FOUNDER'S NOTE

Dear CIOs & Digital Business Leaders,

2023 has been the year of monumental change for the ICT ecosystem, wherein we saw the lines between technology and business getting blurred.

It is now evident that Technology not only fuels business continuity and sustainability but even growth and profitability. CIOs, who were already on the journey of transitioning into being strategic leaders, are presented with the opportunity of a lifetime.

CIOs today are steering their enterprises toward a future that is dominated by digital platforms, data-driven businesses, automation technologies, and new ways of working.

While driving such transformational changes of significant magnitude, they are also tasked with the challenge of 'doing more with less'.

How do CIOs keep the innovation ball rolling, how do they ensure successful digital transformation programs with minimal resources, and be the technology evangelists with an outside-in perspective?

Well this requires the right set of partners and the 11th edition of CIO Choice comes at this crucial time when technology partners are working hand in hand with technology leaders to help achieve these goals.

As India's largest voting platform for ICT leaders, CIO Choice winning brands this year are recognized for their extraordinary efforts and partnership to ensure that CIOs were able to deliver on the changing business goals. The resilience, flexibility, and accountability of these brands were put to test like never before. And those who walked away with this coveted recognition can very well pride themselves on their commitment to customer experience and satisfaction.

CIO Choice – The Gold Seal of Trust is bestowed by the country's top CIOs on the ICT brands that are a notch above the rest. The winning brands therefore represent a new benchmark in excellence. These are the brands that went beyond what was signed on the dotted lines; recalibrated and realigned their offerings, pricing models, SLAs, and service deliveries; and reskilled and adapted to the disruptive tech landscape.

CIO Choice, this year, is hence a celebration of those brands – of people – who stood shoulder to shoulder with the CIOs in their endeavour to navigate the challenging environment and thrive out of it.

In our effort to redefine and raise the bar in excellence, we are truly humbled and overwhelmed by the close alliance and companionship demonstrated by the ICT community.

We hope to see the community evolving together and becoming the true strategic stakeholders who define the future of enterprise technology.

Regards,
Anoop Mathur
Founder, CORE Media

INTRODUCTION

What is CIO Choice?

CIO Choice is a powerful B2B platform for organisations in the Information and Communications Technology space that provides marketers the opportunity to prominently create a positive brand positioning for their products, services and/or solutions.

CIO Choice is not an award, but a Gold Seal of Trust and Recognition for ICT brands. It is an industry hallmark of excellence for over 11 years in India.

Voice of the Customer

CIO Choice is the largest online voting platform, where CIOs vote for their preferred and trusted ICT brands that they rely on the most. It is the Voice of Customer - the CIO Verdict. CIO Choice is a recognition for an organisation's products, services, and/or solutions and it represents the confidence earned from their customers - the CIOs.

Selection and Voting

Stage 3 Process

ICT brands (Large and small medium enterprises) participate by submitting their nominations in relevant categories. There is a distinguished CIO Advisory Panel, comprising industry leaders and CIOs from across different verticals, that oversees the entire process. ICT brands then participate in an independent online pan-India voting survey. CIO responses are collated regarding their preferred products, solutions and/or services by categories, ensuring a certain level of satisfaction with product, solution and services.

CIOs vote for products and/or services that have earned their confidence in each category. The company that wins the maximum votes in each category is bestowed with the CIO Choice recognition title. To ensure there 's no fraudulent voting, there 's a foolproof voting mechanism incorporated in the process.

Winners in each category earn the right to integrate the CIO Choice title logo on their packaging, promotions, advertising, marketing campaigns, and other brand communication for a period of one calendar year. It is a powerful sales accreditation tool as it increases brand awareness and recognition within the CIO community and can be leveraged for increased sales.

ADVISORY PANEL SPEAKS

"CIO Choice is a great platform where CIOs can come together to share common practices, collaborate, identify, and honor common products helping IT Community. This event also gives us the opportunity to meet old colleagues and have a gala time and I look forward to it."

Abhijit Singh – Chief Technology & Digital Officer – HDFC LTD

"CIO Choice is a great platform for a diverse set of technologies where digital partners can share their capabilities and value propositions. Over the years, it has morphed into a mature and coveted platform bringing together various stakeholders of the technology world. It's commendable that CORE Media has created a transparent and methodical approach to bring together everyone through this knowledge-sharing platform."

Baljinder Singh – Global Head Of Enterprise Digital Transformation And CIO– EXL

"CIO Choice is a unique platform for CIOs across India to find out about the best products and solutions available in the market. It is unique in the sense that it is the CIO – the customers and the end users of a product and service choose the finest among various solutions that are available in the market. Building a platform where CIOs, from reputed companies, come together is commendable and I credit this achievement to Anoop Mathur and CORE Media."

Ekhlague Bari – CIO – Jubilant FoodWorks

"CIO Choice is probably one of its kind in the technology world that lends much-needed credence to the technology choice and also gives us assurance and confidence about the products and services available. I look forward to meeting many of my CIO peers, networking with them, understanding some of the technology solutions they have implemented, and translating the knowledge into my work."

Mani Mulki – Operating Director Technology – Kedaara Capital

"CIO Choice is a great platform for service providers, and partners that we work with to get a seal of trust from the CIO community itself. At CIO Choice Red Carpet Night 2023, I'm excited to have a great time with My CIO friends as well as partners, and the community."

Mayank Bhargava - Chief Information and Digital Officer - Fortis Healthcare

"Like every year, I think CIO Choice will be a grand event. The maturity levels are regularly improving and becoming more relevant for the industry. With the addition of newer services into this process, I'm looking forward to this year's CIO Choice Red Carpet night 2023. I am sure it will create a new benchmark for the selection of the right candidates who can be relevant for the CIOs to take their decisions. Anoop is a great leader, innovative and creative, and establishing a new recognition in the media industry, especially in the IT domain."

