no other product on the market quite like your product."

Al Ries & Laura Ries - 22 Immutable Laws of Branding

Overview

Centre of Recognition & Excellence is an organization engaged in building brand reputation, offering recognition, honoring products/services/solutions in ICT space.

Description

This B2B platform is uniquely positioned to recognize and honor products, services and solutions on the back of stated preferences of CIOs and ICT decision makers and to help marketers create a positive brand positioning for their products, services and/ or solutions by being the CIOs preferred choice.

General Information

"Branding is identifying or creating, and then exploiting, sustainable competitive advantage." CIO Choice offers this to ICT vendors to build their brand reputation within CIO community.

For the first time, CIOs have enjoyed the vote of confidence of fellow CIOs to help them select the best products, solutions and/or services from ICT companies. The products, solutions and/or services inadvertently will savor the advantage and benefits of high awareness and visibility thereby, leading to leveraged business potential.

CUSTOMER ENDORSEMENT & SALES ACCELERATION THROUGH CIO CHOICE 2013 RECOGNITION TITLE

CIO Choice is an extensive pan-India CIO referral voting process that spans across industry verticals and geographical boundaries of India. CIO Choice has established its supremacy as the most coveted Brand & Product endorsement platform.

Here are some of the many representations of how CIO Choice recognition has come very handy to communicate Customer Endorsement.

DELL: Banner Commercial in BBC NEWS ASIA

EMERSON: cxotoday.com & cio.in

Selection & Voting Methodology: Three Stage Process

*Call for Vendor Applications
by ICT Category.*

*CIO Voting Survey
(Pan India)*

Advisory Panel Validation

SELECTION PROCESS FOR THE LEADING ICT VENDORS ACROSS 21 CATEGORIES:

A Key Seal of Trust amongst country's leading CIOs; selected through a pan-India voting survey of leading CIOs

This recognition which reflects the recipients' capability to meet customer CIOs evolving needs in today's dynamic business environment commenced with inviting leading ICT players to nominate and participate in this platform; and were decided basis a pan-India voting survey of leading CIOs to recommend their Choice of preferred vendors.

To earn the CIO CHOICE recognition, participating vendors had to undergo the CIO voting survey conducted by Centre of Recognition & Excellence to prove their level of technology expertise, and then be designated by the CIO & ICT professionals uniquely to one or more category competency, ensuring a certain level of satisfaction with vendor product, solution & services. Participating vendors also had to get preferred as CIO CHOICE 2013 with customer references that demonstrate customer satisfaction & meeting delivery commitments.

The CIOs responses & choices in each category determined the list of companies that were bestowed by the CIO CHOICE honor & recognition title. For a period of one calendar year, ICT Companies honored can use the "CIO CHOICE" title logo for the year on their packaging, promotions, advertising and marketing campaigns.

CIO CHOICE 2013 RED CARPET NIGHT

CIO Choice 2013 is a growing benchmark measure for client recognition and service delivery amongst various classes of ICT Businesses. CORE hosted the Red Carpet Night which came to become the most powerful networking ICT event in the country.

Database Solution Support

**Mr. Shrikant Navelkar, Senior VP - Business Development
Receiving Felicitation Trophy From Mr. Milind Khamkar, CIO, Sanofi-Aventis**

“The “CIO Choice 2013” award in the category “Database Solution Support” is a very significant recognition for Clover Infotech. The fact that we have been chosen for this recognition by a jury of eminent industry CIOs bears strong testimony to the quality of service we offer and our willingness to value-add and enhance returns on our customers’ IT investments. We believe the award reflects the trust placed by the industry on us and we will leave no stone unturned to augment this trust.”

Mr. Javed Tapia
Founder and Managing Director

Clover Infotech has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the “Database Solution Support” category.

ABOUT CLOVER INFOTECH

Founded in 1994, Clover Infotech has been amongst the key players in India’s fast growing IT landscape. Over the years, Clover Infotech has established its expertise across multiple technologies including Oracle, SAP, Microsoft and Open Source and is a Gold certified partner of Oracle and Microsoft. Equipped with ISO27001 delivery centers, the company offers end-to-end IT services to over 150 customers across geographies and verticals and have successfully executed more than 2000 projects.

COMPREHENSIVE IT SERVICES PORTFOLIO

- Consulting across our IT services portfolio
- Enterprise Solutions: ERP/CRM (Oracle E-Business suite, SAP, Microsoft Dynamics), Data warehousing, Business Intelligence,

support services across niche products inBFSI sector such as Murex, Kondor, Summit etc.

