Mr. Anoop Mathur

President
Centre of Recognition and Excellence

Prior to founding Centre of Recognition and Excellence he was the Chairman & MD of Pacific & Strategic Media (India), a niche and leading Media Company specializing in the ICT domain. In this capacity, Anoop had the P&L responsibility for India and Middle East operations.

Through his extensive professional experience in the Healthcare, Insurance, Financial Services, BPO & IT Enabled Services business verticals, he has held senior positions with leading global organizations such as Prudential, Capita, ICICI OneSource, and United Healthcare.

Prior to joining the corporate business environment, Anoop was engaged in providing C&F services to the Government & State Trading Corporation of India. He is a Six Sigma Professional & a Licentiate from the Insurance Institute of India.

Introduction

"CIO CHOICE" is a very powerful branding and marketing tool for organizations in the Information & Communications Technology space to promote and market their products, services & solutions.

Our Mission

"Successful branding programs are based on the concept of singularity. The objective is to create in the mind of the prospect the perception that there is no other product on the market quite like your product." Al Ries & Laura Ries - 22 Immutable Laws of Branding

Overview

Centre of Recognition & Excellence is an organization engaged in building brand reputation, offering a recognition platform in honoring products/services/solutions in the ICT space.

Description

This B2B platform is uniquely positioned to recognize and honor products, services and solutions on the back of stated preferences of CIOs and ICT decision makers and to help marketers create a positive brand positioning for their products, services and/ or solutions by being the CIOs preferred choice.

General Information

"Branding is identifying or creating, and then exploiting, sustainable competitive advantage." CIO Choice offers this to ICT vendors to build their brand reputation within CIO community, thereby increasing market share for the brand.

For the first time, CIOs have enjoyed the vote of confidence of fellow CIOs to help them select the best products, solutions and/or services from ICT companies. The products, solutions and/or services inadvertently will savor the advantage and benefits of high awareness and visibility thereby, leading to leveraged business potential.

Selection & Voting Methodology : Three Stage Process

Call for Vendor Applications by
ICT Category.

CIO Voting Survey
(Pan India)

Advisory Panel Validation

Selection Process for the Leading ICT Vendors across 36 Categories:

A Key Seal of Trust amongst country's leading CIOs; selected through a pan-India voting survey of leading CIOs

This recognition which reflects the recipients' capability to meet customer CIOs evolving needs in today's dynamic business environment commenced with inviting leading ICT players to nominate and participate in this platform; and were decided basis a pan-India voting survey of leading CIOs to recommend their Choice of preferred vendors.

To earn the CIO CHOICE recognition, participating vendors had to undergo the CIO voting survey conducted by Centre of Recognition & Excellence to prove their level of technology expertise, and then be designated by the CIO & ICT professionals uniquely to one or more category competency, ensuring a certain level of satisfaction with vendor product, solution & services. Participating vendors also had to get preferred as CIO CHOICE 2014 with customer references that demonstrate customer satisfaction & meeting delivery commitments.

The CIOs responses & choices in each category determined the list of companies that were bestowed by the CIO CHOICE honor & recognition title. For a period of one calendar year, ICT Companies honored can use the "CIO CHOICE" title logo for the year on their packaging, promotions, advertising and marketing campaigns.

APPLICATION **DELIVERY** PLATFORM

Enterprise Category : Small & Medium

Mr. Kunal Nagarkatti, Senior Vice President & Head of Sales, Clover Infotech
and Mr. Neelesh Kripalani, Vice President - Application Development &
Maintenance Services, Clover Infotech
Receiving Felicitation Trophy
From Mr. Arun Gupta, CIO, CIPLA
and Mr. Rajesh Uppal, Executive officer(IT) and CIO, MARUTI SUZUKI INDIA LTD.

“We are happy to be conferred the CIO Choice 2014 recognition in the category ‘Application Delivery platform’ as well as ‘Database Solution Support’- the category in which we had won CIO Choice 2013 recognition. Being the result of votes by eminent industry CIOs, this achievement underscores the expertise of Clover Infotech across service lines. The recognition signifies our commitment, service efficiency and the trust bestowed on us by our customers. On behalf of the company, I thank the entire CIO fraternity and all our clients for honouring us with CIO Choice 2014.”

Mr. Javed Tapia, Managing Director

Today, every organization needs to constantly upgrade & adapt to a dynamic economy & business environment. To address their current & future business demands, the technology implemented by them also need to be agile and flexible both in process and implementation. Clover Infotech's Application Delivery team is well equipped to understand the ever-changing business needs of the organizations. We specialize in software development, maintenance, re-engineering, & software testing. We undertake custom application development and also partner with clients using the ODC (Offshore Development Center) model. Our Application Development activity rests on 3 blocks - Technological Innovation, High Quality Standards & Latest Project Management Practices

Innovative & Scalable Solutions to increase ROI: Through our 3 building blocks seen in the

diagram, we ensure custom application development & deliver solutions. These solutions add great value to the business processes & efficiency of our customers & enable them derive significant return on IT investments.

Service Offerings: Custom Built Applications- Custom application development based on the requirements provided by the clients

Product Implementation- Implementation of the products such as Microsoft, BI, SAS, BO, Teradata and Murex by creating and strengthening technical and strong cross functional teams

Staff Augmentation- Onsite /Offsite support and manpower deployment. Setting up Offshore Development Centers for domestic and international clients

Technology Expertise

1. Microsoft ASP .NET 2.0 – 4.0 (C#, VB.NET),

SQL Server. 2. Java, J2EE, (Core Java, JSP/Servlets, JSF, JMS), MSSharePoint 2007/2010, Weblogic, Webcenter. 3. OBIEE, SAP, BO, IBM Cognos. 4. Oracle E Business Suite, Reports, PL/SQL, Oracle ADF

Engagement Models: ON-SITE

1. Custom Built Application: Project Management, Development and Support of applications onsite
2. Product Support and/or Maintenance :We provide onsite support for critical applications which require close monitoring
3. Staff Augmentation : Augment team for onsite development or L1-L4 support on products, applications or Testing

Engagement Models: OFF-SHORE

1. Custom Built Application: Project Management, Development and Support of

applications to meet technology cost

2. Offshore Development and Support: A strong techno functional team experienced in the client business domain and capable of addressing customer application development and support. An ODC center enables efficient development, maintenance and support of applications cost effectively

Value Proposition

1. Cost effective and highly reliable service.
2. Customized services with additional skill sets, standards, best practices and improvements.
3. Clover's service offerings deliver the combination of flexibility, reliability, security and performance that organizations demand.
4. We work closely with our clients during the entire application development cycle. This helps us to be sensitive to changing business requirements and map them into the application workflow.

BUSINESS **TECHNOLOGY** RESEARCH

Enterprise Category : Small & Medium

Mr. Manish Bahl, Vice President & Country Manager, Forrester
Receiving Felicitation Trophy

From Mr. Dhiren Savla, CIO & Group SVP, VFS Global Services Group
and Shailesh Joshi, Vice President & Head – Corporate IT, Godrej Industries Ltd.

“I would like to thank the entire CIO fraternity for selecting Forrester for Business Technology Research category. Forrester is the only firm providing its research services at the intersection of marketing and technology and this award is a reflection of work that we are doing for CIOs in India. Thanks again!”

Mr. Manish Bahl, Vice President, Country Manager

At Forrester, we believe that empowered customers have given rise to a new era we call The Age of the Customer. We define this as: A 20-year business cycle in which the most successful enterprises will reinvent themselves to systematically understand and serve increasingly powerful customers.

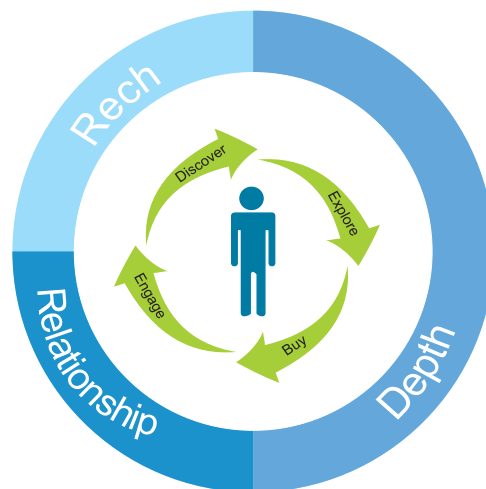

Become Customer-Obsessed

Old sources of competitive advantage are business as usual. Now to be truly competitive your company must become customer obsessed, which means you need to have deep knowledge of and engagement with your customers.

About Forrester

Forrester Research (Nasdaq: FORR) is a global research and advisory firm serving

professionals in 13 key roles across three distinct client segments. Our clients face progressively complex business and technology decisions every day. To help them understand, strategize, and act upon opportunities brought by change, Forrester provides proprietary

research, consumer and business data, custom consulting, events and online communities, and peer-to-peer executive programs. We guide leaders in business technology, marketing and strategy, and the technology industry through independent fact-based insight, ensuring their business success today and tomorrow.

Forrester's Role Manifesto

- By focusing our entire organization on serving clients by professional role, Forrester delivers highly relevant research-based services aligned to your agenda — not ours. This unique role-focused approach is central to our corporate mission: helping you succeed every day. Our Role Manifesto represents this distinct commitment.
- We put roles first. That means you first. That means the first impression you have of us,

whether we're communicating to you in person or virtually, is that we know your role — we cultivate a deep understanding of the role you fulfill within your organization and the specific challenges and goals that drive you.

- We operate with a clear understanding of our clients' needs. Diving deep into your role enables us to work as a trusted advisor who understands which priorities are key to helping you solve a problem or seize an opportunity.
- We get personal with our clients. It's all about trust. We are the most valuable to our clients who trust us. Once we've earned it, that's when we create and deliver the most relevant research-based services you need to achieve success . . . faster.

CONTACT **CENTER** SOLUTION

Enterprise Category : Small & Medium

Mr. Sanjay Gupta, Managing Director, Aspect Software
Receiving Felicitation Trophy

From Ms. Aruna Rao, CTO, Kotak Mahindra Bank and Mr. Pravin Savant, CTO, Lowe Lintas

“We are extremely honored to have the Indian CIO community testify our best-of-breed contact centre offerings. With customer interaction becoming more complex and increasingly reliant on technology, Aspect has utilized its decades of expertise in understanding business and customer expectations, to develop innovative and targeted solutions which organizations can rely on. This award not only solidifies the receptiveness of the industry towards Aspect's contact center portfolio, but demonstrates the excellence that our set of solutions stands to deliver. With our WFO platform been extended to the back-office, and now a SaaS portfolio business that includes Voxeo, Qivox, Aspect Social, and the game changing Zip-wire service which will soon be announced in India, Aspect is not only back in the game, but we are starting to lead again”.

Mr. Sanjay Gupta, Managing Director, India, Middle East and SAARC

As the global leader in customer engagement solutions, its unified interaction management, workforce optimization and back-office solutions seamlessly orchestrate people, processes and touch points for today's top brands in aviation, financial services, healthcare, manufacturing, telecommunications and retail. This platform unifies all the conversations ensuring a consistent omni-channel customer experience each and every time. Wherever you're looking to remove communication and workflow barriers or automate more productive business processes, Aspect solutions allow you to build on your existing customer contact, workforce optimization and enterprise technology investments so you can put the contact centre squarely at the center of the customer experience.

