PRESIDENT'S NOTE

Dear CIOs & Digital Business Leaders,

CIO Choice is the gold standard and yardstick of quality, innovation and excellence. The CIO Choice platform has been a collective point of pride for CORE MEDIA, the CIO community and ICT brands.

As we bring out this 8th Volume of CIO Choice Yearbook, the need for 'meaningful collaboration' between technology leaders and ICT brands cannot be stressed further.

This also underscores the magnitude of CIO Choice Trust Seal, which is by far India's largest and only voting platform for CIOs to endorse ICT brands that '**Deliver What They Promise**'.

Technology is reshaping the competitive landscape and disrupting business models. The CIOs' role has been undergoing dramatic changes in recent years. From being in-charge of technology to being a business leader, the CIO is today at the helm of organizational transformation and value generation.

Tech leaders are looking for strategic partners—rather than product vendors—who can facilitate this holistic transformation.

Technology purchase decisions have always been driven by references and peer learnings. CIO Choice inherently promotes this collaborative culture. It builds on what we believe one of the most democratic processes— 'By the CIO, For the CIO'. With its Gold Seal of Trust, CIOs vote to recognise products, services and solutions from ICT brands who have earned their TRUST.

This recognition allows the winning brands to not only create top of mind recall, but also evolve as trusted value partners for CIOs during challenging times. For the CIO community, we believe that the platform and the yearbook serve as the most-reliable work of reference as they embark on new transformational projects and evolve as strategic leaders.

Once again, my sincere gratitude to all the CIOs and ICT business leaders who have supported us through the years in making CIO Choice the Industry Gold Standard.

Regards,
Anoop Mathur
Founder & President
CORE Media

INTRODUCTION

WHAT IS CIO CHOICE?

CIO Choice is a powerful B2B platform for organisations in the Information and Communications Technology space that provides marketers the opportunity to prominently create a positive brand positioning for their products, services and/or solutions.

CIO Choice is not an award, but a Gold Seal of Trust and Recognition for ICT brands. It is an industry hallmark of excellence for over 8 years in India.

Voice of the Customer

CIO Choice is the largest online voting platform, where CIOs vote for their preferred and trusted ICT brands, whom they rely on the most. It is the Voice of Customer—the CIO Verdict. CIO Choice is a recognition for an organisation's products, services, and/or solutions and it represents the confidence earned from their customers—the CIOs

Selection & Voting

3 stage process

ICT brands (large and small medium enterprises) participate by submitting their nominations in relevant categories. There is a distinguished CIO Advisory Panel, comprising industry leaders and CIOs from across different verticals, that oversees the entire process. ICT brands then participate in an independent online pan-India voting survey. CIO responses are collated regarding their preferred products, solutions and/or services by categories, ensuring a certain level of satisfaction with product, solution and services.

CIOs vote for products and/or services that have earned their confidence in each category. The company that wins the maximum votes in each category is bestowed with the CIO Choice recognition title. To ensure there's no fraudulent voting there's a foolproof voting mechanism incorporated in the process.

Winners in each category earn the right to integrate the CIO Choice title logo on their packaging, promotions, advertising, marketing campaigns, and other brand communication for a period of one calendar year. It is a powerful sales accreditation tool as it increases brand awareness and recognition within the CIO community and can be leveraged for increased sales.

ADVISORY PANEL

CIO choice is one of a kind platform which is very uniquely positioned to recognize products basis preferences of CIOs and tech decision makers. It helps ICT companies create brand positioning by being the CIO's stated choice. For the practitioner community, CIO Choice is an opportunity to recognize brands that help them drive business success.

Mayur Danait, CIO, Pidilite Industries

CIO Choice, every year, brings us an opportunity to recognize and celebrate the star performers of the IT industry. It's collaborative platform for the CIO community and the ICT brands to come together, share ideas and have meaningful engagements in future.

Nafees Ahmed, CIO, Indiabulls Group

CIO Choice, over the years, has established itself as an excellent platform to recognize brands that offer the right technologies and solutions. Chosen by the CIOs themselves, it is a benchmark for CIOs to help make the right technology decisions. It has been widening its scope to encompass new-age technologies and emerging vendors.

Rajesh Uppal, Senior Executive Director, HR & IT, Maruti Suzuki India

CIO Choice is a fabulous initiative, extremely well-organized and is one of the largest networks of CIOs in India. Over the years, CIO Choice has become a common platform for the CIO community to discuss their topics of interest and network effectively.

Sankarson Banerjee, CIO, RBL Bank

CIO Choice is platform where the CIO community can keep abreast of the latest technology developments, while evaluating the right product development companies. It's an occasion where I look forward to thanking our technology partners for their contribution in making CIOs successful in technology delivery and transformation programs.

Shiv Kumar Bhasin, CTO & COO, National Stock Exchange

SPEAKS

CIO choice is a wonderful platform to recognize providers who have excelled in their offerings and commitment while providing solutions and offerings across industries. I personally have been able to identify some of the top-class vendors with strong credentials that have been referred by the CIOs community through CIO Choice.

Saurav Sinha, CIO, Indigo Airlines

CIO Choice is a great platform of interaction which allows for the whole IT community to get together. It is a format based on experience rather than theoretical parameters on which we normally select the organizations, solutions and people that we work with.

Sumi Vivek, CIO, Diageo

CIO Choice is a democratic platform where the technology consumers can communicate in the sincerest way to their IT partners, while recognizing the good work done by some of the strong performers in the ICT community.

Udayraj Prabhu, EVP-Business Process Transformation & IT, Marico

CIO Choice is an excellent platform for technology leaders to come together and validate their technology strategies in a world that is rapidly being disrupted by technology.

Venkatesh Natarajan, Chief Digital Officer, Ashok Leyland

KNOWLEDGE PARTNER

Digital Technology is rapidly driving business transformation and germinating new operating models. The pace of transformation has leapfrogged due to COVID-19 pandemic. Choosing the right partner –from a vast ecosystem of startups to established players—who can enable this transformative journey is a challenging task for technology leaders.

CIO Choice, now in its 8th edition, is platform where participating technology companies across a variety of domains get endorsed by CIOs. The platform thereby provides a good mechanism for CIOs to identify and partner with technology companies. Congratulations to all the winners and I wish CIO Choice all the success in this journey!

Data Protection Solutions

Large Enterprise

Ripu Bajwa, Director & General Manager, Data Protection Solutions, Dell Technologies, receives the recognition trophy from **G. S. Ravi Kumar**, CIO, Gati Ltd. and **Mayur Danait**, CIO, Pidilite, at the **Red Carpet Night**.

About Dell Technologies

Dell Technologies is a unique family of businesses that provides the essential infrastructure for organisations to build their digital future, transform IT and protect their most important asset, information.

The company services customers of all sizes across 180 countries—ranging from 99 per cent of the Fortune 500 to individual consumers—with the industry's most comprehensive and innovative portfolio from the edge to the core to the cloud.

“We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value to CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a manifestation that our long-term, customer centric strategy is working. We are committed to building the industry's most modern portfolio of end-to-end solutions for our customers in India. I would like to thank all our partners, customers and importantly the CIO Choice panel for selecting us.”

Alok Ohrie, President & Managing Director, Dell Technologies India.

Protect your data capital from edge to core to cloud.

Secure and protect your data—no matter where it resides—with simply powerful, cost-effective backup, recovery, archiving and migration solutions that improve uptime and avoid data loss.

Trust your #1 asset to the market leader in purpose-built backup appliances.

Simplify your data landscape: Make data available and keep it protected from edge to core to cloud with Dell EMC.

Automate data services: Utilise advanced data mobility and policy-driven automation from the leading data protection vendor.

Secure data assets: Preserve data with industry-leading solutions that offer superior risk reduction for workloads and advanced security across heterogeneous environments.

“With this recognition in Data Protection Solutions, Dell Technologies bolsters its position as a leading partner that empowers enterprises to harness the power of data.”

Colocation

Large Enterprise

Arjun Kaul, Head- Govt, PSU and MNC Vertical, Nxtra by Airtel, receives the recognition trophy from **G. S. Ravi Kumar**, CIO, Gati Ltd. and **Mayur Danait**, CIO, Pidilite, at the Red Carpet Night.

About Airtel Business:

Airtel Business is India's leading and most trusted provider of ICT services with global network across USA, Europe, Africa, Middle East, Asia-Pacific, India and SAARC regions. We serve over 1000 global enterprises, 2000 large and 500,000 medium/small businesses across India. Airtel Business offers a diverse portfolio of products and services such as Data Connectivity, Voice & Messaging, Collaboration, Cloud, Data Center, Security, IoT, Enterprise Mobility, Network Integration & Professional services to Enterprises, Government, Carriers, Small & Medium Businesses, OTTS, and Mobile Network Operators across the globe. Through the diverse product portfolio and strategically located submarine cables and satellite network running across 2,50,000+ Rkms in 50 countries and 5 continents, we are pushing the boundaries in digital service delivery with a key focus on end user experience, high availability, and impeccable quality of service.

“We acknowledge this recognition by CIOs across the country. We believe this is a by-product of our unrelenting focus on customers and building long term relationships. It will further encourage our teams to keep delivering innovative solutions to customers and add value to their business. At Nxtra by Airtel, we want to extend our support in adopting robust and flexible business continuity arrangements to continue to serve our customers.”

Rajesh Tapadia, CEO, Nxtra by Airtel

Airtel offers cutting edge colocation and cloud solutions through its wholly owned subsidiary Nxtra Data. It offers colocation services to top Indian enterprises, SMB, global customers with its highly secure datacentres in addition to robust public, private and hybrid cloud solutions. Nxtra Data has also been empanelled by the Government of India as one of the Government Community Cloud providers to work with government agencies. Nxtra operates 10 existing state of the art large and over 120+ edge datacenters across India. These datacenters are strategically located in Chennai, Bangalore, Mumbai, Pune, Bhubaneswar, Manesar and Noida. We work towards ensuring our customers' hardware resources are stored in secure, Tier III compliant datacenters. We offer high traffic capacity in a carrier-neutral model for increased flexibility and ensure routine management tasks do not affect your productivity. We take care about your space and power management needs. As part of our server colocation services you can choose from our dedicated or shared racks and get remote hand access for 24 X 7 assistance.

Features:

- 10 state of the art DCs across major cities in India
- 120+ Edge datacenters across nation
- Tier III compliant Dcs
- N+1 redundant UPS systems and generator backups
- PoD based architecture, conforming to ASHRAE, IEEE norms
- Carrier Neutrality – high bandwidth connectivity from all leading carriers
- Access to local fibre, IP Peering, submarine cable and cable landing stations
- Security Compliance ISO 22301, ISO/IEC 27001, ISO/IEC 20000-1

“Nxtra by Airtel has once again been recognized in the colocation category for its highly relevant offerings and its pan-India focus.”

Data Centre Power (UPS)

Large Enterprise

Life Is On

Schneider
Electric

Venkatraman Swaminathan, VP & Country General Manager, India & SAARC and **Ankesh Kumar**, Marketing Director, Schneider Electric, receive the recognition trophy from **G. S. Ravi Kumar**, CIO, Gati Ltd. and **Mayur Danait**, CIO, Pidilite, at the **Red Carpet Night**.

Catering to all types of data centres: edge, small or medium; and business-critical application, Schneider Electric offers the Galaxy VS—a highly efficient, easy to deploy, modular 20-150 kW three-phase uninterruptible power supply (UPS) with flexible operating modes for IT, data centres, and business-critical applications.

Compatible with Schneider Electric's lithium ion battery solution—the Galaxy VS reduces system footprint and weight, cooling and maintenance requirements, and total cost of ownership. Risk management is simple with the Galaxy VS UPS's modular, lightweight design, which ensures full front service access. The included smartphone app delivers peace of mind with access to real-time UPS status, alerts, and predictive analysis through the EcoStruxure IT platform. Delivering the best power protection in the industry, Galaxy VS is the ideal backbone for your critical infrastructure.

“We are delighted to have won this recognition in the Data Centre Power (UPS) category. At Schneider Electric we understand how critical uninterrupted power supply is to an always on and connected world and especially now as we escalate our digital engagement. We are committed towards empowering data centers with the best solutions to enhance productivity and strive towards sustainability and this win adds another feather to our approach towards constant innovation.”

**Venkatraman Swaminathan, VP & Country General Manager, India & SAARC
Schneider Electric Secure Power Division.**

Here are the key benefits of Galaxy VS UPS:

- Provides the best performance in a high-density design, it is the right solution to optimise total cost of ownership.
- No power derating in kW up to 40 degrees C or 104 degrees F. Wide input voltage range. Designed for harsh electrical environments to save battery life.
- Reduces utility costs with industry-leading efficiency in normal operating mode and EConversion mode and simplifies the right-sizing of your UPS with unity power factor.
- The EConversion mode ensures ultra-high efficiency while charging the batteries, conditioning the load power factor and ensuring a Class 1 output voltage regulation.
- Delivers outstanding availability with full protection of normal operating mode throughout a wide input voltage tolerance window.
- Quickly restores battery runtime with our innovative fast battery recharge feature and continues its leadership in modern power protection with the long-life Schneider Electric lithium-ion battery solution.
- Modular Safe Swap design ensures a product that is fault tolerant and has extremely low mean time to repair.
- Reinforced Design with dust filters and conformal coating increase reliability.
- High short circuit handling capability of 65kAIC makes it a robust UPS offer.

“With this award in Data Centre Power, Schneider demonstrates its commitment to bringing innovative technologies while helping enterprises achieve critical cost savings.”

Cloud Telephony

Large Enterprise

Sambuddha Bhattacharya, AGM, Vodafone Idea Ltd., receives the recognition trophy from **G. S. Ravi Kumar**, CIO, Gati Ltd. and **Mayur Danait**, CIO, Pidilite, at the **Red Carpet Night**.

With the increase in adoption of VOIP services, many businesses are integrating their communication processes with Cloud Telephony.

Vodafone's Cloud Telephony Solutions are a Communications Platform as a Service (CPaaS) that can help enterprises automate various business processes like lead management, order booking, payment collections, customer appointments, with intelligent call routing and application integration. Cloud telephony platform supports customized and secured API integration with enterprise's core application solving many use cases.

“We are extremely delighted to have won the CIO Choice 2020 recognitions and are really grateful to the CIO community for their support. This Award is a testimony to our Constant efforts to deliver delightful customer experience by bringing the smartest and newest technologies to serve businesses in digital era. We remain committed to constantly innovate & improve our product portfolio while delivering excellent customer service and be the trusted and valued partner for enterprises.”

Abhijit Kishore, Chief Enterprise Business Officer, Vodafone Idea Ltd

Why choose Vodafone's Cloud Telephony Solutions?

With Vodafone's Cloud Telephony solutions, you can now focus on core business areas by outsourcing associated processes, through

- Automation of various processes using voice and SMS as communication channels
- Seamless customer interactions
- Cloud-based model and consolidation of Voice infrastructure
- Cloud-based model instead of a voice-hosting infrastructure
- Mitigation of high costs due to upgrades and maintenance

Our cloud telephony solution offers complete OpEx-based model, are available on 10-digit and 1800 series numbers. Its omnichannel experience for voice and SMS on same 10-digit access number is a key feature. It supports customised and secured API integration with enterprise applications.

