Presidents Note

Anoop Mathur
Founder & President
CORE Media

Dear Friends,

Over the years, the Centre of Recognition & Excellence (CORE) has worked vigorously to garner an in-depth understanding of the needs of India's ICT industry as well as build trusted relationships within the CIO community.

In the last five years, we've built innovative marketing and branding platforms—like CIO Choice, CIO Crown, CIO POWER LIST, HOT100, B2B1K Ventures, CIO Angel Network (CAN) and Bonne Vie—that have met with great success. Each of these are unique brand engagements that are focused on ICT Enterprises, the CIO community and technology start-ups.

All technology companies irrespective of their scale and size—Large, Medium or Small—have to work with ICT brands to ensure their products, services and/or solutions are up-to-date and of the best quality. So it's a strategic move for technology companies to build the ICT brand in the minds of the CIOs to unlock brand investment advantages to scale their business.

A trusted relationship with a CIO is therefore the most valuable asset for any ICT brand. It is one they strive hard to build as a CIO and his/her good opinion far exceeds any single transactional benefit. The brand is the one that drives the profits at the end of the day. A brand is one that has developed a personality beyond the product, one that CIOs would pay a premium for and look at no other alternative.

You know a B2B ICT brand is truly successful when CIOs request for it by its 'brand name', and when they refer to the brand while talking about a product, then the brand's reputation becomes more than just the sum of its products. Building this brand cachet is crucial to a company's survival and their relationship with CIOs is an important part of the formula.

This is where CORE comes in, to help you develop your B2B technology brand's position in its current marketplaces, while designing flexibility for its future growth. CORE works with ICT companies to promote, market and engage the brand in a way that satisfies the requirements CIOs have. We work with your team to identify, analyse and select your brand's target CIOs, competitive frame of reference and key CIO benefits (functional, emotional, experiential and self-expressive). CIO Choice gives ICT vendors an opportunity to further enhance their relationship with the CIO community so as to better promote their brands. We build the bridge of trust between CIOs and ICT vendors so both derive value from the relationship.

I would like to congratulate all the ICT vendors recognised at CIO Choice 2016, and thank all our CIO friends and ICT vendors for their good wishes and supporting us in our initiatives.

Regards

A handwritten signature in blue ink, appearing to read 'Anoop Mathur'.

Founder & President
CORE Media

Introduction

“CIO CHOICE” is a very powerful branding and marketing tool for organisations in the Information & Communications Technology space to promote and market their products, services & solutions.”

Our Mission

“Successful branding programs are based on the concept of singularity. The objective is to create in the mind of the prospect the perception that there is no other product on the market quite like your product.”

Al Ries & Laura Ries - 22 Immutable Laws of Branding

Overview

Centre of Recognition & Excellence is an organisation engaged in building brand reputation, offering a recognition platform in honouring products/services/solutions in the ICT space.

Description

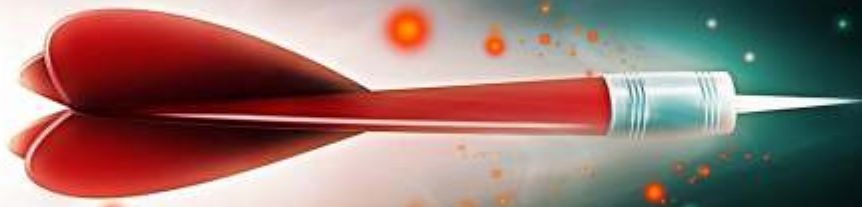

This B2B platform is uniquely positioned to recognise and honour products, services and solutions on the back of stated preferences of

CIOs and ICT decision makers and to help marketers create a positive brand positioning for their products, services and/or solutions by being the CIOs preferred choice.

General Information

Branding is identifying or creating, and then exploiting to create a sustainable competitive advantage. CIO Choice offers this to ICT vendors to build their brand reputation within the CIO community, thereby increasing market share for the brand.

For the first time, CIOs have enjoyed the vote of confidence of fellow CIOs to help them select the best products, solutions and/or services from ICT companies. The products, solutions and/or services will inadvertently enjoy the advantage and benefits of high awareness and visibility, thereby leading to leveraged business potential.

Selection & Voting Methodology: Three Stage Process

1. Call for Vendor Applications by ICT Category
2. CIO Voting Survey (Pan-India)
3. Advisory Panel Validation

Selection Process for the Leading ICT Vendors across 49 Categories:

A key seal of trust among the country's leading CIOs; selected through a pan-India survey of leading CIOs.

This recognition reflects the recipient's capability to meet customer CIOs' evolving needs in today's dynamic business environment. It commenced with inviting leading ICT players to nominate and participate on this platform. The recognitions were decided basis a pan-India voting survey of leading CIOs to recommend their choice of preferred vendors.

To earn the CIO CHOICE recognition, participating vendors had to undergo the CIO voting survey conducted by the Centre of Recognition & Excellence to prove their level of technology expertise. CIO and ICT professionals then designated them to one or more unique category competency, ensuring a certain level of satisfaction with vendor product, solution and services. Participating vendors also had to get preferred as CIO CHOICE 2016 with customer references that demonstrated customer satisfaction and met delivery commitments.

The CIOs responses and choices in each category determined the list of companies that were bestowed with the CIO CHOICE honour and recognition title. For a period of one calendar year, honoured ICT companies can use the "CIO CHOICE" title logo for the year on their packaging, promotions, advertising and marketing campaigns.

CIO Choice 2016

Knowledge Partner

Kunal Pande
Partner, IT Advisory,
Management Consulting
KPMG India

It has been an eventful association as knowledge partner with CIO Choice over the past three years, being involved right from the conceptualisation of the theme to the present day. Along the way it has been a pleasure to deliberate, interact and associate with a number of representatives from both the CIO community and technology vendors. The format itself has been a very strong enabler in the sharing of ideas, practices and trends, which has been beneficial to all. I strongly believe that as technology increasingly plays an important role in our lives and businesses, CIO Choice will continue to grow stronger in the years to come.

Inspiring. Inclusive. Innovative.

Mr. Apurva Boradia, CEO, and Mr. Nagin Kothari, CFO, 9A Business Connect Pvt. Ltd.,
receiving the recognition trophy
From Mr. Girish Kulkarni, Board Member, HIMSS Asia Pacific India Chapter, and
Mr. Ajay Bakshi, Senior Vice President, Business Transformation, Aegis Ltd.

Analytics Services
(Small Medium Enterprise)

“At CIO Choice 2016, 9A Business Connect Pvt. Ltd. won the recognition amongst tough contenders in the space of Business Analytics Services. In this unique forum CIOs vote for innovative solution providers who are their preferred choice of vendors and technology providers across multiple categories, that help their organisations in business transformation. The Red Carpet Night is the most powerful networking ICT event in the country. This evening is a holistic effort to strengthen the relationships between CIOs and ICT vendors within India.”

Mr. Apurva Boradia, CEO, 9A Business Connect Pvt. Ltd.

We provide innovative and inspiring IT solutions by unlocking the power of Analytics, Social Media, Mobility and IT Infrastructure, which enable our customers to achieve the 4Ps:

Productivity	Profitability
EmPowerment	Performance

As customers are moving towards enterprise-wide BI from niche or departmental analytics, it becomes imperative to consider BI as an inclusive and integral part of strategic business instead of as another IT Initiative.

Possible Customer Challenges

With diversified business portfolio and unpredictable customer behaviour, it's critical for organisations to create value rather than just volume and market share. The current MIS system or Excel-based reporting do not provide answers to the following challenges:

- How to get deep Business Insight for fast growing big data
- How to expand revenue stream from existing services and offerings
- How to forecast demands and meet dynamic customer expectations
- How to deploy new business models for new revenue streams
- How to get real time analysis of Sales, Operation and Financial performance
- How to unify functional, departmental and customer data points
- How to anticipate disruption of services and supply
- How to empower end users and create self service
- Intuitive visualisation and mobility
- Exception handling with alerts and notifications
- Automated reports instead of manual MIS

9A Approach and Solution

Our enriched expertise helps customers solve their critical business challenges and achieve the following:

- Create value from volume, variety and velocity of data
- Bring transformation and agility
- Decision-making and actionable Insight at the right time
- Optimise, predict and prescribe
- Unify customers, channels, products and operations
- Enhance productivity, turnaround time and performance
- Optimise processes and systems for responsive analysis
- Integrate departments, functions and discrete data points
- Self service and collaboration

9A Success Story

9A has successfully deployed BI and Analytics solutions for some leading enterprise customers from diverse industry segments like:

- | | |
|-----------------------|-------------------------|
| • Tours and Travel | • Hospitality |
| • Automobile | • Manufacturing |
| • Logistics | • BFSI |
| • Chemical and Paints | • Pharma and Healthcare |
| • IT and ITeS | • Education |

Mr. Vikram Kole, Vice President, Sales, Datamatics Global Services Ltd,
receiving the recognition trophy
from Mr. Kishore Daryanani, CIO, Alfa Laval, and
Mr. Milind Khamkar, Group CIO, Super Max.

Business Intelligence
(Large Enterprise)

Datamatics, a trusted partner to several Fortune 500 Companies, is a global provider of Information Technology and Business Process Outsourcing and Consulting Services. Datamatics specialises in providing enterprise data and information management solutions. The company leverages innovations in technology, knowledge of business processes, and domain expertise to provide business aligned next generation solutions. These solutions provide support through the entire life cycle of 'Data to Intelligence' and helps transform data into business insights.

Datamatics' offerings span varied business processes that transcend Enterprise Document Management, Enterprise Content Management Solutions, Collaboration and Portal Solutions, Managed Services, BI and Analytics and Mobility space.

BI Solution

Datamatics' nSights is an award winning BI platform that provides business insights through self-service and analysis ready data-visualisation framework. nSights built on In-Memory computing enables organisations to deploy an effective 'Enterprise-Wide' BI strategy with an easy-to-deploy Hybrid Architecture.

nSights with its multiple business user interfaces helps discover hidden patterns in data through centralised data governance, data security, flexible data exploration and DIY 'slice and dice' analytics. Users can perform swift analysis of their data—anywhere, anytime.

“Underlying every business insight is data and this data is growing exponentially. This is forcing enterprises to integrate new technologies while finding new ways to use data and insights as a competitive advantage. We help our enterprise customers enhance their business productivity through smart automation of data driven processes. The Datamatics team has the expertise and experience to walk its clients through their Data-to-Intelligence journey; from Data Collation to Data Management; Analytics to extracting Intelligence from Enterprise Data. Datamatics' nSights suite is designed to help enterprise customers discover actionable business insights from obscure data.”

*Mr. Rahul L. Kanodia, Vice Chairman and CEO,
Datamatics Global Services Ltd.*

receiving the recognition trophy
from Mr. Nilesh Khanolkar, Vice President - IT, IL&FS, and
Mr. Prasad Pudipeddi, National Manager IT, Hafele India Pvt. Ltd.

Business Technology
Research And Consulting
(Small Medium Enterprise)

“2016 will be a critical year for companies to improve their ability to serve digitally savvy, empowered customers. To thrive in the age of the customer, CIOs need to embrace the BT agenda – systems, processes, and technologies to win, serve, and retain customers. We are honoured to receive this recognition from the CIO community in India as it validates the value Forrester provides to business and technology leaders in leading the BT agenda for customer-obsession transformation.”

Mr. Mukesh Jain, Country Manager, Forrester Research Inc.

Forrester is one of the most influential research and advisory firms in the world. We work with business and technology leaders to develop customer-obsessed strategies that drive growth. Forrester’s unique insights and frameworks are grounded in annual surveys of more than 500,000 consumers and business leaders worldwide, rigorous and objective methodologies, and the shared wisdom of our most innovative clients. Through proprietary research, data, consulting, events, and exclusive executive networks and programs, the Forrester experience is about a singular and powerful purpose: to challenge the thinking of our clients to help them lead change in their organisations.

Given the trends in technology, business models, and customer market power, Forrester believes that all enterprises must undertake a business technology (BT) agenda that applies technology, systems, and processes to win, serve, and retain customers.

FORRESTER RESEARCH | CIOs

The Age Of The Customer Shifts The Focus To Business Technology

The CIO Mandate: Engaging Customers With Business Technology

	IT	BT
Who	Employees <i>Policy coerces practice.</i>	Customers <i>Value entices engagement.</i>
What	Business processes <i>Defined by legal conventions</i>	Customer patterns <i>Driven by customer data</i>
Where	End-to-end control <i>On-premises simplifies securing.</i>	Integrating zones of authority <i>Cloud simplifies sharing.</i>
How	Risk reduction <i>Waterfall methods limit exposure.</i>	Value generation and speed <i>Agile methods co-create options.</i>
When	Asset-based business model <i>Governance by fiat</i>	Services-oriented business model <i>Governance by outcomes</i>

Mr. Sandip Kumar Panda, CEO and Co-Founder, and
Mr. Prashanth Guruswamy, Head - Sales, InstaSafe Technologies Pvt. Ltd.,
receiving the recognition trophy
from Mr. Thomson Thomas, Senior Vice President - IT (CIO), HDFC Standard Life Insurance, and
Mr. Rajiv Rajda, Vice President Information Systems, Kodak India Pvt. Ltd.

InstaSafe Technologies (www.instasafe.com) is a leading cloud based Security-as-a-Service solution provider delivering comprehensive and uncompromising protection to mobile and remote workers enabling them to safely and securely access enterprise apps, email and Web from anywhere on any network.

InstaSafe Web Security (IWS) offers a hardware free, cloud-based security solution that is easy to deploy and manage, is scalable and helps you control your bandwidth consumption while protecting your organisation from Web threats. With IWS you get instant deployment and zero maintenance with predictable costs.

InstaSafe's flagship product, InstaSafe Secure Access (ISA), offers a hardware free, zero configuration, self-service style, fully redundant, Security-as-a-Service solution that can be deployed in minutes and scaled instantly as per customer requirement. ISA removes the need for expensive hardware, skilled manpower and constant updates to deliver enterprise level security in a subscription based annual pay-as-you-grow licensing model.

Instasafe is deployed in over 20+ Indian organisation with over 5,000+ end points in customers such as Asian Paints, Pidilite Industries, Salarpuria Sattva, DTDC, SpotOn Logistics, Koovs.com and many more.

"We are elated to receive the 2016 CIO Choice Award and humbled by the CIOs' recognition for the second time in a row! This award is a reiteration of our strength and focus on cloud security, and validates the need for a simple and flexible solution to address the security needs of clients by harnessing the power of the cloud."