Aspect helps enterprise contact centres deliver remarkable customer experiences across every conversation and every channel – voice, email, text, social, web — through a single, elegant software platform. This platform brings all the conversations together, in one place, ensuring a consistent omni-channel customer experience each and every time.

- Automated self-service
- Intelligent multichannel contact routing
- Compliant proactive outreach
- Interactive mobile self-service
- Social customer care
- Unified reporting and administration

Workforce Optimization provides the right discipline over the people behind the omni-channel customer experience with insight into –

and control over – every interaction between the customer and the company, helping organizations across the globe inform and automate better operational decisions that improve productivity and create exceptional interactions every time.

- Workforce Management
- Performance Management
- Quality Management
- Speech, Text and Desktop Analytics

Advanced Back Office Optimization provides organizations with a purpose-built solution for not only improving back office productivity but also harmonizing the front and back office processes to achieve better enterprise synergies, higher utilization rates across all operational resources, and better customer

outcomes. With capabilities that span people, process and insight needs, Aspect can ensure that your back office delivers what the front office has promised.

- Data-Driven Operational
- Real-Time Work Management
- Measurement against Proven KPIs

CORE BANKING **CLOUD** SOLUTION

Enterprise Category : Large

Mr. Hanuman Tripathi, Founder & Group MD , Infrasoft Technologies
Receiving Felicitation Trophy
From Mr. Yogesh Zope, Group CIO, Bharat Forge Ltd.
and Mr. Vikas Prabhu, CIO - Oil, Gas & Retail, ESSAR Group

“Recognition of such a stature is an assurance that we are heading the right way. InfrasoftTech OMNIEnterprise™ hosted Core Banking Solutions serves the larger objective of providing world-class technologies to small banks without the associated hassles of CAPEX, Infrastructure & IT Manpower. We believe we are contributing to the national mission of Financial Inclusion with our hosted core banking solution, which would help large numbers of financial enterprises to integrate with the National Payments Network and also comply with Reserve Bank of India risk management and reporting needs”.

Mr. Hanuman Tripathi, Founder and Group Managing Director

InfrasoftTech is the proud recipient of CIO Choice 2014 award in the Large Enterprises Vendors Category for their Hosted Core Banking Solution.

This award is a timely recognition of InfrasoftTech's efforts to assist the banks to enhance their operational efficiency and customer service. InfrasoftTech is now poised to extend the benefits of the hosted platform by enabling gamut of payment services such as ATM sharing, Rupay Card, RTGS, NEFT, etc. launched under the aegis of National Payments Corporation of India.

With the experience of working with all categories of co-operative, micro-banks, community banks in India as well as internationally, InfrasoftTech realized that these

banks though profitable and contributing to the business at regional & local level, have not gained skills to independently manage IT environments. Such skills are a prerequisite for any enterprise for implementing IT automation.

The potential benefits of offering a hosted model led InfrasoftTech to launch their core

banking software – OMNIEnterprise CBS, on hosted platform. InfrasoftTech partnered with Datacenter service providers and formulated a packaged offering that comprised of the Software, Infrastructure and Connectivity.

It got immediate breakthrough in the Indian co-operative segment and few microfinance

institutions outside India. The offering since then has received increasing acceptance on the back of compelling proposition for the banks. InfrasoftTech's hosted solution now has a customer base of 40+ FIs, which is growing rapidly.

The solution offers the SME segment, access to high quality, scalable infrastructure that greatly reduces downtime since such infrastructure has built-in redundancy and ensures high level of technical support. Since deployment of the solution, banks have experienced that the work stoppages on account of infrastructure related issues have reduced by 95%.

DATACENTER **INFRASTRUCTURE** MANAGEMENT

Enterprise Category : Large

Mr. Sunil Khanna, President & MD, Emerson Network Power
and Mr. Shrirang Deshpande, Country Head-Data Center Business (India), Emerson Network Power
Receiving Felicitation Trophy
From Mr. C N Ram, Director and Co-founder of Rural Shores
and Mr. Gururaj Rao, Business and Technology (CIO), Mahindra & Mahindra Financial Services Ltd.

“The IT environment is always changing, and there is a rising concern in real-time management solutions and optimization of critical IT infrastructure. We would like to congratulate CIO Choice awards for doing a great job in providing the best information of product, services and solutions to the CIO and IT decision making community for the second consecutive year. We think this is a great platform to be present at and we are delighted with the appreciation we have received from the community, we wish CIO Choice Awards all the best for coming years”.

Mr. Sunil Khanna, President & Managing Director

Emerson Network Power, a business of Emerson (NYSE: EMR), delivers software, hardware and services that maximize availability, capacity and efficiency for Datacenters, Healthcare and Industrial facilities has been recognized as the CIO Choice 2014 for 3 products in their respective categories, Liebert® Pex Chilled Water in the Datacenter Cooling category, for Emerson Smart Solution in the Integrated Datacenter Solution category, and for the Trellis™ platform in the Datacenter Infrastructure Management category. A trusted industry leader in smart infrastructure technologies, Emerson Network Power provides innovative Datacenter infrastructure management solutions that bridge the gap between IT and facility management and deliver efficiency and uncompromised availability regardless of capacity demands.

The Trellis™ Platform Express Edition provides an out-of-the-box DCIM solution with the same features, functions and benefits as those found in the Trellis™ platform...just simplified.

The Trellis™ platform represents a groundbreaking DCIM innovation from Emerson Network Power – one that mitigates IT risk while at the same time increases operational efficiency – solving your problems for today and preparing you for the future.

Whether you're expanding, consolidating or planning IT initiatives, your Datacenter requires constant monitoring, tracking and the ability to view real-time infrastructure metrics and data for accurate planning and decision making. The Trellis™ platform is a single application that provides the information you need, when you need

it so you can accurately manage the Datacenter and eliminate the need for multiple tools.

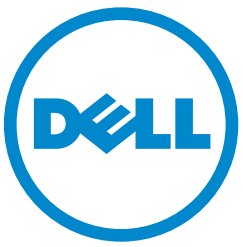

With real-time visualization, power tracking and mobile access in the Trellis™ platform, you can:

- Reduce inefficiencies without disrupting existing operations.
- Defer capital expenses and increase operating

margin.

- Improve SLAs with end-to-end visibility across the infrastructure.
- Reduce operational expenses without compromising availability and agility
- Manage remote resources more effectively
- Improve overall efficiency with more visibility into the Datacenter

DATACENTER **TRANSFORMATION** SERVICES

Enterprise Category : Large

Dr. Hemant Kumar, Director-Dell Services, Dell
Receiving Felicitation Trophy
From Mr. Suneel Aradhya, Group CIO, RPG Enterprises
and Mr. Ajay Bakshi, V.P. & Global Head - Process Automation & Improvements,
Hinduja Global Solutions Inc.

“For more than three decades, Dell has empowered countries, communities and customers to use technology to realize their goals. Our customers are at the core of everything we do and they trust us to deliver technology solutions that can help achieve more. We're very focused on delivering end-to-end scalable solutions that are relevant to rapidly evolving customer environment that helps them manage and grow their business. This award is a testimony to the same”.

Mr. Alok Ohrie, President and Managing Director

Dell Datacenter Consulting and Transformation Services

Dell's Datacenter consulting practices encompass Datacenter planning and management, facilities optimization and Datacenter design and build services. Dell's empowering and innovative solutions 'can you assist with Datacenter strategies', capacity planning exercises, and even site selection. By engaging with your organization right at the conceptual phase Dell minimizes your efforts by taking ownership of project management from start to finish.

Virtualisation/consolidation & private clouds

DATA **RECOVERY** SOLUTIONS

Enterprise Category : Large

Mr. Surajit Sen, Country Manager – Data Protection & Availability Division, EMC
Receiving Felicitation Trophy
From Mr. Shreesh Patwardhan, CIO & Vice President (I.T.), Dynamic Logistics
and Mr. Pankaj Mittal, CTO, SLK Global BPO

“We are honoured and delighted to receive this recognition from the CIO community in India. EMC continues to represent the trusted standard in creating strategic business value to CIOs through the innovative use of technologies. These awards are recognition of our continuous effort to demonstrate excellence both in storage and data recovery solutions even in the most demanding and dynamic IT environments. I would like to thank all our partners, customers and importantly the CIO CHOICE panel for selecting us”.

Mr. Rajesh Janey, President

About EMC

EMC Corporation is a global leader in enabling businesses and service providers to transform their operations and deliver IT as a service. Fundamental to this transformation is cloud computing. Through innovative products and services, EMC accelerates the journey to cloud computing, helping IT departments to store, manage, protect and analyze their most valuable asset — information — in a more agile, trusted and cost-efficient way.

Velocity Partner Program

- Velocity Partner Program, EMC India's channel partner program includes systems integrators such as Wipro Infotech, Tata Consultancy Services, HCL Infosystems, Aparajith, Datacraft
- Redington, Ingram and Select Technologies

are EMC's regional distributors in India

Over 200 channel partners across 40+ cities

India Center of Excellence

As part of its core R&D activities, EMC operates regional Centers of Excellence in India, China, Russia, Israel and Egypt, each staffed with hundreds to more than a thousand software developers who are focused on creating advanced capabilities for customers in areas such as security, virtualization, information management, and enterprise content management. These Centers tap into the specialized engineering skills and customer requirements of their local regions. And they make their services available to EMC business units around the world.

EMC has had an R&D presence in India since

2003 to deliver engineering of EMC's information infrastructure products. In January 2007, the India Center of Excellence (COE) was formed to advance EMC's globalization goals, accelerate R&D efforts and services in the field of information infrastructure by leveraging the highly skilled talent that exists in India.

As EMC's largest R&D center outside of North America, India COE is unique in that we deliver product engineering, services and integrated innovation for every product group Management, Security, Virtualization, and Enterprise Content

Management. We have also significantly scaled out Global Services offerings to offer product support and consulting globally. Having all groups in India creates a compelling value proposition for customers and EMC — that of market innovation, solutions and services and engineering excellence.

DATABASE **SOLUTION** SUPPORT

Enterprise Category : Small & Medium

Mr. Shrikant Navelkar, Director, Clover Infotech
and Mr. Prashant Parab, Vice President - Professional Services, Clover Infotech
Receiving Felicitation Trophy
From Mr. Jagdish Belwal, CIO, Tata Motors
and Mr. T.G Dhandapani , Group CIO, TVS Motor and Sundaram Clayton Group

Driven by strict IT budgets and the scarcity of professional administrators, organizations are moving from dedicated database support models to SLA driven, flexible and transparent models of database administration and support. Our DBA service offerings deliver optimum quality across all key metrics that the client's desire viz. flexibility, reliability, security and performance. We provide best-of-the-breed database management services for technologies such as Oracle, Oracle E-Business Suite, SQL Server, MySQL and PostgreSQL database environments among others owing to our vast experience and expertise in Database Management Services.

Database Management Service Offerings

Architecture Design: We work closely with our customers to review their database application

plans and recommend the architecture for their current and future requirements.

Administration and Monitoring: We ensure efficient monitoring and maintenance of business critical databases.

Performance Tuning: We ensure optimized performance of business critical databases.

24X7 Patch Management: We evaluate database patches, apply them initially on a test database before finally applying on the production environment.

Security Management: We manage the database security with help of users, roles, profiles, and responsibilities.

Backup and Recovery Management: We design backup and recovery policy for the site and ensure that the back-up is done as defined in the backup policy.