Rajesh Uppal - Sr. Executive Director (HR & IT) - Maruti Suzuki

"I have been associated with CIO Choice for a very long time and I think it's one of the best CIO platforms in India. One of the main things I'm looking forward to at the Red Carpet Night this year is the renewed activity in physical form and the CIO Choice events are always great fun, and especially good for networking with the IT community leaders. Wish you all the best Anoop and his team!"

Sankarson Banerjee - Consultant-Technology - RBL Bank

"I think the CIO Choice is an ideal platform for bringing digital technology partners with the end user organization. And in today's ecosystem, no company can be successful without its digital ecosystem, partners, and technology partners. This platform brings both of them together and also helps us show gratitude to our partners. Anoop has been an industry veteran and a great friend. I've seen him create platforms that have enabled peer-to-peer interaction between digital leaders."

Suhail Ghai - CIO - Chief Digital & Information Officer - Max Life

"CIO Choice is a fantastic platform for connecting the CIO community and ICT vendors. Red Carpet Night 2023 should be a gala event for everyone. I would say kudos to Anoop for introducing this unique process where you identify the gap, the problem, and the challenges the CIOs face."

Vinod Bhat - CIO & Chief Ethics Counsellor - Vistara Tata SIA Airlines Ltd

KNOWLEDGE PARTNER

CIO Choice provides an opportunity to vendors to demonstrate their successful IT products and services to the larger CIO community. KPMG in India is pleased to be associated with CIO Choice since its inception and wishing them all the success in the future..

EDGE COMPUTING INFRASTRUCTURE

Large Enterprise

Lenovo

Srinivas Rao, Director, Presales and Solutions, Lenovo Global Technology (India), and Pavan Sachdeva, Head ISG Marketing India, Lenovo Global Technology (India), receive the recognition trophy from Vinod Bhat, CIO & Chief Ethics Counsellor, Vistara - TATA SIA Airlines and Mayank Bhargava, Chief Information and Digital Officer, Fortis Healthcare, at the Red Carpet Night.

The Data-Centered

Lenovo serves and empowers the Data-Centered. Because we know data does not transform the world. People do.

On its own, data is powerless. It takes smarter, more ambitious, more driven humans to bring it to life. To apply it. To derive its meaning. To give it purpose.

To see its potential to dramatically accelerate their organizations, improve their industries, and solve humanity's greatest challenges. Because numbers add up, but it's the people who make them count.

They are visionaries and tech optimists. Executives and engineers.

Researchers and managers alike.

They are The Data-Centered.

"We have been bestowed with the coveted CIO Choice Recognition 2023 in Hyper-Converged Appliance and Edge Computing Infrastructure categories. CIOs from across the country have shown their trust & belief by voting for us as their technology partner. I am confident about edge computing as the next frontier of digital transformation for businesses across verticals in India and I am sure Lenovo is ready to lead with technology to guide our customer in their business continuity, and achieve economies of scale".

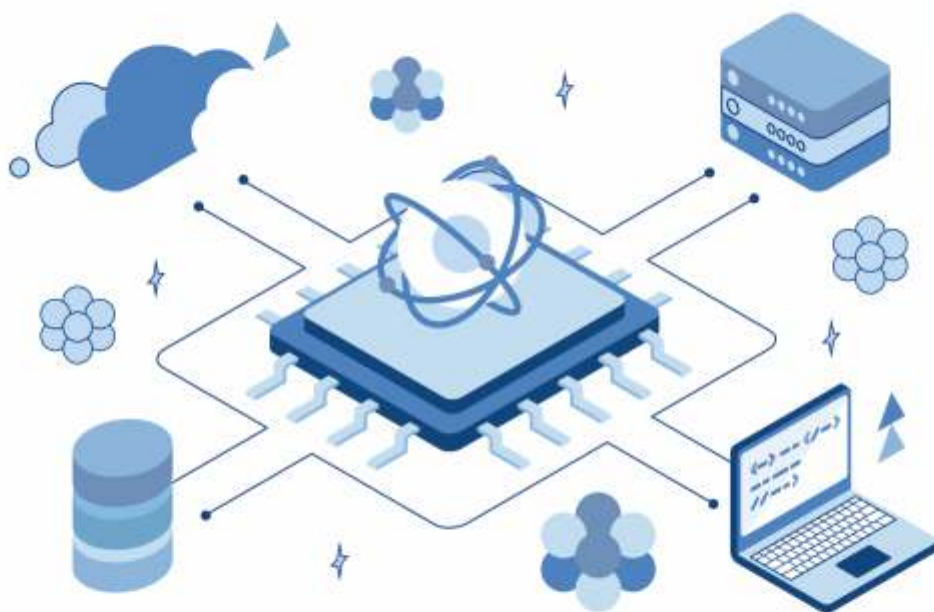

Amit Luthra,
Managing Director,
Lenovo Infrastructure Solutions Group
(ISG) - India

Hyper Converged Infrastructure

Today's enterprises are accelerating their digital transformation journey to provide the necessary edge to their businesses. However, effective modernization of DC infrastructure can be a complex process.

Enterprises face challenges such as hindrances due to legacy IT infrastructure, compatibility issues among the hardware and software platforms, and complex integration within data center components.

Digital leaders around the world are adopting Hyper-Converged Infrastructure (HCI) to overcome these challenges and modernize their DC infrastructure, leading to improved responsiveness, time-to-market, business continuity, and economies of scale. For IT leaders, managing business-critical workloads is a top priority.

"Lenovo Global Technology (India), with this win in Edge Computing Infrastructure, showcases its vision to deliver Smart Technology for all and helps organizations re-think the way they use technology through smarter solutions".