*Mr. Sandip Kumar Panda
CEO and Co-founder, InstaSafe*

Mr. Harvinderjit Bhatia, Chief Financial Officer and Director,
Mr. Shriranga Mulay, Senior Vice President - IT Engineering, and
Mr. Rajesh Tapadia, Senior Vice President and Head – Solutions Engineering and Bids, Netmagic Solutions Pvt. Ltd.,
receiving the recognition trophy
from Mr. Rajendra Prabhakar Deshpande, CIO, Serco Global Services, and
Mr. Umesh Mittal, Group Head-IT, Alchemy Capital Management Pvt. Ltd.

Cloud Storage (Small Medium Enterprise)

“Firstly, I’d like to thank the CIO community for their trust and support. As one of the pioneering cloud service providers in India, we’ve worked hard to bring the latest global technologies to our customers. Our Cloud Storage service is a manifestation of this approach as we deliver a durable, scalable and available solution that is tailored to enterprise needs.”

*Mr. Karan Kīrpalani, Associate Vice-President,
Netmagic Solutions Pvt. Ltd.*

With Netmagic’s SimpliDrive, enterprises can benefit from a highly redundant, massively scalable, widely distributed and secured object storage solution. The service delivered using known Web browsers allows enterprises the freedom to download, move or upload data from end point devices to secured containers. Architected using Open Stack Swift, SimpliDrive is built using Enterprise Grade hardware to ensure quality service. It doesn’t end there, as the solution includes competitive assurance on data durability and data availability.

What makes Netmagic’s Cloud Storage, SimpliDrive the CIOs’ Choice?

- Full role-based access control and authentication for your users.
- Standard https protocol, upload, download, copy, move, rename or delete objects, and sizing anything from 1 KB to 5 GB over the Internet.
- Upload, move or download any amount of data.
- Container level Access Control Lists (ACL).
- 99.99999% data durability SLA.
- 99.99% service availability in a calendar month.

About Netmagic

Netmagic, an NTT Communications company, is India’s leading Managed Hosting and Cloud Service Provider, with 9 carrier-neutral, state-of-the-art data centres and serving more than 1500 enterprises globally. A pioneer in the Indian IT Infrastructure services space—it was the first to launch services such as Cloud Computing, Managed Security, Disaster Recovery-as-a-Service and Software-Defined Storage. Netmagic also delivers Remote Infrastructure Management services to NTT Communications customers across the Americas, Europe and Asia-Pacific region.

Netmagic is India’s only IT Infrastructure services provider to be PCI DSS certified for its entire suite of services. It is also the first cloud service provider in India and in the world to receive the CSA STAR certification for Cloud Capability Maturity Model (CCM) version 3.0.1, an industry benchmark for the specific security requirements of multi-tenant service providers. Besides this, Netmagic is also empanelled as an IT Security Auditing Organisation with CERT-In (Indian Computer Emergency Response Team).

About NTT Communications Corporation

NTT Communications provides consultancy, architecture, security and cloud services to optimise the information and communications technology (ICT) environments of enterprises. These offerings are backed by the company’s worldwide infrastructure, including the leading global tier-1 IP network, the Arcstar Universal One™ VPN network reaching 196 countries/regions, and 140 secure data centres worldwide. NTT Communications’ solutions leverage the global resources of NTT Group companies including Dimension Data, NTT DOCOMO and NTT DATA.

Mr. Vijay Sharma, Vice President CDN Sales, CtrlS Datacenters Ltd.,
receiving the recognition trophy
from Mr. Rajendra Prabhakar Deshpande, CIO, Serco Global Services, and
Mr. Umesh Mittal, Group Head - IT, Alchemy Capital Management Pvt. Ltd.

Content Delivery Network (Large Enterprise)

“We are deeply honoured and proud to be receiving the CIO Choice recognition for the fourth year in a row. At CtrlS we have always believed in innovations to address the most critical challenges faced by customers—our CDN product is one such innovation. I am absolutely delighted to note that our Made-in-India offering CtrlS Content Delivery Network (CDN) has been bestowed the recognition. We would like to extend our sincere thanks to all the CIOs and customers who have rendered constant support, without which this recognition wouldn’t have been possible. This recognition also stands as a testimony to our R&D team’s effort, diligence and patience with which they worked towards building India’s first Content Delivery Network (CDN). We thank the CIO Choice management and jury for the honours.”

Mr. Sridhar Pinnapureddy, Founder and CEO, CtrlS Datacenters Ltd.

CtrlS CDN is an indigenously developed Make In India Content Delivery Network with over 170 PoPs (Edge Servers) across the globe. CtrlS CDN is a well connected system of server through the Internet that helps deliver Web content rapidly to numerous end users across worldwide geographies by duplicating (caching) the content on multiple servers and directing the content to users based on proximity to the users. CtrlS CDN ensures high levels of user experience through faster delivery of content without compromising quality—this is achieved by reducing latency and the ‘jitter’ or buffering that is seen when streaming audio or video, thereby enhancing the user experience, besides providing redundancy.

The CtrlS CDN Highlights

- 170 Points of Presence (PoPs) across the globe
- 18 Domestic PoPs in India
- Large concentration of edge servers
- Key locations with high Internet traffic
- High computing and caching at each PoP
- Intelligent storage, load balancing, caching, routing technology

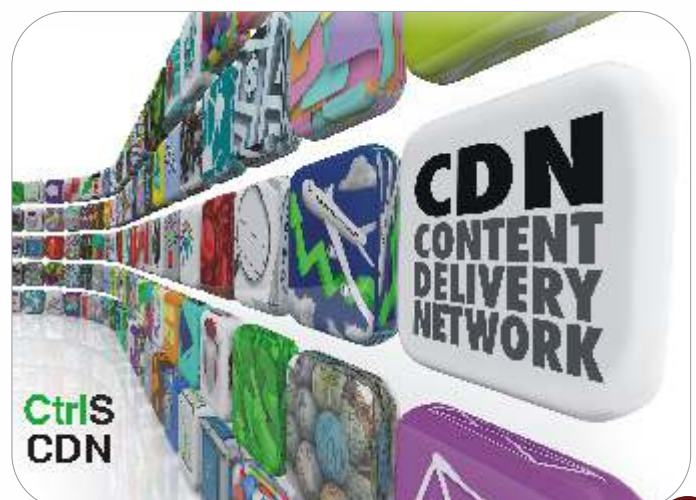

CtrlS CDN Salient Features

- HTTP object delivery
- Large file delivery (software and game downloads)
- Reporting and analytics
- Website and application acceleration
- Front end optimisation
- Dynamic content
- Live event streaming
- Multicast support

- Real-time traffic analytics
- Stream prioritisation
- Mobile delivery multi-device support
- Universal URL formatting
- Mobile ad insertion
- Content management
- Content control
- Dynamic page publishing
- Digital rights management

CtrlS CDN Benefits

- Faster acceleration
- Anytime deployment
- Highly secure CDN network
- Robust fault tolerant network
- 24X7 Support
- Customised pricing

Mr. Manish Gupta, Director, Enterprise Solutions, Dell India,
receiving the recognition trophy
from Mr. K.R.C. Murty, Vice President - Chief Technology Office, Deutsche Bank, and
Mr. Muralidharan Ramachandran, Vice President and Head - Quality Assurance, Syntel Ltd.

Converged Infrastructure (Large Enterprise)

“IT teams are under constant pressure to roll out services in the time required by the business, enable business growth and motivate innovation. Dell’s strategy is to deliver the value of an integrated system by eliminating third-party dependencies to drive customer outcomes by reducing complexity to help IT deliver more efficient and agile applications.”

Mr. Manish Gupta, Director Enterprise Solutions Group India, Dell India

Tailor Infrastructure to Your Workloads

Drive innovation, reduce costs and prepare your enterprise for the future with scalable, flexible convergence. Pair the right unified management system with the right converged platform to implement the right solution, and create an agile, future-ready infrastructure that enables you to:

- Accelerate your time-to-market with minimal downtime.
- Efficiently respond to business demands and simplify administration without compromising domain-level control.
- Reduce your total cost of ownership and enhance the lifetime value of your investments.

Dell converged infrastructure solutions promote superior ease of use and unrivaled flexibility, allowing IT to spend more time focusing on strategic business initiatives.

Nihilent
creating ideas

Mr. B. Ravi Teja, Vice President, Global Consulting Businesses, Nihilent Technologies Ltd.,
receiving the recognition trophy
from Mr. Pankaj Bhargava, CIO, Pidilite Industries Ltd., and
Mr. Meheriar Patel, Chief Technology Officer, The MobileStore Ltd., Essar Retail.

Customer Relationship Management (CRM) (Large Enterprise)

Nihilents CRM Service Offering

Nihilent CRM vision enables businesses to achieve one of their toughest goals - "To Know the Customer". Realising this fact, Nihilent has designed its Microsoft CRM strategy to adopt innovative customer management processes to reduce costs and increase profitability. Integration with various touch points helps consolidate the information from all touch points within an organisation as well as social feeds to give a 720-degree view of customers in real-time. This allows businesses to define their strategy based on various parameters captured in CRM, and make quick, yet informed decisions on everything from cross-selling and up-selling opportunities to marketing strategies to competitive positioning tactics.

What Nihilent Offers

Nihilent offers a comprehensive range of tailored services, beginning with an advisory role in helping define innovative customer management processes, identifying the best CRM for the business for leveraging out of box functionalities in line with business models.

Core Nihilent offerings

- CRM strategy and roadmap consulting
- CRM implementation and production rollouts
- CRM marketing, sales and service automation
- Implementation of CRM on mobile
- Social CRM Implementation and roadmap consulting
- Cloud-based CRM solution
- Full-fledged template driven data migration services
- 24x7 application support and maintenance

- ITIL compliant services
 - Expertise across various industry verticals and horizontals
- The following further bolsters Nihilent's capabilities: Centres of Excellence, Innovation Labs, Strategic Partner Network, Solution Platforms and Solution Accelerators. Integrating the strategic transformation of processes, capabilities and technologies, our methodology ensures the optimum mix of enhanced agility, reduced Total Cost of Ownership (TCO) and maximum Return on Investment (ROI)

The benefits of Nihilent's CRM strategy implementation:

- Better customer management
- Accelerated customer acquisition process
- Identification of cross-selling opportunities
- Creation and tracking of multiple customer touch points
- Enabled mobile access and Web portals for customer self service
- 720 degree view of the customer
- Customer segmentation and analytics
- Automated business processes to reduce manual intervention
- Streamlined customer-centric processes
- One master system to deal with all customer aspects

Building intelligence into CRM

Applying machine learning to prospect and customer data, Nihilent helps organisations predict prospect and customer behaviour for more focussed, effective marketing and sales. Our innovative ML models build intelligence into Microsoft Dynamics CRM providing:

- Continuous improvement in marketing and sales with data-based predictions of customer behaviour.
- Enriched prospect and customer profiles, combining relevant internal and external data sources to improve buying decision predictions.
- Improved effectiveness for both marketing and sales by offering the right product to the right prospect at the right time.

"The CIO Choice recognition is indeed a very valuable acknowledgment of Nihilent's strong capabilities in the CRM space. In the digital world, where having a 720 degree view of the customer is imperative, it is all the more important to go beyond traditional CRM. While we continue to implement Siebel, MS CRM, Salesforce.com among other CRM products, we have gone a step further in the area of customer centricity. Nihilent has launched two key patents, one, a framework for customer loyalty evaluation, called 14Signals, and another related to digital strategy creation and execution. A digital approach to customer relationship management is the order of the day, and I'm confident this prestigious award will help us get into a dialogue with more users."

*Mr. Ravi Teja, Vice President, Global Consulting Businesses,
Nihilent Technologies Ltd.*

Mr. Indrajit Belgundi, Latitude PLM –APJ, Dell India,
receiving the recognition trophy
from Mr. Rajesh Saboo, Head - IT Services, Future Group, and
Mr. Jayant Magar, CIO, AMW Motors.

Data Centre Consultant
(Large Enterprise)

Transform Your Data Centre With Confidence

As IT environments become more complex, you grapple with escalating data centre costs, growing server sprawl, and excessive time-to-market for infrastructure-dependent applications.

Couple that with explosive data consumption and the rise of cloud, converged technologies, and mobility, and it becomes a CIO's nightmare.

With Dell consulting services you can move forward with confidence. Take advantage of Dell's experience to:

- Optimise and consolidate servers, storage and applications.
- Transition to a cloud platform and modernised infrastructure.
- Address time-sensitive goals around mergers, acquisitions and divestures.
- Examine facility and infrastructure resilience.
- Identify and minimise vulnerabilities.

“The evolving complexities of today’s IT environment poses a challenge in achieving business objectives, mitigating risks and improving efficiency. We have designed Dell Data Centre Transformation Services to tackle these complexities from three critical angles—people, processes and technology—to enable intelligent data centres that will deliver higher efficiency, flexibility and elasticity.”

Mr. Bobby Mon, Director Sales, Global Support and Deployment Services, Dell India

Mr. Swarup Das, General Manager - Telecom, Co-location, Banking and Finance, and
Mr. Anuj Kudesia, General Manager - IT Business Unit, Schneider Electric IT Business India Pvt. Ltd.,
receiving the recognition trophy
from Mr. Rajesh Saboo, Head - IT Services, Future Group, and
Mr. Jayant Magar, CIO, AMW Motors.

Data Centre Infrastructure Management (Small Medium Enterprise)

“This is a very prestigious recognition for Schneider Electric’s effort in the DCIM space. We acknowledge this award as symbol of customers trust on Schneider Electric Solutions”.

Mr. Nikhil Pathak, Vice President and Country General Manager - IT Business India and SAARC, Schneider Electric India

Schneider Electric DCIM solutions through customisable Web Services and StruxureWare for Data Centres makes it possible for the mechanical, IT, and electrical spaces to communicate with devices. Because of this, independent business units can easily share relevant data across the DCIM suite, allowing them to gain intelligent and actionable data on their specific domain. And because the Web services also allow StruxureWare for Data Centres to communicate with other StruxureWare suites and portals, as well as third party IT, BMS, and management systems, StruxureWare for Data Centres can always access and use the data you need.