Database Upgradation and Migration: We

provide expert upgrade and migration services by assessing current environment, planning required steps, upgrading and testing the new environment

Delivery Model

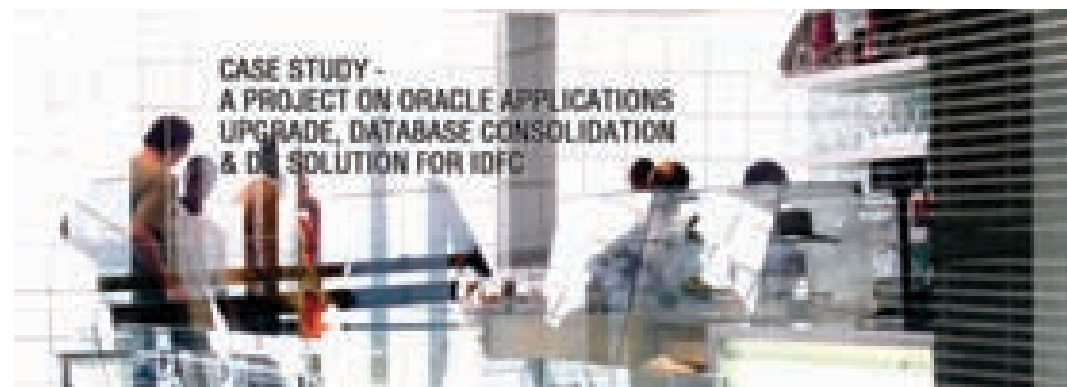

Clover Advantage: Dedicated Onsite Consultant to provide Database Management Services

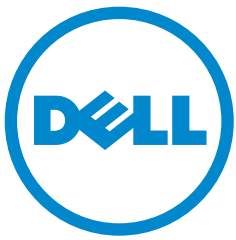

Clover Direct: Hybrid model wherein we

provide Database Management Services remotely and our consultants visit the customer site as defined in the SLA

Clover Connect: Database Management Services provided through Secure Remote Connectivity.

Clover On – Demand: On - demand consultants provide Database Management Services as and when required by clients.

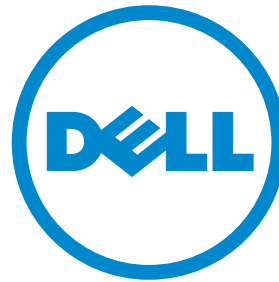

DATACENTER **CONSULTANT**

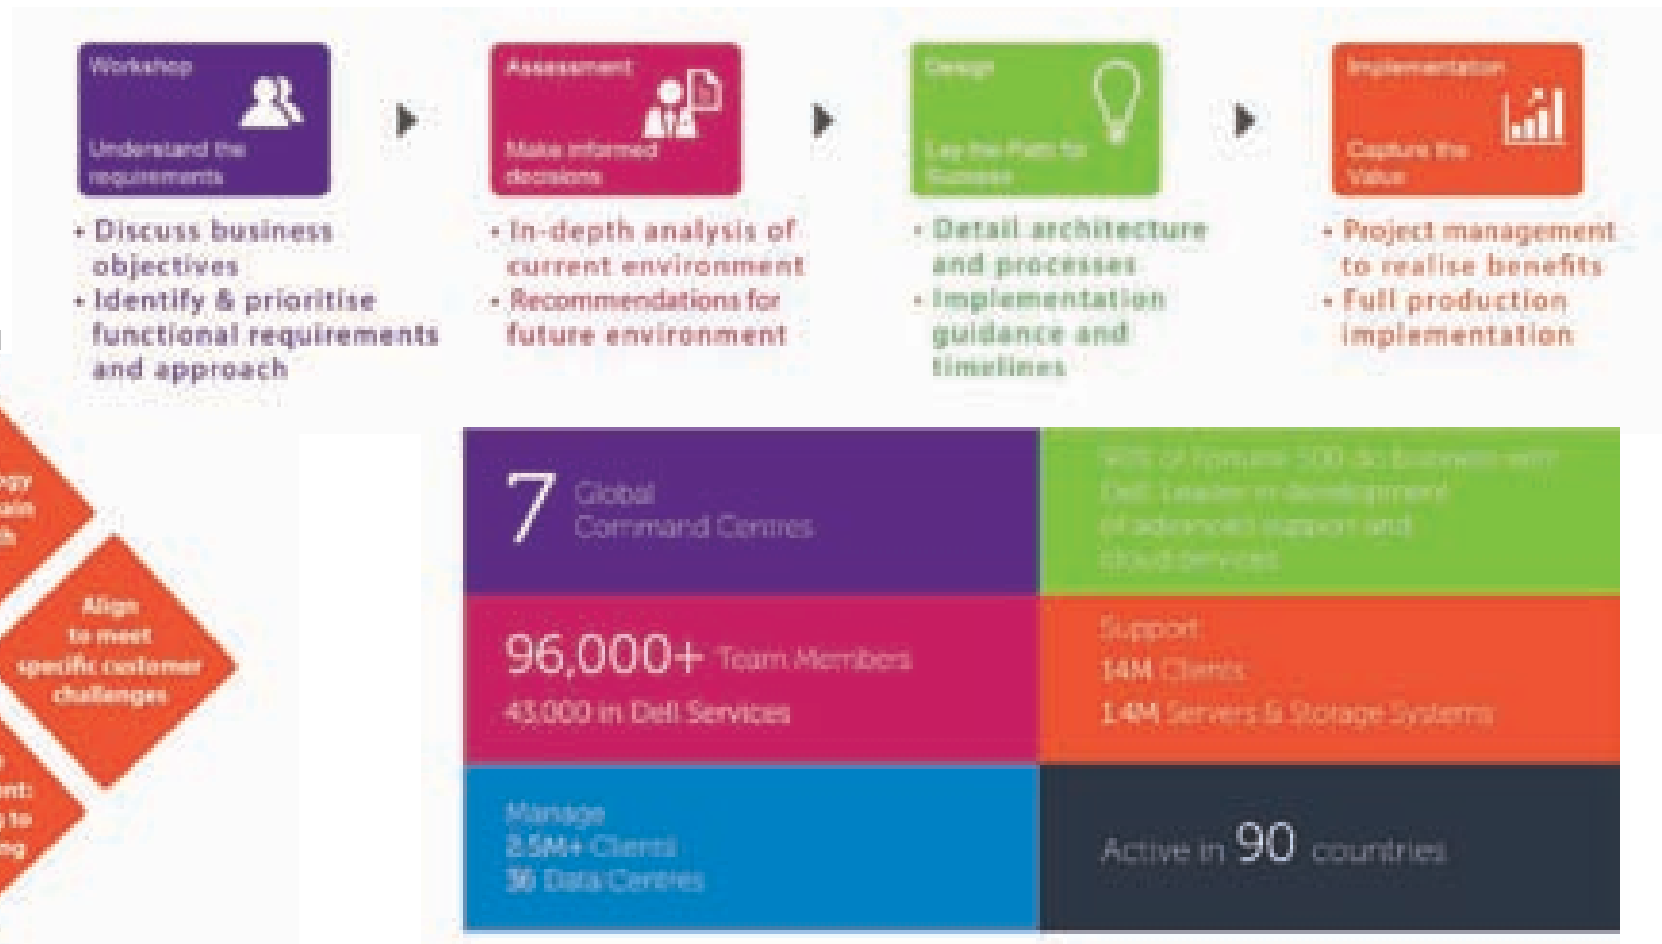

Enterprise Category : Large

Dr. Hemant Kumar, Director, Dell Services
Receiving Felicitation Trophy
From Mr. Muralidharan Ramchandran, CIO, Syntel Ltd.
and Mr. Shyam Kalambi, IT Manager- India, Foseco India Ltd.

Datacenter Optimization Consulting

The rate at which data is growing is pushing the limits of power, cooling and space for existing Datacenters. But Dell can help you optimize and consolidate your organization's Datacenter with the best industry practices and innovative technologies. Building a Datacenter requires deep understanding of convergent technologies and Dell consultants can offer you practical solutions and meticulous planning to decrease disruption and risk of migration.

DATACENTER **COOLING** HARDWARE

Enterprise Category : Large

Mr. Jacob Chandy , Vice President Sales & Marketing, Rittal
and Mr. Shibu Mathews, Director Sales - IT & Telecommunications, Rittal
Receiving Felicitation Trophy
From Mr. Mukund Prasad, Group CIO, Welspun Group

“We are delighted and honoured to know that that Rittal LCP-DX (Liquid Cooling Package) is the preferred solution for 'Datacenter Cooling' in large enterprise / SME category and have been awarded the CIO choice award which was presented to us by most eminent dignitaries in the industry”

Mr. Ajay Bhargava, Managing Director

Rittal is a leading global provider of solutions for industrial enclosures, power distribution, climate control and IT infrastructure, plus software and services. Rittal's portfolio includes energy efficient datacenters from innovative security concepts for data systems to physical data and system security for IT infrastructures.

Rittal India Pvt Ltd is a 100% subsidiary of Rittal GmbH & Co. KG. Rittal, headquartered in Herborn, Germany, is a leading global provider of solutions for industrial enclosures, power distribution, climate control and IT infrastructure, plus software and services.

The company's broad portfolio includes complete solutions for modular and energy-efficient datacentres: from innovative security concepts for data systems to physical data and

system security for IT infrastructures.

Interdisciplinary engineering solutions from leading software vendor Eplan complement Rittal's products.

Rittal Liquid Cooling Package – LCP DX

Ideal hardware cooling – whatever the location

All the power delivered to the server rack ends up as waste heat that must be removed to prevent over temperature conditions. Rittal India Pvt.Ltd –Mr.Jacob Chandy, Vice President Sales & Marketing says *“In spite of a dramatic rise in climate control requirements, cooling practices in many companies have changed little in decades. Traditional room temperature control concepts have their own limitations. Rittals LCP-DX, the latest entrant into our Liquid cooling family is highly efficient, scalable and modular. It allows your server room to be extended in a*

temperature neutral way, without need for room changes”

Rated at 12kW, the Liquid Cooling Package Direct Expansion (LCP DX) can be deployed in either cold aisle containment or high density rack cooling. The LCP DX is mounted on the side of the rack, to form a closed system in either the rack or the cold/hot aisle containment. This eliminates the need of false flooring or even a dedicated server room. Warm server air is drawn in directly from the rear of the rack and cooled air is blown back in front of the 19" equipment level from the side, over the whole height of the enclosure. Rittal's LCP DX has four EC fans for maximum efficiency and minimum power consumption. Flow characteristics of the heat exchanger are optimized for the lowest possible pressure

losses on the air side to minimize the energy consumption of the fans. The speed regulated compressor enables the cooling output to adapt to the actual requirements, thus making this solution the most energy efficient solution in this space. Maintenance and service for all relevant components can be achieved quickly and simply due to the optimized layout. The fans can be exchanged quickly and at any time, even while the system is operational (hot swapping). In addition the fans are installed in the cold air section, which increases their service life.

DATACENTER **COOLING** SOFTWARE

Enterprise Category : Large

Ms. Sony Bhandwalkar, General Manager-Strategic Marketing, Schneider Electric
Receiving Felicitation Trophy
From Mr. Anjan Deb, GM-IT (CIO), The Great Eastern Shipping Co. Ltd
and Mr. Subhojit Roy, Head – IT, SBI Funds Management

“We feel honoured to be recognized as one of the leaders in critical power and cooling solution for the large enterprise segment by Indian CIO and IT decision maker community. This platform has not only helped us to connect with the CIO community at large, it has also given us an edge in the market as one of the most sought after brands. We will continue our efforts to deliver on our promise to our customers and partners as one of the most reliable brands in the market.”

