# President's Note

Dear CIOs & Digital Business Leaders,

2020 has been the year of monumental change for the ICT ecosystem, wherein we saw the lines between technology and business getting blurred.

It is now evident that Technology not only fuels business continuity and sustainability but even growth and profitability. CIOs, who were already on the journey of transitioning into being strategic leaders, are presented with the opportunity of a lifetime.

CIOs today are steering their enterprises toward a future that is dominated by digital platforms, data-driven businesses, automation technologies, and new ways of working.

While driving such transformational changes of significant magnitude, they are also tasked with the challenge of 'doing more with less'.

How do CIOs keep the innovation ball rolling, how do they ensure successful digital transformation programs with minimal resources, and be the technology evangelists with an outside-in perspective?

Well .... this requires the right set of partners and the 9th edition of CIO Choice comes at this crucial time when technology partners are working hand in hand with technology leaders to help achieve these goals.

As India's largest voting platform for ICT leaders, CIO Choice winning brands this year are recognized for their extraordinary efforts and partnership to ensure that CIOs were able to deliver on the changing business goals. The resilience, flexibility, and accountability of these brands were put to test like never before. And those who walked away with this coveted recognition can very well pride themselves on their commitment to customer experience and satisfaction.

CIO Choice - The Gold Seal of Trust is bestowed by the country's top CIOs on the ICT brands that are a notch above the rest. The winning brands therefore represent a new benchmark in excellence. These are the brands that went beyond what was signed on the dotted lines; recalibrated and realigned their offerings, pricing models, SLAs, and service deliveries; and reskilled and adapted to the disruptive tech landscape.

CIO Choice, this year, is hence a celebration of those brands – of people – who stood shoulder to shoulder with the CIOs in their endeavour to navigate the challenging environment and thrive out of it.

In our effort to redefine and raise the bar in excellence, we are truly humbled and overwhelmed by the close alliance and companionship demonstrated by the ICT community.

We hope to see the community evolving together and becoming the true strategic stakeholders who define the future of enterprise technology.

Regards,  
**Anoop Mathur**

# Introduction

## WHAT IS CIO CHOICE?

CIO Choice is a powerful B2B platform for organisations in the Information and Communications Technology space that provides marketers the opportunity to prominently create a positive brand positioning for their products, services and/or solutions.

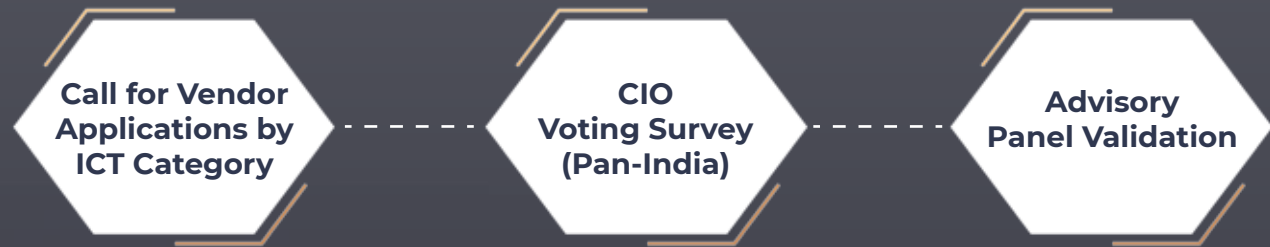

CIO Choice is not an award, but a Gold Seal of Trust and Recognition for ICT brands. It is an industry hallmark of excellence for over 9 years in India.

### **Voice of the Customer**

CIO Choice is the largest online voting platform, where CIOs vote for their preferred and trusted ICT brands that they rely on the most. It is the Voice of Customer—the CIO Verdict. CIO Choice is a recognition for an organisation's products, services, and/or solutions and it represents the confidence earned from their customers—the CIOs

## Selection & Voting

3 stage process

ICT brands (large and small medium enterprises) participate by submitting their nominations in relevant categories. There is a distinguished CIO Advisory Panel, comprising industry leaders and CIOs from across different verticals, that oversees the entire process. ICT brands then participate in an independent online pan-India voting survey. CIO responses are collated regarding their preferred products, solutions and/or services by categories, ensuring a certain level of satisfaction with product, solution and services.

CIOs vote for products and/or services that have earned their confidence in each category. The company that wins the maximum votes in each category is bestowed with the CIO Choice recognition title. To ensure there's no fraudulent voting there's a foolproof voting mechanism incorporated in the process.

Winners in each category earn the right to integrate the CIO Choice title logo on their packaging, promotions, advertising, marketing campaigns, and other brand communication for a period of one calendar year. It is a powerful sales accreditation tool as it increases brand awareness and recognition within the CIO community and can be leveraged for increased sales.

# Advisory Panel Speaks

## **Goutam Datta, CIO & CDO, Bajaj Allianz Life Insurance**

CIO Choice is one of the most coveted recognition for technology partners and services companies in India. Some of the performing and value-creating partners are chosen by a wide spectrum of CIOs across the country and to my mind, it makes this recognition very authentic. CIO Choice 2021 recognition is of extreme importance for each of the deserving and winning candidates this year.

## **Nitin Agarwal, President & Group CIO, CTO & CDO, Edelweiss Financial Services**

CIO Choice is a great platform not only to recognize some of the partners and vendors that we work with, but also to learn from the CIO community. Given the current pandemic this year, technology partners had to demonstrate the ability to go beyond their words to support business continuity and business growth of their customers. The resiliency and flexibility of their service delivery have been tested really hard. CIO Choice has played a key role in bringing the whole community together and keeping them together.

## **Prakash Ramchandran, CTO, Byju's**

In the last one year, many enterprises have relooked at their business models and offerings in the market. CIO Choice has been crucial in helping CIOs select the right partner without really having to spend a lot of time evaluating our options. The fact that the recognitions are backed by our fellow CIOs gives us the much-needed confidence to partner with the winning brands.

## **Prasad Badiwale, Joint President, Birla Management Services**

In the New Normal, it's important to see how each technology vendor has supported their customers and how CIOs were able to effectively leverage their expertise. From that perspective, CIO Choice has provided us with a unique opportunity to share experiences, knowledge and explore new ideas.

## **Sanjay Kotha, Joint President & Group CIO, Adani Enterprises**

CIO Choice has established itself as the most reliable collaboration platform for the ICT ecosystem. Over the years, it has been looked upon as the benchmark in excellence and trust. In the New Normal, when organizations have been navigating some of the biggest changes, the expectations from technology brands went up multi-fold. CIO Choice 2021 has provided a platform for CIOs to acknowledge and endorse the right brands.

**Sreeji Gopinath, Global CIO, Lupin**

CIO Choice is an integrally unbiased platform that recognizes the most deserving ICT brands. This year has been unprecedented for the ICT community and technology partners have stepped up, gone beyond the usual to help their customers navigate the New Normal. CIO Choice ensures that the community comes together and stays together in times of need.

**Tarun Anand, Head - Global IT, Dabur**

These are unprecedented times and a crucial digital turning point for many organizations in India. CIOs have relied on their partners to rise to the challenges thrown at them during the pandemic. CIO Choice recognition is an excellent opportunity to recognize technology partners who have implemented out-of-the-box solution for businesses. It is a fabulous way to recognize future-ready companies and gives CIOs a platform to voice their opinion about the products and technologies offered by these companies.

**Vinod Sivarama Krishnan, CIO, Indus Towers**

The specific constraints of this year have made it even more important to know whom to rely on and where to place your bets. Technology partners have gone over and beyond and have extended themselves in non-traditional ways to support their customers. We must recognize them for their involvement, commitment and dedication and that is really where CIO Choice becomes even more relevant this year as an objective, neutral and credible platform.

**VV Balaji, Head - Business Technology Group, ICICI Bank**

CIO Choice has over the years established itself as a win-win platform for companies that consume technology and companies that provide technology. This year, due to the global disruption, CIO Choice has certainly become more relevant in identifying the right partner during adversities.