Anoop Mathur, Founder, CORE Media

ARTIFICIAL INTELLIGENCE

Large Enterprise

Prasanna Ramakrishnan, Sr. Technical Manager - AI/ML Solutions, GS Lab | GAVS Technologies received the recognition trophy from Vinod Bhat, CIO & Chief Ethics Counsellor, Vistara - TATA SIA Airlines, and Mayank Bhargava, Chief Information and Digital Officer, Fortis Healthcare, at the Red Carpet Night.

GS Lab | GAVS, backed by Kedaara Capital, a leading Private Equity firm in India, is a global AI-led digital transformation company focused on creating business impact for its 200+ customers across the USA, Europe, the Middle East, and APAC. It offers digital product engineering, AI-led managed services, and digital transformation services to customers across healthcare, BFSI, and high-tech segments.

With 4,000+ technologists spread across 10+ global delivery centers and a robust talent-grooming engine, it is a trusted growth partner to its customers. Known for its innovative win-win business models, customer success focus, and deep tech engineering skills, the company invests heavily in emerging technologies such as 5G, edge computing, AI/ML, cloud, and IoT. Its IPs, such as ZIFTM, zIrrus, Rhodium, and zDesk, help accelerate technology adoption for enterprises.

"This recognition is truly a testament to the CIOs' confidence in our solutions and services and the relationships that we've nurtured with them. Over the years, we have invested in the right partnerships, and built competencies in key technologies like AI/ML, and Blockchain, among others, and in the cybersecurity domain. With GS Lab and GAVS joining hands last year, we are poised to make a significant impact in the healthcare, BFSI, and high-tech industries".

Balaji Uppili,
COO,
GS Lab | GAVS

ZIF™ (Zero Incident Framework™)

The CIO Choice award-winning ZIF™ is the world's first patented AIOps platform that can predict failures of applications and devices in an IT environment. ZIF™ works on Service Reliability concepts ensuring a resilient and reliable digital experience. Patented KPIs like Application Health Index (AHI) and User Experience Index (UEI) in ZIF™ help enterprises to measure and analyze the seamless user experience of services rendered to

their consumers. Inbuilt self-healing bots reduce the time to repair (MTTR) incidents across all layers of IT environments. ZIF™ can detect non-compliance and alert if there is a change of state (CoS) in devices and applications.

ZIF™ is a true AI-based product developed in India, which requires no rules to be configured and runs on unsupervised machine learning algorithms developed in partnership with IIT Madras.

Features that make ZIF™ stand out from the rest:

- ✓ Agentless auto-discovery of applications and devices
- ✓ Agentless monitoring of the IT landscape including apps, servers, network, cloud & endpoint devices
- ✓ AI-based correlation & root cause identification
- ✓ AI-based predictive analytics
- ✓ Self-healing bots

"This win by GS Labs | GAVS Technologies in Artificial Intelligence is a testament to their commitment to delivering near 100% reliability to all business-critical applications of an enterprise through prediction and intelligent automation".

Large Enterprise

Akhil Garg, CFO & Head - IoT, Airtel Business, and Kaustubh Chandra, CMO, Airtel Business, India, receive the recognition trophy from Vinod Bhat, CIO & Chief Ethics Counsellor, Vistara - TATA SIA Airlines and Mayank Bhargava, Chief Information and Digital Officer, Fortis Healthcare, at the Red Carpet Night.

Nextra by Airtel, a subsidiary of Bharti Airtel Limited, offers largest network of secure, scalable, and sustainable data centers in India to leading enterprises, hyperscalers, start-ups, SMEs and governments.

Being associated with both data center and telecom industry for more than 2 decades, Airtel provides a platform of hyper connected state-of-the art core and edge data centers across 120+ locations. Airtel enables businesses to accelerate their digital journey and host their applications closer to their customers than ever before. Backed by one of the world's largest investment Firm 'Carlyle Group' and already investing in multiple large data center parks, Airtel is committed to be a long-term partner to support the journeys of their customers to scale and create a digital future.

"We are extremely delighted to win at the prestigious CIO choice awards. We would like to thank CIO community for voting us and helping us win for 6th time in a row for colocation category. This win is a by-product of unrelenting focus on catering to our customers' dynamic data center needs. We're enabling them to build future-ready IT infrastructure and become 'digital-first' with our largest network of scalable, secure and sustainable data centers across India".

Ashish Arora,
CEO,
Nxtra by Airtel

Airtel's colocation facilities are fully-equipped to provide secure, digitised and borderless IT infrastructure with industry leading uptime to meet the demand of India's digital economy. Airtel designs and delivers bespoke large white space footprints quickly and can scale to accommodate the dynamic requirements of hyperscalers and enterprises.

Airtel being the parent company of Nxtra, has big strength in network footprint and robust connectivity offerings across India and global market. Thus, offering its customers a platform of hyper connected data centers with low latency, carrier dense and rich interconnect services. Sustainability tops the list of strategic business priorities for Nxtra and is committed to set new benchmarks in sustainability for the data center industry. With an ambition to reach net zero by 2031, Airtel is making all possible efforts to adopt innovative energy solutions to run the data centers from renewable sources.

"With this recognition in Colocation Nxtra by Airtel emerges as a leader in providing businesses with a secure, scalable, and sustainable space to accommodate the digital needs of different businesses at scale".

APPLICATION MANAGED SERVICES

Large Enterprise

Shomik Dasgupta, Partner, PwC India, and Nilesh Gandhi, Partner, PwC India, receive the recognition trophy from Vinod Bhat, CIO & Chief Ethics Counsellor, Vistara - TATA SIA Airlines and Mayank Bhargava, Chief Information and Digital Officer, Fortis Healthcare, at the Red Carpet Night.

At PwC, our purpose is to build trust in society and solve important problems. We're a network of firms in 152 countries with over 328,000 people who are committed to delivering quality in assurance, advisory and tax services.