The DCIM solution helps manage complex IT to cutting enterprise-wide energy and operating costs, the solution helps customer address data centre challenges and simplify operations with StruxureWare™ for Data Centres software. StruxureWare is an advanced data centre infrastructure management (DCIM) suite that gives end-to-end visibility to optimise, operate, and manage data centre from rack to row to room to building.

StruxureWare for Data Centres software provides a simple, integrated experience for many users and groups who manage both the facility and IT infrastructure environments, as well as executives who depend on their company’s data centre to provide business value. Not only does the software suite streamline operational efficiencies, it enables intelligent energy management for real OpEx savings. StruxureWare for Data Centres software applications are unified across three levels to give the right information to the right users at the right time: With its capability of communicating with building, enterprise and network management systems, DCIM optimises energy and cost efficiencies and aids in short - and long-term planning and provisioning of data centre equipment and resources.

Make informed data centre decisions

With the ability to integrate with both Schneider Electric and third-party equipment throughout the data centre physical infrastructure, Data Centre Operation bridges the gap between IT and facilities by providing complete visibility for proactive monitoring, streamlined management, and system control down to the server level.

Supports business planning

This application supports data centre business processes and strategic

decision-making by allowing stakeholders to manage data centre assets, operational costs, and capital costs. It removes historical management silos and helps to create energy awareness across the entire data centre physical infrastructure.

This visibility enables informed decision-making from a ‘building-to-server’ perspective, which can be enhanced by product modules and enhancement options to scale to specific user requirements and flexibly meet business needs.

Analysis, optimisation and operations

Data Centre Operation enables vendor-agnostic inventory management with real-time device failures and data shown within your data centre physical layout, as well as recommendations on how to resolve issues.

- > Extends the life cycle of the data centre through optimisation of power, cooling, network and space capacities.
- > Provides dynamic cooling optimisation and intelligent control.
- > Reduces IT system energy usage through in-depth optimisation of server utilisation for increased data centre performance.
- > Easily track and execute moves, adds, and changes of equipment in the data centre through the workflow management tool.
- > Software only server access and power cycling for remote management.
- > Rack-level power capping for an optimised performance of server applications.
- > Intelligent PUE/DCiE analytics at subsystem level.

Mr. Shreesh Patwardhan, CIO and VP (IT), Dynamic Logistics.

**Data Centre
Managed Services Provider
(Large Enterprise)**

Data Centre Managed Services have remained a critical part of Netmagic's service suite since its inception. It has amassed a rich experience of catering to the unique technological requirements of the Indian enterprise, helping enrich and refine the Managed Services portfolio. Netmagic has consistently helped enterprises ensure availability, performance and compliance of their IT environment. At any given time, our experts are monitoring your IT infrastructure, using enterprise grade tools, proactively identifying and fixing faults before they impact your business. The entire range of Managed Services spans elements of Servers, Virtualisation, Network, Security, Database, Storage and Backup, Applications, and Middleware.

What makes Netmagic's Managed Services the CIOs' choice?

- Focussed on Core Competency of Data Centre Infrastructure Support.
- Nimble organisation with sound financial backing of NTT.
- Access to senior leadership at Netmagic.
- Unparalleled reach through NTT affiliates globally
- Strong capabilities in engineering and product innovation.

"We're humbled and equally delighted to receive this recognition. Data Centre Managed Services is a category where we've worked very hard to bring high quality services to our customers. And now with our parent organisation, NTT Communications, we've brought in premium data centre services under the NexCentre brand. I take this recognition as an acceptance of the path we've taken as one of the pioneers in data centres in India. We thank the CIOs for voting for us and hope that they will continue to support us as we strive to deliver greater value through our services."

Mr. Sharad Sanghi, MD and CEO, Netmagic

Mr. Roopesh Kumar, General Manager – Data Centre Build, and
Mr. Sreejith Gopalakrishnan, General Manager – Data Centre Operations, Sify Technologies Ltd.,
receiving the recognition trophy
from Mr. Prasad Parab, Manager - Infrastructure Services, SIRO Clinpharm Pvt. Ltd., and
Mr. Shreesh Patwardhan, CIO and VP (IT), Dynamic Logistics.

Data Centre Transformation Services (Large Enterprise)

“These recognitions for Sify’s Managed Network Solutions, Data Centre Transformation Services and Integrated Data Centre Services are testimony to the individual strengths of Sify’s ICT offerings. Coming from our peers, it is a huge vindication of the Sify 3.0 success stories”

Mr. Kamal Nath, CEO, Sify Technologies Ltd.

Sify is among the largest integrated ICT Solutions and Services companies in India, offering end-to-end solutions with a comprehensive range of products delivered over a common telecom data network infrastructure reaching more than 1,300 cities and towns in India. This telecom network today connects 38 data centres across India including Sify’s 6 Tier 3 data centres across the cities of Chennai, Mumbai, Delhi and Bangalore.

A significant part of the company’s revenue is derived from Enterprise Services, comprised of telecom services, data centre services, cloud and managed services, applications integration services and technology integration services. Sify also provides services that cater to the burgeoning demands of the SMB community, much of it on its cloud services platform.

Sify has an expanding base of Managed Services customers, both in India and overseas, and is India’s first enterprise managed services provider to launch a Security Operations Centre (SOC) to deliver managed security services. The software team develops applications and offers services to improve business efficiencies of its current and prospective client bases. Sify also offers services in the specialised domains of eLearning, both in India and globally.

Data Centre Transformation Services

Sify’s Data Centre Transformation Services is a bouquet of services for clients who are in an optimisation mode from technology, cost and efficiency perspective across Data Centre Assets.

While the larger endeavour is to migrate them to our cloud platform or co-locate them to our data centres, the granular components would be a seamless migration of the entire compute-storage-network-security apparatus with next to no downtime. The world class service rendered by our experts across all areas, transforms our customers’ existing operating model absolving them of non ICT multi-vendor management and SLA based ICT infrastructure management. This helps to mitigate multi-point deficiencies in skills and resources and technology obsolescence.

Given the pan-India network infrastructure in place, clients get the additional benefit of migrating to a cohesive network and DC infrastructure, topped with the benefit industry-leading application and security services.

Mr. Indrajit Belgundi, Latitude PLM- APJ, Dell India,
receiving the recognition trophy
from Mr. Girish Rao, Head - IT and Business Analytics, Marico Ltd., and
Mr. Sabyasachi Chakraborty Thakur - Head IT, Century Plyboards India Ltd.

Desktop Virtualisation (Large Enterprise)

Desktop Virtualisation

Empower your people and IT with secure, reliable desktop virtualisation. Protect vital content, support a vast array of clients and efficiently manage desktops and remote offices for your workforce. For secure, easy-to-manage, scalable desktop virtualisation, rely on Dell cloud client-computing. Only Dell offers an end-to-end virtual desktop infrastructure (VDI) solution designed to transform your data centre.

- Simplify VDI planning, deployment and management.
- Enable BYOD and securely deliver any Windows application to any user on any device.
- Add energy-efficient, award-winning Wyse thin clients and software to suit your budget, application and performance requirements.

Assemble your own solution, customise with Dell Blueprints or let Dell experts do it all for you.

“The complexities of virtualisation often overshadows its virtues. In my opinion, for a (VDI) solution to be successful and well accepted, customisability and adaptability to suit existing infrastructure, application and performance requirements is a must, and Dell truly offers it.”

*Mr. Santosh Pandey, Country Manager,
Dell Cloud Client Computing, Dell India*

Mr. Vikram Kole, Vice President, Sales, Datamatics,
receiving the recognition trophy
from Mr. Girish Rao, Head - IT and Business Analytics, Marico Ltd., and
Mr. Sabyasachi Chakraborty Thakur, Head IT, Century Plyboards India Ltd.

Document Management (Large Enterprise)

“Document Management Solutions (DMS) are used by companies of all sizes to effectively manage ever growing repositories of data and documents. Datamatics has developed several proprietary products to help enterprises take charge of their knowledge assets including both structured and unstructured data, while reducing the manual efforts and increasing efficiency. Datamatics’ workflow based smart document automation solution is easily customisable with many more components like indexation, archival, retrieval and tracking, etc. And all these are designed to work smoothly with other systems.

Datamatics’ smart document processing solutions have helped several leading organisations across the world to enhance the efficiency of their document-intensive processes by leveraging intelligent automation technologies to derive business benefits such as cost savings, improved quality, scalability and faster TAT. ”

**Mr. Rahul L. Kanodia, Vice Chairman and CEO,
Datamatics Global Services Ltd.**

Datamatics, a trusted partner to several Fortune 500 Companies, is a global provider of Information Technology and Business Process Outsourcing (BPO) and Consulting services. Datamatics specialises in providing enterprise data and information management solutions. The company leverages innovations in technology, knowledge of business processes, and domain expertise to provide business aligned next generation solutions. These solutions provide support to global clients through the entire lifecycle of Data to Intelligence and help them transform data into business insights.

About Datamatics IP Assets

iQ is an intelligent document processing platform that leverages artificial intelligence, image topography analytics, fuzzy logic, pattern recognition and business algorithms to intuitively identify and efficiently digitise any form or type of document in a fraction of the time with little or no manual intervention.

ePM Enterprise process management platform is a flexible workflow management system that enables information auto-routing, real-time information access through secure profile-based authentication and SaaS-based document submission and tracking.

iDART is an intelligent archival management tool to efficiently consolidate, archive, retrieve, index, version and track a wide variety of digitised business documents. It seamlessly manages both structured and unstructured business documents with options to host on Cloud/SaaS/intranet.

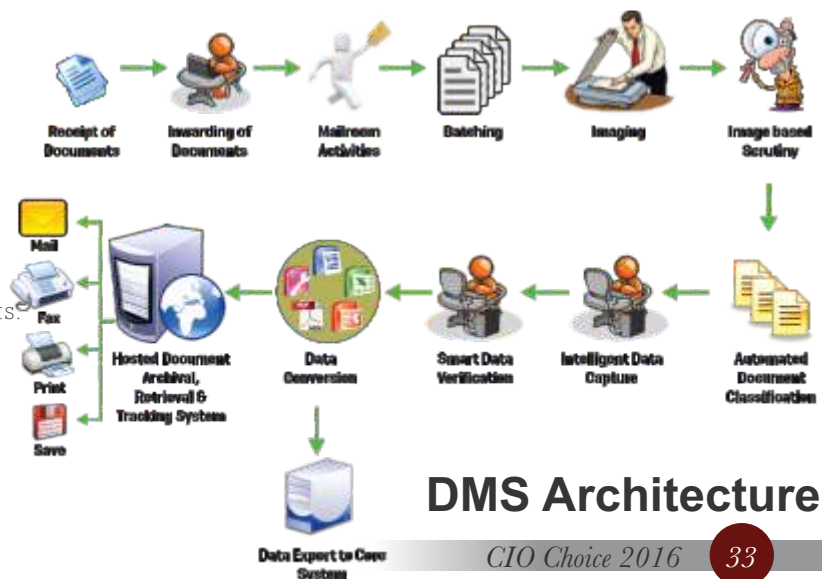

iMASK is a comprehensive and powerful data masking solution that uses intelligence to identify, assess and

redact blocks of information from documents. It is specifically designed to mask sensitive data while processing or outsourcing both structured and unstructured documents.

DMS Business Benefits

- Enhanced accuracy of over 99.9%
- Improvement in turn around time by up to 50%
- 70% reduction in manual effort
- 60% reduction in operating costs
- Easy scalability to meet growing business needs
- Seamless integration with ERPs, databases and workflow
- Improved regulatory compliance
- Easier retrieval
- Better collaboration
- Better backup and disaster recovery

Datamatics’ offerings span varied business processes that transcend Enterprise Document Management, Enterprise Content Management Solutions, Collaboration and Portal Solutions, Managed Services, BI, Analytics, and Mobility space.

DMS Architecture

CIO Choice 2016

Mr. Sunil Gupta, Executive Director and President, and
Mr. Shriranga Mulay, Senior Vice President - IT Engineering, Netmagic Solutions Pvt. Ltd.
receiving the recognition trophy
from Mr. Bhavesh Lakhani, Chief Technology Officer, DSP Black Rock Investment Managers, and
Mr. Dhandapani Ganapathy, Chief Information Officer, TVS Motors.

Disaster Recovery As A Service
(DRaaS)
(Large Enterprise)

Disasters always arrive unannounced. Any CIO would like nothing more than to be prepared for each and every circumstance. But investing in a comprehensive disaster recovery solution can put a huge strain on already thin resources. That's where Netmagic's DR-as-a-Service comes into play. It helps in aligning DR infrastructure with the organisation's recovery time and recovery point objectives.

Enterprises can deploy DR on Physical, Private Cloud or Public Cloud. Netmagic's DR-as-a-Service has multi-tenancy capabilities and comprehensively covers the DR lifecycle making it the leading management solution to enable hybrid DR deployments.

What makes Netmagic's DR-as-a-Service the CIOs' choice?

- Reduces the time and expertise required to provision new DR solutions; out-of-the-box DR signatures enable reliability and DR best practices.
- Deploys and manages DR solutions for a heterogeneous environment.
- Provides customers with the ability to offer high-value services that require stringent SLAs.
- Reduces time and operator error, making application recovery more predictable.
- Dramatically reduces time and resources required to conduct DR drills, resulting in scalability in the number of drills, with lesser resources.
- Manages DR services for multiple subscribers using a single window management console.
- Allows enterprises to offer pay-per-use DR functions to their businesses.

"This CIO Choice recognition is a tremendous endorsement of Netmagic's DR-as-a-Service and of the hard work, commitment and innovative thought that has gone into building this service. The pursuit of innovation spurred us to become the first to launch DR on Cloud in India. We will continue to deliver solutions that will help enterprises prepare for disaster recovery, in a more efficient and cost effective manner."

*Mr. Rajesh Tapadia, Senior Vice President,
Head – Solutions Engineering and Bids, Netmagic*

Mr. Suhrid Shah, CEO, Maven Vista,
receiving the recognition trophy
from Mr. Shailesh Joshi, Head Corporate IT and CIO, Godrej Group, and
Mr. Kunal Pande, Partner, KPMG India.

E Procurement (Small Medium Enterprise)

“E-procurement is very critical for efficient supply chain management considering the fact that it brings visibility on the major spends of an organisation and optimises the process for superior buying decisions, leading to significant reduction in cost. Receiving the CIO Choice recognition for 2016 in this category is a big honour for our organisation and our product VENDX. I would like to thank the IT fraternity of India to whom I attribute this award.”