With Vodafone's Cloud Telephony solutions, enterprises can:

- Avoid the hassles of hardware maintenance and obsolescence of voice infrastructure
- Achieve business process automation
- Ownership of the number
- Platform hosted in Telco grade facility
- Highly Scalable
- Flexible Billing model – Usage-based and Transaction-based

With Cloud telephony, the possibilities are endless—it could be number privacy solution for taxi hailing application, booking a gas connection, lead management for an online car selling service, logistics tracking, hotel reservation, or traveling for a popular reality show! We support same number of any incoming/outgoing call legs which is a unique and industry first feature ensuring better brand recall and call connect ratio. Services are offered on pay as you use model with zero capex investment.

“This award in Cloud Telephony recognizes Vodafone Idea for its pioneering pricing models and feature-rich solutions integrated with the latest technologies.”

OPTIPLEX: 7060

When the desktop works your way, your efficiency is unlimited. Powerful, innovative form factors fully adapt and expand to your business needs OPTIPLEX 7060 TOWER, SMALL FORM FACTOR AND MICRO

Impressively Powerful

Intel® 8th generation processors with optional vPro™ allow the fastest, most manageable OptiPlex yet. Next gen discrete graphics, rich SSD and hard drive options power your workforce demands.

Convenient Connections

Support up to three monitors with two standard Display Ports and your choice of VGA, DP, USB Type-C Alt Mode or HDMI 2.0 as an optional third port. Drive additional monitors with discrete graphics.

Ultimate Expandability

Tool-less design with extensive scalability, including advanced M.2 PCIe NVMe SSD, optional 2nd NIC and Thunderbolt port, plus legacy support provides the most expandable desktop solution.

Smart Design

Adaptable, compact designs with custom mounts and stands seamlessly integrate into your workspace. A sustainably built, MIL-STD 810G tested form factor plus lockable cable covers and chassis intrusion switch keep you working confidently.

Built for Business

Secure

Only Dell provides innovative data security solutions that meet security challenges and business concerns head-on to protect your most critical and at-risk asset, your data. With Dell data security solutions, end users can work where and how they want knowing that data is protected. Dell Data Guardian protects data wherever it goes. Dell Endpoint Security Suite, powered by Cylance, stops up to 99% of malware.

Manageable

The world's most manageable desktop is built to allow flexible and automated BIOS and system configurations through Dell Client Command Suite free tools. We make it easy to deploy, monitor and update your OptiPlex fleet.

Reliable

Features a reliable, built-to-last chassis that has undergone extensive testing, including military-grade MIL-STD 810G, as well as component, accessory and lifecycle testing. OptiPlex beats the stress of the highly accelerated life test (HALT), ensuring premium quality from concept to production.

"This recognition in Desktops underscores Dell Technologies' focus on bringing out innovative products that put the power of computing at end users' fingertips."

Digital Transformation Enabler

Large Enterprise

Lux Rao, Director – Solutions and **Raghuveer**, HR, Director – Sales, NTT Ltd., receives the trophy of recognition from **Milind Khamkar**, Group CIO, Supermax Personal Care and **Sanjay Kotha**, Joint President & Group CIO, Adani Enterprises.

NTT Ltd. is a leading global technology services company, partnering with organizations globally to shape and achieve outcomes through intelligent technology solutions that are data driven, connected, digital, and secure.

As NTT, we enable and support our clients digital transformation journey with our full stack capabilities and advisory. Our Problem to Solution to Technology approach facilitated by our industry-aligned enterprise architects is outcome focused and helps clients bring their technology and business priorities together. When we work with them on strategy, it helps us accelerate not just their digital transformation initiatives, but also their business transformation.

“Winning the coveted award in **Digital Transformation Enabler** category is matter of great pride for all of us at NTT. This win is a true recognition of our client centricity, continuous innovation & the full stack approach we enable for our clients in collaboration with our partners. This award inspires us to further excel in providing exceptional services and driving tangible value & outcomes for all our stakeholders.”

Lux Rao, Director – Solutions & Consulting, NTT India Pvt. Ltd.

What makes the brand a CIO's choice?

Digital can be a catalyst for topline growth and the key is learning how to tap into that potential. NTT helps organizations through a spectrum of products & services, enabling organizations to adopt a business-first approach by following established methodologies to ensure successful implementation and sustenance of their digital programs.

We truly believe that Digital transformation is not merely a technology appendage, but ought to focus on the holistic aspects of the organization and its extended ecosystem.

NTTs Intelligent Solutions' portfolio enables digital transformation for clients by taking a business-first approach.

What makes our offering unique is that we design what we implement, and we implement what we design and also manage it for our clients, making it a truly unique and integrated proposition. Making that possible is a rich portfolio of services from 31 organizations that have come together under the NTT brand and a technology partner ecosystem that is nonpareil.

Enabling true digital transformation

While technology is critical to the digital transformation process, organizations 'indulge' in an almost pavlovian response by placing too much emphasis on technology to drive Digital outcomes. We use a robust consulting methodology to create digital strategy roadmaps for organizations, enabling organizations to carve out their digital vision encompassing people, products & tools.

We are cognizant of the fact that every organization's digital journey is unique, and we help chart digital journeys that go beyond small foot print Pilots or CoEs to true Digital Enterprises.

“The CIO Choice award in Digital Transformation Enabler comes as a recognition for NTT's long-standing leadership in the area of digital transformation.”

Hybrid Cloud

Large Enterprise

Nitin Mishra, Senior EVP & Chief Product Officer, **Pankaj Nath**, Vice President & Head - Products & Services, NTT-Netmagic, receives the recognition trophy from **Milind Khamkar**, Group CIO, Supermax Personal Care Pvt Ltd and **Sanjay Kotha**, Joint President & Group CIO, Adani Enterprises Ltd, at the **Red Carpet Night**.

About NTT-Netmagic

NTT-Netmagic, a wholly subsidiary of NTT, is India's leading Managed Hosting and Multi-Cloud Hybrid IT solution provider serving more than 2000 enterprises globally. Headquartered in Mumbai, Netmagic also delivers Remote Infrastructure Management (RIM) services to various enterprise customers globally across Americas, Europe and Asia-Pacific region. The Company was the first in India to launch services – Cloud Computing, Managed Security, Disaster Recovery-as-aService (DRaaS) and Software-Defined Storage. Netmagic has been recognized with 8 awards at the CIO Choice 2020, and 2 awards at the Datacenter Dynamics India 2019.

About NTT Ltd

NTT Ltd. is a leading global technology services company bringing together 28 brands including NTT Communications, Dimension Data and NTT Security. We partner with organizations around the world to shape and achieve outcomes through intelligent technology solutions. For us, intelligent means data driven, connected, digital, and secure. As a global ICT provider, we employ more than 40,000 people in a diverse and dynamic workplace that spans 57 countries, trading in 73 countries and delivering services in over 200 countries.

“We are grateful to CIOs as the plaudit holds us in good stead to strengthen our operational excellence. This reflects our excellence to provide customers an end-to-end management across clouds for customers, with a strong end-to-end service level agreement guaranteeing performance, predictability and flexibility.”

Nitin Mishra, Chief Product Officer, NTT-Netmagic

NTT-Netmagic's Managed Cloud Services offer you a comprehensive end-to-end quality cloud managed service for your workloads by taking full responsibility including consulting, designing, building, optimizing and managing your private cloud, public cloud and multi-cloud, such as Google Cloud Platform, AWS and Microsoft Azure. We can help you scale and migrate your application workloads to the cloud seamlessly, giving you the autonomy to resize cloud infrastructure on the go.

Today, enterprises are embracing the multi-cloud model like never before. They are looking for ways to assemble, deploy, and manage critical IT workloads across the hybrid cloud environment with controlled cloud IaaS budgets. Lack of a proper governance framework causes enterprises to accidentally expose their data or services.

NTT-Netmagic's cloud analytics platform, Simpli-Insight gives you a single interface to control your complete cloud infrastructure. We deliver a consistent and actionable view into cost and resource management, security, and performance for applications across multiple cloud environments.

NTT-Netmagic's Public Cloud – 'SimpliCloud' – is an enterprise grade IaaS platform that comes with an extensive set of managed services. It not only simplifies your transition to the cloud, but also helps you scale, optimize and manage your technology environment in real-time. Using an end-to-end self-management portal, you have the supreme ability to ramp-up, scale down or modify your cloud server, storage and network resources, anytime, anywhere and anyway you wish. Also, with the help of NTT-Netmagic's dedicated private cloud is delivered in physical and virtual models. For your virtualized workload needs, we provide an end-to-end managed private cloud. Our specially curated Private Cloud environment ensures security of dedicated infrastructure, while enabling complete agility.

“This win in Hybrid Cloud attests to NTT-Netmagic's track-record in helping enterprises navigate their complex cloud journeys.”

Infrastructure Transformation Services

Small & Medium Enterprise

Sachin Rao, MD & CEO, Archon Consulting, receives the recognition trophy from **Milind Khamkar**, Group CIO, Supermax Personal Care Pvt Ltd and **Sanjay Kotha**, Joint President & Group CIO, Adani Enterprises Ltd, at the **Red Carpet Night**.

Archon Consulting Systems delivers value-based solutions and services that positively impact business efficiency. Located in the technological hub of Bangalore, Archon is a privately owned IT infrastructure services company. Incorporated in 2010, Archon offers customised, high quality, ROI-driven IT infrastructure solutions by bringing together the best of technologies provided by market leaders and innovators and back it up with the support and services.

“It is the second Consecutive year that we are receiving the CIO seal of Trust in the Information transformation services category and I humbly accept this coveted recognition on behalf of my team at Archon consulting systems. We at Archon use our extensive industry knowledge and experience to transition customers to the next-gen IT Infrastructure with our product, solution and services integration and I thank all the CIO's who voted for us and showed the faith and trust in our services.”

Sachin S. Rao, MD & CEO, Archon Consulting.

The Archon Advantage

Archon's customised end-to-end, on-time solutions facilitate optimum management of customers' technology investments and resources. Armed with extensive industry knowledge across verticals, Archon's skilled team of experts offer optimum solutions after an in-depth, comprehensive analysis of individual client requirements. Services and solutions are tailor-made for businesses across diverse industries. Each client and every project – big or small – is equally important to us and we form close partnerships with clients and offer customised services to help businesses achieve their key objectives effortlessly.

We are living in a highly disruptive and fast changing world where collaboration occurs at every level. Digital leaders need to excel at continuous business innovation and IT department in enterprises have to cater to disparate demands for various business units as well as employees.

There is constant pressure to optimize and streamline data center management and cut costs while ensuring better performance and utilization of the IT ecosystem. Whether it's real-time analytics, connecting devices at the edge, or protecting apps and data – business leaders now widely prefer to consume the outcomes they want, when they want them, and pay only for what they consume. We at Archon with our technology alliances and skilled resources, including consultants work closely with our customers to manage data, intelligence from edge to core, redefine security paradigm, build infrastructure that will self-manage and self-service, propose and deploy consumption based models that will deliver experiences as a service.

“This win in Infrastructure Transformation Services recognizes Archon Consulting for its customer centricity and innovative solution & services to help enterprises keep pace with the dynamic trends in the technology landscape.”

Edge Computing Infrastructure

Large Enterprise

Life Is On

Schneider
Electric

Ankesh kumar, Marketing Director, Schneider Electric India, receives the recognition trophy from **Milind Khamkar**, Group CIO, Supermax Personal Care Pvt Ltd and **Sanjay Kotha**, Joint President & Group CIO, Adani Enterprises Ltd, at the **Red Carpet Night**.

From optimising data to improving performance of applications, Edge Computing encompasses a breadth of solutions. While we gave a context to what Edge Computing can mean to an enterprise, at Schneider Electric, we have already done the groundwork and revolutionised the area of Edge Computing infrastructure.

Our **Micro DC FX** is one great example of Edge Computing infrastructure, which is located within a secure, insulated, monitored smart enclosure. Each unit contains active cooling, uninterrupted power supply (UPS), battery back-up, environmental monitoring sensors and fire management system with physical monitoring at rack level. This allows plug and play solution for easy and secure deployments of your IT equipment. They come in customisable designs—tested, assembled, packaged and shipped at an APC by Schneider Electric facility.

We are delighted to have won this recognition in the Edge Computing Infrastructure category. Recent industry moves are showing a shift to a decentralized, hybrid computing ecosystem. As a result, the future will see a proliferation of localized edge data centers utilizing converged and hyperconverged technologies.” Venkatraman Swaminathan, Vice President & Country GM, Secure Power Division, Schneider Electric India.

**Venkatraman Swaminathan, VP & Country General Manager India & SAARC
Schneider Electric Secure Power Division.**

Here are some of the benefits of Micro DC FX:

Micro Data Center solutions make it easy and cost effective to add data center capacity anywhere and anytime it is needed – in both IT Room and non climate controlled environments. These customizable designs include the physical enclosure, UPS, PDU, cooling, software, environmental monitoring, and security – all tested, assembled, and packaged at an APC by Schneider Electric facility and then shipped.

- **For System Integrators:**
 - Provides a comprehensive starting point of integrated physical infrastructure for micro data centres.
 - Simplifies the manufacturing process and saves costs.
- **For IT Solution Providers:**
 - Defines standard solutions that are validated by Converged/Hyperconverged industry vendors.
 - Simplifies the purchasing and delivery process.
- **For End Customers (Retail, Finance, Government):**
 - End users need to deploy standardised drop-in-place micro data centres en masse; potentially for thousands of sites with global availability.
 - Simplifies the delivery and deployment processes with repeatable designs, leveraging centralised management for higher availability.

With the emergence of connected devices and the possibility of channelising the data deluge to yield meaningful patterns and insightful information—Edge Computing has come to the forefront to play a critical role in augmenting computing power, boosting bandwidth and reducing network latency or the time taken for the data to move back and forth between edge devices and centrally located data centres. Edge Computing shrinks this delay and allows processing of data at the edge of the network, basically, where the data is generated. This could be your computer or IoT devices placed locally, near to the user.

Internet use is trending towards bandwidth intensive content and an increasing number of attached devices; what many call the Internet of Things (IoT). Edge computing brings bandwidth intensive content and latency sensitive applications closer to the user or data source, providing a low latency bridge to the centralized cloud.

“This recognition in Edge Computing infrastructure is a validation of Schneider Electric's innovation and product supremacy in this segment.”

Travel & Expense Management Cloud Solution

Small & Medium Enterprise

Varun Rathi, Co-Founder & COO and **Ramesh Iyer**, President & CRO, Happay, receive the recognition trophy from **Milind Khamkar**, Group CIO, Supermax Personal Care, and **Sanjay Kotha**, Joint President & Group CIO, Adani Enterprises Ltd., at the **Red Carpet Night**.

Happay is the most preferred corporate spend management partner of midmarket and enterprises. We work with over 6,000 clients across 40+ business verticals and numerous regions. Happay has pioneered innovation in the corporate spend management space. Unlike others, we offer more than a SaaS solution, we incorporate payments and other new-age technologies such as AI, ML, and mobility into our offering. For the end-users, Happay provides a simple, smart, and intuitive interface to manage their expenses with minimal efforts.

"We are ecstatic to begin the new decade by winning the CIO Choice Award for 2020. To receive this award twice in a row, and by extension - an unwavering vote of confidence from CIOs makes this moment extremely special in our journey."