PwC is a community of solvers coming together in unexpected ways to solve the world's most important problems. As part of its new equation strategy, we combine human ingenuity, experience, and technology innovation to deliver sustained outcomes and build trust. PwC encourages innovative mindsets and smart technologies combined with fresh, diverse perspectives to move beyond the tried and tested and drive toward new ways of delivering transformation with the right business outcomes.

"In the digital era, Application Managed Services is of huge significance as it is the engine for digital adoption and continuous innovation, ultimately helping organisations become Digital First. At PwC, we are happy to help our clients and their end customers progress on their digital journey with our Managed Services capabilities, where the focus is on continuous innovation and delivery of sustained outcomes. We thank our customers for their faith in us and allowing us to partner with them on their digital success story. We are also grateful to CIO Choice for recognising our Application Managed Service capabilities".

Shomik Dasgupta,
Partner,
PwC India

PwC network has a global footprint of expertise and is a proven leader in Application Managed Services (AMS). By providing a combination of business and IT outcome-based service models, we allow our clients to focus on their core business operations. In addition to supporting the core 'keep-the-lights on' functions, PwC helps organisations drive application outcomes and capture the power of applications through our managed services.

PwC's Managed Services teams provide the capabilities and flexibility required for organisations

to thrive and evolve in an ever-changing environment. As business integrators, PwC works on transformational engagements, helping clients solve complex business problems using technology as an enabler. Leveraging our internal developed tools, products, and accelerators, we specialise in collaborating with our clients to modernise IT operations, stabilise applications, and provide exceptional application automation and management. PwC focuses on confirming that IT and business have the people, process, tools, and techniques to stay ahead, continuously.

PwC NextGen AMS is committed to providing seamless support and customer delight with the help of a strong delivery framework, robust governance model, and streamlined process. With a focus on continuous improvement and emerging technologies such as robotic process automation (RPA) and machine learning (ML) and keeping innovation, quality and performance as paramount parameters, PwC has been able to cater to the best and often first-of-their-kind solutions, helping customers gain a competitive advantage. Continuous focus on automation, cost optimisation, and proactive risk mitigation for customers has helped PwC garner the topmost ratings in consecutive years in the customer satisfaction surveys of different forums.

"PwC's win in Application Managed Services proves the efficient delivery of end-to-end managed, value-led services to help businesses transform operations and enhance core business processes".

Anoop Mathur, Founder, CORE Media

CLOUD TELEPHONY

Winning Brand

Large Enterprise

Nitin Gogia, GM-Principal Product-TFS, GCS & HCCS, Enterprise, Vi Business, and Vishal Thakur, VP-Business Comms & Cloud Store, Enterprise, Vi Business, receive the recognition trophy from Vinod Bhat, CIO & Chief Ethics Counsellor, Vistara - TATA SIA Airlines and Mayank Bhargava, Chief Information and Digital Officer, Fortis Healthcare, at the Red Carpet Night.

Vodafone Idea Limited is an Aditya Birla Group and Vodafone Group partnership. It is India's leading telecom service provider. The Company provides PAN-India Voice and Data services across 2G, 3G, and 4G platforms. With the large spectrum portfolio to support the growing demand for data and voice, the company is committed to delivering delightful customer experiences and contributing towards creating a truly 'Digital India' by enabling millions of citizens to connect and build a better tomorrow.

The Company is developing infrastructure to introduce newer and smarter technologies, making both retail and enterprise customers future-ready with innovative offerings, conveniently accessible through an ecosystem of digital channels as well as extensive on-ground presence. The Company is listed on National Stock Exchange (NSE) and Bombay Stock Exchange (BSE) in India.

"Vi Business is committed to being the most trusted and valued partner helping enterprises of all sizes succeed. The recognition received by CIO Choice for our products and solutions reaffirms our endeavours. Vi Business is at the forefront when it comes to delivering unmatched solutions to the needs of our customers".

Rochak Kapur,
EVP & Head-Enterprise Products & Business Ops,
Vi Business

Vi Business Cloud Telephony offers businesses a cloud-based solution that allows them to add real-time communication capabilities and transform the way to interact with their customers in a simpler, quicker and more affordable way. The cloud-based platform offers APIs and an integrated development environment that enables enterprise solutions across voice, messaging, advanced messaging, security and intelligent services making them digital-ready for the future.

Vi solutions are democratized across Large Enterprises, SMEs, MSMEs and Startups through zero capex, minimal Opex, and end-to-end managed services which in turn, helps businesses to enrich customer communication channels, automate reminders,

manage appointments, and promote in-app calling, broadcast and much more through simple API integrations.

The offering of a 10-digit virtual mobile number is the 'First-to-Market' product, building a true omni-channel experience, where one number for a business manages the entire spectrum of communications - from incoming to outgoing calls, Messaging, Whatsapp business account, including a chat bot integration.

Vi Cloud telephony solutions offers a host of services including Lead Management solutions, Click2Call Solutions, Auto Receptionist (IVR), Whatsapp Business Account (WABA) integrations. The Cloud telephony services bring in the strength of scale, multi-tenancy, improved outreach and reduced costs.

As a result, it finds extensive applications across the healthcare, hospitality, education, logistics, and banking, financial services, and insurance (BFSI) industries.

"By winning this recognition in 'Cloud Telephony', Vi Business exhibits the effectiveness of its highly-scalable and telecom-grade hosting services that have helped its customers improve operational services without compromising on their quality of service".

Anoop Mathur, Founder, CORE Media

Winning Brand

ENVIRONMENTAL, SOCIAL & GOVERNANCE

Large Enterprise

Sudharsan Aravamuthan, Head - Systems Engineering, Pure Storage India, and Abhinaya Deshpande, Sales Director, Pure Storage India, receive the recognition trophy from Suresh Iyer, CIO, Blue Star, and Chandresh Dedhia, Group CIO, API Holdings, at the Red Carpet Night.