Mr. Suhrid Shah, CEO, MavenVista Technologies Pvt. Ltd.

MavenVista thrives on technology innovation and procurement domain experts to consistently enhance value delivery for the procurement fraternity. This culture and attitude of the organisation has resulted in MavenVista being awarded for its e-procurement platform VENDX at CIO Choice 2016. This was preceded by an earlier recognition as the Most Innovative SME in the Supply Chain domain for the year 2013.

Our solution

VENDX, the e-procurement platform from MavenVista, is offered on SaaS (Software as a Service); it needs no IT infrastructure for the software at the customer’s end. This is backed by best in breed security standards and guarantees uptime of 99.9% to customers who comprise leading Indian companies from pharma, chemical, engineering, FMCG and textile industries.

How do we ensure seamless implementation?

Backed by a highly proficient and committed project management team and procurement domain experts, MavenVista ensures timely implementation and hassle-free change management for its customers.

Experience our support

MavenVista believes this is the beginning of our journey with customers. To provide consistent delight MavenVista has one of the best standards of customer support backed by passionate professionals who thrive to ensure the highest level of customer satisfaction on a consistent basis.

VENDX- The Only all ERP compatible solution

Key USP of VENDX

- Effortless Sourcing of all Categories
- Quick Adoption & Instant ROI
- Integrity of Data
- Superior Strategies
- Timely Negotiations
- Optimum Decisions
- Huge Time Savings
- Excellent Compliance

Unique Features of VENDX

- Integrated PR to PO Landscape
- Most User Friendly User Interface
- Seamless Integration with ERP
- Synchronised Business Intelligence
- Consolidation and Track of PR
- Techno-Commercial Comparison
- Automatic Calculations of Landed Cost
- One Click Access to Historical Decisions

Mr. Mohan Chandrasekaran, Founder & CEO, AdStringO
receiving the recognition trophy
from Mr. Shailesh Joshi, Head Corporate IT and CIO, Godrej Group, and
Mr. Kunal Pande, Partner, KPMG India.

Endpoint Compression
(Small Medium Enterprise)

“adStringO’s vision is to provide easy transmission of the Last Mile Image/audio/video/PDF Capture files either through mobile or Web scanner to the enterprise server at point of capture even on low connected networks like 1G/2G. Our mission is to grow together with employees, customers and partners to become the World’s Fastest End Point Mobile and Web Capture Compression Technology Partner for small and large companies for high quality files with lowest file size, thus helping easy transmission on low connected networks.”

Mr. Mohan Chandrasekaran, Founder and CEO, adStringO

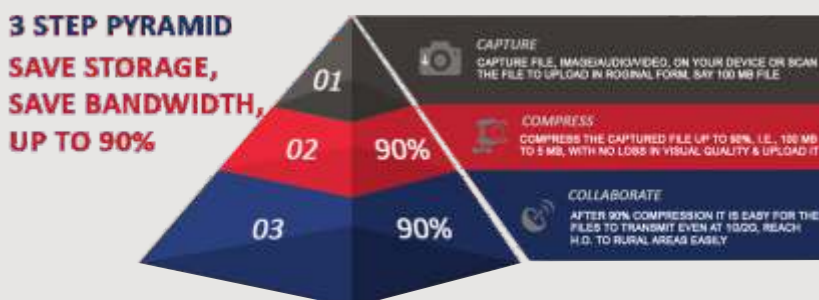

adStringO Software Pvt Ltd is dedicated to endpoint compression helping enterprises in file (image/PDF/audio-video) compression up to 96% with no loss in visual quality, in native format. We help you onboard customers with ease, even if you operate in areas with low latency, like 2G. Now, you no longer require a physical branch, even at rural areas, to service customers. A mobile equipped with adStringO software helps your sales/field guy to easily scan customer documents and upload them directly to headquarters, within minutes, from anywhere.

With adStringO endpoint compression, sales/field representatives or customers themselves can capture documents using scanners and mobiles, then compress to 1/20th the file size, i.e., up to 96% before uploading it, for faster transmission.

Usually, to activate an account/loan-passing/etc, it takes one to two weeks or sometimes even more than two weeks. With adStringO endpoint

compression coming in, this has reduced the turn around time for the exact same process to four hours, and even a few minutes in some cases. Thus, adStringO helps enterprises save on branch set-ups and up to 90% on storage and bandwidth on every single file transaction.

We offer endpoint mobile/Web capture compression technology on any given device (mobile/PC) on any bandwidth (even 2G/3G). Our solution easily integrates in to existing enterprises BPM, DMS or portal, etc, with no upgrades required.

adStringO is looking to expand its limits and venture into B2C services soon. We will soon be providing consumer applications that can run on low bandwidths across all mobile platforms in India. Post this venture, we are planning to expand our services to other countries, where connectivity is a challenge for managing data.

Focusing on the digital India vision, adStringO wants to empower rural India to become digital and join the mainstream, to avail the true benefits of the services offered by various enterprises. Thus, with this future vision we are targeting our services to BRICS nations.

Mr. Vivek Sharma, Senior Vice President, e-Commerce and Subscription Business, and
Mr. Sumit Rajwade, Vice President, Technology, Rediff.Com India Ltd.,
receiving the recognition trophy
from Mr. K.R.C. Murty, Vice President, Chief Technology Office, Deutsche Bank, and
Mr. Muralidharan Ramachandran, Vice President and Head - Quality Assurance, Syntel Ltd.

Enterprise Email
(Small Medium Enterprise)

Rediff's secure Internet platform provides an enterprise class communication suite to businesses of all sizes. The suite comprises email, rich presence, instant group messaging and CRM tool enabling effective and faster accomplishment of tasks. Rediffmail Enterprise is a secure cloud-based email solution for corporate clients.

Data security

Given the importance of email data, all email transactions are secured and the data is stored at a secure location.

Robust infrastructure with 99.9% uptime

Components in the network architecture have counterparts and an automatic switchover ensures that the enterprise service is up and running even if one of the components fails.

Access mails anywhere

A mobile app provides access to enterprise emails and is available for all popular mobile operating systems across device types.

Complete synchronisation across devices

With Internet access on multiple devices becoming a norm, users can sync mails across all devices and applications using complete mail sync.

Backup and restore

Rediff's email backup solution ensures emails are backed up as soon as they are sent or received by the user, eliminating the need for manual backups.

Advanced spam protection

An advanced spam protection mechanism keeps the inbox clutter free as only genuine mails can pass the virus checks, IP check, reverse DNS, DKIM check, content filtering, user behaviour patterns, etc. before landing in the inbox.

Data leak protection

Administrators can restrict certain users from accessing mails outside the company network or allow them to access mails only on secure channels.

Hybrid setup with on premise mailing systems

A hybrid solution combines best of both on-premise and cloud mailing solution. Users can now host some mailboxes on on-premise and rest of the mailboxes on Rediffmail Enterprise platform using the same domain.

Customer support

A dedicated account manager is assigned to every client along with technical customer support available on phone and email.

Collaboration

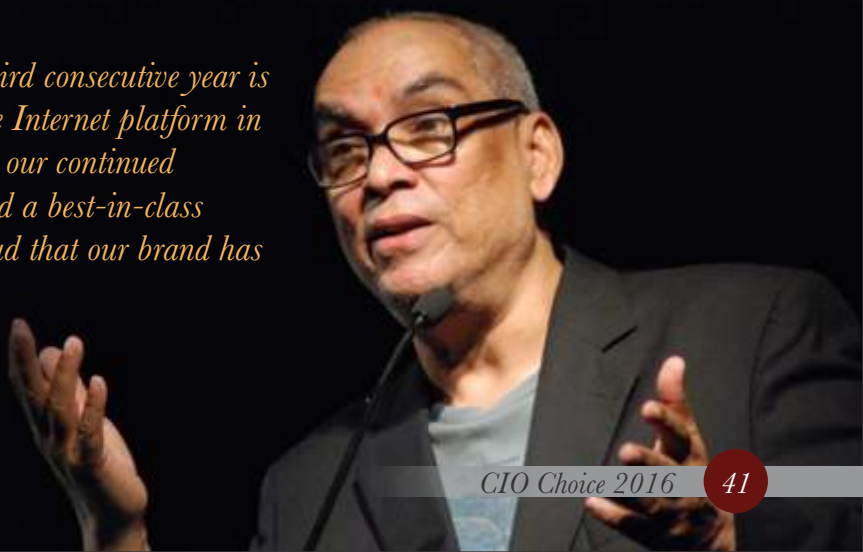

The enterprise solution provides an intra-domain chat, file sharing and newsletter system thus facilitating easy communication between employees.

Conversations

Conversations is a real-time messaging platform, making it easy and secure for users to converse on topics of common interest. Users can create Conversations on the fly and invite others to contribute. The service addresses the issue of users having to manage multiple communication threads. Conversations makes it easier for members to use the platform as multiple discussions are available for their reference in chronological order.

"Winning the CIO Choice recognition for the third consecutive year is an reaffirmation of consumers trust in our secure Internet platform in its two decades of service. We are delighted that our continued investment in our technology platform has created a best-in-class offering for our enterprise customers and are proud that our brand has again been recognised as a global player."

Mr. Ramkumar Balasubramanian, Ramkumar Balasubramanian, Fellow, DMTS, Wipro Ltd., and
Mr. Apurv Mehta, Practice Manager, Wipro Ltd.,
receiving the recognition trophy
from Mr. Rahul Mahajan, Vice President - IT, K. Raheja Corp, and
Mr. Sudesh Agarwal, CIO, Holiday Resorts Ltd.

Enterprise Infrastructure
Automation Services
(Large Enterprise)

Wipro is a market leader in providing Enterprise Automation Services. Wipro's strategy remains aligned to the market's evolution and key trends and continued to vest its interests and investments in automation to create a significant differentiator in the competition in IT Managed Services that has always been human capital centric. Wipro has built an automation framework and an IP set of tools under the trademark FixOmatic™.

FixOmatic™ Automation framework is not about being tools centric or about selling licence. Leveraging on the vast experience in IT Management Services implements the automation platform and runs the automation operations as a service that enables measurable, quantifiable benefits to the customer.

In continuation of the belief in future ready technology investments, Wipro has invested to create a platform on knowledge driven AI platform called Heuristics platform under FixOmatic Automation

framework. Wipro considers a Heuristic Knowledge and Analytics driven Approach for IT Automation that includes learning through experience, applying patterns and improving to solve certain types of problems. In short it is a type of system that can make decisions similar to human administrators.

The FixOmatic Framework provides IT infrastructure automation solutions spanning data centre, end user computing and customised engineering of automation products and services for customers' highly specific needs. The transformational solutions help achieve effort reduction by repositioning skilled resources, by reducing mean time to resolve, through process standardisation, compliance and lower cost per resolution.

The objective of Heuristics and self-healing approach is to allow a machine to respond as adaptively and flexibly as a trained expert, but operate and document as quickly as a machine.

“Automation and analytics are the weapons in a CIO's arsenal that can trigger a shift to the future state of IT infrastructure services transforming the data centre into a strategic business asset.”

Mr. Prasad Pudipeddi, National Manager IT, Hafele India Pvt. Ltd.

Enterprise Mobility
(Small Medium Enterprise)

GoDB Tech

**A Person is as fast as
their Feet can move.**

At GoDB Tech, our unwavering focus to digitise last mile business processes helps our enterprise clients on their growth path. Our clients become competitive with unprecedented levels of co-ordination and agility, when empowered in front of their customers!

Revisiting our 16-year journey—we have worked with a few Fortune 500 enterprises and leaders; partnered with a few passionate teams; failed many products to create a few successful ones; won a few awards for consistency; had a few successful category innovations..and in all made several lasting relationships in the industry.

We are what our team is—and that includes our employees, our partner network and our esteemed customers. With over 150+ business partners, we sometimes align even with our competitors with an aim towards providing the best solution. Having worked with over 350 customers in Banking, Financial Services, Insurance and Consumer Goods verticals, we understand the nitty-gritty details of extending their core as well as non-core business processes. We provide practically workable solutions for a range of mobility issues starting from the growing device fragmentation up to seamless integration with core systems like ERP, CRM, etc.

**An Enterprise is as fast as
their Fleet can move!**

GoDB Tech's solutions work even in the remotest of areas and enable organisations to increase reach. With over 500,000 enterprise deployments and growing, we connect several Enterprise last miles seamlessly to their core systems.

In fact we named our company to identify what we do—"Go" representing Mobility and "DB" represents Database that stores business information—that is, intelligence on the move.

Customers recall us as the "specialists in digitising business processes outside enterprise walls"!

About our Product(s)

GoDB is the flagship product of GoDB Tech (www.go-db.com), which is an industry standard Mobile Backend As A Service (MBaaS) that enables enterprise processes to be seamlessly digitised towards their internal and external ecosystems. The GoDB platform gives organisations a 60% jumpstart towards the overall solution, while the remaining 40% is the actual business process that is being extended.

A recent award winning product is XLApp (www.xlapp.io), which enables business teams that use Microsoft Excel for their last mile processes to directly generate mobile app for their Excell!

We are still learning each day and are passionate to solve anything related to last mile digitisation especially using mobility and cloud.

"GoDB has always been in the business of connecting the enterprise to its last mile. We started synchronising ERPs with thousands of PC ecosystem users, which has now transitioned into millions of mobile users. In the coming years we expect business processes to be linked to billions of IOT sensors. We are thankful to our client CXOs for their continued trust in our brand."

Mr. Sai Lakshmidhar, Vice President, GoDB

Mr. Raghvendra Tripathi, Chief Performance Officer, Ramco Systems Ltd.,
receiving the recognition trophy
from Mr. Thomson Thomas, Senior Vice President - IT (CIO), HDFC Standard Life Insurance, and
Mr. Rajiv Rajda, Vice President Information Systems, Kodak India Pvt. Ltd.

HR & Global Payroll (Large Enterprise)

“It is a great pride that CIOs and end-users have voted in favour of our brand and recognised us against global players. Our belief in simplicity has led us to stamp our Indian product footprint in the global market. It is truly exciting to be recognised on our home ground for our innovations. This award certainly underscores Ramco’s ability to provide a unified system for a globally diversified workforce.”

Mr. Virender Aggarwal, CEO, Ramco Systems

Part of the USD 1 billion Ramco Group, Ramco Systems focuses on innovation and culture to differentiate itself in the marketplace. We, at Ramco, are simplifying HR strategy and empowering 400+ global multinationals worldwide to automate HR transactions and drive business benefits across functions.