ALL ONLINE - 9<sup>TH</sup> EDITION

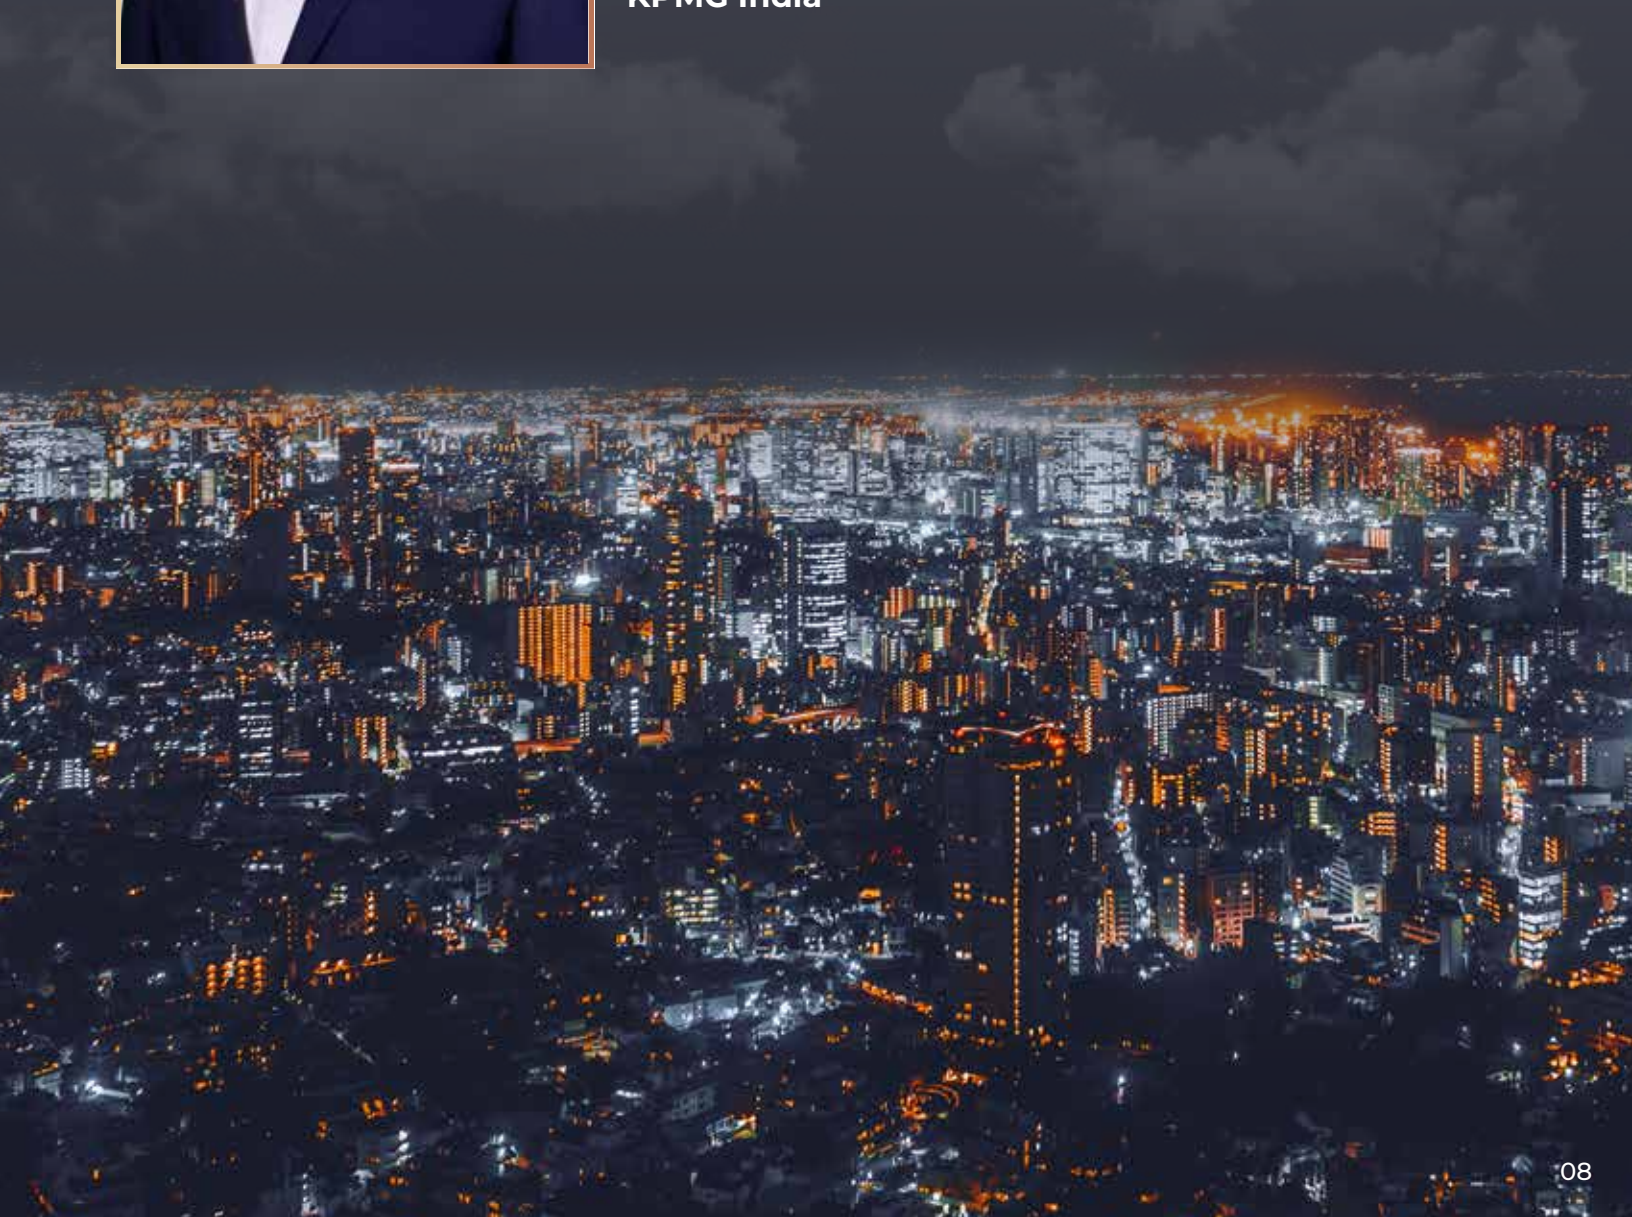

# Knowledge Partner

The last one year has been really transformational from a technology perspective. We have seen tremendous adoption of digital technologies, advanced automation using AI/ML and cloud for transformation of business operations and customer services, and effective management of risk and regulatory requirements.

As a Knowledge Partner, we are pleased to be associated with CIO Choice and wish them success in their goal of recognising those partners who have made a difference in this technology journey.

# Application Development platform

SMALL & MEDIUM ENTERPRISE

**softline**<sup>®</sup>  
We know we can

**YOGESH ZOPE**  
CDO (KALYANI GROUP) & SVP  
BHARAT FORGE

**VINOD NAIR**  
MD  
SOFTLINE

**Yogesh Zope**, CDO (Kalyani Group) & SVP, Bharat Forge, presents the CIO Choice recognition to **Vinod Nair**, MD, Softline India, at CIO CHOICE 2021 Red Carpet – All Online.

Softline is a global digital transformation and cybersecurity solutions provider with over 25 years of experience and a turnover of \$1.8 billion. The company has been leading the change of transforming businesses with its expertise on various cutting edge technology solutions powered by some of our strategic global partners.

Softline today enables technology led business transformation to over 60000+ global customers across 50+ countries. Its dedicated client partners, coupled with technical product and solution experts, engage with clients to help them develop the right technical roadmap essential to support their business plans and aspirations and by creating and managing hybrid & secure cloud infrastructures.

Digital transformation is when business applications really meet the goals of the customer. When you are voted as an application partner, it truly means that you have walked a little bit closer to your vision of being a true digital transformation partner with customers. I want to thank each of our customers for making sure that we are the partner of choice when it comes to applications.

**Vinod Nair, MD, Softline India**

### **How Softline unlocks the power of enterprise apps?**

Softline has been leading several application development programs for Indian enterprises. Its project for Future Generali India Life Insurance Company is a case in point.

During the global pandemic, the insurer was facing several challenges including delayed and longer sales cycle for Insurance sales officers as the face to face selling was not possible. Softline worked with the insurer to develop a Virtual Sales Agent Platform on Teams.

Virtual Sales Agent solution encompassed the following aspects :

- Setting up collaboration using MS Team for Sales Agent
- Sales Agent to connect with Customers Remotely on MS Teams video

- Do the Presentation, Prospecting
- Record entire session
- Capture entire conversation and Insurance form filled in -co-sharing mode
- Get wet signature of customer using Pen
- Get a survey form filled in Multilingual
- Make the recording available to Underwriting system, both videos and all documents

Softline also implemented a Crisis Communication App and O365 Learning Pathway for the insurer.

“With this recognition in Application Development Platform, Softline has strengthened its position as a leading partner who empowers enterprises to thrive in the app-driven digital world.”

ASHOK LEYLAND

**PRADEEP NAIR**

VP & MD - INDIA  
VMWARE

**Venkatesh Natrajan**, CDO, Ashok Leyland, presents the CIO Choice recognition to **Pradeep Nair**, VP & MD – India, VMware, at CIO CHOICE 2021 Red Carpet Night – All Online.

The modern enterprises are innovating and delivering new applications that are built, scaled and operated differently in the modern multi-cloud world. Enterprises need to rethink security as an inherent and distributed part of the modern enterprise to deliver more effective security through a Zero Trust approach.

VMware delivers security as an inherent part of your virtual, cloud and workspace infrastructure to enable IT and Security teams implement Zero-Trust with few tools and silos, better context and security that's built-in and distributed with cloud, workloads, networks and users.

Thank you CIOs for selecting VMware for the CIO Choice recognition in Cloud & Virtualization Security. As remote work becomes more prevalent than ever and workloads are deployed beyond the data center, traditional approaches to security are being reassessed. VMware's intrinsic security offering builds security into the infrastructure so that you can protect any app running on any Cloud across any device, helping businesses secure for today and tomorrow.

**Pradeep Nair, VP & MD – India, VMware**

**Network Security** - VMware NSX Data Center provides network administrators with a single network virtualization and security platform that enables the virtual cloud network, a software-defined approach to networking, distributed firewall and IDS/IPS, extending across data centers, clouds and application frameworks

**Cloud Security** - VMware CloudHealth Secure State helps public cloud teams with unified security approach to mitigate security and compliance risk through intelligent, real-time visibility and security insights across AWS, Azure and Google Clouds

**Workload Security** - VMware Carbon Black Cloud Workload offers agentless security capabilities to IT and Security teams by having unified visibility of vulnerabilities and threats to ensure consistent security for your vSphere workloads and Kubernetes container workloads across any cloud environment with strong detection and response capabilities

"This win in Cloud & Virtualization Security establishes that VMware's unique approach and solutions around security are being applauded by enterprise tech leaders."

We know we can

**RAJIV ARORA**

GLOBAL PROGRAM HEAD - NEW NORMAL (TECHNOLOGY & TOOLS)  
SIEMENS

**VINOD NAIR**

MD  
SOFTLINE

**Rajiv Arora**, Global Program Head - New Normal (Technology & Tools), Siemens, presents the CIO Choice recognition to **Vinod Nair**, MD, Softline India, at CIO CHOICE 2021 Red Carpet – All Online.

Softline is a global digital transformation and cybersecurity solutions provider with over 25 years of experience and a turnover of \$1.8 billion, is leading the change of transforming businesses with its expertise on various cutting edge technology solutions powered by some of our strategic global partners.

Softline is on a mission to help organizations improve business outcomes through the most effective use and consumption of technology solutions, eventually enhancing the quality of life.

Softline today enables technology led business transformation to over 60000+ global customers across 50+ countries.

When you're part of the IT services industry, the voice of the customer is what matters the most. When the voice of a customer becomes the vote of a customer, it truly means that we have really added value to their businesses. I just want to thank all our customers for making sure that they have voted for us. I want to assure that we will continue to upgrade, upskill and reinvent.

**Vinod Nair, MD, Softline India**

### **How Softline Help Enterprises shift to cloud-based email solutions?**

Softline played a critical role on some of the largest cloud email implementation projects in the enterprise space. For example, in one of the key projects for Aditya Birla Group, Softline has successfully migrated the company's entire 28000+ users' mailbox from on-premises exchange to Microsoft Office365 Cloud. The company also migrated over 14000 users on Intune MDM/MAM Microsoft Office365 solution for the same client.

In another large project for Aditya Birla Capital Limited (ABCL), the company also deployed over 13000 users on Microsoft teams. During the Covid-19 Pandemic, Softline gave instant support to migrate the license as well users on Teams for 5000+ users and currently there are almost 14k ABC users who are on Teams. In addition, the company also provided support on Office365 services which includes Microsoft Exchange Online, Intune, EMS, MFA, OneDrive, SharePoint, Stream, Teams etc.

"Softline has been recognized in the Cloud Email Implementation category for its exceptional service, customer-centric approach and cutting-edge technology solutions."

NUTANIX

**Manish Verma**, Head - SonyLIV Technology, Sony Pictures Networks India, presents the CIO Choice recognition to **Anantharaman Balakrishnan**, VP & MD, Nutanix India & SAARC, at CIO CHOICE 2021 Red Carpet Night – All Online.

## About Nutanix:

Nutanix is a global leader in cloud software and a pioneer in hyperconverged infrastructure solutions, making computing invisible anywhere. Companies around the world use Nutanix software to leverage a single platform to manage any app at any location at any scale for their private, hybrid and multi-cloud environments. Learn more at [www.nutanix.com](http://www.nutanix.com) or follow us on Twitter @nutanix.

Thank you for the CIO Choice recognition on Cloud Infrastructure – Software. This offering from Nutanix has been designed to simplify the automation and management of the infrastructure layer so that it becomes easy for customers to serve up a platform for application launches and development for their end-users.

**Anantharaman Balakrishnan (Bala), VP & MD, Nutanix India**

Nutanix helps customers accelerate their business with a single platform for all your apps, data, and cloud services.

Nutanix leverages its industry leading, 100% software-defined hyperconverged infrastructure to provide a single cloud platform that seamlessly brings to life your hybrid and multicloud strategy. Whether on-premise or in the cloud, you get unified management and operations with one-click simplicity, intelligent automation, and always-on availability.

#### **The Nutanix advantage:**

- Standardize upon infrastructure that can be deployed in minutes, and can scale out as your business grows, without disruption
- Get **cloud-like benefits** with the freedom to choose the right technologies for your business needs
- Get **integrated control and visibility** across the virtualized infrastructure stack

- **Financial flexibility** - Convert CapEx to OpEx. No longer should you be forced to buy infrastructure in 3 to 5 year cycles

Nutanix delivers consumer-grade management of datacenter infrastructure, applications, and clouds in a single pane of glass. IT teams can now focus on business-critical initiatives, while advanced machine learning technology reduces complex tasks to a single click.

“Nutanix with their software-defined approach, has established itself as a preferred choice of CIOs when it comes to Cloud Infrastructure – Software.”

# Cloud Telephony

LARGE ENTERPRISE

**SANKARSON BANERJEE**  
CIO, RBL BANK

**SUNDI RAMAN**  
HEAD - DIGITAL PRODUCTS & IOT  
AIRTEL BUSINESS

**Sankarson Banerjee**, CIO, RBL Bank, presents the CIO Choice recognition to **Sundi Raman**, Head - Digital Products & IoT, Airtel Business, at the CIO CHOICE 2021 Red Carpet Night – All Online.

Airtel IQ, a cloud-based omni-channel communication suite, enables brands to deepen engagement with customers through timely and secure communication. Airtel IQ eliminates the need for multiple communication platforms for different channels. With just a slice of code, businesses can embed communication services such as Voice, SMS, IVR in their applications and digital properties across desktop and mobile, all through a unified platform.

By abstracting the strength of Airtel's pan-India mobile and landline infrastructure through a set of APIs, businesses can get started with no telecom infrastructure and using familiar web technologies. Businesses can focus on improving their customer experience and stop worrying about telecom functionality. This translates into peace of mind for businesses through better network reliability that results in enhanced service quality, lower costs, and more control.