Pure Storage (NYSE: PSTG) uncomplicates data storage, forever. Pure Storage delivers a cloud experience that empowers every organization to get the most from their data while reducing the complexity and expense of managing the infrastructure behind it. Pure Storage's commitment to providing true storage as-a-service gives customers the agility to meet changing data needs at speed and scale, whether they are deploying traditional workloads, modern applications, containers, or more. Pure Storage believes it can make a significant impact in reducing data center emissions worldwide through its environmental sustainability efforts, including designing products and solutions that enable customers to reduce their carbon and energy footprint. And with the highest Net Promoter Score in the industry, Pure Storage's ever-expanding list of customers are among the happiest in the world.

"Corporate data centers are often still optimized for reliability, performance, or cost, and less for efficiency. Old magnetic disk technologies delivered capacity yet sacrificed inefficient power usage and e-waste. NVMe and Flash can enable organizations to design and operate less resource-intensive data centers and can help shrink footprints dramatically. At Pure Storage, we believe that our tightly integrated software and hardware allows us to deliver market-leading density, performance, longevity, and help drive energy efficiencies. Our Evergreen architecture and philosophy of continuously and non-disruptively upgrading both the hardware and software components of customers' systems spare our customers from disruptive and costly product replacements and the associated energy and e-waste".

Ramanujam Komanduri,
Country Manager,
Pure Storage India

Data and data insights play a critical role in the development of products and services across industries and there has been a surge in demand for data services. However, while some people assume digital data is carbon neutral, the World Economic Forum estimates that digitization generated 4% of global greenhouse gas emissions in 2020.

With no end in sight to the growth - and importance - of data and the insights data delivers, data centers play an undeniably important part in any corporate sustainability strategy.

Building a sustainable model for the future requires data storage that is engineered to require significantly lower power, lower cooling, and far less waste, with the potential to make a significant and immediate impact on reducing global data-center carbon emissions. Since its inception, Pure has invested in building sustainable and highly efficient products and services that deliver on this need. With a combination of technology, design philosophy, and a ruthless focus on driving the best outcomes for customers, Pure Storage delivers unmatched density, longevity and efficiency, helping global enterprises to continually improve and drive further efficiencies over time.

"As a leading name in building sustainable tech infrastructure, Pure Storage India is the rightful winner in the category 'Environmental, Social, and Governance (ESG)'. The company promotes building products that allow their customers to decrease their environmental footprint and contribute to the green initiative".

Anoop Mathur, Founder, CORE Media

SD-WAN PLATFORM

Winning Brand

Large Enterprise

D. Bora, Co-Founder & COO, Lavelle Networks and Kaustubh Chandra, CMO, Airtel Business, receive the recognition trophy from Suresh Iyer, CIO, Blue Star, and Chandresh Dedhia, Group CIO, API Holdings, at the Red Carpet Night. .

Airtel Business is India's leading and most trusted Information and Communication Technology (ICT) service and solution provider to businesses of all types - be it enterprises, governments, carriers, MNOs, and small and medium businesses.

Airtel's portfolio encompasses a wide array of products and services such as connectivity, voice, data, collaboration, cloud, data centers, security, IoT, network integration, managed services, enterprise mobility, and digital media. With this diverse set of offerings, Airtel is continuously innovating in the realm of digital service delivery to provide an exceptional end-user experience, round-the-clock infrastructure availability, and top-notch service quality.

"It's an absolute honour and pleasure to win the prestigious CIO Choice Award 2023. We feel privileged to have been voted the #1 choice in the CIO and CTO community under the SD-WAN category. The win is synonymous with our dedication at Airtel to helping businesses make their network future-ready and accelerate growth without worrying about network uptime and latency".

Alok Shukla,
SVP Data Products & Business Solutions,
Airtel Business

Airtel Intelligent VPN is the state-of-art SD-WAN solution that ensures faster, agile, and secure WAN connectivity to help businesses succeed in this fast-growing environment and rapidly digitizing realm, unlike the legacy network systems. Airtel's best-in-class, intelligent VPN solution offers centralized network management, ease of deployment, operational flexibility, intelligent path control, and automatic failover.

With such robust features, Airtel Intelligent VPN enables businesses to streamline their traffic flow and boosts bandwidth on demand with greater efficiency across the entire network. Businesses are empowered to remotely configure branch WANs and mitigate the trombone effect. The solution is designed to dynamically balance load, prioritize applications, and support transport neutrality, to assure that business-critical applications have near 100% uptime and zero latency, while users have a superior network experience.

In addition, Airtel Intelligent VPN allows businesses to tremendously bring down the cost that they incur in managing multiple connectivity mediums and the legacy WAN, and create a future-ready network for businesses.

"With an aim to provide an accelerated network with scale and security, Airtel Business and Lavelle Networks win the recognition for the SD-WAN Platform proving their commitment to their business goals".

HYPER-SCALE DATA CENTER

Winning Brand

Large Enterprise

Rahul Ambegaoker, Vice President and Sales Head, NTT Global Data Centers & Cloud Infrastructure India, and Ameya Keni, Product Manager, NTT Global Data Centers & Cloud Infrastructure India, receive the recognition trophy from Suresh Iyer, CIO, Blue Star, and Chandresh Dedhia, Group CIO, API Holdings, at the Red Carpet Night.

We understand data – The world's most valuable resource

NTT is India's leader in data center services and one of the top three providers globally. With decades of local and trusted expertise, our data centers have one of the largest connected platforms in the world. With full-stack services, leading technologies, and a global presence, we provide comprehensive data center solutions to meet your IT infrastructure requirements.