- Application Development & Maintenance Services
- Database and Middleware
- IT Infrastructure Management Services

Clover Infotech’s clientele comprises of reputed organizations from BFSI, Manufacturing, IT and ITes, Telecom, Retail and FMCG, Shipping and Logistics.

TECHNOLOGY SOLUTIONS GROUP: FUELING GROWTH AND DEVELOPMENT

The TSG, the company’s thought leadership arm, constantly researches the latest happenings in the global information technology landscape with the following objective:

- Study the requirements of each client in detail

and offer the best & most cost effective solutions thereby enhancing clients’ ROI

- Create a knowledge repository and train the technology personnel to adapt to the latest technological innovations
- Handhold these personnel to work on these technologies to enhance effectiveness of the solutions provided to the client
- Educate the fresh talent in Clover Academy, the company’s in-house trainingacademy, to bridge the skilling gap and enable them to work on key projects

CLOVER INFOTECH’S COMMITMENT

Clover Infotech’s commitment is to offer globally benchmarked technology solutions customized to the requirements of the clients. They ensure this through constant innovation, research and unmatched service levels. Due to

this, they have been able to retain almost all their clients and garner top-of-the-mind recall for the enterprise IT requirements of all their clients.

Data Centre Managed Services

CtrlS™ | Asia's Largest
Tier IV Datacenter

Mr. Sunil Kumar Raja, Senior VP - Sales, Receiving Felicitation Trophy From
Mr. Pravir Vohra, Ex- President & Group CTO, ICICI Bank & Mr. Dipesh Thakar

Asia's Largest
Tier IV Datacenter

“

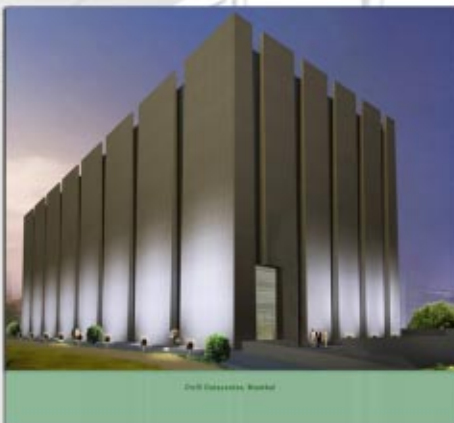

This award has a significant meaning as this is a certificate of success for the entire organization from the people who matter. It is an endorsement from all our customers about our capability on delivering the managed services from our datacenters on solutions like Private Cloud, DR on Demand, Managed Hosting and more importantly our Public Cloud offerings. It reflects that our commitment has been endorsed by our customers.

”

*Mr. Sridhar Pinnapureddy
Founder & CEO*

CtrlS, a leading MSP which owns the Asia's largest Tier 4 Data centres has been awarded CIO Choice 2013 Honour and Recognition title in the category "Data Centre Managed Services".

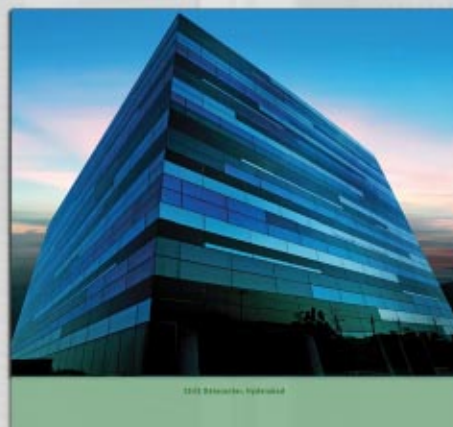

multiple redundancies, and fault tolerant infrastructure with a guarantee of a 99.995% up time. With penalty backed Service Level Agreement (SLA).

CtrlS' state-of-the-art Data centres across Hyderabad, Mumbai and Delhi (upcoming) are spread over combined areas of 370,000 sq.ft (appx.). They offer a comprehensive range of sophisticated and contemporary services for the critical foundation in helping customers gain deep insight into exceptionally and flexibly delivering IT services, in a manner that best serves business needs. Their solutions enable customers to support changing business models at the right time, the right place, and

CIO CHOICE 2013 FOR DATA CENTRE MANAGED SERVICES

from the best sources. They are also the only one of their kind in India to provide 8-zone security,

scalability for up to 10 years, guaranteeing the highest availability and least energy consumption. Armed with top-of-the-line features and the very best of infrastructure & technology, it offers clients an array of benefits which can drive a saving of up to 40 percent on total cost of ownership.