We acknowledge the recognition by CIOs across the country. At Airtel, we are obsessed with solving customer problems and Airtel IQ is first amongst several game-changing products that we will be bringing to the market in near future. Businesses are increasingly looking to cloud-based digital platforms to engage with consumers and Airtel IQ is built to raise the bar when it comes to brands delighting consumers.

**Ganesh Lakshminarayanan, CEO, Enterprise Business, Airtel Business**

Airtel IQ addresses all your business communication concerns

- **Workflow orchestration across calls and SMS** : Create call masking, Customer-to-Customer communication, outbound dialler or any other workflow by dragging and dropping pre-coded building blocks
- **Dynamic call flow configuration** : Define which participants to add, which announcements to play and any such runtime configuration
- **Intelligent call routing** : Route calls on the basis of business hour, spam, customer type, agent availability and other parameters
- **Intelligent call connect** : Route calls in Sequential, Round Robin or Parallel order and allow your customers to control ringing time for a customised experience
- **Smart IVR** : Create multi-level IVR flows for a shorter time-to-reach and improve experience with features like hold, mute and transfer
- **Secured call recording** : Record, store and transcribe calls with assured privacy
- **Seamless integration** : Integrate Airtel IQ can be easily integrated into your web and mobile apps and leading CRM softwares
- **Audio conferencing** : Create conference bridge for multiple users for on-call collaboration

“With this win in Cloud Telephony, Airtel Business has been recognized for its emphasis to deliver the most secure, flexible and scalable communication solutions for businesses.”

CEO  
NXTRA BY AIRTEL

**Vijay Sethi**, CIO, CHRO & Head CSR, Hero MotoCorp presenting the CIO Choice Recognition to **Rajesh Tapadia**, CEO, Nxtra by Airtel, at CIO Choice 2021 Red Carpet Night – All Online.

Nxtra by Airtel, a subsidiary of Bharti Airtel Limited, offers largest network of secure, scalable, and sustainable data centers in India to leading enterprises, hyperscalers, start-ups, SMEs and governments.

Being associated with both data center and telecom industry for more than two decades, we provide a platform of hyper connected state-of-the art core and edge data centers across 120+ locations. Nxtra also enables businesses to accelerate their digital journey and host their applications closer to their customers than ever before.

Backed by one of the world's largest investment firm 'Carlyle Group' and already investing in multiple hyperscale data center parks, we're committed to be a long term partner to support the journeys of our customer's to scale and create a digital future.

We acknowledge this recognition by CIOs across the country. We believe this is a by-product of our unrelenting focus on customers and building long term relationships. It will further encourage our teams to keep delivering innovative solutions to customers and add value to their business. At Nxtra by Airtel, we want to extend our support in adopting robust and flexible business continuity arrangements to continue to serve our customers.

**Rajesh Tapadia, CEO, Nxtra by Airtel**

#### **Key features:**

**Design and Scalability :** TIA 942, concurrently maintainable, PoD- based, modular and scalable architecture

**Reliability:** 99.99% availability backed by industry leading SLAs

**Connectivity:** Low latency, carrier dense and rich interconnection services

**Sustainable Practices:** Green energy powered data centers with highly energy- efficient design and operations

**Security and Compliance:** Comprehensive, multi-level security adhering to global compliances

“Nxtra by Airtel has once again been recognized in the colocation category for its ability to help enterprises meet the growing datacenter needs in a digital-only world.”

# Data Fabric

LARGE ENTERPRISE

**Shiv Kumar Bhasin**, CTO & COO, NSE, presents the CIO Choice recognition to **Puneeth Gupta**, MD, NetApp India Marketing & Services, at CIO CHOICE 2021 Red Carpet Night- All Online.

Data fabric is an architecture and set of data services that provide consistent capabilities across a choice of endpoints spanning on-premises and multiple cloud environments.

Data fabric simplifies and integrates data management across cloud and on premises to accelerate digital transformation. It delivers consistent and integrated hybrid cloud data services for data visibility and insights, data access and control and data protection and security.

Thriving in today's environment requires creating a data-centric organization, which is no small undertaking. It also requires a holistic approach to managing data that is secure, efficient, and future-proof, and provides freedom of choice. At NetApp, we build a data fabric for a data-centric world.

I'm absolutely delighted and honored that NetApp India is being recognized for the third consecutive time by eminent CIOs in the country. This really is a testimony to the fact that NetApp has pioneered the concept of data Fabric in the industry a few years back.

**Puneet Gupta, MD, NetApp India Marketing & Services**

### **Data Fabric for the Data-centric world:**

The NetApp data fabric ultimately helps organizations unleash the power of data to meet business demands and gain a competitive edge. It allows IT organization to better harness the power of hybrid cloud, build a hybrid multicloud experience, and modernize storage through data management.

Data fabric simplifies and integrates data management across cloud and on premises to accelerate digital transformation. It delivers consistent and integrated hybrid cloud data services for data visibility and insights, data access and control and data protection and security.

### **The Data Specialists:**

NetApp brings the enterprise-grade data services you rely on into the cloud, and the simple flexibility of cloud into the data center. Its industry-leading solutions work across diverse customer environments and the world's biggest public clouds. As a cloud-led, data-centric software company, only NetApp can help build your unique data fabric, simplify and connect your cloud, and securely deliver the right data, services and applications to the right people—anytime, anywhere.

"With this recognition, Netapp has once again established itself in the market as the name to reckon with when it comes to Data Fabric."

# Desktop Virtualization

LARGE ENTERPRISE

citrix™

**RAJESH UPPAL**  
Sr. Exec. Dir. HR & IT  
MARUTI SUZUKI

**RAVINDRA KELKAR**  
AVP  
CITRIX

**Rajesh Uppal**, Sr. Executive Director (HR & IT), Maruti Suzuki India, presents the CIO Choice recognition to **Ravindra Kelkar**, Area Vice President & Country Manager, Citrix India, at CIO CHOICE 2021 Red Carpet – All Online.

In the last one year, Desktop virtualization technology has enabled millions of users to simulate a workstation load to access a desktop from a connected device remotely or locally. VDI has been a key focus area for enterprises as many of them shifted to remote working models.

Citrix Virtual Desktop Infrastructure (VDI) solutions give teams reliable access to all the apps and information they need, whether they are working in the office or thousands of miles from the data centre.

Users have access to a reliable, high-definition experience that helps them be productive at all times, and IT can lower costs and safeguard sensitive data by providing the right level of access to each user. This separates the desktop environment and its applications from the physical client device used to access it.

Thank you for the recognition at a time when enterprises across the country shifted to work-from-home model. We are very proud of the work that we have done with our customers in provisioning devices for thousands of users and enabling them with applications access through virtual desktop infrastructure. Thank you again on behalf of Citrix.

**Ravindra Kelkar, Area Vice President & Country Manager,  
Citrix Systems India**

### **The Citrix Edge:**

Citrix desktop virtualization solutions are a key element of the digital workspaces and have a number of benefits. By minimizing how much computing is needed at the endpoint devices for end users, IT departments can save money by buying less costly machines. Desktop virtualization helps IT admins support remote workers by giving IT central control over how desktops are virtually deployed across an organization's devices.

Rather than manually setting up a new desktop for each user, desktop virtualization allows IT to simply deploy a ready-to-go virtual desktop to that user's device. Such a solution also provides IT admins centralized security control over which users can access which data and which applications.

Citrix Systems builds the secure, unified digital workspace technology that helps organizations unlock human potential and deliver a consistent workspace experience wherever work needs to get done.

"With this win in Desktop Virtualization, Citrix has strengthened its leadership position in the market as the most innovative and preferred choice in VDI."

# Digital Transformation Enabler

LARGE ENTERPRISE

**Manish Verma**, Head - SonyLIV Technology, Sony Pictures Networks India, presents the CIO Choice recognition to **Ujjwal Mathur**, VP & Country Head, TCS India Business, at CIO CHOICE 2021 Red Carpet Night – All Online.

Tata Consultancy Services (TCS) is an IT services, consulting and business solutions organization partnering with many of the world's largest businesses in their transformation journeys. TCS has a global presence, deep domain expertise in multiple industry verticals, contextual knowledge of customers' businesses and a complete portfolio of offerings.

In the Business 4.0 era, organizations build strong digital cores to pursue certain economic behaviors – leveraging ecosystems, personalizing at scale, embracing risk and creating exponential value – even as they shifted their mind sets to harnessing abundance rather than optimizing resources.

TCS is truly pleased and thankful for this recognition. I accept this recognition on behalf of my colleagues in TCS who have worked tirelessly during the pandemic time with many institutions, thus helping create digital, resilient, purpose-driven and adaptable organization.

**Ujjwal Mathur, VP & Country Head, TCS India Business**

TCS helps businesses evolve through technology by helping embrace innovative business models to build on their ambitions and transform their businesses for better; so that their contribution is felt not just by their customers, but also the communities they serve.

TCS' new brand statement – 'Building on belief' – encapsulates the active and collaborative role that TCS plays in partnering with customers over the long term, leveraging its investments in research and innovation, contextual knowledge and its technological expertise to help enterprises grow and develop purpose-led ecosystems, according to the company.

"Being recognised as the brand of choice for Digital Transformation Enabler is a testimony of the digital capabilities and strategies that TCS has garnered over the years."

Build for larger than life collaboration Dell C8618QT interactive touch monitor comes with impressive size and outstanding visual clarity ideal for larger conference room settings.

Brilliant 4K resolution keeps audiences captivated, and consistent colours across a wide viewing angle let everyone see clear text and crisp, vivid visuals. The impressive 86-inch touch screen is ideal for conference room settings of up to 20 people. Anti-glare and anti-smudge coatings reduce distracting reflections and fingerprints.

Group collaboration is intuitive and seamless thanks to innovative InGlass™ technology, allowing simultaneous screen interaction via touch or styluses with up to 20 touch points. Two styluses (included) let you write or draw naturally in real time directly on the screen without any lagging, while the remote provides added functionality. Pen and finger differentiation makes it easy to switch between touch and pen-based interaction, and touch

functionality is supported on virtually all industry-standard software. Industry first Dell exclusive screen-drop feature for different presenters. Super reliability from the #1 monitor brand worldwide for four consecutive years.

#### **Simple Setup and Management:**

- **Convenient connectivity:** A variety of ports—including HDMI, VGA, DisplayPort and USB—makes it easy to connect to most IT devices
- **OptiPlex compatibility:** The C8618QT features a unique design that's compatible with the optional Dell OptiPlex Micro, which integrates seamlessly into the back panel without the need of a separate power cord.
- **Connect wirelessly:** The optional wireless modules
- **Easy manageability:** The Dell Display Manager lets users easily organise screen layouts. RS232 and RJ45 interfaces allow you to manage the display remotely

“As a preferred brand in Display Monitors, Dell has been once again recognized for its ability to bring innovation and newer experiences to business users when it comes to their collaboration needs.”

# Edge Computing Infrastructure

LARGE ENTERPRISE

**DELL**Technologies

**NITIN PARMAR**  
CIO, ARVIND LTD.

**SRIKRISHNA VENKATRAMAN**  
COUNTRY MARKETING LEAD - INFRASTRUCTURE SOLUTIONS GROUP  
DELL TECHNOLOGIES

**Nitin Parmar**, CIO, Arvind, presents the CIO Choice recognition to **Srikrishna Venkatraman**, Country Marketing Lead, Dell Technologies India, at CIO CHOICE 2021 Red Carpet Night – All Online.

For many years, Dell Technologies has helped numerous organizations address and overcome challenges presented by systems at the Edge. In this work, the company brings its customers and partners a clear perspective on Edge computing.

Dell defines Edge as the intersection of physical and digital domains where data is generated, collected and processed to create new value.

Dell does not consider computing at the Edge as a separate and discrete solution. Instead, it leverages the deep IT experience of designing and deploying private and public cloud environments to build capabilities at the Edge, while reducing the complexity of managing data and application services across these domains.

We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value for CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a validation that our long-term customer-centric strategy is working.