NTT on an expansion mode

NTT is expanding to more than 1,500MW of critical IT load (including planned) in over 20 countries. In India, our existing data center capacity stands at 230 MW of operational load, spread over 2.1 million sq.ft. across 12 facilities in Mumbai, Bengaluru, Delhi NCR, and Chennai. We're adding new capacity at a very fast pace. We will add a 280 MW operational load spread over 2.5 million sq. ft at our data center campuses across the country in the coming two years.

"We're delighted to have been honored with the CIO Choice recognition for Hyperscale Data Centers. We're grateful to the CIO community for their confidence in our services and their vote that helped us win this prestigious endorsement. This recognition is a testament to our commitment to quality service and our continued leadership in India's data center industry".

Shekhar Sharma,
CEO, NTT Global Data Centers and Cloud Infrastructure,
NTT Communications India

We lay the foundation for organizations-edge-to-cloud networking ecosystem, simplify the complexity of their workloads across multi-cloud environments and innovate at the edge of their IT environments where networks, cloud, and applications converge.

We offer tailored infrastructure and ensure consistent best practices in design and operations across all of our secure, scalable, and customizable data centers.

On the journey towards a software-defined future, we support organizations with our platform-delivered infrastructure services. We enable a connected future.

"NTT Global Data Centers & Cloud Infrastructure India winning the recognition in Hyper-Scale Data Center demonstrates its unmatched capabilities in providing high-density and carrier-neutral data centers that support changing ICT requirements".

Winning Brand

Large Enterprise

Govindaraj Avasarala, VP – Enterprise Marketing, Vi Business, and Vishal Thakur, VP – Business Comms & Cloud Store, Enterprise, receive the recognition trophy from Suresh Iyer, CIO, Blue Star, and Chandresh Dedhia, Group CIO, API Holdings, at the Red Carpet Night.

Vodafone Idea Limited is an Aditya Birla Group and Vodafone Group partnership. It is India's leading telecom service provider. The Company provides PAN-India Voice and Data services across 2G, 3G, and 4G platforms. With the large spectrum portfolio to support the growing demand for data and voice, the company is committed to delivering delightful customer experiences and contributing towards creating a truly 'Digital India' by enabling millions of citizens to connect and build a better tomorrow.

The Company is developing infrastructure to introduce newer and smarter technologies, making both retail and enterprise customers future-ready with innovative offerings, conveniently accessible through an ecosystem of digital channels as well as an extensive on-ground presence. The Company is listed on National Stock Exchange (NSE) and Bombay Stock Exchange (BSE) in India.

"We thank the CIO Community for recognizing us as a preferred partner for SIP Trunk for the fourth consecutive year. Our solution allows enterprises to collaborate with customers by consolidating their voice infrastructure, to work in an efficient and cost-effective manner. We are constantly striving to be a dedicated partner in their digital transformation journey, and this recognition is a testament to our efforts".

Vishal Thakur,
VP-Business Comms & Cloud Store
Enterprise,
VI Business

In addition to Fixed line voice services over a secured IP network, Vi Business Managed SIP solution also enables customers to monitor, measure and optimize their voice infrastructure. MSIP provides enterprises with a complete view of their fixed voice network along with providing the best-in-class SLA, real-time voice analytics, and auto-ticketing capabilities for business improvement.

- ✓ Better flexibility to upgrade & downgrade sessions on a need basis with a granularity of one (1)
- ✓ No restriction on the number of sessions on a single trunk
- ✓ Multiple pilots on a single trunk for project-based/ function-based billing
- ✓ Online portal for customer-centric reports like usage, tariff details, etc
- ✓ Pro-active monitoring of link and auto-ticketing

"Providing faster turnaround times for business-critical operations and ensuring the resolution of every communication need, Vi Business winning this recognition for SIP Trunk is a validation of their exceptional service delivery".

ENTERPRISE FLASH STORAGE

Large Enterprise

Puneet Gupta, Managing Director and VP, NetApp India/ SAARC, received the recognition trophy from Suresh Iyer, CIO, Blue Star, and Chandresh Dedhia, Group CIO, API Holdings, at the Red Carpet Night.

We help our clients embrace the “evolved cloud”

Established in 1992, NetApp (Nasdaq: NTAP) is a hybrid cloud data services and data management company headquartered in San Jose, California. Our portfolio of leading data, application and storage solutions empowers organizations to manage data and applications everywhere across hybrid multi-cloud environments. Over 30 years of innovation have made us the proven leader in all-flash storage. We have the only enterprise-grade storage OS available natively on the world's largest public clouds, and our data services offer the best security and protection in the industry.

In a world of hybrid multi-cloud complexity, NetApp envisions a better IT experience - an 'evolved cloud' state that unites on-premises and cloud environments, delivering simplicity, security, savings and sustainability. With unified management and AI-driven optimization, we build solutions that drive faster innovation wherever our client's data and applications live.

Offering the best of the cloud without complications

In the cloud's next evolution, its benefits aren't held back by complexity, and neither are IT teams. We enable our clients to use the cloud they want, the way they want to, while automatically optimizing for cost, risk, efficiency, and sustainability. Cross-cloud application and data consistency ensures that there is no lock-in - opening the doors for agility, flexibility, and freedom-fuelled innovation.

"We are honoured and grateful for the recognition by the CIO Choice Awards. The win stands testament to the trust our partners and customers have placed in us. At NetApp, we focus on identifying the challenges that our customers face and work in a collaborative manner to problem-solve. Over time, we have witnessed, participated in, and enabled transformative digital journeys. As we forge ahead in an evolved cloud environment, we will continue to innovate and make infrastructure, applications, and data true assets for enterprises".

**Puneet Gupta,
Managing Director & VP,
NetApp India/SAARC**

**Data storage:
More flash, less cost, no
compromise.**

For over 30 years, NetApp has been the leading innovator in data storage, offering the only portfolio in the market with a single unified operating system - NetApp ONTAP - for file, block, and object storage running on performance flash, capacity flash, and hybrid flash. All offered with NetApp Advance to eliminate tech refresh challenges, guarantee security and efficiency, and provide a path to the cloud.