Ramco HCM is the most complete, yet refreshingly simple software covering the 360° lifecycle of an employee from hire to retirement. We offer Core HR, Time and Attendance, Global Payroll, Talent Management, Recruitment, Planning and Analytics. With payroll compliance across 108 countries, Ramco Payroll has the capability to address 88% of the world’s working population on a Unified Payroll platform. Ramco HCM has been evolving at a rapid pace recording growth of 109% YoY adding two new customers every week globally.

Why are we different from the rest?

- Completely organic solution designed with refreshing simplicity
- Intelligent; understands the user/purpose/situation context enabling actionable insights
- Offered on Cloud and Mobile, aligning your employees to your organisation’s goals
- Integrates seamlessly with existing enterprise business applications

Ramco has been focusing on moving towards Cognitive and Robotic ERP with features such as Mail It—a feature that enables users to transact with the application by just sending an email; HUB It—a one-screen-does-it-all concept built to address all activities of a user; and Thumb It—mobility where the system presents users with the option to choose rather than type values.

2016 has had a good start with Ramco Systems winning the CIO Choice honour and recognition in the HR and Global Payroll software category. We would like to take this opportunity to thank our customers for their continuous support and for vouching for us.

**SO COMPLETE & YET
REFRESHINGLY SIMPLE**

Mr. Sunil Gupta, Executive Director and President,
Mr. Karan Kirpalani, Associate Vice President - Products Management, and
Mr. Shiranga Mulay, Senior Vice President - IT Engineering, Netmagic Solutions Pvt. Ltd.,
receiving the recognition trophy
from Mr. Kersi Tavadia, CIO, Bombay Stock Exchange Ltd., and
Mr. Hemal Shah, Vice President - Core Products, WhatsOn India.

Hybrid Cloud (Large Enterprise)

“We’re delighted to receive this recognition and grateful to the CIO community for their support of our Hybrid Cloud services. As Cloud deployments penetrate deeper into enterprise IT infrastructures, we’ve seen the Hybrid model emerge as the most popular choice. We’ve been working closely with our customers and technology partners on many deployments, each with its own custom challenges and unique opportunities. I can say with some pride that we’ve largely succeeded in delivering to each challenge thrown our way.”

*Mr. Shriranga Mulay,
Senior Vice-President, Head - Engineering, Netmagic*

Hybrid Cloud has emerged as a preferred mode of Cloud adoption for enterprises pursuing digital transformation initiatives. With Netmagic’s Hybrid Cloud:

- Enterprises can retain their data and applications in the cloud while maintaining control over organisational network topology and policies.
- Organisations can also retain existing in-house physical infrastructure while borrowing additional resources as and when needed using the cloud.

In fact, customers subscribing to our collocation or dedicated hosting services have been able to augment existing physical infrastructure by securely provisioning additional capacity from our public cloud and pay as per usage.

What makes Netmagic’s Hybrid Cloud Services the CIOs’ choice?

- Secure and compliant environment: Ensures a secure environment through physical and network separation.
- Deploy resources on-the-fly: Get the capacity to deploy new blocks of computing power without capital investment in physical infrastructure.
- Industry leading SLAs
- Live support

Mr. A. S. Raj Gopal, MD and CEO, NxtGen DataCenter and Cloud Technologies Pvt. Ltd.,
receiving the recognition trophy
from Mr. Kersi Tavadia, CIO, Bombay Stock Exchange Ltd., and
Mr. Hemal Shah, Vice President - Core Products, WhatsOn India.

Hyper Convergence (Large Enterprise)

NxtGen is an emerging leader in data centre and cloud-based services that help in powering businesses to grow by cutting through complexity and saving on cost.

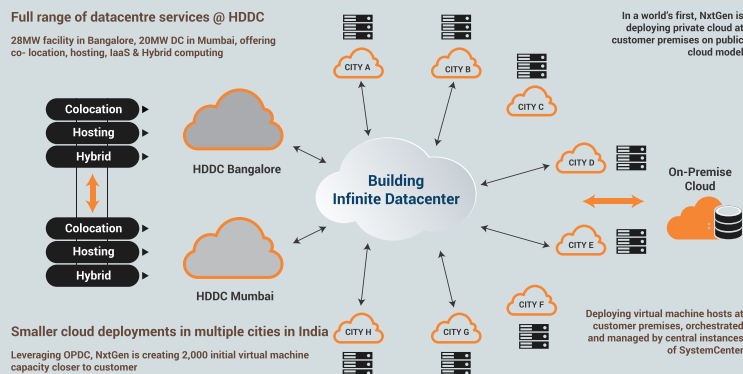

Our advanced solutions can be provided both from our own High Density Data Centre (HDDC™) facilities or deployed at On-Premise Data Centres (OPDC™) that are managed centrally.

Our Enterprise Cloud Services™ (ECS) provide private and public clouds or hybrid cloud infrastructure hosted on OPDC™ or HDDC™. NxtGen's advanced infrastructure enables companies to simplify IT infrastructure, reduce running costs, and enable business growth by creating additional capacity from existing infrastructure. By providing the right public or private infrastructure, NxtGen helps companies meet dynamic business demands.

NxtGen works with customers in their journey into the hyper-converged hybrid compute infrastructure-Infinite

Data Centre, by building a digital enterprise without owning IT infrastructure. Our approach considers customer's existing investments in IT infrastructure, specific requirements such as compliance, and enabling elasticity (grow and shrink) in IT infrastructure to work in tandem with dynamic business requirements.

With the support and trust of Intel Capital, Axon Partners and International Finance Corporation (IFC), NxtGen continues to push the boundaries of the IT infrastructure domain with its unique and cost effective solutions.

"It is an endorsement from our customers, who are grooming us to lead the hyper-convergence space. Team NxtGen's customer commitment and hand work has been recognised by CIO Choice 2016."

*Mr. A. S. Rajgopal, CEO, MD and CEO,
NxtGen DataCenter and Cloud Technologies Pvt. Ltd.*

Mr. Indrajit Belgundi, Latitude PLM - APJ, Dell India,
receiving the recognition trophy
from Mr. Ramandeep Singh Viridi, Vice President - Group IT, InterGlobe Enterprises, and
Mr. Ramesh Janarthanam, Global IT Head, Crompton Greaves.

Information Security (Large Enterprise)

“Information security is of strategic importance to any business. Poorly designed security products and protocols expose the vulnerabilities encouraging exploitation, compliance violations, low productivity and stifled innovation. Dell’s approach to security is based on simplicity, efficiency, and connectivity that tie together the splintered aspects of IT security into one integrated solution, capable of sharing insights across the organisation. It makes security simpler, so that business users can manage the rules and policies, and end users can easily comply.”

Mr. Sudharsan R., Commercial Marketing Director, Dell India

Protect, detect and respond to an ever-changing threat landscape

There's more to enterprise security than defending perimeters. We believe that an IT security strategy aligned to the needs of your business is essential to future growth and innovation. Our solutions help you:

- Protect your whole enterprise, inside and out, efficiently and proactively.
- Comply with internal governance policies and external regulations.
- Enable the adoption of new applications and technology.

We help you create and maintain a strong security foundation with interconnected solutions that span the enterprise. From the endpoint to the data centre to the cloud, Dell solutions mitigate risk and reduce complexity so you can move your business forward.

Mr. Roopesh Kumar, Head, Data Centre Operations, Sify Technologies Ltd.,
receiving the recognition trophy
from Mr. Sayed Peerzade, CIO, Reliance Entertainment-Digital, and
Mr. Prakash Dharmani, Global CIO, Essel Propack Ltd.

Integrated Data Centre Solution (Large Enterprise)

Integrated Data Centre Services

Typically, the decision to house a data centre for any organisation revolves around two parameters. Where will it be housed? What is the application layer required on it? In the case of an IT organisation, that is a given, that the organisation will house the data centre on its own premises (if it's a large organisation) or will co-locate to a non-competing partner specialising in DCs. In both cases, the demand for services does not stop with just 'space'. Organisations will require an unique set of services to overlay their data and a security cover to encompass it.

Integrated Data Centre services from Sify encompass the whole gamut of services like co-location, hosting, white labelling, even a green filed DC build. The managed services layer consists of Managed DC, Security and Network services, apart from offering Infra, Software and Platform as services.

Sify's extensive data centre capabilities are complemented by its infrastructure and expertise in connectivity and security to give enterprises and carriers a competitive edge.

Mr. Jaideep Mehta, MD - India and South Asia, International Data Corporation,
receiving the recognition trophy
from Mr. Sayed Peerzade, CIO, Reliance Entertainment-Digital, and
Mr. Prakash Dharmani, Global CIO, Essel Propack Ltd.

IT Advisory
(Small Medium Enterprise)

“We are delighted to receive the CIO Choice 2016 recognition and are humbled by the CIOs’ stamp of approval for the third time in a row. IDC brings a differentiated, quantitative and structured approach to its research and advisory services. This recognition is a strong validation of this approach by the CIO community and encourages us to deepen our capabilities and continuously build capacity.”

Mr. Jaideep Mehta, Managing Director, IDC South Asia

IDC's 3rd Platform Decision Making Methodologies

IDC India has been felicitated with the prestigious CIO Choice recognition for the third time in a row for best IT Advisory Services. The premier global provider of market intelligence, advisory services, and events for the information technology, telecommunications, and consumer technology markets, IDC delivers dependable, high-impact intelligence and advice on the future of technology, and industry adoption of technology, to help vendors, technology professionals and IT buyers make fact-based technology decisions.

With more than 1,100 analysts covering trends in more than 110 countries IDC provides global, regional, and local expertise on technology and industries. With over 50% of Fortune 500 companies using IDC's research, IDC assists IT professionals and influencers in making more effective technology decisions for business transformation, sourcing strategies and vendor management and governance.

IDC's IT advisory services are designed to ensure that IT buyer's technology purchasing and deployment decisions are optimised. IDC has

been the pioneer in developing these valuable tools and is the unmistakable leader in the industry for a rigorous, fact-based approach to facilitating IT decision making. Our mission is to turn your IT expenditures into sound investments.

The IT executive programs offered by IDC consists of a family of Advisory and Consulting programs intended to help today's time-constrained technology professionals and influencers make more effective technology decisions. The program offers actionable and timely fact-based research that will assist technology professionals and influencers in mitigating technology risks, maximising the effectiveness of IT investments, identifying, and capitalising on new opportunities and creating solutions that are aligned with the organisation's business objectives.

In the IT ecosystem, IDC tracks end users and vendors and helps them through various phases of forming their market strategy, market entry and competitive sustenance. IDC's comprehensive qualitative and quantitative analysis through its tracker programs provides accurate and timely market size, vendor shares and forecast.

Publishing 5,000 reports annually and influencing more than 10,000 CIOs through its events IDC has more than 20,00,000 end users impressions through GMS and White Papers. Our comprehensive portfolio is skillfully curated and promptly delivered to meet each individual client's customised needs. IDC believes in the inherent value of advisory focused on the "how to" of IT, which separates hype and reality and ensures delivery of true business value to our clients.

Mr. Indrajit Belgundi, Latitude PLM - APJ, Dell India,
receiving the recognition trophy
from Mr. Jagdish Lomte, Vice President IT and CIO – BTG, Thermax Ltd., and
Mr. Jayantha Prabhu, Group CIO, Essar Information Technology Ltd.

Laptop (Large Enterprise)

“It’s needs and employee desires have always been at odds with each other. The former wanting secure and manageable devices while the latter want something sleek and lightweight to travel with. Dell Latitude 7000 Series laptop will fit the bill perfectly by delivering on everything that the IT and employee want.”

Mr. Indrajit Belgundi, Director and General Manager - Client Solutions Group, Dell India

The future ready laptop that looks it

Meet the Dell Latitude 7000 Series laptop.

Beauty and brains—yes, you can have it all.

Let’s face it—in life we seem to always want it all. Is that really so bad? Is it too much to ask? Historically speaking, when it comes to technology in the work world, it is. You see, IT’s needs and employee desires have always been at odds with each other. The former wanting secure and manageable devices

while the latter want something sleek and lightweight to travel with. The problem is that it’s hard to find something that delivers on everything.

The balancing act

And so a delicate balancing act to please both sides begins. Finding this balance is more important than ever as 86 per cent of senior executives say that the quality of tech available would influence their decision to accept a new position, while 50 per cent say they would leave their current position. With more employees on the move thanks to technology, IT needs to be able to keep up more than ever, armed with the necessary tools to update and fix problems wherever their employees may be. IT also knows all too well that the biggest cause of breaches is from employee mistakes (sending an email without encrypting it, logging on in an unsecure coffee shop, opening a file from an unknown sender). So they’ll need cutting edge security to protect their data from outside threats but even more from the unwitting inside ones.

Have it all

Fortunately, with the advances in today’s technology the balancing act is over.

Mr. Dhruvil Sanghvi, Co-Founder, LogiNext Solutions,
receiving the recognition trophy
from Mr. Jagdish Lomte, Vice President IT and CIO, Thermax Ltd., and
Mr. Jayantha Prabhu, Group CIO, Essar Information Technology Ltd.

Logistics Supply Chain
Cloud Solution
(Small Medium Enterprise)

Why does LogiNext exist?

India ranks 54 out of 160 countries in the World Bank's Logistics Performance Index of 2014, quite behind Chile, Panama, Vietnam and Indonesia. LogiNext is ambitiously striving to improve that ranking by simplifying decision making in logistics which in turn optimises on ground operations for our clients.

Loginext's optimisation solutions have gone through a steep learning curve by solving many client problems and leveraging their historical data. This learning enables our solutions to efficiently allocate delivery boys for daily deliveries, reduce delivery time and fuel costs by allocating best routes, reduce missed deliveries and ETAs.

What do we do?

Our solutions help our clients with the following benefits:

- Location Clustering
- Route Optimisation
- Automated Delivery Scheduling
- Real Time ETA Prediction
- Real Time Delay Prediction, Alerts and Trend Analysis

With these solutions, we process nearly 50,000 shipments on a daily basis. Leveraging on big data analysis and our state of the art optimisation solutions, we add immense informative value across the board—be it First Mile, Long Haul, Last Mile or Reverse Logistics.

3PL service providers, Courier, Express and Parcel, E-commerce and hyper local businesses swear by our real time shipment data that helps them minimise losses occurring due to high logistics cost and operational uncertainties.