**Alok Ohrie, President & Managing Director, Dell Technologies India**

To that end, Dell successfully deploys systems at the Edge by providing :

- Infrastructure that is optimized for the Edge (dimensional, physical, connectivity, etc.)
- Software-defined data networks that provide flexible connectivity across domains
- Consistent management and operations from the Edge to the hybrid cloud
- The ability to support demanding, cloud-native applications
- A comprehensive industry-leading ecosystem, including VMware, to support unique requirements
- A reliable support services and global supply chain to help ensure no disruptions to operations
- And an intrinsic security approach that robustly protects every layer across all domains

### **The Dell Promise**

We have helped thousands of organizations modernize their infrastructure and deploy essential Edge solutions critical to their businesses. We have built the technology stack to simplify systems at the Edge while providing the capability to extract value and deep insights from data at the Edge.

“With this recognition in Edge Computing Infrastructure, Dell Technologies has secured its position as the leading provider empowering enterprises to harness the new capabilities at the ‘Edge’.”

**PRATAP PAT JOSHI**  
CIO  
MERCEDES-BENZ INDIA

**RITU GUPTA**  
MARKETING DIRECTOR  
DELL INDIA

**Pratap Pat Joshi**, CIO, Mercedes-Benz India, presents the CIO Choice recognition to **Ritu Gupta**, Marketing Director, Dell Technologies India, at CIO CHOICE 2021 Red Carpet Night – All Online.

Flash storage is enabling IT transformation for organizations of every size. All-flash storage offers a wide variety of benefits from lowering latency and increasing IOPS per drive to consolidating workloads, shrinking hardware footprints, minimizing power consumption and reducing the cost of management.

While many companies are already realizing the advantages that flash storage offers, others are not sure the benefits outweigh the cost. Dell EMC provides a family of all-flash arrays that are designed to solve the challenge of embracing a modernized flash-centric data center while simplifying, automating and consolidating IT operations cost-effectively.

We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value for CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a validation that our long-term customer-centric strategy is working.

**Alok Ohrie, President & Managing Director, Dell Technologies India**

### **PowerMax**

PowerMax changes the game for data storage. It is designed with a multi-controller, active/active scale-out architecture and industry standard, end-to-end NVMe. Inline, global dedupe and compression add extreme efficiency to your data center, even as it scales. It offers true scale-out design, end-to-end NVMe, SCM persistent storage.

### **PowerStore**

PowerStore's versatile architecture, unique in the data storage industry, provides unmatched versatility of deployment combined with scale-out as well as scale-up expandability to address the impacts of growing performance as well as capacity requirements.

PowerStore comes with up to 7x more IOPs4 and 3x lower latency for real-world workloads compared to the previous generation of storage platforms.

### **Unity XT**

Dell EMC Unity XT All-Flash and Hybrid Flash arrays set new standards for storage with compelling simplicity, all-inclusive software, blazing speed, optimized efficiency, multi-cloud enablement – all in a modern NVMe-ready design – to meet the needs of resource-constrained IT professionals in large or small companies. With Unity XT, seamlessly extend storage to the cloud or deploy in the cloud with flexible cloud consumption options.

“Dell Technologies’ win in Enterprise Flash Storage underscores the value that the company brings to the table while addressing the unprecedented storage and data requirements of enterprises.”

**RAJESH UPPAL**  
Sr. ED (HR & IT)  
MARUTI SUZUKI

**NITIN MISHRA**  
TEAM NTT

**Rajesh Uppal**, Sr. ED (HR & IT), Maruti Suzuki India, presents the CIO Choice Recognition to **Nitin Mishra**, Head of Cloud Services, NTT, at CIO CHOICE 2021 Red Carpet Night – ALL ONLINE

NTT Ltd. is a purpose-led, performance-driven global technology services provider that enables enterprises to benefit from a full-stack integrated ICT service offerings. With an overall global revenue of around 11 bn and delivering services around 200 countries and regions, India has been identified as the fastest growing market by NTT.

With the coming together of our three key business entities viz. **NTT India Pvt. Ltd**, **NTT Communications India** and **Netmagic** as a single NTT organization and our portfolio spanning data-center, hybrid cloud, system integration, network, security and collaboration, we have created

a leading technology service provider in the company that can address the digital transformation of our clients.

Through this integrated organization, we bring together the best capabilities, technology, infrastructure and services to fast-track our client's digital agenda and help them –

- Accelerate innovation with Datacenter services
- Drive business agility with Network services
- Optimize applications and infrastructure with Cloud services
- Secure by design with Managed Services including Cybersecurity

We are greatly pleased to be bestowed with the CIO Choice 2021 recognition for Hybrid Cloud category. In the race for digital transformation, Hybrid Cloud has proven to be the preferred mode of cloud adoption for enterprises and has been the bedrock of successful adoption of cloud. The recognition from the CIO community comes as a great motivator for us to further raise the bar and create best-in-class hybrid cloud management and migration capabilities.

**Nitin Mishra, Head of Cloud Services, NTT Ltd. in India**

Working with organizations around the world and in India, NTT achieves business outcomes through intelligent technology solutions that are data driven, connected, digital and secure. We believe in a connected future that's secure by design to help organizations minimize risk while they innovate and grow. NTT's clients gain better insight to make the right decisions at the right time and achieve their business modernization and transformation goals.

**NTT's Managed Cloud Services** offer you a comprehensive end-to-end quality cloud managed service for your workloads by taking full responsibility including consulting, designing, building, optimizing and managing your private cloud, public cloud and multi-cloud, such as Google Cloud Platform, AWS and Microsoft Azure. We can help you scale and migrate your application workloads to the cloud seamlessly, giving you the autonomy to resize cloud infrastructure on the go.

Today, enterprises are embracing the multi-cloud model like never before. They control your complete cloud infrastructure. are looking for ways to assemble, deploy, and manage critical IT workloads across the

hybrid cloud environment with controlled cloud IaaS budgets. Lack of a proper governance framework causes enterprises to accidentally expose their data or services.

**NTT's cloud analytics platform,** Simpli-Insight gives you a single interface to We deliver a consistent and actionable view into cost and resource management, security, and performance for applications across multiple cloud environments.

**NTT's Public Cloud – 'SimpliCloud'** – is an enterprise grade IaaS platform that comes with an extensive set of managed services. It not only simplifies your transition to the cloud, but also helps you scale, optimize and manage your technology environment in real-time. Using an end-to-end self-management portal, you have the supreme ability to ramp-up, scale down or modify your cloud server, storage and network resources, anytime, anywhere and anyway you wish. Also, with the help of NTT's dedicated private cloud is delivered in physical and virtual models. For your virtualized workload needs, we provide an end-to-end managed private cloud. Our specially curated Private Cloud environment ensures security of dedicated infrastructure, while enabling complete agility.

"As enterprises adopt hybrid environments at rapid pace, NTT's recognition in Hybrid Cloud validates the company's vision, cloud capabilities and customer-centricity."

It is a great delight for us at NTT India for our efforts to be felicitated with the CIO Choice 2021 award in the Hyperscale Data Center domain. With an investment of over \$2 billion to be made in the next four years, we are set to double our footprint in the major Indian cities. We convey our sincere thanks to the CIO community for the unwavering faith in us.

**Sharad Sanghi, CEO, NTT Ltd. in India**

Working with organizations around the world and in India, NTT achieves business outcomes through intelligent technology solutions that are data driven, connected, digital and secure. We believe in a connected future that's secure by design to help organizations minimize risk while they innovate and grow. NTT's clients gain better insight to make the right decisions at the right time and achieve their business modernization and transformation goals.

As a global NTT company, our customers benefit from our nearly two decades of experience around colocation, data center migration and security. Through our robust data centers, high-density colocation solutions, fault-free migration expertise and more, we help you bounce back from disruption to certainty.

NTT has established itself as the provider of choice for customers with mission-critical hosting requirements. We bring the in-depth experience of managing IT infrastructure for over 2500 enterprise

customers with 10 hyperscale and high-density data centers in Chennai, Bengaluru, Mumbai, and Noida (Delhi). Our data centres provide hosting and co-location solutions that are supplemented with a comprehensive suite of managed services, delivered by a skilled team of technical experts covering the complete IT infrastructure stack—OS, DB, Storage, Security, Network and Cloud. These services are delivered from our Network and Security Operations Team, allowing customers to construct modular solutions that are tailor-made to their specific requirements.

#### **Our India data centers: A snapshot:**

- 10 Data centers in major cities: Chennai, Bengaluru, Mumbai, and Noida (Delhi)
- Cover 1.5 Million sq. ft in major cities
- 140 MW facility load
- 2,500+ Clients
- 3 R&D centers in Pune, Mumbai & Bengaluru
- 99.9% Infrastructure availability
- 24x7 Escorted access security and support
- 2x Capacity every 2 years

"This consecutive win in Hyperscale Data Centers demonstrates NTT's indisputable leadership, infrastructure expertise and capabilities in the market to address the growing demands of enterprises."

PROTECHMANIZE

**AKSHAY DHANAK**  
CIO  
MAGMA FINCORP

**HAKIMUDDIN WADLAWALA**  
CO-FOUNDER & CEO  
PROTECHMANIZE

**Akshay Dhanak**, CIO, Magma Fincorp, presents the CIO Choice recognition to **Hakimuddin Wadlawala**, CEO, ProTechmanize Solutions, at CIO CHOICE 2021 Red Carpet – All Online.

ProTechmanize Solutions is an Information Technology product and services company, established by professionals with a cumulative experience of several decades in the field of Information Technology, CyberSecurity & Software Development.

The company believes in providing the right set of solutions and services to their customer by tailored programs.

We are truly honoured and delighted to be awarded CIO Choice recognition for two years in a row, This recognition is a testimony our relentless efforts to ensure best Cyber Security solutions are available for all organization. We completely owe this success to our customers who have believed in us and supported us through this journey.

**Hakimuddin Wadlawala, CEO, ProTechmanize Solutions**

### **Information Security Solution and Consulting:**

Information security has become an incredibly complex effort. The threat landscape is growing and evolving quickly and new technologies for defense and controls emerge almost daily. It's no longer enough to protect the network — effective, IT security must involve security for data, endpoints, and application security as well.

Building a successful security program today requires extremely talented professionals who can develop a cyber security strategy and sort through all the options to choose the right mix of services, technology and solutions to build an effective program.

When Brands lack the internal resources to meet the demands of enterprise security management, a partner in information security can fill the gaps.

### **Securing the digital era:**

The right information security partner can help you better protect your organization by providing expertise and experience that you may lack internally. When seeking an information security consulting company with the broadest experience and deepest expertise, more leading organizations today turn to Optiv.

In the current digital arena, where desired information is available at fingertips and accessible from anywhere at any time, data privacy and protection stand at great risk. ProTechmanize delivers next-gen cybersecurity encompassing a holistic approach right from detection to protection and remediation.

“ProTechmanize’s recognition in Information Security comes as validation of the company’s broad experience and deep expertise in the field of enterprise security.”

SMALL & MEDIUM ENTERPRISE

**ARCHON**  
Be always on

**ANUBHAV RAJPUT**  
CIO, HEAD DIGITAL & OPS  
CHOLAMANDALAM MS GENERAL INSURANCE

**SACHIN RAO**  
CEO  
ARCHON CONSULTING

**Anubhav Rajput**, CIO & Head - Digital & Operations, Cholamandalam MS General insurance company, presents the CIO Choice recognition to **Sachin Rao**, MD & CEO, Archon Consulting Systems, at CIO CHOICE 2021 Red Carpet – All Online.

Archon helps customers by providing the apt IT infrastructure and services enabling in their digital transformation journey. The company's objective is to increase profitability for the customers by providing solutions and services which bring operational efficiencies, benchmark IT and provide different business models (capex, opex, consumption based private cloud and public cloud).

Archon provides solutions in client computing (end point), datacenter (server, storage, networking), security and software, helping greenfield setup as well as revamping for the new digital age requirements. They have enabled customers with a faster time to market, securing their data, ease of use and with flexible contracts helping traditional customers transform as per today's changing and challenging environment.