Mr. Nikhil Pathak, Vice President – India and SAARC

About Schneider Electric IT Business India
Schneider Electric IT Business, a global leader

in critical power and cooling services, provides
industry leading hardware, software, and

services designed to ensure availability and higher energy efficiency across the residential, business network, datacenter, and manufacturing environments. Backed by the strength, experience, and wide network of Schneider Electric's Critical Power & Cooling Services, Schneider Electric IT Business delivers well planned, flawlessly installed and maintained solutions throughout their lifecycle. Through its unparalleled commitment to innovation, the company delivers energy efficient solutions for critical technology and industrial applications

Datacenter Cooling

StruxureWare Operations: EcoStream enables datacenter designers and managers to reconstruct their computer room within the application and verify the effectiveness of

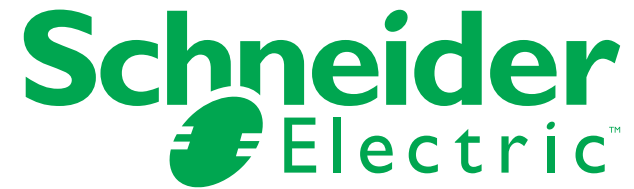

present as-well-as proposed cooling solutions on the datacenter floor. This tool revolutionizes the management of datacenter cooling by instant visualization of the thermal profile of the datacenter in addition to IT load.

Datacenter Power (UPS)

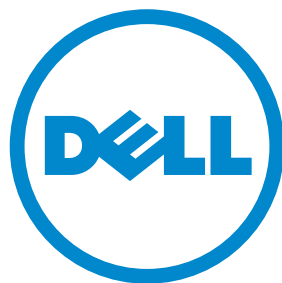

Symmetra MW redefines high-power UPS technology as a modular, fault-tolerant UPS in the 400-1600 kilowatt range. Ideal for large datacenters, complete buildings, healthcare and other critical facility protection requirements, the Symmetra MW can be scaled for rigorous and changing electrical demands. Symmetra MW provides increased availability through internal N+1 configurability, predictive failure notification and multi-module paralleling features.

Desktop Virtualization Solutions

If your workforce expects you to have easy access to their corporate resources, you can do that now with Dell Desktop Virtualization Solutions (DVS). Virtual Desktop Infrastructure (VDI) from Dell enables new user capabilities such as high-performance 3D graphics, unified collaboration and VoIP with Microsoft Lync 2013. Users can access rich media and graphic applications from any location and any device, while providing IT

departments with the ability to centrally host and manage sensitive user data and resources.

EMERGING IT **INFRASTRUCTURE** SERVICES

Enterprise Category : Small & Medium

Mr. Vimesh Avlani, CEO, Graftronics
Receiving Felicitation Trophy
From Ms. Kalpana Maniar, Head Business Solutions & IT, Edelweiss Capital Ltd.

“We are delighted & thrilled to receive the CIO Choice 2014 recognition honour. I would like to express our team's gratitude to CIOs & CTOs of India who have supported Grafronics & shown immense confidence in our products & services. We will continuously thrive to exceed market expectations & provide quality services to our clients”.

Mr. Vimesh Avlani, CEO

Since 1990, Grafronics is a premier IT services firm managed by seasoned professionals with more than 20 years of experience. Headquartered at Mumbai, we are one of the leading 'IT solutions providers' with focus of on-time and efficient service.

Grafronics has established itself as one of the premier companies in Mumbai dealing in Servers, Notebook Computers, Desktop Computers, Storage Solutions, Structural Cabling, Facility Management. Office Equipments & Power Solutions with its credentials, experience and resources at command, Grafronics holds a prime and domineering position in providing solutions and other office automation and security products. Its annual turnover exceeded INR 10 Crore.

Grafronics' key to success has been providing solutions blending with the right technology and ensuring value for the money. Our products & solution combine the most reliable and cost-effective technologies with ease of integration. Together with our vendors, we offer solutions, which exceed customer expectations.

By undertaking research to understand business requirements of our clients, we are in a position to guide our clients in areas ranging from administration, management & value additions, which we integrate in our solutions.

Grafronics as it stands today is a professional enterprise with modern management thinking, advanced technology committed work force, right connections and a positive risk taking attitude that sets it apart as a leader in its

chosen fields of activities.

Grafronics Ethos

Underlying the success of the company is its philosophy of commitment to quality, service and reliability. Grafronics believes in 'customer centric' approach added with commitment to quality for its entire operation, thus group's to the values of Quality, Service and Reliability.

The group's concern for development and welfare is deep rooted. Employee welfare and people care has always been the pride of Grafronics

Benefits Grafronics

- Flexible solution to all your needs.
- Get quality, reliability & responsiveness.
- Covered by our comprehensive support

and free maintenance.

- Lots of choice to choose from.
- You name it and we'll give to you.
- Best technical service.

Grafronics has a team of dedicated young professionals having high standards of IT knowledge commitment enriched by years of experience, management expertise & ability to deliver. Having an outstanding reputation in South Gujarat region (VAPI/SELVASA/DAMAN), we are spreading our wings in other regions by taking projects from various regions.

ENTERPRISE **E-MAIL** SOLUTION

Enterprise Category : Small & Medium

Mr. Mandar Narvekar, Director - Marketing, Rediff.com
and Mr. Shirish Pathade, Product Manager, Rediff.com
Receiving Felicitation Trophy
From Mr. Seshadri J, Sr. Director- IT, Emerson Network Power
and Mr. G. Radhakrishna Pillai , CIO, Super Religare Diagnostics

“The CIO Choice 2014 award for Enterprise E-mail Solution is the testimony of our efforts to provide secure, reliable and feature rich enterprise email solution. We thank all the CIOs and IT managers who trusted us for years to manage the most important communication channel in their organization. We are glad that we lived up to their expectations and we will constantly thrive to enrich our enterprise email solution in years to come”

Mr. Vivek Sharma, Sr. Vice President - SME Sales & Business Operations

Rediffmail Enterprise is a secure cloud based email solution for corporate clients. The email architecture & infrastructure is maintained and managed by Rediff.com.

Data security

Given the importance of email data, all email transactions are secured and the data is stored at a secure location.

Robust infrastructure with 99.9% uptime

Components in the network architecture have counterparts and an automatic switchover ensures that the enterprise service is up and running even if one of the components fails.

Access mails anywhere

A mobile app provides access to enterprise emails and is available for all popular mobile

operating systems across device types, complete with features such as new email notifications & remote wipe.

Complete synchronization across devices

With internet access on multiple devices becoming a norm, users can sync mails across all devices and applications like outlook & webmail using complete mail sync.

Backup and restore

Rediff's email backup solution ensures that emails are backed up as soon as they are sent or received by the user, thus eliminating the need for manual backups on a daily or weekly basis.

Advanced spam protection

An advanced spam protection mechanism

keeps the Inbox clutter free as only genuine mails can pass the virus checks, IP check, reverse DNS, DKIM check, content filtering, user behaviour patterns, etc. before landing in the inbox.

Data leak protection

Administrators can restrict certain users from accessing mails outside the company network or allow them to access mails only on secure channels.

Hybrid setup with on premise mailing systems

A Hybrid solution combines best of both on-premise and cloud mailing solution. Users can now host some mailboxes on on-premise and rest of the mailboxes on Rediffmail Enterprise platform using the same domain.

Seamless transition

Rediff provides support to implement seamless transition from an existing service provider to Rediffmail Enterprise solution.

Customer support

A dedicated account manager is assigned to every client and along with technical customer support available on phone and email.

Collaboration

The Enterprise solution provides an intra-domain chat, file sharing and newsletter system thus facilitating easy communication between employees.

ENTERPRISE **INFRASTRUCTURE** AUTOMATION SERVICES

Enterprise Category : Large

Mr. Ramkumar Balasubramanian, General Manager-Practice and Automation, WIPRO and
Mr. Kiran Desai , Vice President & BU Head - Managed Services, India & ME, GIS, WIPRO
Receiving Felicitation Trophy

From Ms. Ritu Madbhavi, Sr. Vice President - IT at Draft FCB Ulka Advertising
and Mr. Anil Nadkarni, Chief Information Officer at Thermax Ltd.

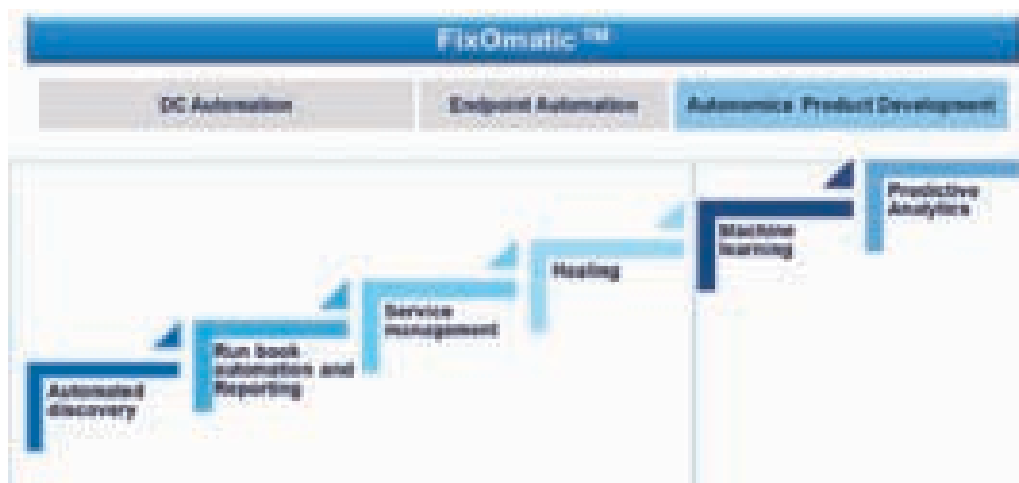

“Wipro will continue to make investments in FixOmatic framework and is working on predictive analytics and machine learning to give increased cost savings to our customers”.

Mr. Ramkumar Balasubramanian, General Manager-Practice and Automation, IMS

Wipro is recognized as an Industry leader in Enterprise Automation Services. Wipro leverages its experience and expertise in Non-Linearity to provide optimized solutions tailored to match the specific needs of its esteemed customers.

FixOmatic™ is a suite of next generation IT Infrastructure Automation solutions spanning Datacenter, End User Computing and Customized Engineering of automation products and services for highly specific needs of customers. The transformational solutions help achieve Effort Reduction by repurposing skilled resources, Effort Reduction by reducing Mean Time To Resolve, Process Standardization and Compliance & Lower cost per resolution.

Designed to dynamically detect, diagnose and auto-correct incidents as they occur in customer's Datacenter environment, most incidents are automatically self-healed even before the user becomes aware of their existence. The Run book automation under DC automation suite automate business processes

and service requests spanning across multiple towers like Platform, Servers ,Network Operations, Storage , Databases leading to more efficient and compliant provisioning of IT Services. Highlights of the Service Management Analytics are Business Intelligence to discover new insights using visual and metric analytics,

prediction of future events and failures using predictive analytics and optimization of ROI through Decision Analytics.