ABOUT CtrlS

Incorporated in 2007, CtrlS is India's leading IT Infrastructure and Managed hosting provider with offerings comprising of Data centre infrastructure, disaster recovery, storage, application hosting, backup, hardware, cloud computing, OS layers, network and security solutions.

With India's only tier 4 Data Centre to its credit, CtrlS provides unmatched hosting capabilities through enhanced connectivity,

Mr. Sridhar, Director, Enterprise Solutions Group, Receiving Felicitation Trophy From Mr. Vijay Sethi, Vice President and CIO, Hero MotoCorp Ltd.

Services & Solutions

DELL MANAGED SERVICES

Clients can outsource the management of their day-to-day IT operations with Dell Managed Services. Thus enhancing the organization's productivity and improving end user satisfaction by adopting ITIL based processes, world class tools and quality service & support.

Dell Solutions

- End User IT Outsourcing
- Data centre Outsourcing
- Core Services

**CIO CHOICE 2013
FOR DATA CENTRE
CONSULTANT**

DATA CENTRE TRANSFORMATION

Running an efficient Data centre is no longer just the mandate of the CIO, it's increasingly becoming a part of the social responsibility of the CEO, Board & organizations at large. Engage with Dell Services Industry leading experts to build/modernize Data centres to

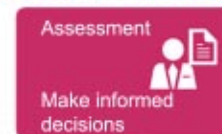

global green standards.

- Data centre Facilities Efficiency
- Networking Services

DELL IT CONSULTING SERVICES APPROACH

- Discuss business objectives
- Identify & prioritize functional requirements and approach

- In-depth analysis of current environment
- Recommendations for future environment

- Detail architecture and processes
- Implementation guidance and timelines

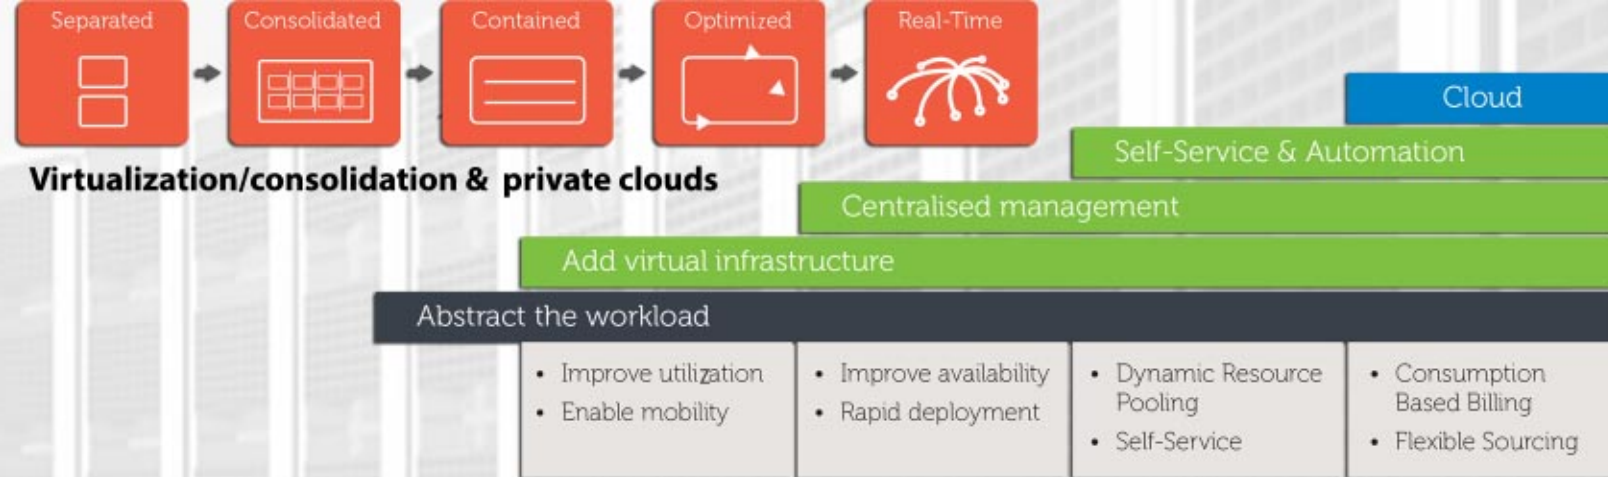

- Project management to realise benefits
- Full production implementation

Data Centre Transformation Services

Mr. Sridhar, Director, Enterprise Solutions Group, Receiving Felicitation Trophy
From Mr. Ajay Bakshi, V.P. & Global Head - Process Automation &
Improvements, Hinduja Global Solutions Inc.