Clientele

We serve more than 65 clients across 18 cities and are expanding our reach to 30 cities by March end. Stalwarts like Paytm, Mahindra Logistics, Myntra and Amazon form part of our ever growing client base. For some of our e-commerce clients, our solutions increased the number of deliveries per delivery boy by 10% due to efficient allocation, routing and reporting. We offer enterprise level logistics capabilities to SMEs, Startups and Mid-Size companies, which were earlier accessible only to the likes of FedEx and UPS globally.

STREAMLINING END-TO-END LOGISTICS OPERATIONS

“It’s a proud moment for us and every employee of LogiNext to receive this recognition from the CIO community, which includes our customers, prospects and well-wishers. 2015 has been very strong for us with almost 500% growth in our revenues, from raising angel round of funding from Indian Angel Network to closing A series investment from Paytm of around USD10 million. We are hoping for an even bigger and better 2016 with the launch of a couple of new products that are going to revolutionise and surprise the logistics and supply chain industry.”

Mr. Dhruvil Sanghvi, Co-Founder and CEO, LogiNext

Mr. Roy Pereira, India Business Head - Managed Services, and
Mr. Rajesh Jhonsa, Operations Director, HCL Technologies Ltd.,
receiving the recognition trophy
from Mr. Sunil Kolambkar, Head SAP and IT, Indofil Industries Ltd., and
Mr. C. N. Ram, Advisor, Warburg Pincus India Pvt. Ltd.

Managed IT Services (Large Enterprise)

At the dawn of the new millennium, a unique information technology company was born: HCL Technologies. HCL Technologies has demonstrated remarkable growth through the recent economic downturn, emerging as one of only eight 21st century listed technology companies in the world to cross \$1bn in net profit, \$6bn in revenue and \$15bn in market capitalisation.

This was possible because we believe that real value lies in the relationship between customer and provider, which is built on three value systems:

- We put employees first, empowering them to believe in everyday ideas that create value for our customers, making HCL Technologies the world's largest Ideapreneurship™.
- Our fixation on Value Centricity is dedicated to delivering value that goes beyond the contract.
- Our belief in trust, transparency and flexibility drives us to step into our customers' business reality, guaranteeing outcomes with enthusiasm.

While we pride our eye for detail in constructing robust contracts with clients, we realise that only a relationship beyond the contract can capture what will change tomorrow. The management's role at HCL Technologies is to empower employees to believe in the power of ideas—a culture we call Ideapreneurship. Helping clients from all spheres through innovative technology solutions, Ideapreneurs are transforming global businesses—one relationship at a time.

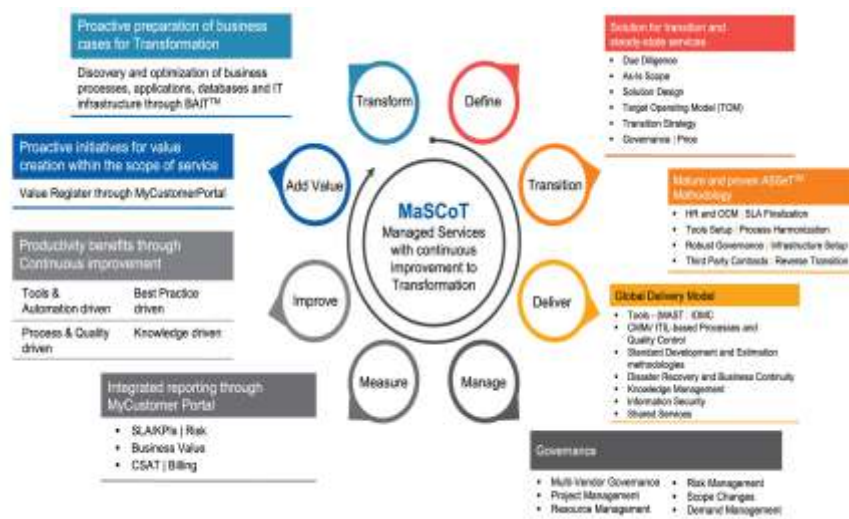

Over the years, we have seen these values manifest in the form of platforms such as the Value Portal, where front line employees have generated and implemented ideas that have unlocked close to \$600mn of unforeseen business value for our customers. Or MAD JAM, a celebration of employee-seeded ideas that are nurtured by leaders and harvested into business

offerings. We believe that our deeply ingrained value system has helped us win multiple awards, establishing us as a leading IT provider among Indian peers.

Quick Facts

- Revenue: USD 6.0bn as on June 30, 2015 (on LTM basis) Latest Annual Report
- Geographies: Operating in 32 countries across the Americas, Europe, Asia Pacific, Middle East and Africa
- Employees: 103,696
- Diversity and Inclusion:
 - 100 nationalities
 - Percentage of senior hires/local hires outside India: 79% in the Americas, 86% in Europe, 83% in APAC/MEA
 - 24% women in the global workforce
 - Affinity Networks by gender, ability, nationality, and more
 - Working across borders through multi-cultural orientation
 - Work life continuity by supporting employee well-being through inclusive policies, support systems and employee assistance programs
 - Positive work environment through awareness forums and channels
 - Advocacy through champions promoting diverse talent

RTB FRAMEWORK: MaScot-MANAGED SERVICES

“We understand that our employees are the foremost vital factor for our achievement and that flexibility on the job makes people feel valued and much happier. The CIO Choice honour reflects our organisation-wide commitment to provide our employees with the ability to balance schedules and workloads so that they are able to maintain a positive work-life balance now and in the future. We believe using flexibility and innovation as a workplace strategy increases the success of our individual employees, our collective team, our clients and, ultimately, our business.”

Mr. Rajesh Thakur, VP – India Business Head, HCL Technologies

Mr. Daniel Alex, President - Telecom Business, and
Mr. Harsha Ram, AVP and Head of Product, Data and Managed Network Services Business, Sify Technologies Ltd.,

**Managed Security Services
(Large Enterprise)**

“We are honoured and re-energised by CIO Choice 2016 recognition in Managed Security Services Category for the third consecutive year. We thank our clients, OEM partners for their support and contributions in this success journey. Wipro is investing heavily in Cybersecurity research, Cyber Risk Management, Critical Information Infrastructure Protection Framework, Security Analytics, CoE, innovation and automation initiatives. Wipro’s focused initiatives and investments in the security domain are to reassure our commitment to protect customer businesses from cyber threats and to produce business value to our customers on their security investments through our Cybersecurity and Risk Services (CRC)”

Mr. Gopinathan K, Practice Head – Managed Security Services, IMS, Wipro Ltd.

The traditional focus of security is fast changing. It is moving from mitigation to improving the bottom line. A comprehensive strategy should address security demands, such as securely embracing new technologies, mitigating cyber threats and compliance to regulations while demonstrating business value.

How Wipro Helps

Wipro’s ServiceNXT enables this by leveraging a gamut of security services such as Unified Threat Management, Security Operations, Security Monitoring, Security Analytics, Compliance Reporting and Management, Identity and Access Management Operations, Managed Authentication Services and Managed PKI Operations, Security as a Service, Fraud and Forensic Analysis and Advanced Security Services.

ServiceNXT Managed Security Operations offer:

- ServiceNXT™ Security Intelligence Center compliant with SAS70, ISO 20000 and ISO 27001 etc.,
- Compliance based reporting – SOX, PCI DSS, HIPAA, GLBA, FISIM, SANS, NIST, Banking, IRDA, TRA, etc.
- Integrated Alert and Advisory Services
- Early detection and prevention of emerging threats

Wipro’s ServiceNXT is the framework to move our clients to a more resilient, business aligned and cost efficient security operations delivery.

ServiceNXT can be deployed through a combination of on-premise, onsite, offshore or on cloud models.

ServiceNXT focuses on standardisation and automation by leveraging Wipro’s IP and best-in-class industry standard tools.

ServiceNXT is a framework that has distilled Wipro’s experience in Managed Services gained over a number of years.

Network Security (Large Enterprise)

Protect your perimeter without compromising performance

Secure your network while sustaining performance and simplifying management. Dell SonicWALL next-generation firewalls and unified threat management firewalls deliver intrusion prevention, malware protection, application intelligence and control, real-time traffic visualisation, and inspection for Secure Sockets Layer (SSL)-encrypted sessions at the gateway.

You can also manage, visualise, analyse, audit and report across numerous appliances deployed all around the world from a single, centralised console, using Dell's management and reporting solutions. Our network security solutions provide:

- Better security effectiveness
- Higher performance
- Disruptively low total cost of ownership (TCO)

“Dell security solutions can help you create and maintain a strong security foundation with interconnected solutions across the enterprise. From endpoints and users to networks, data and identity, Dell security solutions mitigate risk and reduce complexity so you can drive your business forward.”

*Mr. Amit Singh, Country Head – Dell Security Solutions,
Dell India*

Mr. Indrajit Belgundi, Latitude PLM - APJ, Dell India

from Mr. Sunil Mehta, Senior Vice President and Area Systems Director, J Walter Thompson,
Mr. Pankaj Mittal, CTO, Vodafone India Ltd., and
Mr. Anoop Mathur, Founder and President, CORE Media.

Networking - Active (Large Enterprise)

Your network. Your vision. Your terms.

Today's applications call for new thinking about network architecture. Based on open standards, Dell networking solutions free you from outdated, proprietary approaches. Our future-ready networking solutions help you:

- Improve network performance.
- Lower data centre costs.
- Remain flexible to adopt new innovations.

Take control of your network's future and learn how Dell's strategy for open networking can dramatically transform your business.

"Today's IT leaders feel the pressure of delivering exceptional agility, scalability and manageability to their data centre networks. We believe only an open ecosystem can stimulate rapid innovation to accommodate the flexibility and efficiency demands—which is essentially Dell's vision of the new data centre networking model."

Mr. Amandeep Singh Dang, Country Manager — Dell Networking, Dell India

Mr. Amit Barmecha, Co-Founder and Director, and
Mr. Alkesh Agarwal, Co-Founder and CEO, Re-Feel Cartridge Engineering Pvt. Ltd.,
receiving the recognition trophy
from Ms. Ritu Madhbhavi, Senior Vice President - IT, Draft FCB Ulka Adverting, and
Ms. Kalpana Maniar, Head Business Solutions and IT, Edelweiss Capital Ltd.

Print & Cartridge Solution
(Small Medium Enterprise)

“Re-Feel aims to simplify and optimise large printer fleets by deploying scientific processes and cutting edge technology. The presence at over 100 stores across India makes Re-Feel the first choice for medium and large corporates having establishments at multiple locations. Uniform quality and pricing is ensured at all locations pan-India. At Re-Feel we strive to provide quality print solutions to consumers and corporates, helping them save huge money and in process. Over two lakh consumers and 500 corporates trust us for their high quality, low cost print solution.”

Mr. Amit Barmecha, Co-founder and COO, Re-Feel

Re-Feel is India's largest printer cartridge refilling and remanufacturing network with a presence at over 100 locations across 85 cities. Started in 2007 after an extensive research on the printer cartridge remanufacturing industry, Re-Feel now serves over 500 enterprises across India for their day to day print requirements. At Re-Feel we thrive to be technically inspired, economically sound and environmentally safe.

Re-Feel can be the single point of contact for proactively managing existing large printer environment and reducing operating cost. The company's USP lies in customising print solutions best suited to specific organisations, ensuring quality end to end managed print solutions.

Re-Feel is an ISO 9001:2008 and 14001:2004 certified company and our commitment towards quality and support has helped us get recognised many times as industry leaders.

Mr. Sunil Gupta, Executive Director and President,
Mr. Prasenjit Roy, Senior Vice President - Marketing, and
Mr. Rajesh Tapadia, Senior Vice President and Head - Solutions Engineering and Bids, Netmagic Solutions Pvt. Ltd.,
receiving the recognition trophy
from Mr. Pankaj Bhargava, CIO, Pidilite Industries Ltd., and
Mr. Jagadish Belwal, CIO, Tata Motors.

Private Cloud
(Large Enterprise)

With its Private Cloud Services, Netmagic was able to help enterprises looking to exploit the benefits of cloud, while maintaining customised levels of control, performance and security. In essence, a dedicated private environment that is fast and flexible enough to run everything from search intensive websites to ERP solutions.

What makes Netmagic's Private Cloud Services the CIOs' choice?

- Control via Web console: A complete consolidated layer of control over every aspect of your IT.
- Secure and compliant environment: Ensures a secure environment through physical and network separation.
- Enterprise Grade Offering: Built on enterprise grade hardware from the best OEMs like Dell, HP and Intel.
- Deploy resources on-the-fly: Get the capacity to deploy new blocks of computing power without capital investment in physical infrastructure.
- Industry leading SLAs
- Live Support
- 1st to get CSA (Cloud Security Alliance) STAR certified
- PCI DSS Version 3.0 certification

“For enterprises in need of higher levels of control, performance and stringent compliance regulations, Private Cloud has emerged as a preferred deployment model. Netmagic has been successful in delivering deployments with significant levels of customisation, delivering higher levels of efficiency, performance and ultimately business value. I would like to thank the CIO community for their continued patronage and support, as we remain committed to delivering to their expectations and delighting them with innovation.”

Mr. Nitin Mishra, Senior Vice President and Head - Products and Services, Netmagic

Mr. Sunil Gupta, Executive Director and President,
Mr. Shriranga Mulay, Senior Vice President - IT Engineering,
Mr. Rajesh Tapadia, Senior Vice President and Head - Solutions Engineering and Bids,
and Mr. Prasenjit Roy, Senior Vice President - Marketing, Netmagic Solutions Pvt. Ltd.,
receiving the recognition trophy
from Mr. Rahul Mahajan, Vice President - Information Technology, K. Raheja Corp., and
Mr. Sudesh Agarwal, Vice President - IT, Landmark Group.

Public Cloud (Large Enterprise)

“I am humbled by the faith reposed in our services by the CIO community by awarding us this recognition for a second year running. As the first service provider in India to launch Public Cloud services, Netmagic has been pursuing a process of constant innovation in various aspects of public cloud services. These innovations are the result of working closely with our customers, whose requirements have spurred us to deliver to their needs. This recognition is as much theirs as it is ours.”

Mr. Sunil Gupta, Executive Director and President, Netmagic

Netmagic was the first service provider to launch Public Cloud Services in India under the brand, SimpliCloud—an Enterprise grade IaaS (Infrastructure as a Service) Cloud platform built on the latest virtualisation techniques.