EU Automation suite have Self Service tools that directs end users to customized one-click solutions before the need arises to contact service desk for help, Software Asset Management that enables customer to make immediate reductions in software costs, App-store empowers users to get the software and services they need, when they need them, and PC Power Management for delivering immediate credible savings by reducing energy consumption.

ENTERPRISE MOBILITY

Enterprise Category : Small & Medium

Mr. Mahavir Chand, Director, GoDB Tech
Receiving Felicitation Trophy
From Mr. Chitranjan Kesari , AGM (HEAD) IT, Omkar Realtors & Developers Pvt. Ltd.

“GoDB's Mobility journey started a decade ago with our platform offerings and today we see a demand for industry specific add-ons on our platform. We have worked with various partners specializing in specific domains like Banking, Insurance, CPG, Agri business to offer Industry specific applications. To fulfill this huge demand, especially in the SME segment, now we are offering these apps on a cloud model under the brand 'Cloware'”.

Mr. Raja Raman, Founder & CEO

Enterprise outlook towards mobility has changed with time and the market landscape is orienting towards developing apps for business-to-enterprise scenario. As enterprise organizations get more indulged in the BYOD world, they need to move from a point solutions approach to an approach which takes into account the entire platform architecture. GoDB Tech Private Limited, headquartered in Chennai, uses this platform approach to help enterprises that struggle to scale applications or create a unified structure. Through its comprehensive enterprise application platform, the company enables enterprises to extend their business processes outside corporate walls.

With mobile implementations influencing various business functions and strata of organizations like Management, IT/admin

teams and end users; the challenges being faced by enterprises are related to data security outside corporate walls, fragmentation of devices, integration of mobile apps with ERPs

and flexibility of the system. To address these challenges GoDB brings the benefits of mobility to enterprises and provides seamless communication, better visibility, better control,

increased reach and enables faster decision making with enhanced enterprise agility.

GoDB believes in first digitizing or mobilizing the last-mile processes to increase the end-user adoption rates and then brainstorming with the enterprises for re-engineering the business processes to take advantage of new capabilities that the mobile technologies bring. What works for the company is its platform based approach instead of bespoke/custom development by others. The strong sync framework provided by the company enables transaction on field with ability to scale seamlessly from 100 to 50,000 users. The efficiency of the company is a result of its decade long experience of 250 enterprise grade deployments with 200,000 users in field.

GOVERNANCE **RISK &** COMPLIANCE

Enterprise Category : Small & Medium

Mr. Pavan Peechara, CEO, Udyog Software, Mr. Janak Bhuta, Udyog Software
and Mr. Pravin Savant, Udyog Software
Receiving Felicitation Trophy
From Mr. Sumit D. Chowdhury, President & CIO, Reliance Jio Infocom Ltd.

“Indian companies pay up to 26% of their input costs for transactional taxes such as TDS, CENVAT, VAT, Service Tax and others. Udyog Software helps in minimizing and optimizing those costs allowing you to take complete control of your tax expenditures. In any organization, Governance, Risk and Compliance encompasses integral activities and are imperative for risk prevention, cogent performance and reduced compliance costs. Being awarded with CIO CHOICE 2014 in Governance, Risk and Compliance category is an honour for all Udyogites bestowed by CIOs for choosing Udyog's product as their first choice, reinforcing our market leadership in India since 20+ years”

Mr. Pavan Peechara, President & Group CEO

About Udyog Software

Established in 1993, Udyog Software is a pioneer in providing Tax Automation Solutions to various industry verticals and is amongst the leaders in areas of tax compliance, payroll solutions, integrated solutions and ERP implementations. Udyog's unique tax engine provides automation for taxation ranging from Indirect taxes: Excise Tax, Service Tax, VAT by state; Direct taxes: TDS, TCS; to Special Compliances: Export Documentation, Import Documentation, SEZ, and EOU among others.

Udyog serves esteemed organizations such as Kirloskar, ITC Filtrona etc. among Indian majors; BASF, Avery Dennison, Delphi, Nestle etc. among global majors. Udyog Software has more than 14,000+ customers who have invariably benefited from our automated tax planning and end-to-end processing

About iTAX

iTAX is a unique enterprise tax processing engine that validates, computes & processes all tax returns ensuring complete regulatory compliance with updates. Its unique features are:

1. Complete tax planning and set-offs management
2. Accurate liability calculation by tax type
3. Always up-to-date reports, registers
4. Most comprehensive Indian tax coverage
5. Track and manage compliance across manufacturing unit and trading warehouse
6. Seamlessly integrates and transforms data from any ERP

7. Assured savings, value and ROI

8. E-filings and more

It provides taxation requirements for all tax types at Central, State and Local government levels – Excise, Service Tax, TDS/eTDS, VAT/CST, Exim, EOU, SEZ, etc.

Our Renewed Mission

As a leader in tax automation technology in one of the most challenging tax regimes - Indian taxes, we're set out to simplify tax calculation, processing and filing through engineering excellence and thought leadership giving Indian CFOs, CAs and other finance professionals complete control over tax compliances.

Our Technology and Other Products

Udyog's tax technology ability to consume taxation changes automatically gives us the

unmatched advantage over any other tax automation software in India. We are among the best few covering plethora of Indian taxes
iTAX – The Enterprise Tax Processing Engine
Taxilla – The most unique and comprehensive tax technology on cloud with

- Status and notice tracking by client, by employee, by filing type, by stage and by unit / location
- Tax processing workflows
- Audit friendly versioning
- Dynamic data corrections among many never envisaged functionalities

addTax – Determines tax type and computes tax by line and by transaction

Transactor – Provides EDI, Export and Import documents or any other electronic and printable documents for each transaction

ICT **INFRASTRUCTURE** COOLING

Enterprise Category : Large

Mr. Prashant Bhatia, Country General Manager- Enterprise Sales, Emerson Network Power
Receiving Felicitation Trophy

From Mr. Sunil Mehta, Sr. Vice President & Area Systems Director - Central Asia, JWT
and Mr. Subhasish Saha- CTO, Apeejay Surrendra Group

Liebert® PCW is the ideal cooling unit for Cooling the Cloud. Utilising chilled water as its cooling fluid and available in a wide variety of floor mounted configurations the Liebert® PCW is appropriate for all Datacenters from 200 kW to 6 MW.

Liebert® PCW patented technology ensures optimum energy efficiency for cooling Datacenters impacted by the sheer density and variability of demand resultant from Cloud technologies, without compromising on performance or reliability.

Liebert® PCW
Cool the Cloud

When combined with Liebert® HPC Free cooling Chillers this solution provides the ultimate in energy efficient datacenter cooling.

Features

- **EC Fan 2.0** - At the heart of Liebert® PCW are the new generation of fans, developed with EBM, to dramatically reduce the noise level produced during operation while significantly increasing the efficiency of the unit.
- **Unit Inner Aeraulic Design** - Cutting-edge design for the coil and the electrical panel places Liebert® PCW at the forefront of precision cooling for Datacenters.
- **Efficient Humidification Technology** - To maintain the moisture content in the atmosphere the Liebert® PCW has an ultrasonic humidifier. If preferred infrared or electrode humidifiers are two efficient, available, alternatives.
- **iCOM Control** - Smart mode is a unique control algorithm developed for Smart Aisle

application (Cold Aisle containment) to dynamically adjust the airflow and cooling provided to match the needs of the servers eliminating the need to overcool your facility.

- **Ultimate Solution** - Liebert® PCW combines with Liebert® HPC Freecooling Chillers to give optimum efficiency of the whole precision cooling system.
- **Simplified Installation** - Adjustable legs, fast electrical kit and water connection on demand make installation easy.

Smart Solutions

In today's growing Datacenter solutions, one trend stands out – organizations are forced to sacrifice floor space, capacity or efficiency in order to achieve ever-changing business objectives. Emerson Network Power's **Smart Solutions™** is a suite of integrated and pre-

engineered Datacenter infrastructure solutions designed to address these challenges.

SmartRow is an intelligent integrated Datacenter infrastructure that combines industry's finest power, precision cooling and infrastructure management technologies in a sealed environment – which can be placed at any conditioned space. It is precise, modular, produces savings in terms of initial investments as well as the operating expenses.

Ideal for small to mid-sized Datacenter or computer room, it supports up to 40kW of IT equipment in a multi-rack configuration along with integrated power, cooling, infrastructure management and fire suppression. It leverages industry best practices to provide a solution that is efficient, economical, interoperable and controllable to address the challenges of efficiency, capacity and availability.

INTEGRATED **DATACENTER** SOLUTION

Enterprise Category : Large

Mr. Rajagopalan Vasudevan, Vice President (Sales), Emerson Network Power
Receiving Felicitation Trophy
From Mr. Rajeev Mittal, Head - IT/IS, Piaggio Vehicles
and Mr. Jitendra Mishra, Global IT Head, SIRO Clinpharm

Smart Solution Features

Dedicated Rack Level Cooling

- SmartRow brings cooling solution closer to server rack. Cold aisle & hot aisle containment arrangement makes it a close loop cooling.
- It uses digital scroll compressor technology, which has capacity modulation from 10% to 100%. Hence the cooling is produced as per the load requirements which given savings in operating expenses.
- Cooling unit has adjustable baffles through which we can have cold air discharge in direction designed for optimal air circulation.

Optimal Space Utilization

- Unlike traditional Datacenters, SmartRow does not require infrastructure changes such

as raised floor or ducting. As these infrastructural changes are not required, there is considerable amount of savings in capital investment.

- Rack Mount UPS has industry's lowest form factor.

High Modularity

- SmartRow is an easily scalable modular Datacenter infrastructure. For future requirements it is easy to add rack or cooling unit to exiting SmartRow.

Energy Efficiency & Savings

- Digital scroll technology cooling produces savings up to 30% as compared to conventional cooling solution.
- Rack mount UPS is up to 95% efficient.

Easy Relocation

- SmartRow design parameters makes it easy for relocation, with 100% parts being capable of relocated.
- This factor is of critical importance to application where mobility is part of business format.

Monitoring & Security

- SmartRow has intelligent sensors, which can monitor parameters on intelligent devices along with the environmental parameters such as temperature & humidity control.
- SmartRow has following set of sensors as part of monitoring solution
 - Temperature & Humidity Sensors
 - Door Sensor
 - Beacon
 - Water Sensors

- Camera Surveillance
- Motion Sensor

Exhaust Air Ventilation

- This provision is provided to cater for failure of Air conditioning system, in absence of redundant cooling unit.
- When PAC machine fails, the front doors which has magnetic locks, gets opened for entry of fresh room air to cool the servers with normal air circulation.
- The exhaust fans which are mounted in Hot Aisle Containment get activated, which results into hot air exhaust into outside environment.

Mr. Jaideep Mehta, VP & Country General Manager, IDC India and Mr. Shalil Gupta,
Director Insights & Consulting IDC India

Receiving Felicitation Trophy

From Mr. Ajay Kumar Meher, Sr. Vice President & Head - IT
and Post Production, Sony Entertainment Television
and Mr. Veneeth Purushottaman, CTO, Hypercity Retail India Pvt Ltd.

“We are delighted to receive the CIO Choice Award 2014 and are humbled by the CIOs' verdict. I would take this opportunity to thank our clients for their constant support and feedback and IDC India's dynamic team which has led to this recognition. This award showcases our strength in the domain and strengthens our belief in the inherent value of advisory focused on the 'how to' of IT, which separates hype and reality and ensures delivery of true business value to our clients”.