NetApp is a proven leader when it comes to future proofing and streamlining your storage environment with flexible solutions. From simple, smart, trusted storage for shared NAS, SAN, and object environments to arrays built for dedicated, high-bandwidth applications like data analytics and disk-based backup, we work with you to design the perfect solution.

NetApp AFF A900: The superhero in your data center

Powerful, resilient, and secure, the AFF A900 high-end NVMe flash storage in the AFF A-series family has all that you need to fuel your mission-critical enterprise applications and keep your data available and secure at all time.

Built for large enterprises and cloud service providers where speed, dependability, and security are imperative, the AFF A900 delivers unparalleled performance and resiliency for the most demanding enterprise applications and databases. And with the cutting-edge anti-ransomware security in the ONTAP data management software, you can rest assured that your data is safe from potentially catastrophic ransomware attacks.

"As an industry leader with 30 years of storage innovation experience and data management capabilities with a focus on performance, security, availability, and flexibility, NetApp has earned this recognition in Enterprise Flash Storage".

MANAGED SECURITY SERVICES

Large Enterprise

Amit Chaudhary, Vice President - IP & Cyber Security, Airtel Business and Kaustubh Chandra, CMO, Airtel Business, and Shaaz Anjum, Senior Manager, Airtel Business receive the recognition trophy from Suresh Iyer, CIO, Blue Star and Chandresh Dedhia, Group CIO, API Holdings, at the Red Carpet Night.

Headquartered in India, Airtel is a global communications solutions provider with over 500 million customers in 17 countries across South Asia and Africa. The company ranks amongst the top three mobile operators globally and its networks cover over two billion people.

Airtel is India's largest integrated communications solutions provider and the second largest mobile operator in Africa. Airtel's retail portfolio includes high speed 4G/5G mobile broadband, Airtel Xstream Fiber that promises speeds up to 1 Gbps with convergence across linear and on-demand entertainment, streaming services spanning music and video, digital payments and Financial services.

For enterprise customers, Airtel offers a gamut of solutions that includes secure connectivity, cloud and data centre services, cyber security, IoT, Ad Tech and CPaaS (Airtel IQ).

"There has been some amazing work done by the team in the managed services portfolio while we have added some new-age "need of the hour" features in cybersecurity to truly give the control of the entire security ecosystem in the hands of our customers! The kind of partnerships that we've had with our esteemed partners to create a world class SOC has now been identified and talked about by a lot of CIOs in town".

Amit Chaudhary,
Vice President - IP & Cyber Security,
Airtel Business

Cyber security is now a part of monthly boardroom conversations and organizations now need to establish security practices to keep pace with new age threats. Airtel Secure is the complete suite of Cyber Security solutions from Airtel Business catering to all kinds of cyber threats with solutions from iSOC (Intelligent Secure Operations Center) to Internet Security, at the same time catering to solutions like DDoS, WAAP-as-a-service in order to cover the ever-increasing threat landscape.

"With its promise to identify and remedy all major and minor technological susceptibilities before they turn into vulnerabilities, Airtel Secure has engraved its name on the Managed Security Services recognition".

PERPETUUITI™
Automation Simplified

Sudish Kumar, Chief Operating Officer – Sales Operations, Perpetuuiti Technosoft PTE, received the recognition trophy from Prakash Ramachandran, CTO, BYJU's and Kunal Pande, Partner, KPMG, at the Red Carpet Night.

Perpetuuiti is the global leader in Enterprise Resiliency Automation, delivering up to 80% reduction in Recovery Time Objectives (RTOs) and averaging 50% operating cost avoidance and efficiencies to the world's largest banks, insurance, airlines, and stock exchanges.

Perpetuuiti uniquely combines Cyber Resiliency and IT Resiliency in one unified platform to enable organizations recover from Cyber and IT disruptions with the lowest Recovery Point Objectives (RPOs) and fastest Recovery Time Objectives (RTOs) in the industry, dramatically limiting data loss and downtime. We offer a holistic approach that combines cyber resilience, IT resilience, business continuity and enterprise risk management to ensure that organizations remain functioning after a cyber or an IT incident.

Perpetuuiti's Automation Intelligence & Enterprise Resilience Platforms deliver leading-edge automation solutions for modernizing resiliency management, and turbocharging the performance of your applications, IT and business operations at speed and scale to drive exponential efficiencies. These platforms represent breakthrough performance and comprehensive automation for companies of every size.

Perpetuuiti has pioneered innovative products that have been well accepted and trusted by their customers and partner ecosystem comprising Fortune 500 global organizations from a diverse set of industry verticals like banking, insurance, telecom, government organizations, high-tech, BPM and service providers.

"We are extremely delighted that CIOs across industries chose Perpetuuti for the CIO Choice recognition and award for Resiliency Automation Platform this year. This is our 6th win in the enterprise automation solutions' category, and is a testimony to our constant efforts in delivering the best-in-class enterprise automation solutions and an enriched customer experience. This vote of confidence from the CIO fraternity is a validation of Perpetuuti's comprehensive and unique Resiliency Automation Platform enabling organizations to simplify, modernize and redefine business resilience. The award becomes even more special as the jury consists of an independent panel of eminent CIOs and IT decision makers. This is a huge corroboration of our efforts and proves our commitment towards the evolving demands of customers. Furthermore, Perpetuuti's Enterprise Resiliency Automation Platform has helped more than 400 customers across geographies and verticals to enhance Business, IT and Operational excellence and resilience. This further validates our innovation, and trust of CIOs".