SimpliCloud Services include

- On-demand virtual machines and compute resources
- Virtual Load Balancers and Firewalls without the complex setup
- Virtual Storage with SimpliSAN, SimpliNAS and SimpliDrive

What makes Netmagic's Public Cloud Services the CIOs' Choice?

- Complete control: Using the Netmagic Service Orchestrator enterprises can provision, upgrade, downgrade or de-provision your virtual infrastructure
- Enterprise Grade Offering: Built on enterprise grade hardware from the best OEMs like Dell, HP and Intel
- No worry of upfront CAPEX for physical hardware
- Handle flash loads without manual configuration headaches with SimpliScale
- Industry leading SLAs
- Live Support
- 1st to get CSA (Cloud Security Alliance) STAR certified
- PCI DSS Version 3.0 certification

Nihilent
realizing ideas

Mr. Abhay Y. Ghate, Vice President - Centre of Excellence for Technology and CTO, Nihilent Technologies Ltd.,
receiving the recognition trophy
from Mr. V. Subramaniam, Director IT (Transformation), United Technologies - Building and Industrial Systems, and
Mr. Ajay Kumar Meher, Senior Vice President and Head - IT and Post Production, Sony Pictures Networks India.

Quality Testing Services (Large Enterprise)

Testing of systems and solutions represents 30-50% of the total cost of development. Even after making such investments most companies are not sure whether the application/product is indeed tested fully. Testing is an expertise that requires developing a strategy, building a detailed testing process and plan along with execution, and making it efficient and repeatable using appropriate tools and techniques.

"Quality is never an accident; it is always the result of intelligent effort."

Nihilent's testing offering is not only a cost cutting measure but also value added service in analysing test results to identify the root cause of problems/errors and assist in sorting the problem. In addition, Nihilent offers assistance in ensuring high reliability of the software by using reliability modelling techniques. At the same time, outsourcing of a critical but non-core function like testing enables organisations to maintain an up-to-date technology infrastructure and focus on their core competency.

In the current environment it is important for organisations to implement any system solution within the minimum possible time and react nimbly to changes in business conditions. Nihilent's testing services enables organisations to deliver a high quality product with maximum value at minimum cost. Nihilent offers the following benefits:

- Value added services in identifying the root cause of errors and assistance in resolving them
- Ensures the quality and reliability of the product
- Low infrastructure and manpower costs
- Frees up key resources to concentrate on core functions
- Results in minimum time to market
- Minimises testing cycle and time

"We are pleased to have won the CIO Choice honour and recognition for testing. Our company has, right from inception, focused on a holistic approach to problem solving, and our quality testing services offerings stand testimony to this fact. At Nihilent, we offer business-centric testing services wherein we understand the impact of test cases to the business, and based on our assessment we prioritise the specific offerings to our customers."

Mr. Abhay Y. Ghatge, Vice President and CTO, Nihilent

Nihilent's Testing Philosophy

- Metrics Based Approach
 - Effective usage of metrics like Defect Density, Error Injection, Leakage, etc for quality (e.g. Minimum Residual Errors)
 - Risk assessment
 - Predictive modelling and risk assessment
- Root Cause Analysis for Correction
 - Identification of weak spots in SDLC
 - Proper corrective action
 - Alignment to business objectives
- Testing as Risk Assessment and Management

Nihilent believes the objective of testing should be to deliver a product or solution that has been completely exercised and proved. It is impossible to test software to 100% accuracy, with the exception of small transactions. This is because new data profiles occur, which did not exist during testing or were not thought of in the planning. It's therefore the aim of testing to ensure that the software installed does not cause any business disruption and works to an acceptable level.

In the classical development life cycle, there is a stepwise decomposition of requirements, specifications, functions, and code during the build process, and the associated testing.

In reality, it's expected that some degree of change will occur, as constraints of the new environment may impose these. However, the policy should be that this change be limited in scope and nature, requiring only modest, if any, changes to the test.

Nihilent's Testing Service Offerings

Software Testing as a Managed Service

Setting up Testing Centre of Excellence (CoE)

Strategy driven mobile testing—manual, automation and performance

Optimised test tool utilisation

Our unique offerings include

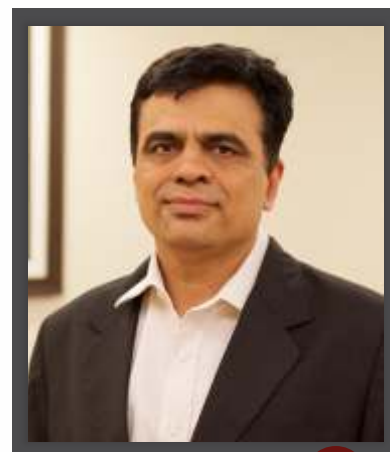

Business centric testing

Business tree map technique—test analysis

Predictive risk modelling

Nihilent Automation Framework for Testing (NAFT)

Professional testing training

Mr. Piyush Somani, MD and CEO, ESDS Software Solution Pvt. Ltd.,
receiving the recognition trophy
from Mr. V. Subramaniam, Director IT (Transformation), United Technologies - Building and Industrial Systems, and
Mr. Ajay Kumar Meher, Senior Vice President and Head - IT and Post Production, Sony Pictures Networks India.

Realtime Automatic
Resource Adjustment
(Small Medium Enterprise)

“We are delighted to have received this recognition for our patent winning innovation on eNlight cloud. We are committed to partner with customers of all scale and sectors to empower them to adopt the Cloud First approach and transform their IT strategy. This award is a testimony to our efforts and we are focused in ensuring that we continue to set industry benchmarks on breakthrough innovations.”

*Mr. Piyush Somani, Founder, MD, CEO,
ESDS Software Solution Pvt. Ltd.*

ESDS started operations in the year 2005, and has since then made rapid strides as an established group of Web Hosting companies and Fully Managed Data Centres based in India, UK and USA. The company specialises in provisioning of high quality Managed Hosting, Managed Servers, Server Racks and Cages, Co-location and System Security, Cloud Hosting, DataCentre Management System, SAP Hosting (HANA, Non HANA, B1), Disaster Recovery Hosting (including Cross Platform), E-Commerce Hosting, Hosted Core Banking Solution, etc.

Today, 10 years down the line, we have more than 35,000 customers worldwide, a significant number of them being corporate entities that have their businesses dependent on their Internet presence. Our eNlight Cloud (Patent: US 9176788) is a state-of-the-art cloud hosting solution with a built-in ability to automatically scale CPU and RAM on-demand. ESDS is an Uptime Certified Tier 3 Data Centre, CMMI Level 3 company, NASSCOM Member and SAP Certified Data Centre and Cloud Hosting Provider.

ESDS has consistently been honoured by government bodies, media, OEMs, etc and appreciated by clients for its innovative products and services.

About eNlight

eNlight Cloud is India's First Cloud Computing Platform patented from USPTO (No. 9176788) for "Method and system for real-time detection of resource requirement and automatic adjustments". It is a state-of-the-art cloud hosting solution with a built-in ability to automatically scale CPU and RAM on-demand. The Auto-Scalable feature of eNlight has succeeded in eliminating the downtime that occurred as a result of volatile Internet traffic. This Auto-scaling feature makes eNlight an unsurpassed proposition for Disaster Recovery Hosting that cuts down Disaster Recovery Hosting cost by 70%. With greatest transparency in the Pay Per Consume billing model, users get to eliminate costs of unused resources.

Mr. Amit Goel, Co-Founder and Enterprise Sales Head at Blubirch,
receiving the recognition trophy
from Mr. Rahul Mahajan, Vice President - IT, K. Raheja Corp., and
Mr. Sudesh Agarwal, Vice President - IT, Landmark Group.

Reverse Inventory Logistics (Small Medium Enterprise)

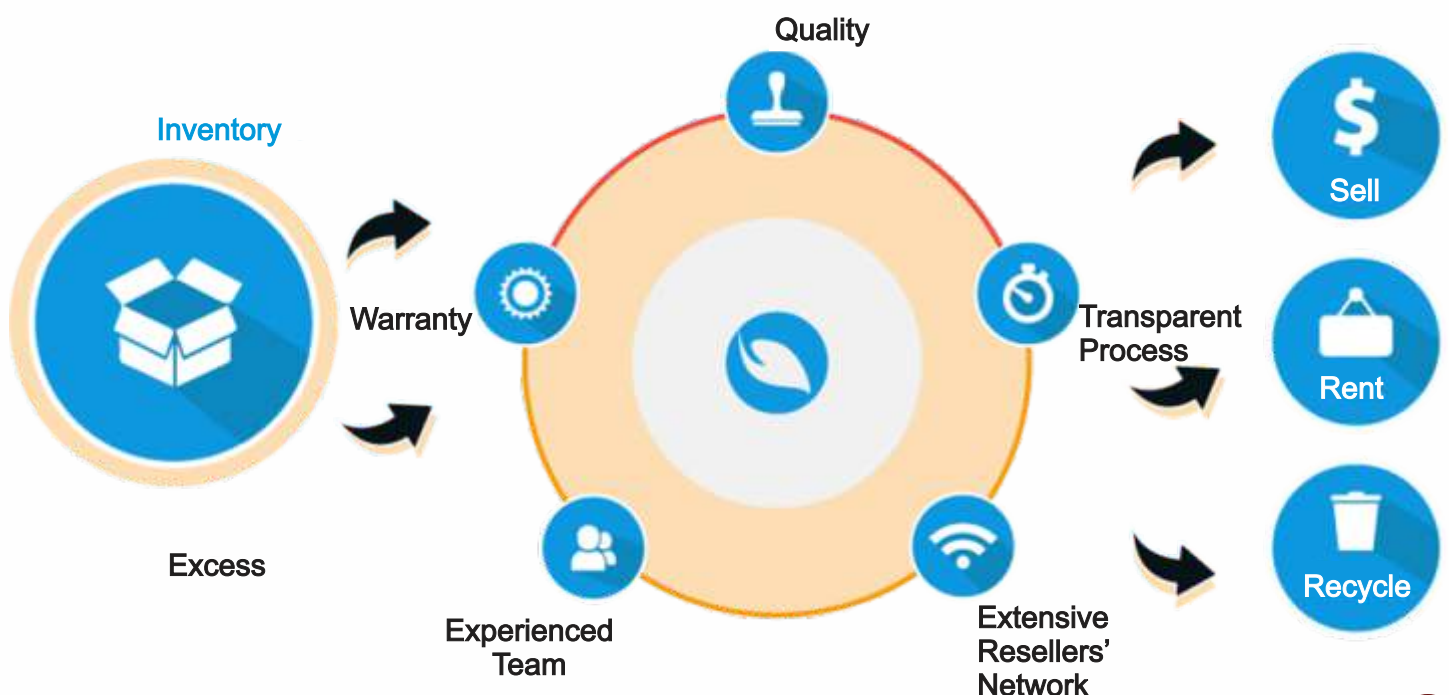

“Blubirch is a young startup in the Reverse Inventory Logistics space. We are very excited to win this recognition in just the second year of operations and to be recognised by such an eminent set of CIOs is a testimony that we are on the right track. With a focus on helping our clients using technology in the Reverse Logistics space and with our own refurbishment centres coupled with some key solutions being rolled out in next couple of months, we are looking at rapid growth in 2016.”

Mr. Amit Goel, Co-Founder and Enterprise Sales Head, Blubirch

Blubirch is a VC funded startup offering End-To-End Reverse Supply chain Solutions that helps Retailers, Enterprises, OEMs and Individuals in maximising value from unutilised, decommissioned and customer returned inventory in a transparent, trustful and compliant way. Blubirch's solution encompasses diagnosing the returned items, refurbishing/repairing where required and enabling clients to redeploy or sell these items through its online/offline channels. Blubirch's technology-based solution ensures cost effective and speedy handling of returns along with insightful analytics.

Further, Blubirch also worked with businesses of all sizes and help them with high quality refurbished/open box inventory of mobiles, laptops, desktops,

tablets, servers and other IT equipment through outright sale or a rental model. Multiple startups, mid-size companies and big enterprises are benefitting from these cost effective offerings. Various startups and enterprises have taken entire infrastructure including servers, desktops, mobiles and laptops from Blubirch to reduce their capital expenditure. Some of the marquee clients include Amazon, Barclays, Kotak Mahindra Bank, Gati along with 200+ other corporate clients and 3,000+ reseller network across the globe.

Mr. Manish Gupta, Director Enterprise Solutions, Dell India,
receiving the recognition trophy
from Ms. Puneet Kaur Kohli, Group CTO and EVP IT, Bajaj Capital Ltd.

Server Virtualisation (Large Enterprise)

"It is high time organisations moved away from the one-server, one-workload paradigm that results in underutilised resources, complex operations, and rigid infrastructure. x86 server virtualisation technologies enable the separation of the operating system and applications from the physical hardware through the presentation of virtualised hardware resulting in maximised efficiency, simplified operations and increased agility."

*Mr. Manish Gupta, Director Enterprise Solutions Group,
Dell India*

Virtualisation, it's easier than you think

Create an efficient, responsive IT environment by virtualising your entire data centre.

When you consolidate your physical server, storage and networking hardware, you also:

- Improve asset utilisation.
- Lower capital and power and cooling costs.
- Reduce management touch points.
- Accelerate IT service delivery.

Combine your current investments with Dell's end-to-end portfolio of VMware®, Microsoft®, Citrix® or Red Hat® solutions.

Regardless of where you are in your virtualisation process, Dell experts can help you clarify your goals, identify requirements and create a virtualisation plan to automate daily operations and unify data centre management. Contact a Dell representative to get started.

Mr. Manish Gupta, Director and GM - Enterprise Solutions, Dell India,
receiving the recognition trophy
from Mr. Kishore Daryanani, CIO, Alfa Laval, and
Mr. Milind Khamkar, Group CIO, Super Max.

Servers (Large Enterprise)

“Data centres built around predictable, one-dimensional applications are evolving into dynamic environments tasked with complex and infrastructure-taxing workloads adding up the operational and capital costs. Dell has built an end-to-end selection of enterprise solutions with unique technologies and exclusive capabilities to deliver a scalable IT infrastructure for the future based on standardised technologies. Our solutions are scalable and flexible with efficient compute architecture for streamlined and intuitive management.”