Mr. Jaideep Mehta, Vice President and Country General Manager

About IDC:

International Data Corporation (IDC) is the premier global provider of market intelligence, advisory services, and events for the information technology, telecommunications and consumer technology markets. IDC helps IT professionals, business executives, and the investment community make fact-based decisions on technology purchases and business strategy. More than 1,100 IDC analysts provide global, regional, and local expertise on technology and industry opportunities and trends in over 110 countries worldwide. For 50 years, IDC has provided strategic insights to help our clients achieve their key business objectives.

IDC delivers dependable, high-impact intelligence and advice on the future of technology, and industry adoption of technology, to help vendors, technology

professionals and IT Buyers make fact-based technology decisions.

With more than 1,100 analysts covering trends in more than 110 countries IDC provides global, regional, and local expertise on technology and industries. With over 50% of Fortune 500 companies using IDC's research, IDC assists IT professionals and influencers in making more effective technology decisions for business transformation, sourcing strategies and vendor management & governance.

IDC's IT Advisory services are designed to ensure that IT Buyer's technology purchasing and deployment decisions are optimized. IDC has been the pioneer in developing these valuable tools and is the unmistakable leader in the industry for a rigorous, fact-based approach to facilitating IT decision making. Our mission is to turn your IT expenditures into

sound investments.

The IT executive programs offered by IDC consist of a family of Advisory & Consulting programs intended to help today's time-constrained technology professionals and influencers make more effective technology decisions. The program offers actionable and timely fact-based research that will assist technology professionals and influencers in mitigating technology risks, maximizing the effectiveness of IT investments, identifying, and capitalizing on new opportunities and creating solutions that are aligned with the organization's business objectives.

In the IT ecosystem, IDC tracks end users and vendors and help them through various phases of forming their market strategy, market entry and competitive sustenance. IDC's

comprehensive qualitative and quantitative analysis through its tracker programs provides accurate and timely market size, vendor shares and forecast.

Publishing 5,000 reports annually, influencing more than 10,000 CIOs through its events

With 50% of Fortune 500 companies using IDC's research, IDC assists IT Professionals and Influencers are able to make more effective technology decisions!

IDC has more than 2,000,000 end users impressions through GMS and White Papers. Our comprehensive portfolio is skillfully curated and promptly delivered to meet each individual client's customized needs. IDC believes in the inherent value of advisory focused on the 'how to' of IT, which separates hype and reality and ensures delivery of true business value to our clients.

MANAGED **IT** SERVICES

Enterprise Category : Large

Mr. Kiran Desai , Vice President & BU Head - Managed Services, India & ME, GIS, WIPRO
Receiving Felicitation Trophy
From Mr. Sabyasachi Thakur, Head IT at Century Plyboards (I) Ltd.
and Mr. Ramesh Janarthanam - Global IT Head - Crompton Greaves

“Today, we find companies of all sizes adopting managed services to gain a competitive advantage in a rapidly changing business environment. However, while doing so, it is of utmost importance to partner with an organization that has a robust managed services framework, one which is comprehensive, integrated, futuristic and yet flexible to work in diverse customer environments. At Wipro, we have put together the right people, processes and tools to develop Wipro's next gen managed service framework for infrastructure and applications - ServiceNXT™. Focusing strongly on automation and standardization, ServiceNXT™ leverages Wipro's IP and best-in-class tools delivering ITIL V3 level services to our customers”

Mr. Kiran Desai, VP & Business Unit Head

About Infrastructure Management Services (IMS)

With the technology environment constantly changing with upgrades and expansions, it gradually becomes too complex for an organization to manage it all on its own. Wipro's Infrastructure Management Services (IMS) enables enterprises to focus on their core competencies, while taking the responsibility of managing your IT environment. We offer a powerful combination that gives customers the most advanced IT capabilities while freeing up your resources for more strategic endeavour's within your organization.

Wipro's Infrastructure Management Services (IMS) is a business unit under Wipro's Global Infrastructure Services (GIS), which is USD 2 Billion business that enables enterprises to

focus on their business while we manage, monitor and support your technology infrastructure. Our services portfolio includes: Business Service Management, Datacenter Services, Contact Centre Technology Management Services, Telecom Managed Services, Managed Security Services, Application Management Services, IT Service Desk, End User Support Services, IDMS (Integrated Device Management System), Non-IT services and Google Apps.

Our rich talent base is also coupled with deep industry knowledge and backed by best-of-breed products and technology. Adoption of robust quality management systems—like Six Sigma & Lean—ensures enhanced service levels and continuous improvement of our services. By partnering with us, enterprises can maximize

the availability, performance and quality of the IT infrastructure and applications, while accomplishing their business goals.

This recognition will prove to be a driving force for us in further continuing to demonstrate our abilities in providing excellent Managed Network Services & Solutions with best-in-class technology”

Mr. Surya Prakash Madrecha, Chairman & Managing Director

About Trimax

Established in 1995, Trimax IT Infrastructure and Services Limited (Trimax) is a leading provider of information storage, network and computing infrastructure and allied services. Over 2300 employees working from two Tier III+ Datacenters, 14 offices and 440 service delivery locations are supporting more than 600 client locations across India.

Through the last 18 years, Trimax has created a track record of working with over 900 customers that include some of the largest brands in India in the transportation, telecom, manufacturing, BPO, banking, financial services and insurance sectors. Trimax has proven expertise in handling large and complex projects, having managed critical projects for various State Government bodies and Public Sector enterprises.

Trimax follows global best practices in quality assurance, information security and business process management, thus assuring customers of high quality services delivered through mature processes from a secure technology environment.

Trimax core offerings include

- Managed IT (Facilities and Network) Services
- Datacenter Services – Co-location, Hosting, DR/BCP, Data Back-up
- Custom Application Development and Systems Integration
- Cloud-based Offerings – SaaS, IaaS, PaaS

Summary – The Trimax Advantage

- Trimax can support your pan-India IT infrastructure and support services

requirements through 440 service locations across India.

- With breadth of experience in managing some of the most complex projects in India, Trimax can help address complexity and scalability challenges of your IT infrastructure.
- With ready to use Datacenters and network

infrastructure, Trimax helps you speed up your go-to-market & technology roll-out.

Our flexible pricing models help you conserve capital.

- Trimax provides access to best-of-breed technology expertise and high availability infrastructure through alliances with leading technology and network services

Mr. Gopinathan K, Practice Head – Managed Security and Network Services, IMS

In today's complex environment, organizations are increasingly interconnected with partners, networks, customers, applications and end user devices. Providing uninterrupted access to IT resources and safeguarding it against evolving threats is the biggest challenge for organizations today.

Wipro has been a Leader in providing Information Security Services across verticals, with the Managed Security Services of Wipro having grown more than 20 times in the last 7 years. Adding more than 10 New Customers YoY & with a consistent revenue growth in India and ME, Today more than 50 MSS customers are supported from remote GSOC in Mysore / Chennai. Apart from India and ME region, globally we are supporting 300+ Fortune 1000 Customers in Enterprise Security Solutions Wipro's Managed Security Services are flexible

and affordable solutions that help organizations reduce their costs of security infrastructure and operations management resulting in efficient use of IT resources. Wipro offers organizations access to world class, state-of-the-art Security Intelligence Centres

(SIC) for proactive security and risk management. The SIC ensures intelligence driven security incident monitoring / management to handle and mitigate known and unknown threats. Investments in various security products, related support and continuous improvement initiatives has lead to the creation of catalogued services for security - Security as a Service, empowering organizations to focus their investments on the security service they require rather than on products and technologies.

Wipro MSS support customers in all the industry verticals like BFSI, Telecom, Retail, Healthcare, Manufacturing, Automobile, Aviation, Energy and Utilities etc., to secure their IT & Telecom Apps-Infra. Security Solutions are customized to industry verticals and their compliance / regulatory requirements. Advanced skilled resources in Security and Risk Management along with other Apps-Infra domain SME's form the core group of the Wipro Security Program. On-deman Skills and Security Services are also provided to meet the organizations security & threat analysis / mitigation requirements.

IMAGE **CAPTURE & COMPRESSION**

Enterprise Category : Small & Medium

Mr. Mohan Chandrasekaran, Founder & CEO, Sudesi
Receiving Felicitation Trophy
From Mr. Pradeep Java, CIO, Baggit

“**A**dStringO's vision is to create a World Class and Fastest Image File Compression Engine which can compress the captured image either from Scanners or from Mobile Platform upto 1/20 of original size with no change to Quality before extending it to any Business Process Application like DMS, BPM or Portal etc. There was a significant benefit of this innovative technology post adoption in Banking, Insurance, Telecom and Logistics verticals. With this innovative technology solutions now field executives now onboard customers with supporting documents from his home or from dealers place. Truly “Instant” and delivers “Customer Delight” anywhere every time. Being Awarded as CIO Choice 2014 under Compression Category assures we are heading towards the right path and we would like to Thank CIO Choice team & fellow CIOs who recognized us”.

Mr. Mohan Chandrasekaran, Founder & CEO

adStringO: What's it all about?

adStringO is a tool which compresses the captured image either from Scanners or from Mobile Platform upto 1/20 of original size with no change to quality before extending it to any Business Process Application like DMS, BPM or Portal etc.

With this, field representatives or customers themselves can capture documents using scanners & mobile photos then compress to smaller file without losing aspect ratio and Meta data to initiate critical business processes at the transaction point itself.

With adStringO enabled capture & compress capability now enterprises can on-board customers at a click of the button

Unique Features

- Mobile: Can Operate From Any Mobile Device Which Has Internet Capability
- Any Network: Works Well Even In 1G & 2G Network
- Original: Captures Images In Original Colors
- No Compromise Resize: Resizes Without Compromising On Aspect Ratio For Easy Uploading (As Attachments)
- Compressed: Compress To 1/20* Of The

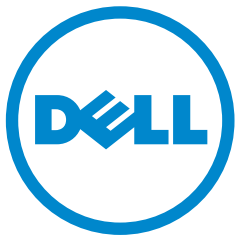

Size Of Original Image

- Geo Located: Captures The Latitude & Longitude From Where The Image Is Captured
- Meta Tagged: Meta Tagged With Lat/Long Details
- Direct: Can Be Sent/Transmitted From The Point Of Origin
- Intuitive: Use Friendly

Benefits

- Productive: Improved Productivity TAT Reduction & Eliminate Back Office Processing Time
- Efficient: Inverse Revenue & Help To Reduce Operational Head Count And Its Associated Cost
- Faster: Faster Servicing & Improved Customer Satisfaction

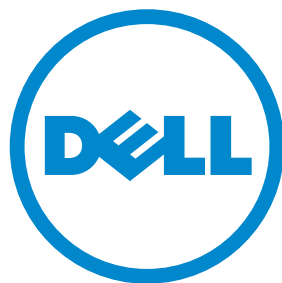

- High Quality: High Quality Digital Documents Help Curving Forgets & Miss-Selling
- Thrift: Significant Cost Saving On Network Bandwidth & Storage
- Compliant: Help Company Compliance With New Regulations Like KYC, CAF etc.
- Self Recovering: TCO In Less Than 6 Months
- Quality Compression: Compress Capture Documents By 1/20 Of Original Size Without Compromising Aspect Ratio

Networking - Active

Network should evolve with technology. Unfortunately, networking paradigms haven't kept up with advancements in virtualization, convergence, mobility and cloud. However, now you can free your network from the constraints of outdated networking paradigms. And transform it via innovative solutions designed by our unique, time-tested and market-proven expertise in servers and storage. With our Networking solutions and an end-to-end portfolio of simple, flexible and reliable open-standards-based platforms, you can modernize your network to improve infrastructure, gain performance and lower costs with the power of 10GbE networking.