Varun Rathi, Co-Founder and COO, Happay

Enabling digital transformations

The start of the decade has heralded exciting change for Happay with reference to its growing product line and expanding geo presence. Happay launched new solutions such as Fleet Xpress, Invoice Processing & Vendor Payments, and Flexi Benefits Management to complement its marquee offerings of Travel & Expense Management. The company's presence has now crossed the subcontinent as it broke new ground in the USA, Brazil, and MENA in 2020.

Happay have helped over 6,000 companies during varied stages of their digital transformation process. Whether it is the very first step of migrating from a manual process, or replacing a limited in-house development, Happay has expertly maneuvered the challenging course of digital transformation for its clients and provided the consummate corporate spend management solution.

What makes us different ?

- Experience: 6500+ clients across 40+ industry verticals
- Product UI & UX: Our user-centric app with its supreme UI/UX is used and loved by over 10,000 users with a rating of 4.5 stars.
- Change management expertise: Account managers committed to customer success; best practices of going digital, onboarding, training and on-going support
- Integrations: SFTP and API-based integrations with HRMS, TMCs, ERPs, CRMs, and accounting softwares, Uber, Gmail and Outlook Plugins

We have about 5500+ companies using Happay to manage business expenses at scale. Some of our key customers are Byju's, OYO, Fossil, Welspun and Landmark group.

"Happy's ability to offer a simple, agile, and intuitive platform that plugs in seamlessly with other softwares has resulted in this win for Travel and Expense Management Cloud Solution."

Unified Communications & Collaboration

Large Enterprise

Manish Jain, Head - Business Solution, Airtel Business, receives the recognition trophy from **Nafees Ahmed**, CIO, Indiabulls and **PVJ Prasad**, CIO, Hafele India Pvt Ltd., at the **Red Carpet Night**.

About Airtel Business:

Airtel Business is India's leading and most trusted provider of ICT services with global network across USA, Europe, Africa, Middle East, Asia-Pacific, India and SAARC regions. We serve over 1000 global enterprises, 2000 large and 500,000 medium/small businesses across India. Airtel Business offers a diverse portfolio of products and services such as Data Connectivity, Voice & Messaging, Collaboration, Cloud, Data Center, Security, IoT, Enterprise Mobility, Network Integration & Professional services to Enterprises, Government, Carriers, Small & Medium Businesses, OTTS, and Mobile Network Operators across the globe.

“This recognition is an endorsement of our efforts to understand industry needs and provide next generation solutions for SMEs & Enterprise customers across India. Given the disruption caused by COVID-19 related lockdowns, we understand maintaining business continuity becomes a huge concern. We are leveraging the power of our integrated product portfolio to enable businesses to operate seamlessly from anywhere through secure communication and collaboration.”

Ganesh Lakshminarayanan, CEO, Enterprise Business, Airtel Business.

Airtel's Conferencing solution offers an integrated and secure cloud-based conferencing platform for audio, video and web conferencing, and webinar and digital events across mobile devices, desktops, telephones and room systems. With this, businesses can now leverage the next generation conferencing solution to foster effective collaboration amongst their employees and teams globally.

Airtel's unified communication and collaboration services comes with huge cost savings, flexible billing, unlimited or pay per use model across 120 countries, 24*7 mail / phone support, and custom plans relevant to your business segment.

Key Features of Airtel Conferencing solution:

- HD video and audio meetings can support up to hundreds of video participants.
- Built-in collaboration tools like screens share and co-annotate for a more interactive meeting.
- Support scheduling or starting meetings from Outlook, Gmail, or iCal. Record your meetings locally or to the cloud, with searchable transcripts.
- End-to-end encryption for all meetings, role-based user security, and password protection.
- Host and manage live interactive events, town halls and webcasts for thousands of attendees.
- #1 Conferencing Service Provider by Frost & Sullivan for 3 consecutive years.
- One of the largest conferencing infrastructures (15000 ports) in APAC region with 20 local dial-ins in India.
- Advanced Unified Conference Portal with optional free services such as recording, online call logs and online report.
- Managed Video Conferencing offering with bundled network services on the internet and MPLS.

“With this win in Unified Communications & Collaboration, Airtel Business has once again bolstered its position in the market as a trusted partner for CIOs.”

Enterprise Flash Storage

Large Enterprise

Parag Amalnerkar, Director-Marketing, NetApp India Marketing and Services, receives the recognition trophy from **Nafees Ahmed**, CIO, Indiabulls and **PVJ Prasad**, CIO, Hafele India Pvt Ltd., at the Red Carpet Night.

About NetApp

NetApp has been helping customers buy less storage for over a decade. We believe that getting the most data storage capacity for your budget dollar is only one consideration when you're making a purchase decision. It's imperative to thoroughly explore the product's capabilities and have confidence the system will enable you to not only meet your business requirements today, but in the future as well.

NetApp is the data authority for hybrid cloud. We provide a full range of hybrid cloud data services that simplify management of applications and data across cloud and on-premises environments to accelerate digital transformation. Together with our partners, we empower global organisations to unleash the full potential of their data to expand customer touchpoints, foster greater innovation, and optimise their operations.

“Today, enterprises are looking to adapt dynamically to changing business demands, they aim to grow with ease and protect the investments made towards technology. Flash storage has brought a whole range of new possibilities to enterprise computing. With NetApp All Flash Arrays, we combine industry leading performance, efficiency, and data management with seamless cloud connectivity to enable digital transformation. NetApp empowers organizations with the world's fastest all-flash storage, enabling them to put the right data, in the right place, at the right cost.”

Puneet Gupta, MD, NetApp India Marketing and Services

7 Reasons Why NetApp is Best for Flash Storage

- **Better performance**

Not only do NetApp all-flash arrays deliver consistent low latency under the most stressful workloads, but performance does not suffer when inline storage efficiency features are turned on. We guarantee it!

- **More efficient**

NetApp efficiency technologies deliver market-leading data reduction. The storage savings increase 10X with snapshots. Better effective capacity backed by the most effective guarantee. No fluff. No fine print.

- **Total security**

NetApp all-flash storage provides application-consistent data protection, synchronous replication, built-in encryption, WORM protection, and more to safeguard your data and meet governance and compliance requirements.

- **Completely future-proof**

Sure, we can offer you a free controller upgrade. But will your IT strategy take you to hybrid or public cloud in the next 3 years? Our NextCredit program gives you the agility to make your cloud strategy a reality—with no upfront costs.

- **Better application integration**

NetApp plug-ins for Oracle, Microsoft SQL, SAP, My SQL, and more let you empower your application owner to provision storage as they need it—easily and without being storage experts.

- **Most cloud-ready**

Whether it's tiering cold data to the cloud, using cloud for backup, or unifying management across flash and cloud, NetApp helps you place the right data in the right place for the right cost.

- **Innovation leader**

NetApp has led the market, shipping NVMe over Fabrics (NVMe-oF), the industry's first end-to-end NVMe system, support for 32 GB fibre-channel and 100 Gb Ethernet, data management software for server-side persistent memory, and cloud data services in partnership with the leading hyperscalers.

“More than a decade's experience addressing enterprise storage needs, coupled with NetApp's innovation has helped the company secure this important recognition in Enterprise Flash Storage.”

Sharad Sanghi, Managing Director & CEO, **Anbu Shanmugam**, VP- Facilities Projects and **Nimesh Chandra Thakur**, GM-Sales & Business Development, NTT-Netmagic, receive the recognition trophy from **Nafees Ahmed**, CIO, Indiabulls and **PVJ Prasad**, CIO, Hafele India Pvt Ltd., at the **Red Carpet Night**.

About NTT-Netmagic

NTT-Netmagic, a wholly subsidiary of NTT, is India's leading Managed Hosting and Multi-Cloud Hybrid IT solution provider serving more than 2000 enterprises globally. Headquartered in Mumbai, Netmagic also delivers Remote Infrastructure Management (RIM) services to various enterprise customers globally across Americas, Europe and Asia-Pacific region. The Company was the first in India to launch services – Cloud Computing, Managed Security, Disaster Recovery-as-aService (DRaaS) and Software-Defined Storage. Netmagic has been recognized with 8 awards at the CIO Choice 2020, and 2 awards at the Datacenter Dynamics India 2019.

About NTT Ltd.

NTT Ltd. is a leading global technology services company bringing together 28 brands including NTT Communications, Dimension Data and NTT Security. We partner with organizations around the world to shape and achieve outcomes through intelligent technology solutions. For us, intelligent means data driven, connected, digital, and secure. As a global ICT provider, we employ more than 40,000 people in a diverse and dynamic workplace that spans 57 countries, trading in 73 countries and delivering services in over 200 countries.

“We are extremely delighted to be honoured in 4 categories at CIO Choice, across cloud and data centre categories. We are immensely grateful to the CIO community for their continued faith in us and helping us win, for 4 consecutive years in some of the categories. This is a testimony to our leadership in cloud and data center managed services.”

Sharad Sanghi, Managing Director and CEO, NTT-Netmagic

As a global NTT company, our customers benefit from our nearly two decades of experience around colocation, data center migration and security. Through our robust data centers, high-density colocation solutions, fault-free migration expertise and more, we help you bounce back from disruption to certainty.

NTT-Netmagic has established itself as the provider of choice for customers with mission-critical hosting requirements. We bring the in-depth experience of managing IT infrastructure for over 2500 enterprise customers with 10 hyperscale and high-density data centers in Chennai, Bengaluru, Mumbai, and Noida (Delhi). Our data centres provide hosting and co-location solutions that are supplemented with a comprehensive suite of managed services, delivered by a skilled team of technical experts covering the complete IT infrastructure stack—OS, DB, Storage, Security, Network and Cloud. These services are delivered from our Network and Security Operations Team, allowing customers to construct modular solutions that are tailor-made to their specific requirements.

Our India data centers: A snapshot

- 10 Data centers in major cities: Chennai, Bengaluru, Mumbai, and Noida (Delhi)
- Cover 1.5 Million sq. ft in major cities
- 140 MW facility load
- 2,500+ Clients
- 3 R&D centers in Pune, Mumbai & Bengaluru
- 99.9% Infrastructure availability
- 24x7 Escorted access security and support
- 2x Capacity every 2 years

“This recognition in Hyperscale Data centres validates NTT-Netmagic's deep expertise and infrastructure capabilities that have been built over the years.”

Hybrid Multi Cloud

Large Enterprise

YOUR ENTERPRISE CLOUD

NUTANIX
YOUR ENTERPRISE CLOUD

Anantharaman Balakrishnan, VP & MD-Sales, **Ritesh Gupta**, Regional Director, Nutanix India, receive the recognition trophy from **Nafees Ahmed**, CIO, Indiabulls and **PVJ Prasad**, CIO, Hafele India Pvt Ltd, at the **Red Carpet Night**.

Nutanix is a global leader in cloud software and a pioneer in hyperconverged infrastructure solutions, making computing invisible anywhere. Companies around the world use Nutanix software to leverage a single platform to manage any app at any location at any scale for their private, hybrid and multicloud environments.

Flexible and fast-moving business environments call for flexible and agile solutions. Nutanix looks to provide its customers with a comprehensive range of consumption models and the freedom to run Nutanix Enterprise Cloud software across a wide range of popular third-party server platforms of their choice. Essentially, we help customers to modernize their data centers and run applications at any scale, on-premise and in the cloud. What sets us apart from our players in the industry is our ability to make infrastructure invisible.

“We are honoured to have been recognized as the CIO Choice 2020 for Hybrid Multi Cloud. India is increasingly embracing hybrid and multi cloud as the foundation for its future digital economy. We're delighted with this acknowledgement of our efforts and capabilities. Customer service has always been an obsession for us at Nutanix, and we remain committed to delivering the highest levels of excellence, innovation and service to our customers.”

Anantharaman Balakrishnan, VP and MD-Sales, India and SAARC, Nutanix

Enabling a 'Hybrid' Future

Nutanix has always believed that hybrid cloud is where majority of customers will gravitate as enterprises begin to understand the restrictions of a 'one size fits all' public cloud model. In fact, 42% of India's enterprises plan to shift the majority of their IT deployments to Hybrid Cloud according to the Nutanix Enterprise Cloud Index 2019.

Hybrid and multi cloud can provide organizations the option to manage both private and public cloud platforms at the same time according to their business needs. They have the added benefit of managing cloud expenditure and can easily streamline operations and systems.

We're witnessing wide adoption of hybrid cloud in India, and we have further enabled this by adding layers to our software applications, so customers can move applications to the public cloud if required. At the same time, if a customer decides they want to shift back on-prem for reasons of cost, security, or performance, we enable that too. App mobility and interoperability are major benefits of hybrid cloud models.

The Nutanix hybrid and multi cloud solutions are an important offering for our customers to navigate cloud complexity and make full use of their cloud investments.

Additionally, our latest Nutanix Enterprise Cloud Index for India found that 91% percent of India's enterprises reported having moved, or having plans to move, public apps back on-prem. This reflects India's enthusiasm for hybrid cloud adoption.

“Nutanix has won this recognition in Hybrid Multi Cloud by helping enterprises to get to the cloud and then enhancing their value once they are there.”

Hyper-Convergence

Large Enterprise

Amit Luthra, Director & General Manager, Storage & CI sales, Dell Technologies, receives the recognition trophy from **Nafees Ahmed**, CIO, Indiabulls and **PVJ Prasad**, CIO, Hafele India Pvt Ltd., at the **Red Carpet Night**.

About Dell Technologies

Dell Technologies is a unique family of businesses that provides the essential infrastructure for organisations to build their digital future, transform IT and protect their most important asset, information.

The company services customers of all sizes across 180 countries—ranging from 99 per cent of the Fortune 500 to individual consumers—with the industry's most comprehensive and innovative portfolio from the edge to the core to the cloud.

"We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value to CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a manifestation that our long-term, customer centric strategy is working. We are committed to building the industry's most modern portfolio of end-to-end solutions for our customers in India. I would like to thank all our partners, customers and importantly the CIO Choice panel for selecting us."

Alok Ohrie, President & Managing Director, Dell Technologies India.

Dell EMC VxRail Hyper-Converged Infrastructure

Powered by VMware vSAN and Dell EMC PowerEdge servers, VxRail is the only fully integrated, pre-configured, and pre-tested VMware hyper-converged appliance on the market. VxRail transforms HCI networking and simplifies VMware cloud adoption, while meeting any HCI use case, including support for the most demanding workloads and applications.

VxRail: Delivering a turnkey experience that enables our customers to continuously innovate, VxRail features next-generation technology that provides future proofing for your infrastructure, including NVMe cache drives, SmartFabric Services supported by Dell EMC networking switches, advanced VMware Cloud integration through VMware Validated Designs (VVD) guidance, and automated tools and guides to simplify deployment of a secure VxRail infrastructure.

- Consolidates compute, storage, and virtualization with end-to-end automated lifecycle management
- Offers deep integration with VMware tools, including operational transparency with vCenter
- Automates network setup with SmartFabric Services, greatly simplifying and accelerating deployment
- Provides a single point of support for appliance software and hardware

"Dell's consecutive win in Hyperconverged Infrastructure is a recognition of the company's continued effort to raise the bar and meet the growing infrastructure demands of enterprises."