Dell has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the "Data Centre Transformation Services" category.

ENTERPRISE COMPUTE

Platform modernization/Migration

The main reason behind migrating out of legacy platform and particularly UNIX Platform is that many legacy systems have become very expensive to maintain & upgrade. Alternatives on x86 platform with Linux & Microsoft as an OS of choice are closer to the expectations of price/performance desired by customers and results in lower TCO. Dell's strong platform expertise on x86, Linux, Microsoft, VMware, etc., coupled with application migration skills, help ease platform modernization concerns of customers.

Virtualization/consolidation & private clouds

Cloud computing increases business agility by offering access to a pool of computing resources (e.g. networks, servers, storage applications and service) and virtualization would be the first step to increase system utilization and reduce carbon footprint.

WORKFORCE TRANSFORMATION

Customers are facing challenges to drive down IT and T&E costs and at the same time deliver the services required by new generation of workforce: remote workers, mobile workers, shared workspace and high mobility 'global' workers.

Unified Communication & Collaboration:

Microsoft Exchange	Microsoft Sharepoint	Microsoft Lync
Stay connected with email, calendar and contacts on the PC, phone and web	Empower anytime, anywhere information through business communities	Unite voice, IM, audio video and web conferencing into a richer, enterprise contextual format

- Integrated email, voicemail, phone, messaging, & conferencing
- Real-time document and application sharing
- A common interface for all unified communications devices

Unified communication integrates all these in a single platform: Instant Messaging, Voicemail, Telephony, Presence and Video Conferencing.

Dell Services has designed and deployed the largest Microsoft Lync platforms across customers and is the leader in India.

**CIO CHOICE 2013
FOR DATA CENTRE
TRANSFORMATION SERVICES**

Desktop virtualization

Growing demand from end users to use their own devices, especially the high mobility customers has posed a challenge to IT departments to deliver a highly secured thin client solution to address the needs of this new generation of workers.

Dell design/deployment services coupled with Dell Wyse thin clients, PowerEdge™ servers, PowerVault™ storage, and quest softwares provide an integrated, pre-tested VDI solution resulting in better security & better manageability.

Application packaging, remediation & deployment

Every organization faces huge challenges when they need to migrate their end user applications. Identifying and resolving potential compatibility issues are the key to delivering the required results. Dell offers a wide range of services in packaging, remediating and rolling out business applications.

Dell Services is one of the leading Microsoft ACF (Application Compatibility Factor) partners worldwide. They offer application virtualization solutions across many technology domains (App-V, ThinApp, XenApp, Symantec etc).

Mr. Sridhar, Director-Enterprise Solutions Group, Receiving Felicitation Trophy From Mr. Arun Gupta, CIO, CIPLA & Mr. Prasenjit Mukherjee, GM-IT, Reliance Energy Ltd.

“Dell has been investing in its enterprise capabilities and strengthening solutions that address the business goals of customers. As an end-to-end technology solutions provider, being honoured by the CIO Choice award is truly a cherished achievement and a testimony to the efforts of Dell India team. Our agile, efficient and scalable solutions have been well received by customers. This award has strengthened our position as the preferred technology partner of choice.”

Mr. Alok Ohrie
President & MD

Dell has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the “Servers” category.

ADDRESS COMPLEX BUSINESS CHALLENGES WITH NEXT-GENERATION POWEREDGE SERVERS

Dell's latest generation of servers offers an unparalleled combination of manageability, performance and scalability to address complex business challenges.