Receiving Felicitation Trophy From
Mr. Satish Warriar, CISO, Godrej Industries
and Mr. Raghu Reddy, Sr Vice President – IT, UTI Asset Management Company Ltd.

Power Distribution unit (PDU)

Schneider Electric provides a wide array of power distribution solutions for IT environment. Schneider Electric's standardized PDUs are designed to increase the manageability and efficiency of the datacenter. Power Distribution solutions provide real-time remote load monitoring of connected equipment and individual outlet power control for remote power recycling, manage power-up or power-down sequencing of equipment. IT and Datacenter Managers rely on PDU alarms to warn of potential power overloads before critical IT failures occur.

PUBLIC **CLOUD** SERVICES

Enterprise Category : Large

Mr. Suresh Kumar Rathod, Vice President-Enterprise Business, CtrlS
Receiving Felicitation Trophy
From Mr. Bhupendra Pant, Head IT, Larsen & Toubro – EWAC
and Mr. Bala Meshram, VP-IT, Shipping Corporation of India Ltd.

“Winning this award for the second time has re-energized the entire organization. Our focus now is to repeat the success story, with new service offerings. We believe that the best of our offerings are yet to come. We are thrilled to be part of this timeframe, when Cloud is at the cusp of transforming more businesses than ever¹¹”

Mr. Sridhar Pinnapureddy, Founder & CEO

Known initially as the company that pioneered the Tier 4 Datacenter movement in India, CtrlS has moved from strength to strength since then. CtrlS is among the most admired Cloud service providers in India, the CIO Choice 2014 award for Public Cloud stands testimony to this. Through its unmatched security, Gartner Magic Quadrant 1 hardware, low-latency dark-fibre network and fault-tolerant infrastructure – CtrlS delivers world-class Cloud offerings.

Put to the test, right from the start

Incorporated in 2007, CtrlS initiated operations when the global recession was at its peak. In this challenging time-period, CtrlS entered the market by positioning itself as a long-term partner. Since inception, CtrlS has successfully addressed numerous concerns regarding Cloud Computing.

The right ingredients for the best Cloud

CtrlS' Cloud services are based on a military-grade platform that comes with high-security measures like Double Factor Authentication, UTM device for Intrusion Detection & Prevention and Data Encryption. With Gartner Magic Quadrant 1 hardware, CtrlS' cloud customers get superior performance. To minimize latency, CtrlS has invested in a mammoth dark-fibre ring that simply cannot be matched by others. CtrlS is a carrier-neutral Datacenter and also houses an IXP in its premises.

Powered by pedigree Tier 4 infrastructure –everything from power to cooling to connectivity to security, is monitored, managed and delivered by highly fault-tolerant and energy-efficient systems. Furthermore, the

billing is automated to ensure complete accuracy and transparency in billing.

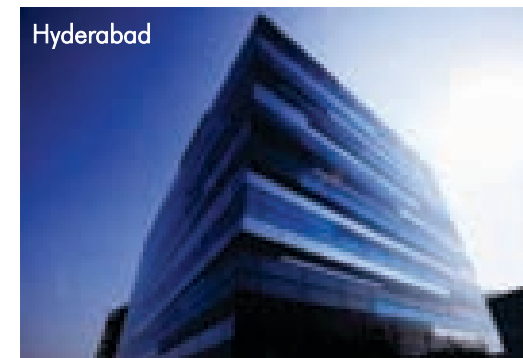

CtrlS is an organization that delivers innovative services based on deep client insights. CtrlS was the first in the country to launch revolutionary products like Disaster Recovery on Demand and Zero Data Loss.

About CtrlS

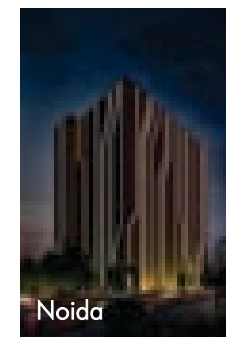

With deep-rooted belief in the Total Ownership philosophy, CtrlS services 2000 clients globally; many of them demanding segments like BFSI and Telecom. CtrlS also services clients from other industries like IT / ITeS, Manufacturing, Logistics, Utilities and Government sectors as well. CtrlS currently operates 4 Datacenters – conveniently located in capital cities like Hyderabad, Mumbai, Delhi and San Diego – which translates to 9,400 racks and 3,40,000 sq.ft. Three more Datacenters have been

planned as part of expansion plans. CtrlS is promoted by the 20-year old Pioneer Group. To know more about CtrlS, please write to marketing@ctrls.in.

QUALITY **TESTING** SERVICES

Enterprise Category : Large

Mr. Maneesh Jhavar, Director, Quality Kiosk
Receiving Felicitation Trophy
From Mr. Rajesh Panchal, Head IT – Global, United Phosphorus Ltd.
and Mr. Kamal Karnatak, Sr. Vice President and Group CIO, RJ Corp.

“We are delighted to win the award. We owe this honor to the continued trust and encouragement of our esteemed Clients. I am thankful to our 600+ consultants for making us India's leading independent quality assurance services provider. QualityKiosk collaborates with customers to understand and exceed the end-users' expectations. Our expertise in independent and cost effective automated testing services has made us a preferred Partner for leading global enterprises”.

Mr. Maneesh Jhawar, CEO

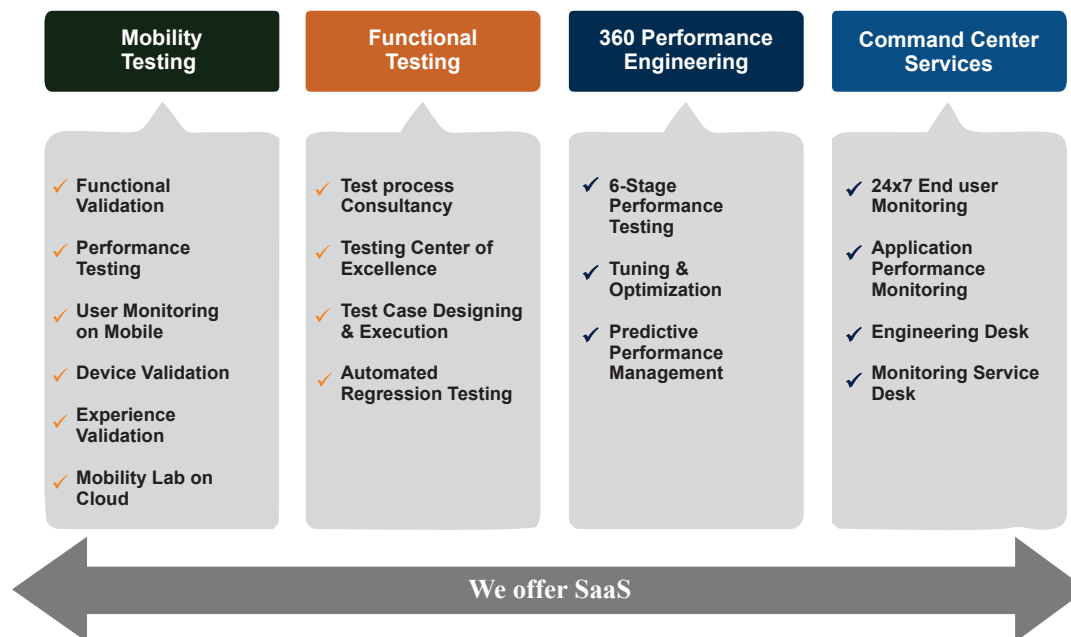

QualityKiosk is one of the leading Independent Quality Assurance companies in India, Middle East and Far East region and has customers across 11 countries. With its operations being started in the year 2000 by a team of IIT pass outs, it has grown to an enterprise organization with more than 550+ employees. QualityKiosk is headquartered in Navi Mumbai, India and has offices in UAE, Singapore, Malaysia, and USA and has rich experience in providing quality assurance services in industries like Banking, Insurance, Capital Markets, E-commerce, Telecom and Manufacturing.

Over this period of time we have completed more than 2000+ projects and as a matter of pride, an application tested by QualityKiosk has never been rolled back from production due to Quality issues. Recently QualityKiosk

Technologies was awarded the 'CIO Choice Award 2014 for Software Testing' and has also been listed in the Gartner list of 'Right Application Testing Service Partner' written by Susanne Matson | Gilbert van der Heiden.

The Quality Assurance services cater to the entire Life Cycle of the Application i.e. Pre-Production and Post-Production. The Quality Assurance services are focused on Mobility Testing for Digital Applications, Functional Testing, 360 degree Performance Engineering, Command Centre Services. With every industry moving their line of operation from the traditional methodology towards digital, QualityKiosk is keeping itself future ready by having capabilities being built in the digital space.

QualityKiosk unique model of SaaS helps in reducing the total cost of ownership.

ARTERIA®

SECONDARY **SALES DATA** ANALYSIS

Enterprise Category : Small & Medium

Mr. Sriram Kanuri, CEO, Arteria Tech
Receiving Felicitation Trophy
From Mr. Hemal Shah, Vice President, Whats On India Media
and Mr. Naresh Jha, AVP – IT, HDFC ERGO General Insurance

“We are pleased and excited to have been recognized by the CIOs of India, who have expressed their CHOICE. This honor is an assurance of our growing presence in the market, there by facilitating our growth and expansion in the segment. Our rapid and easy-to-go-live Secondary Sales Solutions enables for large Dealer Connect and comprehensive dashboard viewing mobile capabilities”

Mr. Sriram Kanuri, CEO

Arteria, an illustrious SAP partner, blends high value IT management consulting with right-shore excellence to deliver economy and quality. Arteria offers a suite of portal and mobility-based solutions that can help organizations to extend their on-premises SAP data to external partners (distribution network, suppliers and subcontractors). These solutions have helped organizations with the tracking and collation of data from their partner ecosystem and the integration of this data with their SAP system.

The resulting business benefits are extremely cool to business managers. Arteria solutions automate traditional methods of capturing and collation of partner data (through telephone, emails, excel sheets and flat files) and significantly improve accuracy of capturing

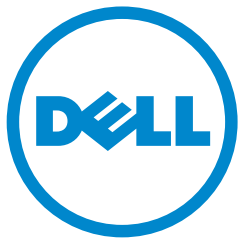

external partner network data such as secondary sales (from distributor to retailer), inventory levels, orders, invoices, returns, capacity and forecast schedules. This enhances logistics and order management decisions by providing seamless integration of external ecosystem data and SAP ERP. For example, in fast-moving consumer goods (FMCG) industries, secondary sales (distributor to retailer) data is a critical aspect for forecasting and demand planning. This functionality is also a known whitespace in SAP and typically organizations resort to collecting this data through spreadsheets from the distribution network, downloading primary sales and returns data from SAP ERP and then massaging it with Microsoft Excel pivot tables to generate the relevant reports. However, this takes days and affects the accuracy of their production

plan. Arteria solutions automate this using a single platform and empower the organization to have accurate secondary sales data and analysis for demand planning.

Founded in 2007 by former SAP Lab associates, Arteria is an Indian-based software vendor with approximately 300 SAP

consultants, focused on providing SAP Mobile and Partner portal solutions. They are one of the first partners of SAP globally to publish mobile apps on SAP Store for Mobility in 2011. They have around 75 customers for their portal and mobility solutions.