Managed IT Services

Large Enterprise

Kaustubh Chandra, Head Marketing, **Jayant Gundewar**, Director - GTM - Transformation & Platform Services and **Shailendra Badoni**, COO, NTT Ltd., receive the recognition trophy from **Sourav Sinha**, CIO, Indigo Airlines and **Udayraj Prabhu**, EVP-Business Process Transformation & IT, Marico at the **Red Carpet Night**.

NTT Ltd. is a leading global technology services company, partnering with organizations globally to shape and achieve outcomes through intelligent technology solutions that are data driven, connected, digital, and secure. NTT helps with the management of your day-to-day IT operations, improving efficiency and delivering business outcomes.

Our Managed IT Services help enterprises with the operations of their technology environments. We provide technical expertise, service consistency, and flexibility across multiple vendors, technologies, and geographies. Reduce overheads and improve efficiency by leveraging our scale, methodologies, and high levels of standardization.

Our Managed IT services include - **Collaboration and Productivity, CX, Data Centre, Network and Security.**

“It gives us great pleasure to be the recipient of this year's CIO Choice awards in the managed IT services category. With cloud computing at the helm of enabling a digitally transformed business, managed IT services will continue to be significant for enterprises across verticals. This recognition re-establishes our industry leadership and is a testimonial to the excellence that NTT Ltd. strives to deliver.”

Jayant Gundewar, Director - GTM -Transformation & Platform Services, NTT India Pvt. Ltd.

Proactive hybrid managed services

NTT offers a suite of hybrid managed services which cater to the full stack of technology towers with a single pane of glass dashboarding for the CIOs to get a ring side view of the entire IT operations in real time. Transparent & real time reporting helps quick decision making in a proactive manner rather than traditional reactive managed services.

Effective digital outcomes call for a macro view of the business landscape. NTT delivers this by reviewing business models, customer preferences, employees and their processes, partner ecosystem and competitors' digital initiatives. With this in-depth view in hand, NTT helps enterprises evaluate the impact of digital initiatives and how they can be strategically used to increase your overall business value. We then isolate and define the digital initiatives that are best aligned to your unique business strategies and desired outcomes.

Our Hybrid service delivery leveraging the best of automation technologies deployed across our remote platforms and a well trained on ground workforce owned by NTT rather than a third-party franchised service model.

“This recognition in Managed IT services stands as evidence to NTT's leadership and unparalleled expertise in the managed services space.”

Information Security

Small & Medium Enterprise

Vivek Tiwari, CEO and **Darshini Kulkarni**, Director – Sales & Marketing, Audix Technologies receives the recognition trophy from **Udayraj Prabhu**, EVP-Business Process Transformation & IT, Marico and **Sourav Sinha**, CIO, Indigo Airlines, at the **Red Carpet Night**.

Audix Technologies is one of rapidly emerging Information & Cyber Security partners for enterprises globally. Our team of qualified & experienced professionals equipped with regularly updated knowledge on emerging cyber threats and latest emerging cyber security technologies ensure a complete 360-degree approach for enterprises so you continue with having core focus on your business. Audix Technologies has been rendering comprehensive Information & Cyber Security services to many of the Fortune 500 reputed global companies across BFSI, Manufacturing, ITes, Power & Energy Sectors.

“Being recognised with “CIO CHOICE 2020” awards for the Information security category is an endorsement of the expertise brought by our team and the quality delivered by us to the organisation. It's a seal of trust endorsing CIO's have put on a 1.5 year old startup to manage one of the most critical asset of their business – 'DATA' and we are really proud & humbled to prove ourselves matching the CIO expectation in terms of our service quality.”

Vivek Tiwari, CEO, Audix Technologies.

7 Secret of Our Success since our inception in mid-2018 has been:

- Providing Security Solution & Consulting in TRUE sense
- Unquestionable Integrity
- 100% Ownership of your Information security
- Strict adherence to delivery timelines
- Continuous global information security trend awareness to customers
- 24 X 7 passionate support to respond to your cyber risk concerns any time
- Hassle-free optimised process to kick-off the project max within 3 working days post approval

Audix Technologies is into helping enterprises to secure & prevent information loss to cyber-attacks by eliminating kind of security lapses in 3 major pillars of the organisation – People, Process & Technology.

Our Enterprise Suite of Information Security Solutions	
Information Security Assurance	Cyber Risk Governance & Compliances
○ Vulnerability Assessment & Penetration Testing ✓ Application security ✓ Infrastructure security ✓ Network security ○ Digital App Security Assessment ○ Cloud Security Assessment ○ Secure Code Assessment ○ Red Team Assessment ○ IOT Security Assessment	○ Enterprise Cyber Risk Framework Design ○ Enterprise Cyber Security Strategy Assessment ○ Cyber Resiliency Framework Implementation ○ ISMS Framework Implementation ○ PCI DSS Consulting & Implementation ○ GDPR Compliance Consulting ○ SCADA Security Consulting & Implementation ○ HIPPA Compliance Consulting ○ Sarbanes-Oxley Consulting

Securing Enterprise Digital Transformation Journey:

As the enterprises are embracing digital transformation heavily so as to stay in the business race and remain connected to their customer's 24 X 7 through multiple digital means, the vulnerability of the business against the data loss due to cyber-attacks has also increased considerably. Now with majority of the customer as well the employees on-boarding the digital platforms, these end users have become more exposed & thereby becoming the weakest link in the security framework of any organisation.

“As a startup, Audix has delivered commendable work in the last few years, including for some of the Fortune 500 brands. This recognition bears testimony to the company's focus on quality and expertise.”

End Point Compression

Small & Medium Enterprise

Dr Mohan Chandrasekaran, Founder & CEO, AdStringO, receives the recognition trophy from **Sourav Sinha**, CIO, Indigo Airlines and **Udayraj Prabhu**, EVP Business Process Transformation & IT, Marico, at the **Red Carpet Night**.

Headquartered in Mumbai, the company delivers primary storage and network bandwidth reduction under the brand AdStringO. AdStringO's products are sold worldwide and have already helped small and medium-sized companies, universities, public and government institutions as well as the vast majority of Fortune 500 companies get more from their storage investments.

We are world's fastest endpoint digital compression provider. Our world class technology compresses IMAGE, PDF, AUDIO, VIDEO and OFFICE Files up to 90% with no loss in visual quality.

AdStringO's Digital Compression technology can be used across various verticals like Banking, Insurance, Telecom and Logistics to increase Performance, Reliability and Profitability.

“AdStringO vision is to provide easy transmission of the Last Mile IMAGE/AUDIO/VIDEO/PDF/OFFICE Files Capture files either through Mobile or Web Scanner to the Enterprise Server at Point of Capture even at Low connected Networks like 2G. Our mission is to grow together with its employees, customers and partners to become the World's Fastest EndPoint Mobile & Web Capture Compression technology partner for small and large companies for high quality files with lowest file size thus help easy transmission at low connected network.”

Dr. Mohan Chandrasekaran, Founder & CEO, AdStringO

Core USP of AdStringO

By Implementing Digital Technology, we have channelized automation in onboarding process to reduce the turn-around-time and eliminate paperwork. Now Field agents can on board customers from anywhere, anytime with no paperwork or branch visit compulsion, even from 6 lac+ rural areas at low bandwidths, like: 2G, connectivity. So by utilizing this digital technology, GOI and BFSI sector can save up to 90% cost on storage and bandwidth during the customer onboarding process.

Adstringo an innovative End-Point Compression product consists of the following advanced features:

- Compresses of all MS Office File types (XLS/ XLSX, DOC /DOCX, PPTX / PPT).
- Compresses all capture Images formats like JPEG, PNG, TIFF, PDF etc.
- Worlds 1st Mobile Compression available on Android, IOS & Windows platform.
- Easily Integrates with existing systems as SDK for Enterprise Customers.
- Easily Integrates to your existing SCAN Application, DMS & BPM.
- Available in Web, Mobile, Desktop and Server Platform.
- Captures and Compresses all Audio, Video formats (WAV, MP3, AVI, WMV, Mp4).
- Healthcare (DICOM) Files (X-ray, MRI, Ultrasound etc.) can be compressed.
- CCTV on the Fly Video Streaming can be done successfully.

We have helped our customers compress an enormous amount, 100 million + media files. The field user base has increased from 1000+ to million users. Our vision is to “GO PAPERLESS, GO DIGITAL, GO RURAL”.

“This recognition stands testimony to the compelling use-cases and proven track record that AdStringO brings to the table.”

Airtel Business is India's leading and most trusted provider of ICT services with global network across USA, Europe, Africa, Middle East, Asia-Pacific, India and SAARC regions. We serve over 1000 global enterprises, 2000 large and 500,000 medium/small businesses across India. Airtel Business offers a diverse portfolio of products and services such as Data Connectivity, Voice & Messaging, Collaboration, Cloud, Data Center, Security, IoT, Enterprise Mobility, Network Integration & Professional services to Enterprises, Government, Carriers, Small & Medium Businesses, OTTS, and Mobile Network Operators across the globe.

Through the diverse product portfolio and strategically located submarine cables and satellite network running across 2,50,000+ Rkms in 50 countries and 5 continents, we are pushing the boundaries in digital service delivery with a key focus on end user experience, high availability, and impeccable quality of service.

“We are delighted with this recognition by CIOs across the country. This is yet another acknowledgement of our razor sharp focus on customer requirements for robust and secure connectivity, especially in times of business operating remotely. We will continue to serve our customers with best-in-class connectivity solutions that set new industry benchmarks.”

Ganesh Lakshminarayanan, CEO, Enterprise Business, Airtel Business.

Airtel offers enterprise-grade, secure connectivity services that accelerates business productivity and growth in the digital world. With one of the largest terrestrial fiber networks in India, Airtel leased lines provide reliable, cost-effective, and low latency network connectivity for seamless access to ever-growing immediate and future content needs.

Features:

- Tier 1 internet operator in India with one of the largest terrestrial fiber network
- 10Tb+ of diversified submarine and terrestrial IP backbone worldwide
- 100G enabled IP Network with multiple bandwidth options
- Fully protected internet delivery till customer premises
- Unmatched network reach with 3,00,000+ route Kms fiber deployment and 1500+ fiber point of presence in India
- Resilient and self-healing global IP backbone
- Future Ready – 1200+ private peering relations with leading IPXs, CDNs, OTTs in India and globally for local content availability.
- IPV6 ready peering ecosystem and DDOS ready when it comes to security

Airtel is India's largest player in the B2B connectivity space and serves over 2500 large and one million plus SMEs and startups with its integrated product portfolio that includes data centres, cloud, security and collaboration.

“With this award in Telecom Carrier (Leased Lines), Airtel Business has once again demonstrated its leadership position in the market.”

Idea

Bhushan Sethi, Vice President, Vodafone Idea Ltd., receives the recognition trophy from **KRC Murty**, Head of RTB (IT), Kotak Mahindra Bank and **Raghunath Reddy**, Executive VP-IT, UTI Asset Management Company Ltd, at the **Red Carpet Night**.

About Vodafone Business Services

Vodafone Business Services (VBS), the enterprise arm of Vodafone, is committed to being the most trusted and valued total communications partner to enterprises. Our portfolio of Total Communications Solutions includes Enterprise Mobility, Fixed line Voice, Fixed line Data, IoT (Internet of Things), Security and Cloud-based Solutions to global, national and emerging enterprises, backed by our robust and superior network infrastructure and a 24x7 Network Operations Centre (NOC). We are actively engaged with public sector enterprises and state governments and are strongly contributing to the vision of Skill India, Digital India and Smart Cities.

A leading player in the enterprise segment, we are led by our strong growth in the wireline and emerging enterprises units. With unmatched global expertise and technological know-how, we bring in both the scale and flexibility that Indian businesses require. Our global and Indian reach and scale also power the delivery of wholesale data and voice solutions to telecom carriers & wholesale customers through our business division, Vodafone Carrier Services.

“We are extremely delighted to have won the CIO Choice 2020 recognitions and are really grateful to the CIO community for their support. This Award is a testimony to our Constant efforts to deliver delightful customer experience by bringing the smartest and newest technologies to serve businesses in digital era. We remain committed to constantly innovate & improve our product portfolio while delivering excellent customer service and be the trusted and valued partner for enterprises.”

Abhijit Kishore, Chief Enterprise Business Officer, Vodafone Idea Ltd

Vodafone Idea Business Service offers a wide range of enterprise-grade, end-to-end solutions to meet your specific business requirements. Our reliable and secure global network will ensure that you can scale your business without limitations. Our range of IoT solutions can help you deliver better accountability, faster implementation, and quicker return on investments.

Vodafone is recognized by Gartner as a Leader in the 2019 Magic Quadrant for IoT Connectivity Services, Worldwide for the 6th consecutive time. We now have 94 million managed IoT connections around the world. In India, we have the best of breed connectivity management platform, industrialized SIMs and integrated solutions to help deliver faster RoI on IoT solutions.

What makes us unique:

We, at Vodafone understand that no two IoT projects are the same--in scale, requirement and deployment. Each involves multiple components – device, application, connectivity and others. And with different suppliers providing various components, this makes the project even more difficult to manage.

With Vodafone's SuperIoT Suite, you get end-to-end solutions with one single point of contact; where we ensure that every element of your project works smoothly. Our team of highly specialised experts with detailed knowledge of their particular industry sector ensure that you focus solely on your business, while they manage everything else. Thereby ensuring better accountability, faster implementation and quicker return on investments.

We come with over twenty years of successful implementations, across the world. Our IoT Managed Connectivity Platform brings all the information to you, IoT SIMs helps with longevity, and our modular approach that ensures rapid application development and scalability.

- Internet of things across businesses
- Differentiated managed IoT connectivity platform
- Building end-to-end solutions
- Dedicated IoT expert sales & BD, skilled service & support
- Market leading connectivity portfolio
- Location-based services
- Super IoT-end to end solution
- Product & service led innovations

“This win in Internet of Things (IoT) is an endorsement of Vodafone's focus on offering the right expertise and unique offerings in the IoT space.”

IT Advisory

Large Enterprise

Abhijit Majumdar, Partner and **Anand Kumar Jena**, Director, PwC India, receive the recognition trophy from **KRC Murty**, Head of RTB (IT), Kotak Mahindra Bank and **Raghunath Reddy**, Executive VP-IT, UTI Asset Management Company Ltd, at the **Red Carpet Night**.

PwC's IT Function Transformation practice provides IT advisory to CIOs and CXOs in delivering some of their most important and complex technology transformations. IT strategy roadmap advisories are widely trusted by the C-suite for their neutrality, insights, holistic perspectives and practicality.

This is a tremendously exciting time for businesses. The speed of technology change creates opportunities and threats for us all. The cost of technology is falling, new technology consumption models are now available, and people want technology 'on the go'. In the digital world, businesses are looking to deliver new functionality in days and weeks, not months and years.

In PwC's IT function transformation practice bring the right vision, people and leadership to succeed in helping our clients become more effective businesses.

This is a tremendously exciting time for CIOs. The speed of technology change creates opportunities and threats for us all. The cost of technology is falling, new technology consumption models are now available and people want technology 'on the go'. In the digital world, businesses are looking to deliver new functionality in days and weeks, not months and years. We help our clients understand and evolve the way they align IT with the business, and source, organise and manage IT to deliver the modern day demands of the business.