Accomplish more

- Optimize virtualisation environment with memory-dense platforms
- Turn data into insights faster with solid-state flash
- Accelerate high-performance computing through integrated GPU technology
- Get more throughput with major input/output (I/O) performance enhancements

Improve operational efficiency

- Manage anywhere, anytime, with agent-free server management consoles
- Reduce maintenance time with auto-updates for replacement parts
- Control cooling costs with better power monitoring and automated control
- Tailor network to applications with fabric flexibility

CIO CHOICE 2013 FOR SERVERS

Ensure business continuity

- Access information quicker via storage tiering
- Protect data in motion using best-in-class RAID
- Protect data at rest with malware resistance and faster encryption
- Keep data safer with firmware signing and encrypted credentials

Storage - Hardware

**Mr. Vikas Bhonsle , General Manager - Mid Markets, Receiving Felicitation Trophy From
Mr. CN Ram, Group President - Chief Information Officer, ESSAR Group &
Mr. Subhojit Roy, Head – IT, SBI Funds Management**

Data Protection & Recovery

Storage virtualization

Storage Architectures

Dell has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the "Storage - Hardware" category.

DATA PROTECTION AND RECOVERY

Data protection and recovery solutions help maximise data availability and can be automated to reduce the cost and complexity of recovering your data. Storage-based business continuity technologies such as replicas, snapshots, clones and mirrors are essential for protecting mission-critical application data as well as for creating data copies used in test/dev, quarterly reporting and backup operations.

Read-only and read/write replicas of production systems help customers to achieve high data recoverability and availability. Primary storage that includes next-generation data efficiencies can automate data movement and optimise for both performance and capacity. Multi-protocol support is optimal for simplifying deployment, migrations and scaling as you move from test & development to mission critical or global infrastructures. Dell™ storage solutions for data

protection and recovery are tightly integrated with the leading application and virtual environments to help meet your recovery point and time objectives without adding cost and complexity.

STORAGE VIRTUALIZATION

Virtualization has become a cornerstone of modern data centers. Having realised the cost and efficiency benefits of virtualization through resource consolidation, many IT organizations are looking to take virtualization deeper into their data centers by virtualising mission-critical workloads and building flexible private cloud infrastructures.

Storage is a critical component of modern virtualized Data centre deployments and traditional storage platforms are inadequate for optimally supporting the virtualization deployments. Dell storage solutions are designed in the 21st century, with virtualization in mind. Through their virtualized architectures, built-in intelligence and tight integrations with virtualization platforms, Dell storage solutions help maximize efficiency,

flexibility and reliability of the entire virtual infrastructure.

STORAGE ARCHITECTURE

Consolidating storage into a common pool of resources helps enterprises increase efficiency, reduce costs, and manage application service levels. In the efficient enterprise, migrating storage and file services from individual servers to consolidated storage can help boost resource utilization, streamline management, and enhance data protection and recovery operations.

Dell™ offers a comprehensive portfolio of storage architectures to help organizations reap the benefits of consolidation. Dell's award winning primary storage portfolio now consists of the virtualized iSCSI EqualLogic™ PS Series SAN and the multi-protocol, Fluid Data architecture of the Dell Compellent™ Storage Center NAS and SAN family. Dell also offers file-based Windows NAS and Unified Storage platforms, as well as direct-attached storage (DAS). The DX Object Storage Platform can even intelligently manage data across multiple infrastructures to automate archiving, long-term preservation and retrieval.

**CIO CHOICE 2013 FOR
STORAGE - HARDWARE**

Emerging - IT Infrastructure Services

Mr. Dharmesh Anjaria, Director & Mr. Parag Dalal, Director, Receiving Felicitation Trophy
From Mr. Raghunatha Reddy, Senior Vice President & Head IT, UTI Mutual Fund

“ We thank CIO Choice to have recognized us as emerging IT Services company. Our comprehensive Infrastructure Management Services leverage technology ahead services and solutions. In us, you will find a partner who you can trust completely with your IT infrastructure, leaving you with the time to focus on core aspects of your business. **”**

Management Dynacons

Mr. Shirish Anjaria
C.M.D.

Mr. Parag Dalal
Director

Mr. Dharmesh Anjaria
Director

Dynacons, leaders in the IT infrastructure Management Services, has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the “Emerging-IT Infrastructure Services” category.

ABOUT DYNACONS

Dynacons is a premier provider of IT Infrastructure Solutions custom designed for enterprise customers. Our solution-based services are found on mature internal competencies in technology. We offer a wide range of solutions and services including System Integration, Networking solutions, Software solutions, IT Infrastructure management, Security solutions and Consulting Services. Dynacons differentiates itself in the marketplace through service excellence, flexibility, business value, and passion for its customer's success. Dynacons capacity to deliver business value through efficient and well designed IT solutions is a foundation to our strategy of developing long-term customer relationship and becoming a trusted partner. Dynacons is committed to service level

excellence. You can expect our teams to introduce innovative solutions that create competitive advantages for your team by resolving technical challenges and achieving new operational efficiencies. Although Dynacons is a technology company, we are motivated to build solutions that enable business benefits.