CORE Media's CIO Choice is one of the most sought-after recognitions amongst the ICT vendor community and I take the opportunity to thank the CIO Community for nominating us and voting for us in the Infrastructure Transformation Services domain for third year in a row. This time it is even more prestigious for Team Archon as we are celebrating our 10th year anniversary. I would also like to dedicate this recognition to my team.

**Sachin Rao, MD & CEO, Archon Consulting Systems**

### **The Archon Advantage**

We are living in a highly disruptive and fast changing world where collaboration occurs at every level. Digital leaders need to excel at continuous business innovation and IT department in enterprises have to cater to disparate demands for various business units as well as employees.

There is constant pressure to optimize and streamline data center management and cut costs while ensuring better performance and utilization of the IT ecosystem. Whether it's real-time analytics, connecting devices at the edge, or protecting apps and data – business leaders now widely prefer to consume the outcomes they want, when they want them, and pay only for what they consume. We at Archon with our technology alliances and skilled resources, including consultants work closely with our customers to manage data, intelligence from edge to core, redefine security

paradigm, build infrastructure that will self-manage and self-service, propose and deploy consumption based models that will deliver experiences as a service.

### **Archon Lines of Business**

- Optimizing End user Devices for Workforce productivity, End Point Governance, Virtual Desktop Infrastructure
- Server, Storage, Back Up and Disaster Recovery, Virtualization, Hyper scale computing and Converged Infrastructure
- Datacentre and Cloud
- Networking, Collaboration and Security
- Enterprise Software and Applications
- IT Infrastructure Support & Services

"A decade's experience coupled with innovative offerings have made Archon a brand that the CIOs' trust for their infrastructure transformation initiatives."

# Internet of Things (IoT)

LARGE ENTERPRISE

**RAJIV ARORA**  
GLOBAL PROGRAM HEAD - NEW NORMAL (TECHNOLOGY & TOOLS)  
SIEMENS

**BHUSHAN SETHI**  
VP  
VODAFONE IDEA

**Rajiv Arora**, Global Program Head - New Normal (Technology & Tools), Siemens, presents the CIO Choice Recognition to **Bhushan Sethi**, VP, Vi Business India, at CIO CHOICE 2021 Red Carpet Night – All Online.

The Internet of Things (IoT) is changing the way businesses operate around the world. It is helping different businesses open up new revenue streams, improve efficiency across the board and get a clear view of their supply chains, assets and operations. IoT has the potential to enable more efficient use of scarce resources, automate routine manual tasks, and improve decision-making.

We thank the CIO community for recognizing our efforts in IoT, for the fourth consecutive year. We are truly grateful to our customers and partners in contributing towards maintaining our IoT leadership position in the market. In the journey from Telco to Techco, IoT is an essential component to our vision, and we continue to strive towards keeping the innovation quotient alive with recent launches like Integrated IoT.

**Bhushan Sethi, VP, IoT Product and Solutions, Vi Business**

### Why Vi IoT?

Vi Business simplifies IoT deployments, with a wide range of enterprise-grade, end-to-end solutions to meet the specific needs of business.

With its Integrated IoT Solutions, businesses get end-to-end IoT deployment, with a single point of contact, so that every element of the project works seamlessly. Vi team of experts comprise specialists from different industry sectors and verticals, ensuring better accountability, faster implementation and quicker return on investments.

As global and local market leaders in IoT, the company continues to leverage its global expertise spanning over 20 years as well as local strengths of platforms, connectivity, marketplace of partners and integrated IoT solutions to bring the customers IoT solutions that are tailored to their business needs.

### The Vi Innovation

Vi IoT has a number of products and services addressing the complete Internet of Things (IoT) market – connecting machines, devices and services. Our IoT Partners programme will support you with resources that you need to offer compelling solutions to existing and new customers. The partner programme has been developed to provide our valued partners with a range of benefits that will enable you to get to the vibrant IoT market quicker, serve your customers better, and forge mutual collaborations to expand your business in new directions.

“Vi’s broad gamut of solutions and their global expertise have once again strengthened their prominence in the market as an innovative IoT player.”

**PRATAP PAT JOSHI**  
CIO  
MERCEDES-BENZ INDIA

**SATYEN VYAS**  
CEO  
SYMPHONY SUMMITAI

**Pratap Pat Joshi**, CIO, Mercedes-Benz India presents the CIO Choice recognition to **Satyen Vyas**, CEO, Symphony SummitAI, at CIO CHOICE 2021 Red Carpet – All Online.

Symphony SummitAI is a market-leading AI- driven IT/Enterprise Service Management suite that integrates IT Service Management (ITSM), IT Asset Management (ITAM), AI-powered digital agent (CINDE) and Service Automation in a single easy-to-use suite.

Available as SaaS over the cloud or on-premises, SummitAI is an enterprise-class solution that delivers measurable business outcomes through digital transformation, such as:

- Up to 45% lower total cost of ownership as compared to the next best alternative
- Up to 30% improvement in employee satisfaction scores
- Faster time to value (go live in less than 90 days)

Customers have rated SummitAI as a Gartner Peer Insights Customers' Choice thrice in a row and recognized as a 'CIO CHOICE' four years in a row.

SummitAI is privileged to receive the CIO Choice recognition. What makes it unique for us this year is receiving the honor for the fourth year in a row. We have been a trusted partner for our customers in driving the digital transformation initiatives to build a competitive edge and lead markets. SummitAI is continuously looking for avenues on how we improve on delivering business values for our customers. This recognition by the CIOs validates our efforts and serves as a huge testimony.

**Satyen Vyas, CEO, Symphony SummitAI**

### **The Symphony SummitAI Differentiators**

- Next Generation AI-driven SaaS/Cloud Architecture that is highly flexible and easily configurable reduces TCO and implementation time
- CINDE, our breakthrough AI Conversational Insights and Decision Engine, enables the best user experience
- Our AI Model-driven Digital Service Agents enable 50% reduction in service response time
- Full suite of integrated capabilities for ITSM, ITAM, AI Powered Digital agent and Service Automation
- Scalable to full ESM deployments, beyond ITSM
- Better TCO and improved CSAT
- Codeless configurations, Rapid deployment, Easy administration
- Intuitive UI/UX, Omnichannel access
- Powerful, user-friendly dash-boarding, reporting analytics capabilities
- Open architecture based on Microsoft Azure cloud infrastructure

IT Leaders are navigating a wide range of interconnected issues that span from business continuity, employees and customer safety, shoring-up cash & liquidity, and reorienting operations to improve productivity amid intensifying uncertainty – all with a focus on overall cost reduction.

The company's AI-driven solutions address the major challenges that organizations face when it comes to IT and enterprise service management.

“With this win in IT Operations Management, Symphony has re-established its position as a partner who brings advanced innovation in AI & machine reasoning to help customers accelerate business outcomes.”

LARGE ENTERPRISE

**DELL**Technologies

**SANKARSON BANERJEE**

CIO  
RBL BANK

**SRIKRISHNA VENKATRAMAN**

COUNTRY MARKETING LEAD - INFRASTRUCTURE SOLUTIONS GROUP  
DELL TECHNOLOGIES

**Sankarson Banerjee**, CIO, RBL Bank, presents the CIO Choice Recognition to **Srikrishna Venkatraman**, Country Marketing Lead, Dell India, at CIO CHOICE 2021 Red Carpet Night – ALL ONLINE.

Latitude 7490 is the world's most secure, most manageable and most reliable business-class laptops with outstanding support.

**World-class security and manageability:**

As workers continue to become more mobile, security and management are more critical than ever, especially as devices and data are increasingly outside the perimeter. Dell's Client Command Suite provides free automation tools to manage your devices. And with vPro out-of-band capabilities, you can reach all your systems, to update once and update everywhere, even when systems are turned off.

**Award winning innovation:**

Dell's design process is laser-focused on our customers. We go straight to the source and directly engage our customers every single day in our global Customer Solution Centres via focus groups, surveys, customer advisory councils, and on social media. And from these conversations implemented six key tenets in our latest product designs. From intelligent wireless technology that boosts connection speeds up to 40%, to small and light devices that have narrower borders to immerse our users in beautiful and productive displays.

We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value for CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a validation that our long-term customer-centric strategy is working.

**Alok Ohrie, President & Managing Director, Dell Technologies India**

#### **Business class that's smaller and lighter:**

At Dell we continue to design and build devices that fit the way you work. From reducing footprints for smaller workspaces, optimising displays for easier viewing and multiple processor choices that match your needs all in a laptop that is comfortable and easy to use. Consider thoughtfully designed thermal vents that keep your lap cool while working, connectivity options that neatly organise wires in small workspaces and express battery charging while you're on the go. All this and your data is protected by the world's most secure and manageable laptops and 2-in-1s.

#### **Mobility with a view:**

Experience optimum productivity and mobility in a device that is small and light. Choose slimmer bezels and immerse yourself in a display that is designed to saturate its user with an ultimate viewing and touch interface.

#### **Designed for style:**

Made with premium, durable materials, there are now even more choices to love. Introducing a stunning new machined aluminium finish, or opt for woven carbon fibre or magnesium alloy, all with soft touch paint. These laptops are built to last.

#### **Connectivity means productivity:**

New system access and connectivity features that improve your productivity throughout the workday. Including Win

dows Hello via an optional infrared camera facilitates logon using facial recognition. And docking, which is now a breeze with multiple options, including DisplayPort™ over USB Type-C.

#### **World's most secure:**

Relax knowing that this series of laptops is the world's most secure, featuring optional multi-factor authentication, including touch fingerprint reader, contact FIPS 201 smart card reader, contactless smart card reader/NFC with Control Vault 2™ FIPS 140-2 Level 3 certification.

#### **Features of the Dell Latitude family of products:**

Commercial devices that are small, light and beautiful

- Intelligent wireless technology that works upto 40% better
- Dynamic power mode for more performance boost when you need it
- Multiple work modes including laptop, tent and tablet
- Narrow border displays that are stunning and may detach for tablet use
- Type-C connectivity for power, data or voice using one cable, including Thunderbolt
- Rugged extreme devices designed to work in the harshest conditions
- Tailored ecosystem of peripherals available to keep you productive wherever you work

"At a time when mobility becomes a key priority for enterprises and their workforces, Dell has once again proven its forte in Laptops by bringing devices that transform the way we work."

**PARESH SHAH**  
CEO  
ALLIED DIGITAL

**Nitin Parmar**, CIO, Arvind Ltd., presents the CIO Choice recognition to **Paresh Shah**, CEO, Allied Digital Services, at CIO CHOICE 2021 Red Carpet Night – All Online.

## Overview

Allied Digital's Managed IT Services offer comprehensive solutions, across enterprise grade IT infrastructure and applications. We partner with clients across industries around the world, to drive modernization, transformation, and radical cost reduction. Field-tested consultants, and implementation experts drive business transformation through holistic alignment of people, processes and technologies. Decades of experience and fast technology adaption makes Allied Digital, a sought after partner for customised cost effective solutions.

## What Allied offers

Our mature systems management approach offers reduced operational costs, higher availability, better control, increased transparency and reliability.

Driving automation across diverse managed services (workplace and enterprise), we reduce mundane tasks, quicken resolution time and fulfil service requests.

Our public cloud transformation narrates success stories of migration exercises, including leveraging cloud Terraform/Arm templates, IaC DevOps and Application

A big thanks to all the CIOs who voted for us in CIO Choice 2021 for Managed IT Services category. As an IT services management company with global footprint across 70 countries, we have been recognized repeatedly for our large infrastructure and Smart City projects. We look forward to partnering with you in your technology transformation journey ahead.

**Paresh Shah, CEO, Allied Digital Services**

re-engineering driving containerization including comprehensive cloud engineering support.

For ever-growing challenges in cybersecurity and compliance, we provide, best practices, implementations and awareness in end user security, zero trust and cloud security, AI based SIEM, SOAR including operational technologies.

Our ADiTaaS powered certified platform enhances ITSM and DSM experience via dynamic dashboards driving trend analytics coupled by RPA and Chatbots. As Master Systems Integrator, our pioneering work in smart cities continues to be path breaking.

### **Business Value**

- Modernized services which are value for money, highly scalable and require zero upfront capital expenditure
- Immediate 30-40% savings in monthly operational expense
- Effective digital transformation, from infrastructure to re-architecting applications
- Blend of global skillsets, leading edge toolkits, global standards compliant service delivery and smart technology platforms,

help successfully transform client's business.