Abhijit Majumdar, Partner and IT Function Transformation leader, PwC India

PwC advises CXOs to enable their businesses through:

- Adoption of emerging technologies (cloud, social, mobile) into their existing technology landscape
- Directional clarity and greater IT investment value through better IT governance, lower "IT run" costs and new technology adoption
- Greater IT operational value through optimized IT service delivery to the business' employees, partners and customers
- Rapid transition through disorderly, high-risk IT events such as outsourcing, mergers, acquisitions and divestitures

Our IT strategy roadmap advisories are widely trusted by the C-suite for their neutrality, insights, holistic perspectives and practicality. It is evident from the feedback of clients we have served over the years and the repeat advisory we are called upon for. We bring a unique approach of evolving the IT roadmaps through the 3 perspectives of business, experience and technology, while applying both internal business and IT expectations and external peer comparisons, by leveraging our experience and deep industry insights.

With offices in 157 countries and a global network of more than 276,000 people, we are among the leading professional services networks in the world. We help organisations and individuals create the value they are looking for by delivering quality in assurance, tax and advisory services.

"With this win in IT Advisory, PwC has once again reinforced its leadership position in the market as the most trusted technology transformation partner for enterprises."

IT Operations Management

Small & Medium Enterprise

Satyen Vyas, CEO and **Karthik Srinivasan**, Regional Director – Sales, Symphony SummitAI, receive the recognition trophy from **KRC Murty**, Head of RTB (IT), Kotak Mahindra Bank and **Raghunath Reddy**, Executive VP-IT, UTI Asset Management Company Ltd, at the **Red Carpet Night**.

Symphony SummitAI, AI-driven IT and Enterprise Management Suite, is designed to take IT and business to greater levels of speed, responsiveness, and productivity. SummitAI brings unprecedented benefits of automation, agility and productivity gains to enterprises. SummitAI can transform the way routine tasks are performed.

Users can converse with AI-powered digital agent Conversational Interface and Decisioning Engine – CINDE, using natural language and receive personalized and intelligent responses. SummitAI can automatically resolve majority of the user issues and the rest are intelligently routed to the right human agent. SummitAI increases productivity for end users and operations staff through end to end automation and resolve up to 50% of end user tickets instantly.

“CIOs are harnessing digital transformation, agile strategies and AI-driven automation to ensure their companies can adapt swiftly to future disruptions. We are privileged to be in a position to help CIOs to adopt AI-driven digital innovation as the pathway to resilience. We are honoured to receive validation of our solution for three years running by those we seek to serve. It's a recognition by the CIO and for the CIO that spurs us on to continue innovating.”

Satyen Vyas, CEO, Symphony SummitAI

Our value propositions

The impact of the pandemic is being felt by all businesses across the globe. IT Leaders are navigating a wide range of interconnected issues that span from business continuity, employees and customer safety, shoring-up cash & liquidity, and reorienting operations to improve productivity amid intensifying uncertainty – all with a focus on overall cost reduction.

The best cost reduction is the strategies that demonstrate visible hard-dollar savings that have a minimal impact on the company's strategic initiatives. This is where Symphony SummitAI helps CIOs. SummitAI's AI-driven automation can provide reduction in service desk operations cost. SummitAI can deliver up to 25% reduction in IT assets inventory costs with better visibility and usage tracking. SummitAI can increase productivity by up to 15% using unified operations across Enterprise Services and IT.

Our AI-driven solutions address the major challenges that organizations face when it comes to IT and enterprise service management, and we'll do it better than anyone else.

Consumers of IT services who are also consumers of the latest innovation in B2C products expect similar quality of 24/7 service from IT. These expectations place greater strain on IT service teams, who typically are asked to do more and more with the same or fewer resources – all while dealing with increasing complexity. Organizations recognize the need for a service management solution that addresses enterprise needs beyond IT.

“This award in IT Operations Management recognizes Symphony's continued endeavor to bring the latest advances in AI & machine reasoning to help customers drive productivity, reduce costs and accelerate business outcomes.”

SD-WAN Platform

Small & Medium Enterprise

Vishal Khare, Co-Founder and **Abhinav Gupta**, Regional Head, Lavelle Networks, receive the recognition trophy from **Amit Phadke**, Group Head - IT, Operations, Cloud and Security, Western Union and **Meheriar Patel**, Group CIO, Jeena & Company, at the **Red Carpet Night**.

Lavelle Networks solves the biggest challenges in the WAN for distributed enterprises. With 100% software defined architecture, Lavelle Networks' SD-WAN solutions ensure faster networks, faster scale and the fastest transition to cloud networks.

Lavelle Networks helps enterprises leverage hybrid WAN transport resulting in enhanced user experience in terms of improved application accessibility speed. Lavelle Networks ScaleAOn SD-WAN also enables deep insight into the network and application behavior in real time with simplified cloud based central management.

“What better can be than getting recognized by our own customers for the value we have been able to add in their environment. This is also special because we were up against few other worthy choices from this field. It was a great honour for us to get selected as the winner in SD-WAN category. We would sincerely like to extend our gratitude and appreciation towards our customers, partners and organizers for this recognition.”

Vishal Khare, Co-founder and VP Sales, Lavelle Networks

Solving CIOs' biggest challenges

The biggest challenge facing CIOs and the enterprise IT infrastructure they manage today, is being able to deliver fast, safe, ubiquitous access networks so users, enabling them to have the same great productive experience everywhere when they use applications in the data center.

Lavelle Networks' solutions offer:

- Reduce operational WAN costs and total cost of ownership.
 - Use the Hybrid WAN strategy to reduce reliance on MPLS.
 - Ensure readiness for cloud application performance.
 - Simple to deploy with zero touch provisioning
 - Secure, scalable network with our ScaleAOn architecture.
 - Cloud-based centralised management with deep visibility and insight
 - Take advantage of Internet bandwidth with no compromise on Internet Security.
- ...and a lot more.

Lavelle Networks SD-WAN Suite:

CloudPort Edge: Wan/Edge appliance available in physical form factor or as an “any cloud provider ready” virtual appliance. It allows you to use multiple forms of network links (4G to Fiber to V.35 serial) to connect your users to your applications from any branch location.

CloudPort Gateway: All CloudPort Edge locations need to be aggregated and connected in an interoperable manner to your data center or cloud networks. Our Gateway appliances help you do just that with their powerful hardware and software capabilities to handle thousands of VPN tunnels, large BGP or OSPF network aggregation and peering, advanced high availability architectures.

CloudStation NETWORK CONTROLLER appliance suite of physical, virtual and cloud instances which provide the wonderful magic of next generation SDN architecture, intent driven policies, modern dashboards, network segmentation tools.

CloudStation NETWORK ANALYTICS appliance suite of physical, virtual and cloud instances which power the advanced network flow analysis that fuels our industry leading dynamic path selection, automated performance characterization using Network Scores, split second visualization of Top Network usage by user, flows or applications.

“This award in SD-WAN Platform recognizes Lavelle's product innovation on a fully SD-WAN based architecture, which offers tremendous capability of scale to enterprises.”

InfrasoftTech

tech Digital Solutions

Rishi Kothari, Program Manager and **Laxshmikant Darbha**, Delivery Head – Digital, InfrasoftTech, receive the recognition trophy from **Amit Phadke**, Group Head - IT Operations, Cloud & Security, Western Union and **Meheriar Patel**, Group CIO - Digital Solutions, Jeena & Company Pvt. Ltd., at the **Red Carpet Night**.

Infrasoft Technologies' Kiya.ai Mixed Reality (MR) technology, a first-of-its-kind solution, significantly re-invents the banking processes to deliver a whole new level of digital experience to the customers. Blending the capabilities of Augmented Reality (AR) and Virtual Reality (VR), the solution overlays smart digital elements in the real world through a our MR-enabled wearable device such as Smart Glass View, enabling the customers and bank executives to interact with digital elements through holographic technology and extract real-time, accurate information.

The solution transforms the banking processes dramatically, helping solve various use cases, offer deeper customer engagement and cost efficiency to the business.

We are extremely delighted to be awarded the CIO Choice Award 2020. At Infracore, we strive to embrace new and futuristic technologies to empower banks and financial institutions to cater to rising and evolving customer demands. We would like to express our gratitude to our partners, customers and CIO panel for recognizing our innovations and commitment towards serving the community with the cutting-edge solutions."

Rajesh Mirjankar, Managing Director & CEO, InfracoreTech

AR Navigation

From finding the nearest ATMs and bank branch within the customer's geographical radius with the help of AR Navigation to enabling them to cash-in on the offers and redeeming the reward points in their wallet, while navigating to their destination, our Kiya.ai MR solution empowers financial institutions to keep customers engaged to their banking services and encourage the use of their wallets and card services through AR-enabled apps.

Account Management

Using AR-enabled mobile apps to scan debit and credit cards overlaid with details of their past expenses, current balance and upcoming dues enables in completely reforming the way customers manage or view their accounts. Moreover, the MR solution enables customer to manage their account, budgets and much more by using the Smart Glass View eyegear that overlays an interactive dashboard in the physical environment, displaying their financial records and data, along with offering personalised solutions to manage their finances better and help in making sound financial decisions.

Authentication & Security

Kiya.ai MR-enabled wearable device recedes the conventional brick-and-mortar branch banking model and empowers financial institutions to quicken their customer authentication process, access their financial portfolio and expedite the loan origination process by taking a single look at the customer through the lens of our Kiya.ai MR-enabled Smart Glass View. Kiya.ai provides the banking executives with a 3D view of customer's data on fraud, concentration and past performance through data visualizer, and enables the bank to use voice command, gesture or touch to get into the details of the subject matter of interest. Built with robust security protocols, the solution fast-tracks various banking functions, allowing the customers to experience novel and faster banking processes and at the same time bring in cost and time efficiencies for the business.

"This win in Mixed Reality recognizes InfracoreTech's innovative approach in redefining customer experience in the banking space."

Vivek Sawardekar, Sr. Technologist – Client Solutions Group, Dell Technologies, receives the recognition trophy from **Sumi Vivek**, CIO, Diageo India and **Venkatesh Natarajan**, Chief Digital Officer, Ashok Leyland, at the **Red Carpet Night**.

Workstation: Dell Precision 3930 Rack

The world's most powerful 1U rack workstation. Precision 3930 Rack

Compact Industrial Design

A short-depth and narrow design delivers better rack density and a smaller footprint ideal for space-constrained workspaces. Extended operating temperatures and a compact form-factor facilitates a seamless integration into complex OEM medical imaging and industrial automation solutions.

Room to Grow

Up to 24TB of storage delivers high performance for complex projects. Expandability with up to 3 PCIe slots with an option to add PCI legacy cards allows you to scale with your business needs.

"We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value to CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a manifestation that our long-term, customer centric strategy is working. We are committed to building the industry's most modern portfolio of end-to-end solutions for our customers in India. I would like to thank all our partners, customers and importantly the CIO Choice panel for selecting us."

Alok Ohrie, President & Managing Director, Dell Technologies India.

Professional Power

Impressive affordability and workstation-class performance with 8th Gen Intel® Core™ and Xeon® processors, 64GB memory, and up to one double-width 250W of NVIDIA Quadro® or Radeon™ Pro professional graphics support. In addition, Dell Precision Optimizer Premium is the only AI-based performance optimiser software in the industry to automatically tune your workstation to run popular ISV applications at the fastest speeds possible.

Remote Peace of Mind

Experience versatile, secure and fast remote 1:1 user access with optional Teradici PCoIP technology with support for dual and quad display zero clients.

Secure

Only Dell provides innovative data security solutions that meet security challenges and business concerns head-on to protect your most critical and at risk asset, your data. Dell Endpoint Security Suite, powered by Cylance, stops up to 99% of malware.

Manageable

Commercial PCs featuring the free Dell Client Command Suite toolkit for flexible and automated BIOS and system configurations.

Reliable

Precision Workstations are Independent Software Vendor (ISV) certified to ensure the high-performance applications you rely on every day run smoothly.

Workstation: Dell Precision 5530 2-in-1

The world's smallest 15" 2-in-1 mobile workstation. An impossibly thin 16mm form features a next-gen Infinity Edge display with a 4K Ultra HD resolution. A flexible 360-degree hinge enables multiple modes of interaction.

Powerful Performance

Deliver the power with 8th Gen Intel® Core™ processors and professional Radeon™ Pro WX Vega M GL graphics.

Premium Materials

Ultra-thin GORE™ Thermal Insulation provides thermal conductivity levels lower than air. Dell Premium Pen delivers precise pressure sensitivity (4096 levels), tilt functionality and low latency. New MagLev Keyboard design reduces the thickness of your keyboard.

Secure

With Dell Data Security solutions, end users can work where and how they want knowing that data is protected. Dell Data Guardian protects data wherever it goes. Dell Endpoint Security Suite, powered by Cylance, stops up to 99% of malware.

Manageable

Part of the world's most manageable line of commercial PCs featuring the free Dell Client Command Suite toolkit.

Reliable

ISV certified to ensure the high-performance applications you rely on every day run smoothly.

"Dell Technologies' win in Performance Workstation comes as validation of the company's feature-rich offerings that blend performance with innovation."

Managed Security Services

Large Enterprise

Rishikesh Kamat, Vice President - Products & Services and **Srinivas Prasad**, Senior General Manager - Security Practice, NTT-Netmagic, receive the recognition trophy from **Sumi Vivek**, CIO, Diageo India and **Venkatesh Natarajan**, Chief Digital Officer, Ashok Leyland, at the Red Carpet Night.

About NTT-Netmagic

NTT-Netmagic, a wholly subsidiary of NTT, is India's leading Managed Hosting and Multi-Cloud Hybrid IT solution provider serving more than 2000 enterprises globally. Headquartered in Mumbai, Netmagic also delivers Remote Infrastructure Management (RIM) services to various enterprise customers globally across Americas, Europe and Asia-Pacific region. The Company was the first in India to launch services – Cloud Computing, Managed Security, Disaster Recovery-as-aService (DRaaS) and Software-Defined Storage. Netmagic has been recognized with 8 awards at the CIO Choice 2020, and 2 awards at the Datacenter Dynamics India 2019.

About NTT Ltd

NTT Ltd. is a leading global technology services company bringing together 28 brands including NTT Communications, Dimension Data and NTT Security. We partner with organizations around the world to shape and achieve outcomes through intelligent technology solutions. For us, intelligent means data driven, connected, digital, and secure. As a global ICT provider, we employ more than 40,000 people in a diverse and dynamic workplace that spans 57 countries, trading in 73 countries and delivering services in over 200 countries.

“NTT-Netmagic is a name to reckon with in the Managed Security Services (MSS) domain and this recognition is a fair testament to our work. Our MSS team feels proud in knowing that more than a decades worth of experience in security management is bearing fruit in offering a plethora of proactive mechanisms to address core security concerns, both within and outside the network.”

Rishikesh Kamat, Vice President - Products & Services, NTT-Netmagic

NTT-Netmagic has a comprehensive managed security services approach to counter threat vectors. The company takes into account all the four pillars of the security architecture – network, application, endpoint and data – to offer 360-degree coverage. This model is built to address next generation threats that silos of security products fail to provide and secures assets, users and data from lone rangers, hacktivists, cybercrime syndicates and nation sponsored cybercriminals.