EMC²

EMC India Factsheet

EMC started operations in India in October 2000 and has since scaled up its presence to over 3500 employees, a strong customer portfolio of 3800 across 190 cities, and a well established sales and marketing infrastructure, including a 200+ strong partner network.

In Sept 2009, it made its fourth major investment announcement in India with an incremental investment of US\$1.5 Billion over five years (2010-2014). This brings its cumulative planned spend from 2003-2014 to US \$ 2 Billion. The investment is being used for expansion of sales and marketing infrastructure, growing the information Infrastructure market and strengthening R&D presence in India.

Geographic Presence

EMC has a geographically well established presence in India and SAARC region

- 7 offices in India – Delhi, Mumbai, Bangalore, Kolkata, Chennai, Hyderabad and Pune
- 7 Logistics and Support Centres - Delhi, Mumbai, Bangalore, Chennai, Kolkata, Hyderabad and Pune

EMC India Revenue

- FY 2012-13: Rs 1847 crore as per DQ Top 20 (Dataquest Top 20 Issue)
- Ranked 49th in the top 100 IT companies in India in 2013 (DQ Top 20 results)
- EMC showed a growth of 4.59% in 2012-2013

Market Share: As per the V&D 100 for 2013, EMC leads the “Network storage” market with 31.5%

EMC Education Initiatives

EMC collaborates with colleges and universities worldwide to help prepare students for successful careers in transforming IT industry.

The Academic Alliance program offers unique 'open' curriculum-based education on technology topics such as cloud computing, big data analytics, and information storage and management. All courseware and faculty training are offered at no cost to qualifying higher education institutions. The courses focus on technology concepts and principles applicable to any vendor environment,

enabling students to develop highly marketable knowledge and skills required in today's evolving IT industry.

EMC Academic Alliance Program

EAA is targeted at educational institutions and it introduces the storage technology open curriculum into their existing IT curriculums

Since inception in 2005 with Manipal Institute of Technology being the first one to adopt EAA, we are now 300+ strong with 120,000+ students educated till date. 100+ new Institutions joined EAA in 2012

EAA has witnessed an increased adoption over the years. In 2009 we educated 3,500 students which grew to 6,000+ in 2010 and in 2012 it crossed 45000+ students
50,000+ students to be educated in 2013

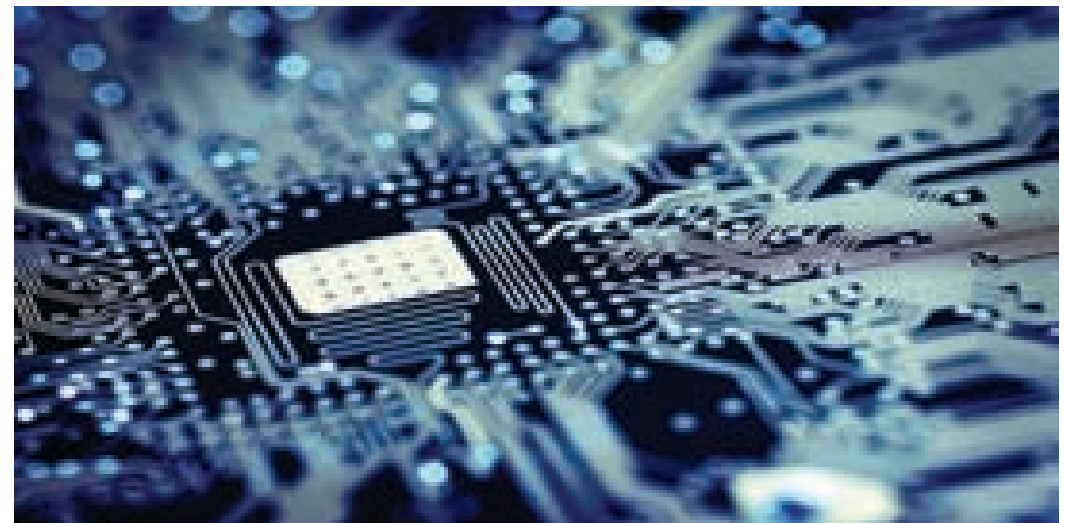

including for Cloud & Big Data courses

Currently, EAA has enrolled 17,500+ students on Cloud and Big Data and expect more students to join before the end of the year.

In February 2012, EMC signed an MoU with Rajiv Gandhi Technical University, Bhopal, to facilitate next-gen technology education in Cloud Computing, Data Science and Big Data

Analytics among others

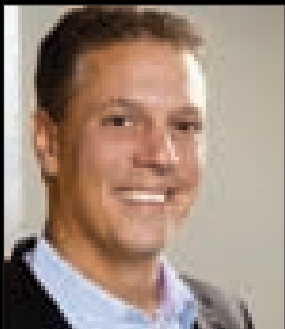

In July 2013, EMC signed an MOU with Rajiv Gandhi Proudhyogiki Vishwavidyalaya to set up a corporate School; 1000+ students are expected to enroll in the next two years

TALENT
MANAGEMENT
CLOUD SOLUTION
Enterprise Category : Small & Medium

Mr. Siranaddya Barzorak, Regional Sales Manager, Cornerstone On Demand
Receiving Felicitation Trophy
From Mr. Zueb Adenwala, IT Advisor
and Mr. Suresh Iyer, Head - IT, Blue Star Ltd.

“More companies in India and South Asia region are looking to invest in SaaS solutions for talent management because the total operational cost of traditional, on-premise software is too high, Cornerstone take advantage of these new market opportunities. Our formidable network of strategic alliances worldwide, combined with the success of our team in EMEA, continue to play a key role in the rapid expansion of Cornerstone's global footprint”

Mr. Adam Miller, Founder and CEO

Cornerstone OnDemand is a global leader of cloud-based talent management software solutions. Based on Cornerstone's pure cloud architecture, Cornerstone's comprehensive solution helps organizations manage entire employee lifecycle, from hiring through retirement. The solutions include Recruiting Cloud, Performance Cloud, Learning Cloud, and Extended Enterprise Cloud (learning management for customers and partners).

Nowadays, CIO's top of mind of concern lies on the best use of technology to better manage the organization from different perspectives, where talent management is one. A recent research conducted by Cornerstone OnDemand, the 'The State of Workplace Productivity Report' indicated that despite that fact that people are trying to combat the stress

of living in a hyper-connected world, people are still turning to tech to tame their always-on lives. As the trend goes, the adoption of mobile or wearable devices and social media is putting CIO in a favorable position to help company strategize talent management initiatives at even lower costs.

“For organizations, smart management means staying ahead of what employees want and need in order to be most productive. It's about embracing mobile and providing workers with user-centric applications that simplify – not complicate – how they get work done,” said Adam Miller, founder and CEO of Cornerstone OnDemand. “This includes making it easier for people to connect with the relevant knowledge and resources they need, when they need it, as well as ensuring the right people with the right skills and expertise are working together both

online and offline in more meaningful ways.” This is particularly relevant for countries like India where employees are in general more 'tech-savvy' than their Asian counterparts.

Organizations' ability to harness opportunities in new technologies also explains why Cornerstone OnDemand is looking to expand into the region.

TRAVEL & EXPENSE **MANAGEMENT** CLOUD SOLUTION

Enterprise Category : Small & Medium

Mr. Ramesh Iyer, Managing Director, Concur
Receiving Felicitation Trophy
From Mr. Kersi Tavadia, CIO, Bombay Stock Exchange Ltd.

“The CIO CHOICE 2014 Recognition is a testament of Concur's distinctive capability of providing solutions that can be easily adapted to any business environment while delivering the efficiency levels mandated by our customers. Concur's solutions can be easily integrated with any back-end ERP system or existing systems of a company to manage their travel bookings and expense reports, more efficiently”.

Mr. Ramesh Iyer, Managing Director

About Concur

Concur® is a leading provider of integrated travel and expense management solutions.

Concur's easy-to-use Web-based and mobile solutions help companies, federal agencies and their employees control costs and save time.

Concur's open platform enables the entire travel and expense ecosystem of customers, suppliers, and developers to access and extend Concur's T&E cloud. Concur's systems adapt to individual employee preferences and scale to meet the needs of companies from small to large.

Concur's integrated travel & expense solutions have been in use in India for long now. Serving our customers in India, we have provided them with innovative business solutions. Concur has invested in top-notch products and services in

order to meet the unique requirements of the Indian marketplace.

Concur has a Research & Development team in India and is investing to expand this team in Bangalore. With Sales and Marketing offices in Mumbai, Delhi and Bangalore, Concur is committed to deliver effective and innovative

integrated solutions to its Indian clients.

Cloud Computing

Concur offers a comprehensive SaaS solution that can truly automate a company's travel and expense

management. Concur's vast portfolio of online solutions helps companies, whose employees travel frequently, get a handle on their travel (second largest spend by companies after payroll) and expense policies and will assist them in significantly cutting costs in these areas.

Solution Highlights

- End-to-end cloud based travel and expense management solution
- Advanced reporting provides insight into travel and expense trends Robust and reliable Cloud Computing infrastructure
- Web and mobile solutions for anytime, anywhere access
- Business data security as per international standards
- Concur is proactively subjected to a number of globally recognized standards

Foreward

Mr. Anil Nadkarni (Advisory Panel)

Global Chief Information Officer at Thermax Ltd.

"CIO Choice will definitely benefit vendors. In a way CIO Choice Forum 2014 helps to bring the parity among the vendors, and smaller vendors with the label can now actually approach the top companies, when CIOs see a label like CIO Choice 2014, they will have that confidence - that look this is a vendor tried, tested and certified by the CIO community".

Mrs. Aruna Rao (Advisory Panel)

Group Chief Technology Officer at Kotak Mahindra Bank

"It's a unique platform because it is a completely independent way for CIOs to recognize the capabilities of the technology partners and technology service providers. It's an independent platform , in which their existing customers, people who have actually experienced their services, are recommending them".

Mr. Jagdish Belwal (Advisory Panel)

CIO at Tata Motors

"CIO Choice gives a platform to CIOs to actually share the good work that the vendors have done this time. And , when we look at it at an aggregate level, it benefits the vendors. This is a great platform because of the credibility that it carries, which results from the fact that this is a customer oriented platform. Customer CIOs are talking about you. Its enormous and we lack these kind of neutral platforms today. So I believe , this is a great platform ".

Mr. Manish Choksi (Advisory Panel)

President-Home Improvement, Supply Chain & IT Asian Paint Limited

"CIO Choice 2014,should benefit the vendors, as the vendor and CIO would come together on a single platform".

Mr. Rajesh Uppal (Advisory Panel)

Executive officer (EO) – IT and CIO, Maruti Suzuki India Ltd.

"CIO Choice 2014 is a very very unique format. It Identifies the best amongst the best vendors in the industry, since the whole process is decided by CIOs and the kind of value they have added to the CIO, recognizing them and motivating them".

Mr. Venkat Iyer (Advisory Panel)

Global CIO at Wockhardt (Pharma, Hospitals and Foundation).

"It is no longer just selling the box at a cheapest price, but the type of quality, the type of services they provided to their customers , the way they have held hands with customers over the last one year. For the first time I have seen this in the Indian industry, where customers are talking about their suppliers and the suppliers are working hard to provide fantastic services, so that they get selected".