Mr. Sudharsan R, Commercial Marketing Director, Dell India

Be future ready right now

A company is only as innovative as its IT. With Dell future-ready enterprise solutions, you can be ready with a data centre that bridges traditional and new IT, so you can:

- Scale and adapt with tailored solutions.
- Speed innovation with simplified management.
- Save on total cost of ownership with efficient technology.

PowerEdge rack, tower and blade servers are customer-inspired, feature-rich platforms designed to deliver the performance and versatility you need to meet all challenges in almost any setting, from small businesses to enterprise hyper-scale environments.

Mr. Manish Gupta, Director - Enterprise Solutions, Dell India,
receiving the recognition trophy
from Mr. Girish Kulkarni, Board Member, HIMSS Asia Pacific India Chapter, and
Mr. Ajay Bakshi, Senior Vice President - Business Transformation, Aegis Ltd.

Storage - Hardware (Large Enterprise)

“Enterprises are looking for efficiency/agility in storing and managing massive data to stay ahead of today’s always-on world, rapid technology change, omnipresent mobile devices and super-connected consumers. The storage solution portfolio of Dell that includes performance-optimised flash technologies, ultra-dense storage enclosures and software-defined storage (SDS) solutions can address all the storage needs of an organisation and ensure best business outcome.”

Mr. Sudharsan R, Commercial Marketing Director, Dell India

Storage Solutions

Redefining the economics of enterprise storage

Achieve faster response times and lower your total cost of ownership (TCO) with data centre and virtualisation strategies designed to match your workloads. From storage, networking and servers to software and beyond, our flexible modern architectures span a broad technology portfolio, delivering a distinct advantage over siloed vendors who work inside only a single domain.

Meet your specific storage needs from our wide range of solutions:

- Modern hardware architectures
- Innovative software tools
- End-to-end services

Whether you need performance-optimised flash technologies, ultra-dense storage enclosures, traditional or software-defined storage (SDS) solutions, we can help you choose the right options for your organisation’s needs.

Mr. Kiran Shinde, Head- Service Delivery, Maintenance Services, SIMS and
Mr. Prakash Mardikar, Head - Project Delivery and PMO, SI Services, SIMS, Wipro Ltd.
receiving the recognition trophy
from Mr. Pankaj Bhargava, CIO, Pidilite Industries Ltd., and
Mr. Meheriar Patel, Chief Technology Officer, The MobileStore Ltd..

**System Integrator
(Large Enterprise)**

“Winning the System Integrator of the Year recognition for the second year in a row is a testament to the trust that we have earned from the CIO community. This award is a recognition of our commitment towards excellence and our technical expertise.”

Mr. Anuj Bhalla, VP and Business Head - Global SI, Maintenance Services and Products, Wipro Ltd.

Mr. Satish Mittal, CTO, Vodafone India Ltd.,
receiving the recognition trophy
from Mr. Girish Rao, Head - IT and Business Analytics, Marico Ltd., and
Mr. Sabyasachi Chakraborty Thakur, Head IT, Century Plyboards India Ltd.

Telecom Carrier
(Leased Lines)
(Large Enterprise)

Vodafone Business Services (VBS), the enterprise arm of Vodafone India is committed to being the most trusted and valued total communications partner.

VBS' portfolio of total communications solutions for global and national businesses comprises Mobile, Wireline, Internet of Things (IoT), and Cloud services. These are delivered to businesses through four verticals Vodafone Global Enterprise (VGE), National Corporate (NC), Small and Medium Enterprise (SME) and a dedicated vertical for government customers. VBS also has a dedicated sales team for telecom carriers and wholesale.

Vodafone Business Services leverages the Vodafone Group's global expertise in product and solution development, account and service management and other best practices. This gives them an edge over the competition in providing cutting-edge tailored solutions that address customer needs while also developing go-to-market strategies for relevant new products and services, across mobile, wireline, IoT and cloud services.

Through a dedicated team of Account Managers and Service Managers, VBS offers a varied range of products and services to help enterprises (big and small) enhance their productivity and efficiency.

- IoT Solutions
- Wireline Data Solutions (MPLS-VPN, Internet Leased Lines, Domestic and International Leased Circuits)
- Office Wireline Voice (E1-DID)
- Toll Free Services, Conferencing and Collaboration, Application Mobility
- Mobile Email and Connectivity Solutions

We are proud to be recognised as CIO Choice 2016 in the categories Telecom Carrier (Leased Lines) – Large

“Our aim is to be the leading total communications provider for enterprises by helping Indian businesses across segments achieve their ambitions. We are constantly working on keeping our customers ready for challenges and the future. We are delighted to receive the CIO Choice 2016 recognition for two core categories. We will continue to be at the forefront of building future-ready enterprises by empowering businesses with total communications solutions.”

Mr. Satish Mittal, CTO and New Product Development Head, Vodafone Business Services

Enterprise and Telecom Carrier (Mobile Access) – Large Enterprise.

Telecom Carrier (Leased Lines)

Vodafone's Internet Leased Line Service connects you to the outside world and gives your organisation secure data connectivity.

- Your business maintains faster data output at low latencies.
- Guaranteed bandwidth ranging from 1Mbps to 1 Gbps and more.
- Stringent performance SLAs, giving you quality assurance and peace of mind.
- Ideal for hosting corporate Web portals, email servers, video conferencing, VOIP or accessing the Internet.

Mr. Nick Gliddon, Director, Vodafone India Ltd.,
receiving the recognition trophy
from Mr. Pankaj Bhargava, CIO, Pidilite Industries Ltd.,
and Mr. Jagadish Belwal, CIO, Tata Motors.

Telecom Carrier
(Mobile Access)
(Large Enterprise)

Telecom Carrier (Mobile Access)

Vodafone's Enterprise Mobility Solutions help you address the challenges your business faces—today and in the future.

- It helps you simplify your communications, control costs and drive productivity of your workforce.
- Securely connect with customers, colleagues and employees when they are on the move, between meetings or even at home.
- Enterprise Mobility Management (EMM) helps manage and maintain the use of mobile devices within an organisation.
- Customised solutions to suit your business needs, backed by our global expertise in the machine-to-machine arena.

Mr. Darshan Watve, Director - Enterprise, and
Mr. Lalit Parchani, Director - Solutions Consulting, Concur Technologies India Pvt. Ltd.,
receiving the recognition trophy
from Mr. Sayed Peerzade, CIO, Reliance Entertainment - Digital, and
Mr. Prakash Dharmani, Global CIO, Essel Propack Ltd.

Travel & Expense
Management Solution
(Small Medium Enterprise)

“Concur aims to enable the perfect trip for a business traveller – one that is smooth, hassle-free, with some wow moments thrown in—all made possible through technology. We are delighted to receive this recognition and extend our appreciation to our partners, associates and clients. The award is a true testament to the trust Concur’s customers place in the company, and we feel privileged and humbled. Voted for by CIOs, this recognition showcases our expertise in specific technology areas as well as our strength and leadership in the travel and expense management industry.”

Mr. Ramesh Iyer, Managing Director - India, Concur Technologies

Concur, an SAP company, is a leading provider of integrated travel and expense management solutions. The company’s cloud-based and mobile solutions ensure that corporate travel is booked within policy and reconciles expenses after travel are completed. By capturing and reporting on T&E spend, Concur provides data to increase visibility control spend and manage compliance.

Solution Highlights

- End-to-end cloud-based travel and expense management solution
- Advanced reporting with insight into travel and expense trends
- Robust and reliable Cloud Computing infrastructure
- Web and mobile solutions for anytime, anywhere access

Concur Stats

- Concur processes more than 55 million T&E transactions, worth over \$50 billion in a year
- Concur employs approximately 4,800 people worldwide
- Concur boasts of a 30,000+ client base located in over 150 countries
- Over 70% of BTN’s Corporate Travel 100 companies are Concur’s clients
- More than half (305) of the Fortune 500 companies are Concur’s clients

As the world’s leading provider of integrated travel and expense management solutions and services, Concur understands the changing dynamics of businesses and the prerequisites for user adoption. It not only helps companies with its transformational

T&E ecosystem, that brings together customer, supplier and developer, but also adapts to the altering situations to stay ahead of the curve in its domain by taking advantage of various channels, such as:

Social

- Connect employees and cut costs by sharing trip details
- Connect travellers and avoid mishaps by giving out information

Mobility

- Aam Aadmi is now App Aadmi
- Claim, approve, access reports anywhere anytime in a click

Cloud

- Asset-light model effectively lowers operating costs and risks
- Minimal infrastructure investment assures companies of cost reduction
- On-demand model: Pay as you use structure ensures solutions are made available as and when needed

Analytics

- Gain visibility and insights into budget versus spends
- Identify frequent suppliers; Negotiate harder to gain cost saving benefits
- Identify defaulters; Fix compliance issues for more productive functioning

Mr. Abhay Bagde, Vice President (Strategic Products and Sales), Perpetuuiti Technosoft Services Pvt.Ltd.,
receiving the recognition trophy
from Ms. Ritu Madhbhavi, Senior Vice President - IT, Draft FCB Ulka Adverting, and
Ms. Kalpana Maniar, Head Business Solutions and IT, at Edelweiss Capital Ltd.

Virtual Workforce
Solutions
(Small Medium Enterprise)

“Being recognised at CIO Choice for two consecutive years from amongst so many companies is a great accomplishment for us. The recognition becomes even more special as the jury consists of an independent panel of eminent CIOs and IT decision makers. This is a huge validation of our efforts and proves our commitment towards the evolving demands of IT customers. Furthermore, one of the world’s biggest stock exchanges uses our Virtual Workforce Solution to automate their roles tasks for enhanced productivity and greater efficiency. This further validates our innovation, and the trust of CIOs.”

Mr. Rohil Sharma, Co-Founder and CEO, Perpetuuti Technosoft Services Pvt. Ltd.

Let a Robot Handle The Work

Perpetuuti’s Ops-Central provides a comprehensive Ops Platform using **ROBOTIC SOFTWARE AUTOMATION**

Perpetuuti, a Global Enterprise Software Products company that helps organisations increase productivity and efficiency through Automation for On-Premises or Cloud Deployments, has been awarded with the CIO Choice 2016 Honour and Recognition for its Virtual Workforce Solution delivered through its flagship product, Ops-Central™.

Perpetuuti’s integrated and modular product family supports a combination of technologies enabling solutions (built in accordance with ISO 22301 standards) for Artificial Intelligence, Cognitive Computing, Machine Learning, Robotic Software Automation (RSA), Intelligent Process Automation (IPA), Business Process Automation (BPA), Organisational BCP Automation, IT Service Continuity and Availability Management, Recovery Assurance, Real-Time Auto Discovery of Application IT infrastructure and Application Interdependency Mapping, and Migration/Replication to Cloud.

Ops-Central™, a flagship gem from Perpetuuti’s basket of offerings, provides a comprehensive Virtual Workforce Solution using Robotic Software Automation (RSA). Ops-Central™ RSA has the capability of applying specific technologies to easily and rapidly automate the standardised, day-to-day IT

workload related jobs to enable simpler and automated Business Processes. Ops-Central™ RSA does not require the prior knowledge of clients’ processes and can automate these processes on the fly, which makes Perpetuuti Ops-Central™ unique in the Business Process Automation market. Ops-Central™ RSA eliminates the labor-intensive manual interactions, providing an instinctive and comprehensive automation platform that automates and orchestrates key processes, such as system, network, application and user tasks. It has a unified graphical command centre dashboard that enhances business experience through increased real-time visibility and centralised management across heterogeneous IT platforms, which can be leveraged in order to reduce the time, cost and logistics associated with more traditional IT workload exercising. Allowing IT personnel to maintain full control over automated tasks, Ops-Central frees up time to focus on key issues that improve service levels through centralised activities across physical, virtual and cloud systems.

Advisory Panel 2016

Speaks

Mr. Anil Garg

Head Global Operations - IT, Dabur India Ltd.

"CIO Choice is a great initiative. Vendors have now started giving it lot of weightage and they are very keen to get this recognition as it gives them a starting point with CIOs. Till now there was no recognition like this. Anoop Mathur has been doing great work in bringing together the IT community and making people aware of the good work being done by members of the IT fraternity."

Mr. Anil Jaggia

Ex-CIO, HDFC Bank

"CIO Choice is an awesome forum connecting over a thousand senior IT professionals. It is definitely unparalleled in the Indian landscape. Anoop Mathur has built an outstanding brand in a very short time span."

Mr. Avinash Velhal

Group CIO for India, Middle East and Africa, ATOS India

"CIO Choice is a unique B2B platform that enables CIOs to endorse our preferred vendors. It's one of those star events and all vendors strive to be recognised at CIO Choice. Anoop Mathur's continuous effort has made CIO Choice into a grand red carpet event."

Mr. Girish Rao

Head IT and BA , MARICO Ltd.

"I think CIO Choice is an excellent platform that gives CIOs an opportunity to voice who their preferred vendors are, as well as give a feedback to the vendors in terms of their work. It a platform where vendors are recognised for all the hard work they do in delivering solutions as part of their service."

Mr. Kersi Tavadia
CIO, BSE Ltd

"CIO Choice is a very good platform for encouraging vendors and shows the trust placed in the CIO community. The entire initiative, started by Anoop Mathur, is an excellent way of bringing together the vendors and users. It's a great confidence building activity; the biggest plus point is that people will trust each other before using the product. Anoop has been doing a fantastic job of bringing in a lot of innovation in the IT field."

Mr. Pankaj Bhargava,
CIO, Pidilite Industries

"CIO Choice is a very unique platform; it is like a proxy for the voice of the customers. It is also a platform for the discovery of potential partners, and provides credibility to both CIOs and vendors."

Mr. Ramandeep Singh Viridi
Vice President – Group IT, Inter Globe Enterprises

"CIO Choice is a one of its kind platform in India. It's a great place for the CIOs to recognise their partners, the vendors, who help them grow their business. And to be able to share our views with other CIOs is important for us."

Mr. Sanjay Narkar
CTO, IDFC Bank

"This is a great platform for all CIOs and CTOs, where we are brought together for a purpose that actually helps us get into technology more objectively. CIO Choice provides CIOs with a lot of ideas and a chance for networking, which is a must."

Mr. Shailesh Joshi
CIO, Godrej Industries

"The CIO Choice verdict is the most efficient or effective recognition for product and service providers. Since these are the CIOs' choice of preferred brands, it makes the recognition unbiased. The entire credit of this program goes to Anoop Mathur and his team."