CIO CHOICE 2013 FOR EMERGING-IT INFRASTRUCTURE SERVICES

ABOUT INFRASTRUCTURE MANAGEMENT SERVICES

Dynacons Infrastructure Services Practice comes with over seventeen years of experience. Staffed with a strong set of technical and business experts who have helped several organizations to enhance and unlock tremendous value from their existing IT infrastructure assets. Increasingly there is the need for Intelligent Infrastructure that easily adapts and responds to your company's needs. As infrastructure experts, we eliminate the complexity by offering service models,

resource skill-sets, ITIL processes and solutions that are well matched to suit our client's needs. We accelerate our clients' success by acting as a one-stop IT Business Partner. We relentlessly endeavor to augment our overall value creation proposition by providing a broad spectrum of services which are cost effective, customized to client's needs, efficient, reliable and fully automated.

Data Centre Cooling

Mr. Seshadri J, Sr. Director - IT, Receiving Felicitation Trophy
From Mr. Nilesh Sangoi CTO, Meru Cab Company & Mr. Ananthakrishnan Ganesan,
Head-Information Systems & Technology, APM Terminals, Mumbai (GTI)

Emerson Network Power has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the "Data Centre Cooling" category.

ABOUT EMERSON

Emerson is a diversified global manufacturing and technology company. They offer a wide range of products and services in the industrial, commercial, and consumer markets through their Process Management, Industrial Automation, Network Power, Climate Technologies, and Commercial & Residential Solutions businesses. Recognized widely for their engineering capabilities and management excellence, Emerson has approximately 135,000 employees and 235 manufacturing locations worldwide.

PRECISION COOLING

Maintain precise temperature for reliable equipment performance. Emerson Network Power delivers cooling with the most comprehensive range of Liebert HVAC and

system cooling solutions, protecting mission-critical applications from even the slightest increase in temperature.

HIGH DENSITY MODULAR COOLING

Energy-efficient and flexible high heat density Liebert XD air conditioners and system cooling solutions are available with open or closed architecture and pumped refrigerant-based or water-based technology.

SMALL ROOM COOLING

Space-saving precision system cooling available in configurations and sizes to meet the needs of electronic equipment in tight spaces.

INDUSTRIAL COOLING

Rugged precision system cooling for industrial sites.

LARGE ROOM COOLING

Precision Data centre cooling and humidity control solutions provide protection in

raised floor or ducted applications. A variety of models and configurations are available.

CIO CHOICE 2013 FOR DATA CENTRE COOLING

TELECOM ENCLOSURES

Precision cooling system designed for year-round cooling of remote shelters.

HEAT REJECTION

System-matched condensers, drycoolers and condensing units for continuous, proper operation of cooling systems.

ECONOMIZER COOLING SOLUTIONS

Economizer cooling solutions - including Liebert Air Economizer, GLYCOOL glycol-cooled economizer, and chiller plant economizer compatibility - can reduce Data centre cooling costs by up to 50%, without compromising system reliability.

Data Centre Power (UPS)

Mr. Seshadri J, Sr. Director – IT, Receiving Felicitation Trophy
From Ms. Meenakshi Agrawal, Vice President - IT, Mumbai International Airport Limited (MIAL) &
Mr. Ajay Kumar Meher, Sr. Vice President & Head - IT & Post Production, Multi Screen Media Pvt. Ltd.

AC Power

Precision Cooling

Racks & Integrated Solutions

Emerson Network Power has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the "Data Centre Power (UPS)" category.