NTT-Netmagic's managed security services are enabled through their 24X7 SOC team staffed with certified and skilled resources to analyse and respond to security events. They also help customers protect their existing security investments by enabling support through the right mix of onsite and remote SOC teams. Their portfolio of services include:

- 24X7 Security monitoring, response and Analytics
- Managed Web Application Firewall
- Managed DDOS mitigation
- Web and Email threat prevention
- Anti-phishing & Antimalware protection
- Managed Intrusion prevention
- Shadow IT Exposure monitoring
- Managed Darknet and Deepweb monitoring
- Endpoint threat detection and response
- Privilege ID management
- Threat intelligence service
- Compromise assessments, Red team solutions
- Vulnerability assessments, vulnerability management and penetration tests
- Quantified cybersecurity posture assessment

“This award in Managed Security Services showcases the kind of trust the CIOs have placed on a brand like NTT-Netmagic to address their critical security requirements.”

We remain committed to constantly innovate & improve our product portfolio while delivering excellent customer service and be the trusted and valued partner for enterprises.”

Abhijit Kishore, Chief Enterprise Business Officer, Vodafone Idea Ltd.

A high-speed WiFi network is often at the core of different business and customer initiatives for small, medium and large enterprises to drive business productivity and collaboration, improve customer experience, and adopt new technologies like IoT, Unified Communications, Cloud etc.

Vodafone's SuperWifi is a fully managed WiFi for the businesses offering hardware, software and featured backed with stringent SLAs to run a highspeed, high uptime Wi-Fi network with 24/7 support.

We are the only operator in India offering multi OEM, multi tenanted managed WiFi service on leading platforms of Cisco and Aruba. We also support all types of Wi-Fi deployment models including on-premise, hosted and cloud-based making it an ideal solution for today's hybrid environments.

What makes SuperWiFi unique:

- Seamless, High-speed WiFi Service: Provide a high-quality WiFi experience for users
- WiFi Access Control Policy: Limit WiFi usage basis time and/or usage quota during business hours
- Secure Authentication: Reduce administration efforts
- Guest Portal / Splash Page Customisation: Increase brand visibility
- Corporate and Guest WiFi Access: Secure your corporate Information
- Built-in Wireless Threat Prevention & Security: Restrict access to inappropriate Websites
- Online Customer Portal: Take business decisions with network insights
- Location Analytics Service: Improve business efficiency with data-driven decisions

With a fully managed WiFi network, organizations can shift to a fixed recurring charge (OpEx) and significantly lower up-front CapEx investment. It also offers an online reporting & analytics portal, by which businesses can get WiFi analytics on network performance, usage and applications.

“With this win in Managed WiFi, Vodafone Idea has once again proven its experience and expertise in providing the most reliable wireless connectivity solutions to enterprises.”

Ketan Kothari, Managing Director, Chintak Dalal, Business head (FTTx) and **Kandarp Jhala** Business Head (Safety and security), Sigma-Byte, receive the recognition trophy from **Sumi Vivek**, CIO, Diageo India and **Venkatesh Natarajan**, Chief Digital Officer, Ashok Leyland, at the **Red Carpet Night**.

Structured cabling is the backbone of ICT industry that is an everlasting and ever-growing domain. Sigma-byte stands as the only system integrator in the country with the experience and skill to deliver structured cabling solutions to the entire ELV and IT sector. We are proud to have served some of the key corporate institutions like Reliance Industries, Netmagic, Flipkart, Citibank, JP Morgan Chase and continue to serve them till date.

Our Key Competencies include:

Sigma-Byte's cabling solution products satisfy the need for a fast, dependable, yet flexible system to accommodate today's changing voice, data and video requirements. We have deep expertise in:

- Network and Telecommunications Engineering and Design
- Corporate and Data center Design and Installation
- 24/7 National Customer Support Center
- Complete Documentation of all Projects
- Future Growth Planning

“Sigma-Byte is humbled and honoured for such a recognition for the second consecutive year by the CIOs. We thank CIO Choice's continuous efforts towards recognising Sigma-byte's work consistently and for constantly supporting us towards building our name in the Information and Telecommunications sector.”

Ketan Kothari, Managing Director, Sigma-Byte.

Why we stand apart

Sigma-byte has the capability to design and build standards-compliant, robust, future-proof and scalable low voltage integrated ICT infrastructure and the lowest turnaround time with the added benefit of having to deal with one single entity.

Sigma-byte attributes its entire success to the belief that one can never compromise on the quality of service one can provide. The intent of each employee is to continuously be better at what they do. The customer satisfaction and the customer experience are at the heart of the company's belief system. We believe that ICT infrastructure forms the backbone of the digital journey of our customer. With our products, solutions and delivery capabilities, we are bringing certainty in this ICT infrastructure thus enabling our customers to have a smooth, speedier and dependable ride in their digital journey.

We are able to exceed our customers' quality expectations, because:

- Sigma-Byte is the Only mainstream cabling integration company in India with three (3) RCDDs and (1) DCDC on board.
- ISO 9001:2015 Certified.
- We have a Designated Quality Auditor.
- Pan India Support with branches in 7 Major cities and 1 International operation in Singapore

“This award in Structured Cabling recognizes Sigma-Byte's consistent focus on delivering better customer experience and customer satisfaction.”

Data Centre Cooling

Large Enterprise

Life Is On

Schneider
Electric

Venkatraman Swaminathan, VP & Country General Manager- India & SAARC and **Ankesh kumar**, Marketing Director, Schneider Electric India, receives the recognition trophy from **Sumi Vivek**, CIO, Diageo India and **Venkatesh Natarajan**, Chief Digital Officer, Ashok Leyland, at the **Red Carpet Night**.

As enterprises push the boundaries of power densities, Data Centre cooling becomes an indispensable feature in a data centre infrastructure to keep powerful processors up and running. By employing energy-efficient data centre cooling technologies, data centres can prevent the wasteful methods of cooling and save operational costs. This is where Schneider Electric presents a comprehensive solution for data centre cooling—the Air-Cooled Chillers, which are highly efficient and sustainable in nature.

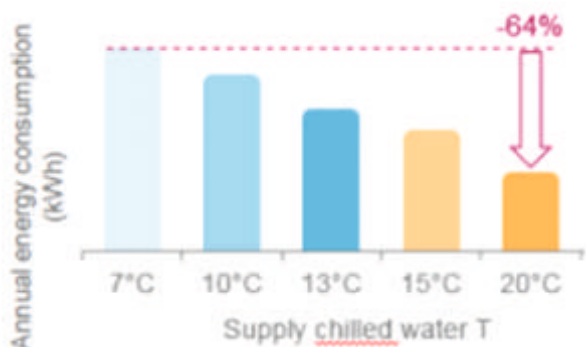

The high chilled water temperature of the chillers can raise up to 20 degree Celsius, which allows the operation of data centre on higher limit of cold aisle temperature up to 27 degree Celsius.

“We are delighted to have won this recognition in the Data Centre cooling category. At Schneider Electric, we are committed towards empowering data centers with the best solutions to enhance productivity and strive towards sustainability and this win adds another feather to our approach towards constant innovation.”

**Venkatraman Swaminathan, VP & Country General Manager India & SAARC
Schneider Electric Secure Power Division.**

As a result of increasing the chilled water temperature from 7 degree Celsius to 20 degree Celsius, a whopping reduction in annual energy consumption (-64%) can be seen, as demonstrated in the graph below:

This allows the data centre to achieve a PUE in the range of 1.2 to 1.3.

Some of the features of the chillers are as follows:

- Has extremely fast restart capability. Thereby, achieving full load capacity within 90 secs, which optimises the thermal storage requirement by 1/3rd. In many cases, the thermal storage can be avoided if total hydraulic system water volume is enough to take care of power changeover scenario.
- The chillers come with inbuilt inverter driven pumps. Thus, there is no requirement of additional space and pump controller.
- Removes the need for a dedicated Chiller Plant Manager as these smart chillers with inbuilt controls can manage multiple chillers along with primary pumps and external motorised valves.
- For low ambient temperature locations, there is an option of integrated Free Cooling, which eliminates the need for additional space.
- Inbuilt ATS within chiller electrical panels to avoid any single point of failure.

In contrast to the conventional chillers, our Uniflair high-efficiency data centre chillers has an edge over the former.

“With this win in Data Centre Cooling, Schneider Electric has once again demonstrated its ability to consistently deliver the most valuable technologies and products to enterprises.”

Large Enterprise

Vikas Khandelwal, Head- BFSI Vertical, Airtel Business, receives the recognition trophy from **Sanjay Narkar**, CTO, IDFC Bank Ltd and **Pratap Pat Joshi**, CIO, Mercedes-Benz India Pvt Ltd., at the **Red Carpet Night**.

Businesses need cybersecurity network solutions that can keep sophisticated threats at bay across complex network configurations. And the most vulnerable part of this system lies hidden on hard network infrastructure in the form of internet connected routers.

This is where Airtel Secure offers a holistic solution. Airtel Secure Internet is a fully managed, cost-effective solution that lets you manage and gain control over your internet access. This is instrumental in preventing any unauthorized access to your corporate network. This convergent solution includes enterprise-grade internet integrated with next-generation firewalls that ensure everything from intrusion detection, content filtering to malware and virus protection. Our solution provides significant cost savings in both capital expenditures and management & monitoring costs by providing a flexible subscription-based pricing model. This also allows you to reduce downtime and complexity of the network significantly without compromising on security policy design, implementation, or the management of systems.

“This recognition for Airtel's efforts in network security is an endorsement of our security solutions for SME-SMBs and Enterprise customers. Airtel, with its experience in serving businesses with integrated connectivity solutions, has formed a strong partner ecosystem in partnership with global leaders with an aim to provide complete security solutions to protect customers from cyber threats.”

Ganesh Lakshminarayanan, CEO, Enterprise Business, Airtel Business.

Key features:

- End-to-end managed services – Includes onsite installation, onsite support, commissioning, maintenance, change management and proactive monitoring for device health check-up.
- Flexible deployment models – Allows flexibility to deploy a stand-alone firewall hardware or an integrated solution that bundles enterprise grade internet with the firewall that is pre-configured as per the bandwidth and appliance size.
- Strong encryption - IPSec and SSLVPN, network segmentation and load balancing are included
- Deep packet inspection - Built on Reassembly-Free DPI (RFDPI) engine that makes it compatible with packet, crypto, and network processing.
- Complete security - All-in-one capabilities with firewall, including anti-spam, anti-virus, intrusion prevention and content filtering for complete protection. We provide round the clock, 24/7/365 active management and monitoring of the firewalls and internet connectivity by our Airtel Secure Intelligence Center– a highly secure, fully-redundant, state-of-art security operation center (SOC) which is integrated with our Network Operations Center for complete security

Why Airtel?

- **Robust Infrastructure:** Airtel Secure Intelligence center (SOC) and Airtel network operations center (NOC) in India is one of the largest in the Asia-Pacific region and offer enterprises a singular contact point for deployment, support, operations, and maintenance.
- **World-class Expertise:** Our SOC-NOC is run by over 50 highly qualified cyber security experts and analysts working 24*7*365.
- **Telco Experience:** Airtel has the third largest number of Telco assets with zero threat tolerance. We carry this experience into our operational DNA with a highly regulated environment and stringent compliance policies.
- **Strategic Partnerships:** Our partnerships with global security OEMs empower us to create effective B2B solutions for customers across all verticals.

“With this win in Network Security, Airtel has emphasized its ability to cater to the unique and most pressing security requirements of enterprises.”

Managed Network Services

Large Enterprise

Manoj Chitgopekar, Head – South 1 Region and **Vicky Desai**, Regional Manager – Managed Services, West, NTT Ltd., receive the recognition trophy from **Sanjay Narkar**, CTO, IDFC Bank Ltd. and **Pratap Pat Joshi**, CIO, Mercedes-Benz India Pvt. Ltd., at the Red Carpet Night.

NTT is a recognized and trusted global brand. In 2019, the NTT brand was ranked the world's eighth most valuable brand among IT service providers. Further, NTT is recognized as a market leader in the Managed Network Services space. We are a Leader in Gartner's Network Services Magic Quadrant.

NTT is a global innovator, investing USD 3.6 billion in research and development per year and leading on current and future technologies, such as managed SD-WAN, NFV, 5G access and IoT. We are a pioneer in managed SD-WAN, offering cloud based NFV services hosted out of 75+ global network nodes. NTT group's strong operating and financial fundamentals and continued self-transformation in line with the changes in society contribute to the realization of a smart society and a sustainable increase in enterprise value.

“The CIO Choice awards have always been the ultimate testimony and a great platform for the ICT industry to confer the recognitions and felicitate brand leaders for their exceptional contribution to the Industry. I'm very proud and delighted to receive the CIO Choice award on behalf of my team as the winner in the managed network services category, three times in-a-row.”

Shailendra Badoni, Chief Operating Officer, NTT India Pvt. Ltd.

What makes us different

Operational – We handle the day-to-day management of their technology, spanning WAN, wired and wireless LAN, data centre, and security devices.

We're highly skilled – We hold over 30,000 certifications in 36 technologies. We also have 12,000 talented technicians in the field, and 8,500 networking certifications across multiple vendor technologies.

We've invested – We've developed a state-of-the art network management platform that monitors your network performance remotely and automatically 24 hours a day, tracking performance trends, highlighting potential issues, and taking pre-emptive action before incidents occur.

What makes us a CIO's choice

Our platform based managed network services help CIOs to bring disparate applications and infrastructures together, increase operational efficiency, drive business productivity and enhance user experience while reducing overall TCO. Real-time executive dashboards, integrated views and network and security analytics across the disparate infrastructure and platforms hosted and managed by NTT ensure that all levels at the client and NTT work from the same source of information.

Security continues to remain one of our key focus areas. Our Secure by Design solutions and Secure Remote Delivery approach helps CIO balance data accessibility with security controls whilst improving overall IT infra services governance & operational efficiency.

“With this award in Managed Network services, CIO Choice recognises NTT for its client centric approach aiming to set the benchmark in quality of services and improving client experience.”

PERPETUUITI™
INTELLIGENT BUSINESS SERVICE AVAILABILITY MANAGEMENT

Sudish Kumar, Vice President (India & APAC), Perpetuuiti, receives the recognition trophy from **Sanjay Narkar**, CTO, IDFC Bank Ltd. and **Pratap Pat Joshi**, CIO, Mercedes-Benz India Pvt Ltd., at the **Red Carpet Night**.

Perpetuuiti is a leading Enterprise Software Products Company with innovative products built in accordance with global benchmarks transforming the way businesses operate in the digital age.

We deploy futuristic technologies like Artificial Intelligence (AI), Cognitive Computing (CC), Machine Learning (ML), Robotic Process Automation (RPA) and INTELLIGENT Process Automation (IPA) to enable Automation solutions for INTELLIGENT Business Service Availability Management (iSAM), INTELLIGENT Organizational BCP Automation (iBCM), Data Replication and Cloud Migration, Real-Time Auto-Discovery of Application IT infrastructure and Application Interdependency Mapping.