### **About Allied Digital Services Limited**

With over three decades of proven experience Allied Digital responsibly delivers cutting-edge IT services and solutions to a wide range of industries spanning 70 countries (with subsidiaries in US, Canada, UK, EU Countries, Middle East, Japan, China, Brazil, Australia, Singapore). As a trusted partner having sound financials, invested in widest range of service capabilities and state-of-the-art global command centres, Allied Digital helps clients transform and succeed in challenging environments by supporting them to make better IT decisions. In our current version 6.0 - Disruption driven, we are focusing on emerging technologies and incubating start-ups.

We are India's leading Master Systems Integrator and Digital Transformation Architect. We have established a holistic CoE for driving next generation smart governance in service delivery. The story of Allied Digital can be well summarized as "Agile, Responsible and Competent" IT services organization.

"Three decades of experience coupled with world-class expertise in services management has made Allied Digital the partner of choice for CIOs in the Managed IT Services Category."

LARGE ENTERPRISE

**PRATAP PAT JOSHI**  
CIO  
MERCEDES-BENZ INDIA

**APURVA AGRAWAL**  
VP  
VODAFONE IDEA

**Pratap Pat Joshi**, CIO, Mercedes-Benz India, presents the CIO Choice recognition to **Apurva Agrawal**, VP, Vi Business India, at the CIO CHOICE 2021 Red Carpet Night – All Online.

Vi Business Managed Mobility Services is a one-of-a-kind solution for enterprise customers to manage their end-to-end mobility operations. This innovative solution is designed to improve the productivity of the enterprise workforce and reduce the total cost of ownership.

It includes an entire gamut of services to address any enterprise's unique needs, from Device Selection & Procurement, Staging & Kitting, Secure Network Connectivity, Mobile Device Management & Life Cycle Management & Support. This comprises device pick-up & drop at doorstep, giving loaner devices to replace devices gone for repair and providing insurance & extended warranty for the devices purchased. These are available for mobile phones & tablets on a fully-assisted managed service model.

The CIO Choice 2021 recognition for Managed Mobility Services is a validation of our commitment towards solving critical Business Operations problems for our Enterprise customers. In our journey from a telco to a tech-co, we are constantly expanding our services to become one-stop-shop for end-to-end solutions managing business services for our clients in an ever evolving digital landscape.

**Apurva Agarwal, VP-Enterprise Revenue Growth & Commercials, Vi Business**

### **What makes Vi Business Solution unique?**

Vi Business Managed Mobility Services come with Vodafone Idea Secure Device Manager (ViSDM) using which enterprises can secure their corporate data, e-mails & apps while ensuring compliance to corporate policies across devices and applications irrespective of whether they are company-owned or employee-owned.

The key highlight of the offering is the pan India support that we offer with fast Turn Around Times for pick- up drops, loaners, insurance claims and repairs. It brings down the Total Cost of Ownership of organizations and offers a fixed price model. Single Touch point for incident management allows hassle free operations and ensures business continuity. In addition to this, our customers get complete visibility of their device inventory, status and usage on our dedicated Managed Mobility Portal. Vi Business's Managed Mobility services thus offers one stop shop to meet all mobility requirement of organizations, thereby enabling them to focus on their core business.

“Vi's win in the Managed Mobility Services is proof that tech leaders prefer end-to-end, feature-rich solutions at a time when mobility becomes a key priority for enterprises.”

# Managed Network services

LARGE ENTERPRISE

**SHIV KUMAR BHASIN**  
CTO & COO  
NATIONAL STOCK EXCHANGE

**SANJEEV ANAND**  
TEAM NTT

**Shiv Kumar Bhasin**, CTO & COO, NSE, presents the CIO Choice Recognition to **Sanjeev Anand**, Senior Director- Solution Sales, NTT, at CIO CHOICE 2021 Red Carpet Night – ALL ONLINE.

NTT Ltd. is a purpose-led, performance-driven global technology services provider that enables enterprises to benefit from a full-stack integrated ICT service offerings. With an overall global revenue of around 11 bn and delivering services around 200 countries and regions, India has been identified as the fastest growing market by NTT.

With the coming together of our three key business entities viz. **NTT India Pvt. Ltd**, **NTT Communications India** and **Netmagic** as a single NTT organization and our portfolio spanning data-center, hybrid cloud, system integration, network, security and collaboration, we have created

a leading technology service provider in the company that can address the digital transformation of our clients.

Through this integrated organization, we bring together the best capabilities, technology, infrastructure and services to fast-track our client's digital agenda and help them –

- Accelerate innovation with Datacenter services
- Drive business agility with Network services
- Optimize applications and infrastructure with Cloud services
- Secure by design with Managed Services including Cybersecurity

NTT India receiving the CIO Choice demonstrates the great trust reposed by the CIO community in our Managed Network Services. This recognition has always held a special place as it comes directly from our valued customers. This has been an extraordinary year, and it gives me great pride to receive this honor as the representative of my entire team today.

**Shekhar Sharma, Head of NTT CI and ICTI Delivery, NTT Ltd. in India**

Working with organizations around the world and in India, NTT achieves business outcomes through intelligent technology solutions that are data driven, connected, digital and secure. We believe in a connected future that's secure by design to help organizations minimize risk while they innovate and grow. NTT's clients gain better insight to make the right decisions at the right time and achieve their business modernization and transformation goals.

#### **What makes us different**

**Operational** – We handle the day-to-day management of their technology, spanning WAN, wired and wireless LAN, data centre, and security devices.

**We're highly skilled** – We hold over 30,000 certifications in 36 technologies. We also have 12,000 talented technicians in the field, and 8,500 networking certifications across multiple vendor technologies.

**We've invested** – We've developed a state-of-the art network management

platform that monitors your network performance remotely and automatically 24 hours a day, tracking performance trends, highlighting potential issues, and taking pre-emptive action before incidents occur.

#### **What makes us a CIO's choice:**

Our platform based managed network services help CIOs to bring disparate applications and infrastructures together, increase operational efficiency, drive business productivity and enhance user experience while reducing overall TCO. Real-time executive dashboards, integrated views and network and security analytics across the disparate infrastructure and platforms hosted and managed by NTT ensure that all levels at the client and NTT work from the same source of information. Security continues to remain one of our key focus areas. Our Secure by Design solutions and Secure Remote Delivery approach helps CIO balance data accessibility with security controls whilst improving overall IT infrastructure services governance & operational efficiency.

"The CIO Choice 2021 recognition in Managed Network Services reiterates NTT's capabilities in helping enterprises drive better user experiences and productivity in today's cost-sensitive environments."

It is an honor for us to be recognized for our Managed Security Services in CIO Choice 2021. It is a testament to our matured capabilities delivered in a customer-focused approach. We are grateful to the CIO Community as the product holds us in good stead as a service provider of choice for cyber security protection. Our entire team takes pride in the knowledge that over a decade of experience in cyber security has led to our fourth consecutive win in this category.

**Sanjeev Anand, Head of Managed Infrastructure & Cybersecurity Services, NTT Ltd. in India**

Working with organizations around the world and in India, NTT achieves business outcomes through intelligent technology solutions that are data driven, connected, digital and secure. We believe in a connected future that's secure by design to help organizations minimize risk while they innovate and grow. NTT's clients gain better insight to make the right decisions at the right time and achieve their business modernization and transformation goals.

NTT has a comprehensive managed security services approach to counter threat vectors. The company takes into account all the four pillars of the security architecture – network, application, endpoint and data – to offer 360-degree coverage. This model is built to address next generation threats that silos of security products fail to provide and secures assets, users and data from lone rangers, hacktivists, cybercrime syndicates and nation sponsored cybercriminals. NTT's managed security services are enabled through their 24X7 SOC team staffed with certified and skilled resources to analyse and respond to security events. They also

help customers protect their existing security investments by enabling support through the right mix of onsite and remote SOC teams. Their portfolio of services include:

- 24X7 Security monitoring, response and Analytics
- Managed Web Application Firewall
- Managed DDOS mitigation
- Web and Email threat prevention
- Anti-phishing & Antimalware protection
- Managed Intrusion prevention
- Shadow IT Exposure monitoring
- Managed Darknet and Deepweb monitoring
- Endpoint threat detection and response
- Privilege ID management
- Threat intelligence service
- Compromise assessments, Red team solutions
- Vulnerability assessments, vulnerability management and penetration tests
- Quantified cybersecurity posture assessment

“With this repeated recognition in Managed Security Services, NTT has once again proven that tech leaders trust the brand for something as critical as managed security.”

# Multi Cloud management platform

LARGE ENTERPRISE

**NUTANIX**  
YOUR ENTERPRISE CLOUD

**AKSHAY DHANAK**  
CIO  
MAGMA FINCORP

**ANANTHARAMAN BALAKRISHNAN**  
VP & MD - INDIA SALES  
NUTANIX

**Akshay Dhanak**, CIO, Magma Fincorp, presents the CIO Choice Recognition to **Anantharaman Balakrishnan**, VP & MD, Nutanix India, at CIO CHOICE 2021 Red Carpet Night – ALL ONLINE.

## About Nutanix:

Nutanix is a global leader in cloud software and a pioneer in hyperconverged infrastructure solutions, making computing invisible anywhere. Companies around the world use Nutanix software to leverage a single platform to manage any app at any location at any scale for their private, hybrid and multi-cloud environments. Learn more at [www.nutanix.com](http://www.nutanix.com) or follow us on Twitter @nutanix.

Thank you CIOs for the recognition on Multi Cloud Management. Nutanix Platform helps organizations to seamlessly migrate on-premise environments onto a public Cloud, thereby reducing significant pain around Cloud migration. This truly makes it easy for customers to take a journey to the cloud and reduce the cycle to market, and therefore benefit the entire organization in the long run.

**Anantharaman Balakrishnan (Bala), VP & MD, Nutanix India**

IT is increasingly asked to deliver additional capabilities that enable their organizations to innovate in new and faster ways. The public cloud is often looked at to augment existing on-premise environments, but this creates new challenges, like managing complex networking, re-architecting applications, and using multiple infrastructure tools for various clouds.

**Manage Private and Public Clouds as one in order to stay ahead of the competition :**

Nutanix solves these problems with a single software platform that can span private and public clouds, making hybrid and multicloud deployments. Nutanix hybrid cloud solutions unify management across clouds, while enabling seamless mobility of applications and data between disparate environments. Deliver each application from the right cloud, but without added complexity.

**Nutanix advantage:**

Seamless app mobility without having to re-tool or re-work. Avoid vendor and cloud lock-in with portable software that can move with your applications and data across clouds. Get a consistent consumption model spanning private and public IT environments, so you can confidently plan your long-term hybrid and multicloud strategy, maximizing the benefits of each environment.

“The innovative cloud management offerings from Nutanix have been helping enterprises leverage cloud in the most efficient ways and this win reinforces their position in the market.”

**MANISH TIWARI**  
CISO  
BHARTI AIRTEL

**Rajesh Uppal**, Sr ED (HR & IT), Maruti Suzuki India, presenting the CIO Choice Recognition to **Manish Tiwari**, CISO, Bharti Airtel, at CIO Choice 2021 Red Carpet Night – All Online.

Businesses need cybersecurity network solutions that can keep sophisticated threats at bay across complex network configurations. And the most vulnerable part of this system lies hidden on hard network infrastructure in the form of internet connected routers.

This is where Airtel Secure offers a holistic solution. Airtel Secure Internet is a fully managed, cost-effective solution that lets you manage and gain control over your internet access. This is instrumental in preventing any unauthorized access to your corporate network. This convergent solution

includes enterprise-grade internet integrated with next-generation firewalls that ensure everything from intrusion detection, content filtering to malware and virus protection. Our solution provides significant cost savings in both capital expenditures and management & monitoring costs by providing a flexible subscription-based pricing model. This also allows you to reduce downtime and complexity of the network significantly without compromising on security policy design, implementation, or the management of systems.