AC Power

- **Desktop UPS** (350 VA~1 kVA) for workstation and point of sale applications, desktops & servers
- **Rack-based UPS** (500VA ~20kVA) for server, network switching and routing applications
- **Row-based UPS** (15 – 200 kVA) modules with completely redundant system controls, battery modules and monitoring options for small to mid- size data centers
- **Room and site-based UPS** (40kVA - 9.6 MVA) with best in class availability, and efficiency for protection of sensitive electronics in large Data centres and hosting facilities.
- **Room-based power distribution** with metering and voltage transformation
- **Rack-mountable power distribution** with metering and management capabilities

Precision Cooling

Complete line of energy efficient, dependable cooling equipment

- Perimeter, row-based, high-density cooling and free cooling chillers
- Collaborative development of custom solutions for large Data centre applications
- Complete plug and play solutions for small Data centres and network closets
- Modular solutions to add capacity on with IT growth

Industry standard for efficiency, reliability and durability

- Designed for lowest cost of ownership with energy saving features with features such as:
 - Digital scroll technologies and EC fans for efficient capacity modulation
 - Multiple economizer configurations (air, water and pumped refrigerant)
- Industry leading continuous operation and high reliability

State of the art Liebert® iCOM controls and software to optimize efficiency and uptime

- Optimized control at the rack, row, and cooling system levels
- Monitoring, diagnostics and real-time analysis & optimization

Racks & Integrated Solutions

- Indoor enclosure systems for telecommunications, electronics, and computing equipment
- Integrated enclosures that include self-contained air conditioning, UPS and wiring management in a sturdy, lockable cabinet
- High density cooling modules designed to connect to a computer center's thermal management infrastructure (refrigerant- and water-based)
- High density cooling integrated racks that manage varying levels of heat loads (refrigerant- and water-based)
- Pre-engineered and prepackaged converged infrastructure systems including racks, rack power distribution units, thermal management, UPS and infrastructure management (Smart Solutions family)
- Basic, managed and adaptive rack power distribution and busway systems
- Standard, distribution, server, computer, co-location and electromagnetic interference/compatibility, radio frequency interference racks

**CIO CHOICE 2013
FOR DATA CENTRE POWER (UPS)**

Infrastructure Appliance

Mr. Ankesh Kumar, Director - Product Management (Channel, IT Solution) & Marketing, Receiving Felicitation Trophy From Mr. Vikas Gadre, Executive Director, Bombay Chamber of Commerce and Industry & Mr. Suresh A Shan, Head - Business Information Technology Solutions (BITS) - MMFSL Group, Mahindra & Mahindra Financial Services Limited

“

We are living in a networked economy and everything in our life is being driven with Information Technology, which makes the role of CIOs more critical than ever before. CIO Choice is an excellent initiative to recognize the innovation and efficiency introduced by technology providers which ultimately helps CIOs to achieve their goal to keep business in business. This also gives good insight on market trends and technological adoption in IT environment. We are also thankful to the CIO Community who recognized four of our leading products for CIO Choice 2013 and looking forward to win more in coming times.”

*Mr. Sunil Khanna
President*

Emerson Network Power has been awarded the prestigious CIO Choice 2013 Honour and Recognition title under the “Infrastructure Appliance” category.

ABOUT EMERSON'S PRODUCTS INFRASTRUCTURE APPLIANCES

The first Data centre appliance that enables true, real-time, integrated monitoring, access and control across IT & facilities systems in the Data centre.

DIGITAL KVM SWITCHES

These digital KVM switches enable use of a single keyboard, monitor & mouse to seamlessly access multiple PCs, without the expense and waste of valuable desktop real estate.

ANALOG KVM SWITCHES

Simplify local rack access for users with analog KVM technology. A solid platform for managing larger groups of equipment as well as enabling advanced features such as matrix switching, virtual media & smart card/CAC authentication.

SERIAL CONSOLES

Avocent has a full line of serial console appliances that include the field tested ACS, the SMB targeted ACS 5000 & the next generation ACS 6000.

RACK POWER DISTRIBUTION UNITS

Control status & measure usage. Understand energy capacity and reduce the risk of overloading circuits with Emerson Network Power's Avocent PDUs. These devices include metered & switched models, allowing control & measurement of power usage.

LCD CONSOLE TRAYS

The LCD Console Tray family provides a variety of features that simplify & provide ease of access to servers, making software upgrades, troubleshooting and system monitoring convenient and less time consuming.

DATA CENTRE MONITORING AND ACCESS

Real-time acquisition of data from the Data centre infrastructure and environment. Ability to change operating status of managed devices.

DATA CENTRE PLANNING & MANAGEMENT

An integrated set of tools, products, and services that help Data centre professionals manage change and complexity while controlling cost and optimizing performance.

**CIO CHOICE 2013
FOR INFRASTRUCTURE APPLIANCE**