“Being recognized as the CIO CHOICE winner consecutively for four years from amongst so many companies is a great accomplishment for us. The award becomes even more special as the jury consists of an independent panel of eminent CIOs and IT decision makers. This is a huge validation of our efforts and proves our commitment towards the evolving demands of customers. Further more, Perpetuuiti's intelligent automation solutions have helped more than 195 customers across geographies and verticals to enhance efficiency and customer experience.”

Rohil Sharma, Co-Founder & CEO, Perpetuuiti Technosoft Services Pvt. Ltd.

Perpetuuiti's Av3ar for 'ROBOTIC PROCESS AUTOMATION'

Av3ar is a unique type of Intelligent Digital Assistant who can absorb, deconstruct and use information as a human would to solve problems. Av3ar uses Cognitive RPA, Artificial Intelligence (AI) and Machine Learning (ML) algorithms to sense, predict, analyze and solve customer issues.

Av3ar can be trained to handle almost any knowledge-based task. Av3ar has the capacity to perform and contribute in a diverse spectrum of roles across any business scenario. Av3ar learns just as any new employee and can apply its knowledge to help employees and customers in virtually any industry addressing a wide range of business challenges. Av3ar's extensive understanding of languages enables it to work with colleagues and customers around the world.

Key Features:

- Self Service Portal
- Built-in Analytics Engine
- Deep Learning Technology
- Chat/Email/Voice-enabled input commands
- Deployed Non-Intrusively
- Multiple Av3ar Digital Assistants

How is Av3ar different?

- **Av3ar has contextual comprehension:** Links concepts & optimizes customer queries.
- **Av3ar understands what you actually mean:** Does not require exact phrases or fixed content
- **Av3ar has EQ & emulates Human Intelligence:** Brings advanced AI to interactive operations by engaging users in more intuitive & natural conversations through chat.
- **Av3ar is more consulting-based outcome focused:** Brings advanced Artificial Intelligence to businesses to achieve the necessary outcomes.
- **Av3ar is foraying into Impact based models beyond traditional BPM & IT:** Foraying into business models beyond traditional BPO & IT Services in creating impactful solutions on AI into Agritech, Healthcare IT and Education Sectors.

“This award in RPA validates Perpetuuiti's product innovations to help enterprises transform the way today's digital workforce operates.”

Laptop

Large Enterprise

Vivek Sawardekar, Sr. Technologist – Client Solutions Group, Dell Technologies, receives the recognition trophy from **Sanjay Narkar**, CTO, IDFC Bank Ltd. and **Pratap Pat Joshi**, CIO, Mercedes-Benz India Pvt Ltd., at the **Red Carpet Night**.

Latitude: 7490

The world's most secure, most manageable and most reliable business-class laptops with outstanding support.

World-class security and manageability

As workers continue to become more mobile, security and management are more critical than ever, especially as devices and data are increasingly outside the perimeter. Dell's Client Command Suite provides free automation tools to manage your devices. And with vPro out-of-band capabilities, you can reach all your systems, to update once and update everywhere, even when systems are turned off.

Award winning innovation

Dell's design process is laser-focused on our customers. We go straight to the source and directly engage our customers every single day in our global Customer Solution Centres via focus groups, surveys, customer advisory councils, and on social media. And from these conversations implemented six key tenets in our latest product designs. From intelligent wireless technology that boosts connection speeds up to 40%, to small and light devices that have narrower borders to immerse our users in beautiful and productive displays.

"We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value to CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a manifestation that our long-term, customer centric strategy is working. We are committed to building the industry's most modern portfolio of end-to-end solutions for our customers in India. I would like to thank all our partners, customers and importantly the CIO Choice panel for selecting us."

Alok Ohrie, President & Managing Director, Dell Technologies India.

Business class that's smaller and lighter

At Dell we continue to design and build devices that fit the way you work. From reducing footprints for smaller workspaces, optimising displays for easier viewing and multiple processor choices that match your needs all in a laptop that is comfortable and easy to use. Consider thoughtfully designed thermal vents that keep your lap cool while working, connectivity options that neatly organise wires in small workspaces and express battery charging while you're on the go. All this and your data is protected by the world's most secure and manageable laptops and 2-in-1s.

Mobility with a view

Experience optimum productivity and mobility in a device that is small and light. Choose slimmer bezels and immerse yourself in a display that is designed to saturate its user with an ultimate viewing and touch interface.

Designed for style

Made with premium, durable materials, there are now even more choices to love. Introducing a stunning new machined aluminium finish, or opt for woven carbon fibre or magnesium alloy, all with soft touch paint. These laptops are built to last.

Connectivity means productivity

New system access and connectivity features that improve your productivity throughout the workday. Including Windows Hello via an optional infrared camera facilitates logon using facial recognition. And docking, which is now a breeze with multiple options, including DisplayPort™ over USB Type-C.

World's most secure

Relax knowing that this series of laptops is the world's most secure, featuring optional multi-factor authentication, including touch fingerprint reader, contacted FIPS 201 smart card reader, contactless smart card reader/NFC with Control Vault 2™ FIPS 140-2 Level 3 certification.

Features of the Dell Latitude family of products

Commercial devices that are small, light and beautiful

- Intelligent wireless technology that works up to 40% better
- Dynamic power mode for more performance boost when you need it
- Multiple work modes including laptop, tent and tablet
- Narrow border displays that are stunning and may detach for tablet use
- Type-C connectivity for power, data or voice using one cable, including Thunderbolt
- Rugged extreme devices designed to work in the harshest conditions
- Tailored ecosystem of peripherals available to keep you productive wherever you work

About Dell Technologies

Dell Technologies is a unique family of businesses that provides the essential infrastructure for organisations to build their digital future, transform IT and protect their most important asset, information.

The company services customers of all sizes across 180 countries—ranging from 99% of the Fortune 500 to individual consumers—with the industry's most comprehensive and innovative portfolio from the edge to the core to the cloud

"With this win in Laptop, Dell Technologies has once again demonstrated its focus on bringing intelligent technologies and innovative features to end-users."

SD-WAN Services

Large Enterprise

Prasenjit Roy, Senior EVP and Chief Marketing Officer, NTT-Netmagic, receives the recognition trophy from **Sanjay Narkar**, CTO, IDFC Bank Ltd. and **Pratap Pat Joshi**, CIO, Mercedes-Benz India Pvt Ltd., at the **Red Carpet Night**.

About NTT-Netmagic

NTT-Netmagic, a wholly subsidiary of NTT, is India's leading Managed Hosting and Multi-Cloud Hybrid IT solution provider serving more than 2000 enterprises globally. Headquartered in Mumbai, Netmagic also delivers Remote Infrastructure Management (RIM) services to various enterprise customers globally across Americas, Europe and Asia-Pacific region. The Company was the first in India to launch services – Cloud Computing, Managed Security, Disaster Recovery-as-aService (DRaaS) and Software-Defined Storage. Netmagic has been recognized with 8 awards at the CIO Choice 2020, and 2 awards at the Datacenter Dynamics India 2019.

About NTT Ltd.

NTT Ltd. is a leading global technology services company bringing together 28 brands including NTT Communications, Dimension Data and NTT Security. We partner with organizations around the world to shape and achieve outcomes through intelligent technology solutions. For us, intelligent means data driven, connected, digital, and secure. As a global ICT provider, we employ more than 40,000 people in a diverse and dynamic workplace that spans 57 countries, trading in 73 countries and delivering services in over 200 countries.

“It is an honour to be recognised for our SD-WAN Services as part of CIO Choice 2020. It is a testament to our stringent efforts to provide SD-WAN services to all our trusted clients. Going forward we aim to establish NTT-Netmagic as a pioneer in this technology in India by providing next-generation network solutions to enterprises.”

Shriranga Mulay, Senior EVP & Chief Technology Officer, NTT-Netmagic

NTT-Netmagic delivers Managed SD-WAN connectivity solutions custom-built to the Indian context, to accelerate agility, flexibility and ease of centralized management – all the while streamlining the overall TCO and improving efficiency. Through our SD-WAN offering, we bring you improved capacity, network performance, security and agility at reduced TCO. Our solutions are tailored to Indian business needs concerning data security, last-mile-connectivity and performance monitoring.

Our SD-WAN service is a centralized infrastructure (controller and management plane) hosted in our own data centers and SD-WAN CPE Provisioning at each location, along with SD-WAN managed services options.

Our services promote greater control, security and scalability, while giving you the freedom to prioritize your network traffic and operate flexibly. We take your enterprise WAN to a significantly higher level of consistency and control, allowing you to abstract network components, dynamically reallocate network resources and do more.

Our SD-WAN services benefit enterprises with:

- Cost advantage using managed services.
- Unified governance of all network resources.
- Compatibility with existing WAN infrastructure.

“This recognition in the SD-WAN Services category is a testament of NTT-Netmagic's commitment to deliver offerings that address the unique needs of Indian enterprises.”

Telecom Carrier (Mobile Access)

Large Enterprise

Tanaz Makujina, General Manager, Vodafone Idea Ltd., receives the recognition trophy from **Suresh Iyer**, CIO, Blue Star Ltd. and **Jitendra Mishra**, VP (Group-CIO), Alembic Pharmaceuticals Ltd., at the **Red Carpet Night**.

Vodafone Idea Business Services is committed to being the most trusted and valued partner helping businesses succeed in a digital world. From market-leading enterprise mobility, robust connectivity and world-class IoT solutions, to superior business communication and cloud and insightful business analytics and enabling solutions, we bring the newest technologies to serve businesses in the digital era.

Below are a few unique data capabilities Vodafone launched this year for our enterprise mobility customers, making us the winners of the CIO Choice recognition for the 6th consecutive year in the Mobile Access category.

“We are extremely delighted to have won the CIO Choice 2020 recognitions and are really grateful to the CIO community for their support. This Award is a testimony to our Constant efforts to deliver delightful customer experience by bringing the smartest and newest technologies to serve businesses in digital era. We remain committed to constantly innovate & improve our product portfolio while delivering excellent customer service and be the trusted and valued partner for enterprises.”

Abhijit Kishore, Chief Enterprise Business Officer, Vodafone Idea Ltd.

Vodafone Secure Device Manager (VSDM): This is a comprehensive unified end-point management platform which enables trusted apps and content on any device, on-the-go delivering mobile security for the way people work. It comes with AI capability for malware & threat management and Single Sign-on (SSO) with cloud identity to Web and SaaS apps on mobile.

Managed Mobility Services: This is a one-of-a-kind solution for enterprise customers to manage their end-to-end mobility operations. It is designed to improve workforce productivity and reduce the total cost of ownership. The services include the entire gamut to address any enterprise's unique needs, from Device Selection and Procurement, Secure Network Connectivity, to Mobile Device Management and After Sales Service.

Optima Corporate Plus for Enterprises: With deployment of GST, the benefit of input credit can be claimed by companies on their mobile bills, provided they are company-owned and company-paid (COCP) connections. COCP connections should cover the communication needs for business operations and continuity, but not of the customer's personal usage too. However, the end user should have the flexibility to use the phone for personal use and pay for it. Hence, the need Optima Corporate Plus.

Mobile Call Recording Solution: This is a mobility SIM-based solution that assures 100% recording of voice calls. It allows fully automated, mobile-based call recording with the secure and real-time transfer of recorded calls. It provides anytime, anywhere access, ensuring business continuity, as well as instant scalability, flexibility, full security and no investment from the enterprise end due to the fully opex-based model.

Secure Data Connectivity Portfolio: Enterprises across industries are rapidly deploying applications on tablets and smartphones. This has led to a demand for a secure mobile data connectivity solution coupled with an agile deployment. As an industry first, Vodafone-Idea Ltd offers IP and URL whitelisting on private APN.

SuperNet 4G and VOLTE For business: The world's largest 4G network that delivers high-speed mobile Internet to enterprises across India for a seamless and effortless communication experience. VOLTE has enabled superior quality voice services with unmatched clarity and simultaneous usage of high-speed data while on voice calls.

“This consecutive recognition in Telecom Carrier (Mobile Access) is testament to Vodafone's long-standing leadership in the market as the one-stop solution provider for enterprise mobility solutions.”

System Integrator

Large Enterprise

Gopal VT, Head – South 2 Region and **Amit Uppal**, Head – North & East Region, NTT Ltd., receive the recognition trophy from **Suresh Iyer**, CIO, Blue Star and **Jitendra Mishra**, VP (Group-CIO), Alembic Pharmaceuticals, at the **Red Carpet Night**.

NTT Ltd. is a global systems integrator with deep levels of expertise and human capital for providing end-to-end, cloud-enabled hybrid IT services. NTT's consulting, technical support, managed services, and focus on integrating services, applications, and infrastructure helps clients increase their time-to-market speeds, optimise costs, reduce risks, simplify interoperability, and improve operational control.

NTT delivers solutions across the entire spectrum of technology and creates compelling business outcomes for its clients. NTT's strategy is to differentiate itself by evolving beyond traditional systems integration to become a services-led trusted advisor to our clients.

“We are delighted to be recognized by the prestigious CIO Choice Awards as the winner in the System Integrator category. As a core part of our business, we at NTT Ltd. are committed to provide the best technology integration services to our clients to help them achieve their goals. The win is an appreciation for the hard work and dedication of our teams to partner with our clients to help them tackle the toughest technology challenges and gain an upper hand in this competitive landscape.”

Raghuveer HR, Director – Sales, NTT India Pvt. Ltd.

What makes us unique?

We offer a comprehensive portfolio of rich solutions and services with the combined strengths of 31 organizations that have come together under the NTT brand along with a technology partner ecosystem that is unparalleled.

- one-stop-shop for clients, can augment with public cloud services, data center hosting services, other managed services and NTT's security portfolio.
- Offer clients not just compute, but also storage & network services that address issues of scalability through intelligent solutions.
- A thoughtfully designed GTM of Intelligent solutions covering – *Intelligent Business, Intelligent Workplace, Intelligent Cybersecurity and Intelligent Infrastructure*, all wrapped in a layer of Intelligent Innovation ensure that we offer clients a business first approach.
- Bespoke strategy roadmaps for organizations holistically looking at enabling new revenue models, exceptional client engagement and superior operational excellence.

With our increased focus on innovation, where the NTT Group has planned an annual average investment of USD 3.6 bn in R&D for the next 5 years, we will be better equipped to help clients stay ahead of the curve. Innovation has always been at the heart of our value proposition and now we will be able to create newer opportunities for our clients to derive the benefits of our global market intelligence and R&D initiatives.

“NTT's focus on innovation and unique client requirements, coupled with their global market intelligence, has made the company a preferred choice of CIOs in System Integrator category.”

DNS Security

Small & Medium Enterprise

Manish Rane, Director - Cyber Threat Intelligence and **Shekhar Sharma**, Director - Sales, iSecureNet, receive the recognition trophy from **Suresh Iyer**, CIO, Blue Star and **Jitendra Mishra**, VP (Group-CIO), Alembic Pharmaceuticals, at the **Red Carpet Night**.

iSecureNet is the intelligence-led security company. It has helped thousands of organizations — ranging from Fortune 500 businesses and large financial institutions to small and medium-sized retailers—manage compliance and secure their network infrastructure, data communications and critical information assets.