This recognition for Airtel's efforts in network security is an endorsement of our security solutions for SME-SMBs & Enterprise customers. Airtel, with its experience in serving businesses with integrated connectivity solutions, has formed a strong partner ecosystem in partnership with global leaders with an aim to provide complete security solutions to protect customers from cyber threats.

**Ganesh Lakshminarayanan, CEO, Enterprise Business, Airtel Business**

### Key features:

**End-to-end managed services** – Includes onsite installation, onsite support, commissioning, maintenance, change management and proactive monitoring for device health check-up

**Flexible deployment models** – Allows flexibility to deploy a stand-alone firewall hardware or an integrated solution that bundles enterprise grade internet with the firewall that is pre-configured as per the bandwidth and appliance size

**Strong encryption** - IPSec and SSL VPN, network segmentation and load balancing are included

**Deep packet inspection** - Built on Reassembly-Free DPI (RFDPI) engine that makes it compatible with packet, crypto, and network processing  
Complete security - All-in-one capabilities with firewall, including anti-spam, anti-virus, intrusion prevention and content filtering for complete protection. We provide round the clock, 24/7/365 active management and monitoring of the firewalls and internet connectivity by our Airtel Secure Intelligence Center– a highly

secure, fully-redundant, state-of-art security operation center (SOC) which is integrated with our Network Operations Center for complete security

### Why Airtel?

- **Robust Infrastructure:** Airtel Secure Intelligence center (SOC) and Airtel network operations center (NOC) in India is one of the largest in the Asia-Pacific region and offer enterprises a singular contact point for deployment, support, operations, and maintenance
- **World-class Expertise:** Our SOC-NOC is run by over 50 highly qualified cyber security experts and analysts working 24\*7\*365
- **Telco Experience:** Airtel has the third largest number of Telco assets with zero threat tolerance. We carry this experience into our operational DNA with a highly regulated environment and stringent compliance policies
- **Strategic Partnerships:** Our partnerships with global security OEMs empower us to create effective B2B solutions for customers across all verticals

“With this win in Network Security, Airtel has been chosen as a preferred brand for enterprises in securing their networks in today’s highly dynamic threat landscape.”

COUNTRY MARKETING LEAD - INFRASTRUCTURE SOLUTIONS GROUP  
DELL TECHNOLOGIES

**Venkatesh Natarajan**, CDO, Ashok Leyland, presents the CIO Choice recognition to **Srikrishna Venkatraman**, Country Marketing Lead, Dell India, at CIO CHOICE 2021 Red Carpet Night – ALL ONLINE.

## **Workstation: Dell Precision 3930 Rack**

The world's most powerful 1U rack workstation. Precision 3930 Rack

### **Compact Industrial Design**

A short-depth and narrow design delivers better rack density and a smaller footprint ideal for space-constrained workspaces. Extended operating temperatures and a compact form-factor facilitates a seamless integration into complex OEM medical imaging and industrial automation solutions.

### **Room to Grow**

Up to 24TB of storage delivers high performance for complex projects. Expandability with up to 3 PCIe slots with an option to add PCI legacy cards allows you to scale with your business needs.

We are honoured and delighted to receive this recognition from the CIO community in India. Dell Technologies continues to represent the trusted standard in creating strategic business value for CIOs through the innovative use of technologies. Our breadth and depth of technology expertise in India is clearly reflected in how our customers and ecosystem partners value us and the CIO Choice recognition is a validation that our long-term customer-centric strategy is working.

**Alok Ohrie, President & Managing Director, Dell Technologies India**

### **Professional Power**

Impressive affordability and workstation-class performance with 8th Gen Intel® Core™ and Xeon® processors, 64GB memory, and up to one double-width 250W of NVIDIA Quadro® or Radeon™ Pro professional graphics support. In addition, Dell Precision Optimizer Premium is the only AI-based performance optimiser software in the industry to automatically tune your workstation to run popular ISV applications at the fastest speeds possible.

### **Remote Peace of Mind**

Experience versatile, secure and fast remote 1:1 user access with optional Teradici PCoIP technology with support for dual and quad display zero clients.

### **Secure**

Only Dell provides innovative data security solutions that meet security challenges and business concerns head-on to protect your most critical and at risk asset, your data. Dell Endpoint Security Suite, powered by Cylance, stops up to 99% of malware.

### **Manageable**

Commercial PCs featuring the free Dell Client Command Suite toolkit for flexible

and automated BIOS and system configurations.

### **Reliable**

Precision Workstations are Independent Software Vendor (ISV) certified to ensure the high-performance applications you rely on every day run smoothly.

### **Workstation : Dell Precision 5530 2-in-1**

The world's smallest 15" 2-in-1 mobile workstation. An impossibly thin 16mm form features a next-gen Infinity Edge display with a 4K Ultra HD resolution. A flexible 360-degree hinge enables multiple modes of interaction.

### **Powerful Performance**

Deliver the power with 8th Gen Intel® Core™ processors and professional Radeon™ Pro WX Vega M GL graphics.

### **Premium Materials**

Ultra-thin GORE™ Thermal Insulation provides thermal conductivity levels lower than air. Dell Premium Pen delivers precise pressure sensitivity (4096 levels), tilt functionality and low latency. New MagLev Keyboard design reduces the thickness of your keyboard.

"This recognition in Performance Workstation comes as a validation of Dell's consistent endeavour to provide versatile, secure and seamless experience to end-users."

# SD-WAN Platform

SMALL & MEDIUM ENTERPRISE

**SANJAY PRASAD**  
CIO  
RP-SG CESC POWER GROUP

**VISHAL KHARE**  
CO-FOUNDER, EVP & GM SALES  
LAVELLE NETWORKS

**Sanjay Prasad**, CIO, RP-SG CESC Power Group, presents the CIO Choice recognition to **Vishal Khare**, Co-Founder, EVP & GM Sales, Lavelle Networks, at CIO CHOICE 2021 Red Carpet – All Online.

Lavelle Networks offers an SDN networking platform- ScaleAOn that solves the biggest challenges in the WAN for distributed enterprises. The company strives to deliver the best enterprise network experience for every user, on every device, for any application, on any cloud.

Lavelle believes that by doing this they will enable every customer to take their business to every location on the planet they wish to, by ensuring their networks are always accelerated, secured and simplified.

CIO Choice is one of the most coveted recognition platform for ICT industry vendors and is a validation by our customers that we are their preferred choice of SD-WAN. This verdict does mean great deal to us and it also helps other CIOs to build the confidence in our technology. We would like to thank all our customers for voting for us and CORE Media for creating this platform.

**Vishal Khare, Co-Founder, EVP & GM Sales, Lavelle Networks**

### **Solving SD-WAN challenges:**

The biggest challenge concerning CIOs and the enterprise IT infrastructure they manage today, is being able to deliver fast, safe, ubiquitous access networks so users, enabling them to have the same great productive experience everywhere when they use applications in the data center.

As a quick takeaway, here are the highlights of our ScaleAOn SD-WAN solution :

- 10x Improvement in critical application load time at branches
- 15x improvement in branch policy change management
- 60% cost saving in branch and data centers
- Zero policy discrepancies across the network
- The easiest SDWAN Control Panel

Top Global Enterprise Brands in retail, ecommerce, insurance, financial institutions, government networks, law and order, manufacturing and healthcare, are using Lavelle Networks ScaleAOn SD- WAN Platform for upgrading their infrastructure to next generation WAN and Hybrid WAN Solutions.

“This recognition is a validation of Lavelle Networks’ product innovation and its focus to deliver superior enterprise network experience to customers.”

# Secure Remote Workspace Access

LARGE ENTERPRISE

citrix™

**EKHLAQUE BARI**  
EVP, CTO & HEAD OF ANALYTICS  
FULLERTON INDIA

**RAVINDRA KELKAR**  
AVP  
CITRIX

**Ekhlaque Bari**, EVP and CTO & Head of Analytics, Fullerton India, presents the CIO Choice recognition to **Ravindra Kelkar**, Area Vice President & Country Manager, Citrix India, at CIO CHOICE 2021 Red Carpet – All Online.

Citrix Secure Workspace Access offers a comprehensive, zero trust approach that delivers secure and contextual access to all applications and provides an enhanced user experience while maintaining security control. It provides security controls to protect users and corporate information even when accessed from bring your own (BYO) and unmanaged devices.

Citrix Systems builds the secure, unified digital workspace technology that helps organizations unlock human potential and deliver a consistent workspace experience wherever work needs to get done. With Citrix, users get a seamless work experience, and IT has a unified platform to secure, manage, and monitor diverse technologies in complex cloud environments.

The best vote is a vote given by our clients. Thank you so much for this recognition. As we embrace the New Normal, the concept of workspace and security is changing completely. Citrix is very proud of the work that we have done and we will move forward with customers on securing today's digital workspaces.

**Ravindra Kelkar, Area Vice President & Country Manager,  
Citrix Systems India**

With a large part of the workforce working remotely due to the pandemic, it is valuable for businesses to have a strategy for allowing remote access to its users. As the workforce becomes more distributed, and as more business applications are delivered from the cloud, many traditional security architectures are proving to be inadequate. Remote employees need fast, easy access to apps and data so they can be productive and engaged. While some of these apps are sanctioned from IT, many are potentially unsanctioned apps that could store corporate data.

Enabling work-from-anywhere Citrix secure access solutions are designed to provide the best of both worlds: An unmatched work-from-anywhere application experience and advanced contextual and cloud-delivered security. Citrix Secure Workspace Access and Citrix Secure Internet Access provide the fully integrated,

automated solutions businesses need to keep applications secure and employees productive irrespective of their location.

Citrix Gateway too is a customer-managed solution that can be deployed either on-premises or on any public cloud. It comes in both hardware and virtual form-factors that can run on any hypervisor environment. Citrix Gateway provides users with secure access and single sign-on to all the virtual, SaaS and web applications they need to be productive. It also provides a complete SSL VPN solution for access to network resources.

"Citrix has once again proven to be the brand of choice in securing today's dynamic, digital and remote workspaces in an unmatched way."

# SIP Trunk

LARGE ENTERPRISE

**ANUBHAV RAJPUT**  
CIO, HEAD DIGITAL & OPS  
CHOLAMANDALAM MS GENERAL INSURANCE

**MITESH BHARWADA**  
VP  
VODAFONE IDEA

**Anubhav Rajput**, CIO and Head Digital & Operations, Cholamandalam MS General Insurance Company, presents the CIO Choice recognition to **Mitesh Bharwada**, VP, Vi Business, at CIO CHOICE 2021 Red Carpet Night – All Online.

Vi Business offers SIP Trunk Services to its Enterprise customers who require a flexible, scalable and secured voice communication service. The platform is geo-redundant at the core with the SBC's & hardware deployed in high availability mode making the network fail free. For achieving enterprises' BCP, multiple redundancy options are available from CPE to Last mile to call routing in case of an emergency.

We thank the CIO Community for showing faith in us for recognizing us as a preferred partner for SIP Trunk for the second consecutive year. Our SIP Trunk solution allows enterprises to collaborate with customers by consolidating their voice infrastructure, to work in an efficient and cost effective manner. We have constantly striven to keep pace with the evolving digital needs of enterprise customers to be a partner in their digital transformation journey, and this recognition is a true proof of our efforts.

**Mitesh Bharwada, VP - Business Comms & Cloud Store,  
Vi Business**

Session Border Controllers are deployed at multiple locations pan India for traffic distribution and also to keep the network secure from fraudulent calls and DDoS attacks. Vi USP 1 – With Managed SIP variant, enterprises can get proactive monitoring, real time reports and usage analytics on a “self care portal”. Vi USP 2 – businesses can have multiple pilot numbers on a single trunk. Vi USP 3 - there is no max limit to the no of sessions that each trunk can contain. Multiple Codecs and Encryption types are supported basis customer requirements.

Vi Business SIP trunks are also available as PSTN callout option integrated with Microsoft Teams so that customers can make calls using the Teams soft client.

### **Why choose ViTM SIP Trunking?**

- Flexibility to upscale voice infrastructure depending on call volumes
- Keep your confidential voice communications secure
- Reduce investments in hardware and AMCs
- Avoid cumbersome hardware upgradation processes
- Faster turnaround for business-critical operations
- Option to choose a fully-managed service model

Vi Business is actively engaged with public sector enterprises and state governments and are strongly contributing to the vision of Skill India, Digital India and Smart Cities.

“With security and scalability at the core, Vi’s SIP Trunk solutions have been recognised by CIOs as their preferred choice for today’s distributed work environments.”

**KETAN KOTHARI**

MD  
SIGMA-BYTE

**Sanjay Prasad**, CIO, RP-SG CESC Power Group, presents the CIO Choice recognition to **Ketan Kothari**, MD, Sigma-Byte, at CIO CHOICE 2021 Red Carpet Night – All Online.

Sigma-Byte Computers is a 29 year old company providing structured cabling solutions. It is the country's one of the largest network cabling integrator. Over the years, the company diversified deeper by catering and installing ICT infrastructure and IP- based ICT, ELV, and network Systems Integration.

Sigma-Byte is also one of the premier Networking Integrators in Data Centers providing enterprise class solutions added with managed services. The company designs and builds cabling infrastructure for Hyper Scale Data Centre customers.

The company is recognized for its well-defined processes for design, implementation, testing and documentation, as per BICSI/ ISO / IEEE guidelines and many more other relevant standards as applicable.

Winning CIO Choice recognition for the third year in a row is a big achievement for us. The last year has been tough year for everyone. Continued support from the CIO community helped us continue our business unhindered. Thanks to all the CIOs who voted for us in Structured Cabling category.

**Ketan Kothari, MD, Sigma-Byte**

### **Sigma-Byte: Unique Strengths**

Sigma-byte attributes its entire success to the belief that one can never compromise on the quality of service one can provide. The intent of each employee is to continuously be better at what they do. The customer satisfaction and the customer experience are at the heart of the company's belief system, because of :

- Long list of recurrent customers
- Recognized by customers, OEMs and industry alike
- Serving end-to-end integrated solutions and services

Sigma-Byte continues to thrive for growth and success and with almost 450 plus people on board, along with a team of 200 on a fulltime contract basis. With the strength of these skillful manpower trained on high quality tools and equipment, the company is in a position to design and build any kind of ICT infrastructure meeting Global standards.

"Sigma-Byte has emerged as one of the most preferred names in Structured Cabling with its consecutive win and its consistent focus to deliver better customer experience."

# System Integrator

LARGE ENTERPRISE

**VENKATESH NATARAJAN**  
CDO  
ASHOK LEYLAND

**RAGHUVEER HR**  
TEAM NTT

**Venkatesh Natarajan**, CDO, Ashok Leyland, presents the CIO Choice Recognition to **Raghuveer HR**, Senior Director - Sales, NTT, at CIO CHOICE 2021 Red Carpet Night – ALL ONLINE.

NTT Ltd. is a purpose-led, performance-driven global technology services provider that enables enterprises to benefit from a full-stack integrated ICT service offerings. With an overall global revenue of around 11 bn and delivering services around 200 countries and regions, India has been identified as the fastest growing market by NTT.

With the coming together of our three key business entities viz. **NTT India Pvt. Ltd**, **NTT Communications India** and **Netmagic** as a single NTT organization and our portfolio spanning data-center, hybrid cloud, system integration, network, security and collaboration, we have created

a leading technology service provider in the company that can address the digital transformation of our clients.

Through this integrated organization, we bring together the best capabilities, technology, infrastructure and services to fast-track our client's digital agenda and help them –

- Accelerate innovation with Datacenter services
- Drive business agility with Network services
- Optimize applications and infrastructure with Cloud services
- Secure by design with Managed Services including Cybersecurity

This is a matter of great pride to see our ground-breaking work as System Integrator being recognized by CIO Choice for the fourth year in a row. The acknowledgment underscores the value of the work put in by us to help clients smoothly overcome the technological challenges they face. It also gives me great motivation and makes me optimistically look forward to the new year as a range of opportunity.

**Rahul Ambegaoker, Senior Director and Head, SI, NTT Ltd. in India**

Working with organizations around the world and in India, NTT achieves business outcomes through intelligent technology solutions that are data driven, connected, digital and secure. We believe in a connected future that's secure by design to help organizations minimize risk while they innovate and grow. NTT's clients gain better insight to make the right decisions at the right time and achieve their business modernization and transformation goals.

### **What makes us unique?**

We offer a comprehensive portfolio of rich solutions and services with the combined strengths of 31 organizations that have come together under the NTT brand along with a technology partner ecosystem that is unparalleled.

- one-stop-shop for clients, can augment with public cloud services, data center hosting services, other managed services and NTT's security portfolio
- Offer clients not just compute, but also storage & network services that address

issues of scalability through intelligent solutions

- A thoughtfully designed GTM of Intelligent solutions covering – Intelligent Business, Intelligent Workplace, Intelligent Cybersecurity and Intelligent Infrastructure, all wrapped in a layer of Intelligent Innovation ensure that we offer clients a business first approach
- Bespoke strategy roadmaps for organizations holistically looking at enabling new revenue models, exceptional client engagement and superior operational excellence

With our increased focus on innovation, where the NTT Group has planned an annual average investment of USD 3.6 bn in R&D for the next 5 years, we will be better equipped to help clients stay ahead of the curve. Innovation has always been at the heart of our value proposition and now we will be able to create newer opportunities for our clients to derive the benefits of our global market intelligence and R&D initiatives

"At a time when enterprises turn to their technology providers with increasing expectations, this win in System Integration endorses NTT's effort to provide the most relevant solutions and services to enterprise customers."

# Telecom Carrier (Mobile Access)

LARGE ENTERPRISE

**AKSHAY DHANAK**  
CIO  
MAGMA FINCORP

**TANAZ MAKUJINA**  
GM  
VODAFONE IDEA

**Akshay Dhanak**, CIO, Magma Fincorp, presents the CIO Choice Recognition to **Tanaz Makujina**, GM, Vi Business, at CIO CHOICE 2021 Red Carpet Night – All Online.

Vi Business Services is committed to being the most trusted and valued partner helping businesses succeed in a digital world. From market-leading enterprise mobility, robust connectivity and world-class IoT solutions, to superior business communication and cloud and insightful business analytics and enabling solutions, we bring the newest technologies to serve businesses in the digital era.

We are elated to have been recognized for Telecom Carrier (Mobile Access) in CIO Choice 2021, and thank the CIO community for continuing to show faith in us in this category. This is the 7th consecutive year that we have received this recognition. Throughout these tough times, Vi has ensured that we enable our customers to balance the needs of both employees and corporates

**Tanaz Makujina, GM - Mobility & Allied Services, Vi Business**

Below are a few unique data capabilities Vodafone launched for enterprise mobility customers.

#### **Postpaid Integrate for Enterprise IOIP**

POSTPAID INTEGRATE is a capability where the Enterprise IOIP subscriber can create a group and add upto 8 additional connections to his billing account and avail extra savings on the bill and also gets the additional data which can be shared among all group members.

#### **Data Pooling Plans for Enterprise COCP**

With new data pooling plans COCP employees can combine their data quotas and use it to balance out over and under usage across the enterprise.

#### **Premium Plans**

REDX is a limited edition Postpaid Experience which brings in unique & premium experience to the elite customers. REDX comes with Unlimited Voice & Unlimited Data and faster data speeds.

#### **Mobile Call Recording Solution**

Mobile Call Recording is a mobility SIM-based solution which assures 100%

recording of voice calls for enterprises.

#### **Secure Data Connectivity Portfolio**

As an industry first, we offers IP & URL whitelisting on Private APN which helps enterprises with a secure connectivity. The solution ensures that only approved web addresses that are relevant to the customer's business are made accessible while all other addresses were blocked.

#### **SuperNet 4G & VOLTE For business**

The world's largest 4G network that delivers high-speed mobile internet to enterprises across India for a seamless & effortless communication experience.

#### **Optima Corporate Plus For Enterprises**

With deployment of GST, the benefit of input credit can be claimed by companies on their mobile bills, provided they are company-owned and company-paid (COCP) connections. COCP connections should cover the communication needs for business operations and continuity, but not of the customer's personal usage too. However, the end user should have the flexibility to use the phone for personal use and pay for it. Hence, the need Optima Corporate Plus.

"This consecutive recognition in Telecom Carrier (Mobile Access) is testimony of Vi's leadership and continued innovation in the enterprise mobility solutions space."

# Unified Communications & Collaboration

LARGE ENTERPRISE

**Ekhlague Bari**, EVP - CTO & Head of Analytics, Fullerton India, presenting the CIO Choice Recognition to **Alok Shukla**, Head of Data Products & Business Solutions Group, Airtel Business at CIO Choice 2021 Red Carpet Night – All Online.

Airtel Business is India's leading and most trusted provider of ICT services with global network across USA, Europe, Africa, Middle East, Asia-Pacific, India and SAARC regions. We serve over 1200 global enterprises, 2000 large and 1 Million medium/small businesses across India. Airtel Business offers a diverse portfolio of products and services such as Data Connectivity, Voice & Messaging, Collaboration, Cloud, Data Center, Security, IoT, Enterprise Mobility, Network Integration & Professional services to Enterprises, Government, Carriers, Small

& Medium Businesses, OTTS, and Mobile Network Operators across the globe.

With the very idea of workplaces changing so rapidly, the need for video conferencing tools has increased manifold. Smart conferencing, virtual meetings, and holistically reformed digital interactions are now the norm.

However, cybersecurity remained a key necessity for enterprises and secure video conferencing played a critical role in their transition to the new normal.

This recognition is an endorsement of our efforts to understand industry needs and provide next generation solutions for SMEs & Enterprise customers across India. Given the disruption caused by COVID-19 related lockdowns, we understand maintaining business continuity becomes a huge concern. We are leveraging the power of our integrated product portfolio to enable businesses to operate seamlessly from anywhere through secure communication and collaboration.

**Ganesh Lakshminarayanan, CEO, Enterprise Business, Airtel Business**

Airtel Bluejeans conferencing solution offers an integrated and secure cloud-based conferencing platform for audio, video and web conferencing, and webinar and digital events across mobile devices, desktops, telephones and room systems. With this, businesses can now leverage the next generation conferencing solution to foster effective collaboration amongst their employees and teams globally.

### **Key Features of Airtel Conferencing solution**

Keeping in mind the rapidly-evolving connectivity and video conferencing needs of enterprises, Airtel BlueJeans offers a secure, simple and seamless experience to users. The solutions has unique attributes –

#### **SECURE**

- **Encrypted Meetings:** All video, audio, and content in transit are encrypted to deliver improved security and faster performance
- **Restricted Meetings with Two-step Authentication:** This ensures that only invited participants can join a meeting by leveraging a unique one-time passcode that can be authenticated via email confirmation or by logging into a dedicated Airtel BlueJeans account
- **Data Localization:** Hosted in India for a better video conferencing experience
- **Screen Share Controls:** Administrators can

control who has access to screen share at enterprise, individual, and per-meeting levels

#### **SIMPLE**

- **One-touch Activity:** Users can schedule, join and host meetings with one touch and within just six seconds from anywhere, on any device or room system
- **Telco-Grade:** 24X7 local support from Airtel
- **Easy Content Sharing:** Facilitate an interactive meeting by sharing any type of content and using annotation to illuminate key details. Use the digital white board for brainstorming sessions

#### **SEAMLESS**

- **Dolby Voice® + HD Video:** Award-winning multimedia experience ensures amazing audio and visual clarity. Experience the difference by clicking [here](#)
- **Integrated Workflows:** This feature helps users launch or join video meetings directly from their favorite applications. Airtel BlueJeans works seamlessly with Microsoft Teams, Workplace by Facebook, Office 365, Google Calendar, Slack, Splunk, Trello and many more applications
- **Large-scale Event Support:** Host and manage live interactive events, town halls and webcasts for up to 50,000 attendees
- **Smart Meetings:** This feature captures the most important discussion points, assigning action items, and catching-up quickly with time-saving highlight reels

“With this win in Unified Communications & Collaboration, Airtel Business has once again amplified its position as a trusted partner that addresses the evolving workplace needs of current-day enterprises.”

**Anoop Mathur**, Founder & President, CORE Media