One of the most important aspects of cyber security that companies easily over-look is DNS Queries. DNS, being allowed to float freely through networks are the least regulated; attackers have found it very convenient to exploit it to their benefit without getting caught. To address this challenge in cyber security segment, iSecureNet, an advanced cyber defense player, has specifically positioned itself extending its threat intelligence to DNS based protection through its product-- DNS Advance Malware Trap. The product, DNS AMTrap has successfully detected huge threats like cryptominer or cryptojacking attacks.

"It's really been an honour to win the prestigious CIO Choice 2020 award and recognising our unique and only offering from Indian organization about DNS Security. This is in fact the recognition of the completely new concept of security we are bringing together where hardly any vendors are focussing. We are thankful to our clients who gave us an opportunity and shown confidence on our offerings."

Manish Rane, Director - Cyber Threat Intelligence, iSecureNet Solutions.

A DNS AM-Trap is a Purpose-built DNS Server. All it takes to create one is a list of malicious domains or hostnames, which can be added easily to the configuration of the DNS resolver server to automatically block access to those locations.

By utilizing this secure DNS gateway, an enterprise can ensure its employees and IT systems are not routed to destinations that could jeopardize communications, proprietary information, customers' private data and more.

Another major advantage of a DNS AM-Trap is that you already have the foundation you need in place with your current DNS resolver infrastructure. Thus, there's no hardware to install, major software upgrades, network reconfiguration projects, or other "show stopper" items that can bog down typical security solution deployments. In fact, a DNS AM-Trap can be deployed in minutes and offer protection from

- Phishing/Spear Phishing/Whaling
- APT Protection
- Crypto Mining and Cryptojacking
- DNS Typosquatting
- DNS Tunnelling
- DNS beacon channels
- Data Exfiltration
- DGA Attacks

Key USP

Any organization is prepared to fight the Malware with all the available gears comprises of APT, Proxy, Next Gen Firewall etc. However, CIOs fail to understand that their a major gap in technology and that is being exploited by attackers Is a DNS traffic going out from your organization. Clever Attackers can exfiltrate the data, your database, Excel file convert. If CIOs are not keeping an eye on DNS queries Attackers can be very stealthy and evade all your security protection. DNS Security is an important solution along with other solution. iSecureNet is the only Organization from India to offer such a unique functionality and security services.

"This award in DNS Security recognizes iSecureNet's commitment to eliminate the complexity and burden of cyber security for organizations struggling to prepare for, prevent and respond to cyber-attacks."

Display Monitor

Large Enterprise

Vivek Sawardekar, Sr. Technologist – Client Solutions Group, Dell Technologies, receives the recognition trophy from **Suresh Iyer**, CIO, Blue Star Ltd. and **Jitendra Mishra**, VP (Group-CIO), Alembic Pharmaceuticals Ltd., at the **Red Carpet Night**.

About Dell Technologies

Dell Technologies is a unique family of businesses that provides the essential infrastructure for organisations to build their digital future, transform IT and protect their most important asset, information.

The company services customers of all sizes across 180 countries—ranging from 99 per cent of the Fortune 500 to individual consumers—with the industry's most comprehensive and innovative portfolio from the edge to the core to the cloud.

"We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value to CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a manifestation that our long-term, customer centric strategy is working. We are committed to building the industry's most modern portfolio of end-to-end solutions for our customers in India. I would like to thank all our partners, customers and importantly the CIO Choice panel for selecting us."

Alok Ohrie, President & Managing Director, Dell Technologies India.

Build for larger than life collaboration Dell C8618QT interactive touch monitor comes with impressive size and outstanding visual clarity ideal for larger conference room settings.

Brilliant 4K resolution keeps audiences captivated, and consistent colours across a wide viewing angle let everyone see clear text and crisp, vivid visuals. The impressive 86-inch touch screen is ideal for conference room settings of up to 20 people. Anti-glare and anti-smudge coatings reduce distracting reflections and fingerprints.

Group collaboration is intuitive and seamless thanks to innovative InGlass™ technology, allowing simultaneous screen interaction via touch or styluses with up to 20 touch points. Two styluses (included) let you write or draw naturally in real time directly on the screen without any lagging, while the remote provides added functionality. Pen and finger differentiation makes it easy to switch between touch and pen-based interaction, and touch functionality is supported on virtually all industry-standard software. Industry first Dell exclusive screen-drop feature for different presenters. Super reliability from the #1 monitor brand worldwide for four consecutive years.

Simple Setup and Management

- **Convenient connectivity:** A variety of ports—including HDMI, VGA, DisplayPort and USB—makes it easy to connect to most IT devices.
- **OptiPlex compatibility:** The C8618QT features a unique design that's compatible with the optional Dell OptiPlex Micro, which integrates seamlessly into the back panel without the need of a separate power cord.
- **Connect wirelessly:** The optional wireless modules.
- **Easy manageability:** The Dell Display Manager lets users easily organise screen layouts. RS232 and RJ45 interfaces allow you to manage the display remotely.

"With this win in Display Monitors, Dell has once again demonstrated its constant effort to deliver the best possible experience to businesses."

SIP Trunk

Winning Brand

Large Enterprise

Sambuddha Bhattacharya, AGM, Vodafone Idea Ltd., receives the recognition trophy from **Suresh Iyer**, CIO, Blue Star Ltd and **Jitendra Mishra**, VP (Group-CIO), Alembic Pharmaceuticals Ltd., at the **Red Carpet Night**.

Vodafone's **SIP Trunking** service allows you to securely make and receive global calls from your office. Calls are securely routed as high priority data packets across our PAN India network to your destination. SIP trunking replicates functionality of a Public Switched Telephone Network (PSTN) to allow phone calls to be made over your data network.

Vodafone Business Services (VBS), the enterprise arm of Vodafone, is committed to being the most trusted and valued total communications partner to enterprises. Our portfolio of Total Communications Solutions includes Enterprise Mobility, Fixed line Voice, Fixed line Data, IoT (Internet of Things), Security and Cloud-based Solutions to global, national and emerging enterprises, backed by our robust and superior network infrastructure and a 24x7 Network Operations Centre (NOC). We are actively engaged with public sector enterprises and state governments and are strongly contributing to the vision of Skill India, Digital India and Smart Cities.

“We are extremely delighted to have won the CIO Choice 2020 recognitions and are really grateful to the CIO community for their support. This Award is a testimony to our Constant efforts to deliver delightful customer experience by bringing the smartest and newest technologies to serve businesses in digital era. We remain committed to constantly innovate & improve our product portfolio while delivering excellent customer service and be the trusted and valued partner for enterprises.”

Abhijit Kishore, Chief Enterprise Business Officer, Vodafone Idea Ltd.

Why choose Vodafone SIP Trunking?

- Flexibility to augment voice infrastructure depending on call volumes
- Ensure secure voice infrastructure
- Avoid the high TAT for hardware augmentation and reduce investments in hardware and AMC's
- Faster turnaround for business-critical operations

Features of SIP Trunking

- Extension for every user with Direct Inward Dialling (DID) / Direct Outward Dialling (DOD)
- Extension-wise and Pilot number-wise billing
- Multiple pilot numbers on single trunk
- Redundancy with dual Last-mile options
- Cost saving, with national pooling
- No restriction to the number of sessions supported on single trunk
- Geo-redundant architecture
- Multiple levels of security leading to protection from fraudulent calls, DDoS attack
- Supports multiple codec as per customer needs
- Geo-redundant architecture
- No restriction to the number of sessions supported on a single trunk
- Delivers up to 5 pilot numbers on a single trunk for better manageability

Benefits of adopting Vodafone SIP Trunking

- Highly secured and resilient next-generation SIP Trunk Services
- No more expensive E1 or analogue trunk cards
- Better flexibility to upgrade and downgrade sessions on need basis
- Device flexibility across existing desk phone, IP phone or softphone
- Support for most commonly used Audio Codecs
- Pay-as-you-use model

A leading player in the enterprise segment, we are led by our strong growth in the wireline and emerging enterprises units. With unmatched global expertise and technological know how, we bring in both the scale and flexibility that Indian businesses require. Our global and Indian reach and scale also power the delivery of wholesale data and voice solutions to telecom carriers & wholesale customers through our business division, Vodafone Carrier Services.

“With this recognition in SIP Trunking, Vodafone Idea has reinforced its position as a trusted partner for enterprises' complete communication needs.”

Servers

Large Enterprise

Prasanna Ranade, Senior Manager, Enterprise Sales, Dell Technologies, receives the recognition trophy from **Suresh Kumar**, Partner & CIO, Grant Thornton and **Rahul Mahajan**, Executive VP-IT, Lodha Group, at the **Red Carpet Night**.

About Dell Technologies

Dell Technologies is a unique family of businesses that provides the essential infrastructure for organisations to build their digital future, transform IT and protect their most important asset, information. The company services customers of all sizes across 180 countries—ranging from 99 per cent of the Fortune 500 to individual consumers—with the industry's most comprehensive and innovative portfolio from the edge to the core to the cloud.

"We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value to CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a manifestation that our long-term, customer centric strategy is working. We are committed to building the industry's most modern portfolio of end-to-end solutions for our customers in India. I would like to thank all our partners, customers and importantly the CIO Choice panel for selecting us."

Alok Ohrie, President & Managing Director, Dell Technologies India.

PowerEdge servers: The foundation of the modern hybrid data centre.

Modernising with the industry's #1 servers is your starting point for the performance, security and cost advantages of a hybrid infrastructure—including up to 40% less unplanned downtime and up to 30% fewer application errors.

Scalable Business Architecture: Maximise performance across the widest range of applications with highly scalable architectures and flexible internal storage.

Intelligent Automation: Automate the entire server lifecycle from deployment to retirement with embedded intelligence that dramatically increases your productivity.

Integrated Security: Protect your customers and your business with a deep layer of defence built into the hardware and firmware of every server.

"This win in Servers recognizes Dell Technologies' constant endeavour to help enterprises maximise performance, minimize the downtime and help IT meet the growing demands from business."

Telecom Carrier (International Access)

Large Enterprise

Mushir Khan, DGM - Enterprise Business, Airtel Business, receives the recognition trophy from **Suresh Kumar**, Partner & CIO, Grant Thornton and **Rahul Mahajan**, Executive VP - IT, Lodha Group, at the **Red Carpet Night**.

About Airtel Business:

Airtel Business is India's leading and most trusted provider of ICT services with global network across USA, Europe, Africa, Middle East, Asia-Pacific, India and SAARC regions. We serve over 1000 global enterprises, 2000 large and 500,000 medium/small businesses across India.

Airtel Business offers a diverse portfolio of products and services such as Data Connectivity, Voice & Messaging, Collaboration, Cloud, Data Center, Security, IoT, Enterprise Mobility, Network Integration & Professional services to Enterprises, Government, Carriers, Small & Medium Businesses, OTTS, and Mobile Network Operators across the globe. Through the diverse product portfolio and strategically located submarine cables and satellite network running across 2,50,000+ Rkms in 50 countries and 5 continents, we are pushing the boundaries in digital service delivery with a key focus on end user experience, high availability, and impeccable quality of service.

“We acknowledge the recognition by CIOs across the country. We believe this is a result of our unrelenting focus on customers and building long term relationships. It will further encourage our teams to keep delivering innovative solutions to customers and add value to their business. We at Airtel Business want to extend our support in adopting robust and flexible business continuity arrangements to continue to serve our customers.”

Ganesh Lakshminarayanan, CEO, Enterprise Business, Airtel Business.

Airtel Business offers international connectivity services for companies that are looking to scale their business operations, and in need of high bandwidth options up to 100G, for communications with offices which are geographically dispersed throughout the world.

With 65 global PoPs and 2,50,000+ RKM long, robust network infrastructure, we offer connectivity that help organisations expand and enjoy a direct link to even the remotest areas.

Features:

- Robust enterprise grade connectivity - 65 Global PoPs and 2,50,000+ Route KMs cable network
- On-demand bandwidth service for IPLC
- Partnerships with all major carriers across globe with NNIs at strategic PoPs
- State of the art Network Operations Center and 24 X 7 support to ensure short fall-over time
- Fully managed, high quality and reliable data transmission service across the globe.
- Flexibility to select multiple bandwidth capacities ranging from 2M to multiples of 100G on various interfaces.
- Low latency solutions
- On-demand availability of bandwidth basis dynamic needs
- High level of service availability

“With this recognition in Telecom Carrier-International access, Airtel Business has once again proven its ability to provide the most relevant connectivity solutions to businesses.”

Endpoint Security

Small & Medium Enterprise

Hakimuddin Wadlawala, Co-founder & CEO, ProTechmanize Solutions, receives the recognition trophy from **Shiv Kumar Bhasin**, CTO & COO, National Stock Exchange of India Ltd. and **Sourav Das**, CIO, Essel Mining & Industries Ltd., at the **Red Carpet Night**.

About Protechmanize

ProTechmanize Solutions is a change setter startup for their services and solutioning capabilities for Information & Cyber Security.

ProTechmanize team brings in the knowledge on different Information & Cyber Security areas, making it a unique combination for customers to leverage the right skill sets with expected outcome on the investment.

ProTechmanize has successfully served customers from different regulators like SEBI/RBI/IRDA and standards like ISO 27001/2013, PCI & many more. ProTechmanize has the skills spread across 3 pillar of services "Consult", "Implement" & "Sustain" making it a one-stop service provider to enable customer with the right skills.

ProTechmanize solutions has served companies across various sectors like BFSI, HealthCare, Manufacturing, ITes, Power & Energy.

“Team of ProTechmanize Solutions is humbled and honoured to receive this award with a commitment to continue in providing quality service to its customers. This recognition fuels our innovation efforts and further strengthens our focus towards quality service.”

Hakimuddin Wadlawala, Co-founder & CEO, ProTechmanize Solutions

A startup founded in 2018, ProTechmanize is a service-oriented cyber security organization, which has acquired customers across various industry domains in a short span of time. ProTechmanize has a wide range of security services available with its core focus areas being consultation, implementation and sustenance. The firm is established by professionals with a cumulative experience of over 20 years in the field of CyberSecurity, Information Technology, IT Security & Software Development.

In the current digital arena, where desired information is available at fingertips and accessible from anywhere at any time, data privacy and protection stand at great risk. ProTechmanize delivers next-gen cybersecurity encompassing a holistic approach right from detection to protection and remediation.

We offer a suite of services, tools and solutions that focus on detecting, investigating, and mitigating suspicious activities and issues on hosts and endpoints.

In today's digital world, perimeters are blurred, and users are spread across locations—accessing corporate data through a host of devices. Endpoint security is emerging as a key challenge and also a priority area for technology and security leaders.

Why endpoint detection and response?

Advanced persistent threats and customized targeted malware attack toolkits are intentionally bypassing traditional signature-based antivirus solutions. Endpoint detection and response solutions supplement traditional signature-based technologies for richer behavior-based anomaly detection and visibility across endpoints.

Endpoint detection and response tools offer greater visibility into endpoint data that's relevant for detecting and mitigating advanced threats, limiting sensitive data loss, and reducing the risk of devastating data breaches occurring on endpoints. Endpoint detection and response tools are complimentary to a variety of other security measures and solutions as well, including data loss prevention (DLP) solutions, security information and event management (SIEM), network forensics tools (NFT), and advanced threat defense (ATD) appliances.

“ProTechmanize's recognition in the Endpoint security comes as validation of the company's innovative approach and solutions in endpoint detection and response.”