Sudish Kumar,
Chief Operating Officer - Sales
Operations,
Perpetuuti Technosoft Services

Our flagship offering enabling comprehensive and simplified enterprise automation offers multitude of benefits for business, IT and operational excellence:

Continuity Patrol™ from **Perpetuuti's Resiliency Automation Platform** uniquely combines cyber resiliency and IT resiliency in one unified solution to enable organizations recover from Cyber and IT disruptions with the lowest recovery point objectives (RPOs) and fastest recovery time objectives (RTOs) in the industry, dramatically limiting data loss and downtime.

Continuity Patrol™ (CP) offers a holistic approach that combines cyber resilience, IT resilience, business continuity, and data migration/ replication to cloud to ensure that organizations remain functioning after a cyber or an IT incident.

Business benefits using Perpetuuti's Continuity Patrol™ :

- ✓ **Single-click Recovery** Invocation with minimal human intervention and dependency on SMEs
- ✓ **50-80%** reduction in RTO over manual/ script-based recovery
- ✓ **50+%** reduction in operational costs
- ✓ **60-80%** reduction in total cost of ownership
- ✓ **Anytime** Switchover-failover. **Scale & protect** 100s of applications with ease
- ✓ **Anytime** BCP Compliant fully-automated drill reports

Continuity Patrol™ is one simple, agile solution saves you time, resources and costs while making it easier and faster to manage workloads at scale with minimal touch.

"By winning this recognition for the category 'Resiliency Automation Platform', Perpetuuti Technosoft PTE has showcased how remarkable its unified and comprehensive resiliency automation platform is, especially for hybrid environments".

SASE (SECURE ACCESS SERVICE EDGE)

Small & Medium Enterprise

Anuj Dutia, Global Head of SASE Cloud Solutions & Services, Versa Networks, and Abhishek Jain, Country Manager - India and SAARC, Versa Networks, receive the recognition trophy from Prakash Ramachandran, CTO, BYJU's and Kunal Pande, Partner, KPMG, at the Red Carpet Night.

Versa Networks, the leader in SASE, combines extensive security, advanced networking, full-featured SD-WAN, genuine multitenancy, and sophisticated analytics via the cloud, on-premises, or as a blended combination of both to meet requirements for small to large enterprises and Service Providers, and via the Versa Titan cloud service designed for Lean IT. Versa simplifies how enterprises protect and connect their users, devices and sites to workloads and applications anywhere, anytime.

As the leader in SASE, the fastest growing category in cybersecurity, Versa is the only company delivering a differentiated Unified SASE architecture that converges security and networking to ensure an improved security posture, enhanced user-to-application experience and operational efficiency. Versa Networks is privately held and funded by investors such as Sequoia Capital, Mayfield, and Verizon Ventures.

"We are elated to be recognized with the CIO Choice 2023 award for the SASE category. This is yet another testimony of our market leadership in the Unified SASE space and we are thankful to the CIOs for their votes. This will further encourage our teams to keep delivering innovative solutions to customers and add value to their business".

Pallav Maru,
VP Operations and India Head,
Versa Networks

Versa's single-vendor Unified SASE platform delivers organically developed best-of-breed functions that tightly integrate and deliver services via the cloud, on-premises, or as a blended combination of both, managed through a single pane of glass. Versa delivers SASE services such as Secure SD-WAN, Next-Generation Firewall, Next-Generation Firewall as a Service, Cloud Network Firewall, Unified Threat Management (UTM) including Advanced Threat Protection (ATP), Secure Web Gateway (SWG), Zero Trust Network Access (ZTNA), Cloud Access Security Broker (CASB), Data Loss Prevention (DLP), Remote Browser Isolation (RBI), and User and Entity Behavior Analytics (UEBA).

Versa's single-vendor SASE platform goes above and beyond management console automation integration by providing the ability to integrate networks, points of presence, policy definitions, application definitions, agent logic, and data lakes.

As the leader in SASE, the fastest growing security and networking category, Versa is the only solution proven to deliver the industry's leading and differentiated SASE architecture for high performance and security.

"Integrating security, networking, and SD-WAN into a single software operating system with cloud and on-premises delivery models have made Versa Networks the champion in the SASE (Secure Access Service Edge) category".

VERITAS™

Vasu Prakash, Sales Director, Veritas Software Technologies India, and Kiran Sukhtankar, Head of Pre-Sales, Veritas Software Technologies India, receive the recognition trophy from Prakash Ramachandran, CTO, BYJU's and Kunal Pande, Partner, KPMG, at the Red Carpet Night.

Veritas Technologies is a leader in multi-cloud data management. More than 80,000 enterprise customers, including 95% of the global Fortune 100 companies, rely on Veritas to ensure the protection, recoverability, and compliance of their data. Veritas has a strong reputation for reliability at scale, providing enterprises with the resiliency they need to defend against cyber-attack threats such as ransomware. Veritas supports more than 800 data sources, more than 100 operating systems, more than 1,400

storage devices, and more than 60 types of cloud platforms through a unified platform. Backed by cloud-scale technology, Veritas is now implementing its data autonomy strategy to deliver greater value while reducing operational costs.

Veritas is committed to continuing its industry-leading levels of investment in R&D. In 2022, Veritas addressed the challenges of cloud cost, complexity, and the risk of ransomware through the launch of Veritas Alta, a new platform that simplifies and automates cloud data management. This was coupled with Alta View, which provides customers with a single-pane-of-glass to manage workloads on-prem, in the cloud, and across multiple clouds from a unified console. They also completely rearchitected their underlying software to be containerized, cloud-first, and future-ready. In 2023, Veritas will be expanding the SaaS services available through the Veritas Alta platform, including additional ransomware protection features that can be consumed as a service.

Veritas Alta will be the only cloud data management platform that spans data protection, application resiliency, and data compliance, with single-pane-of-glass management for both on-premises and off-premises environments.

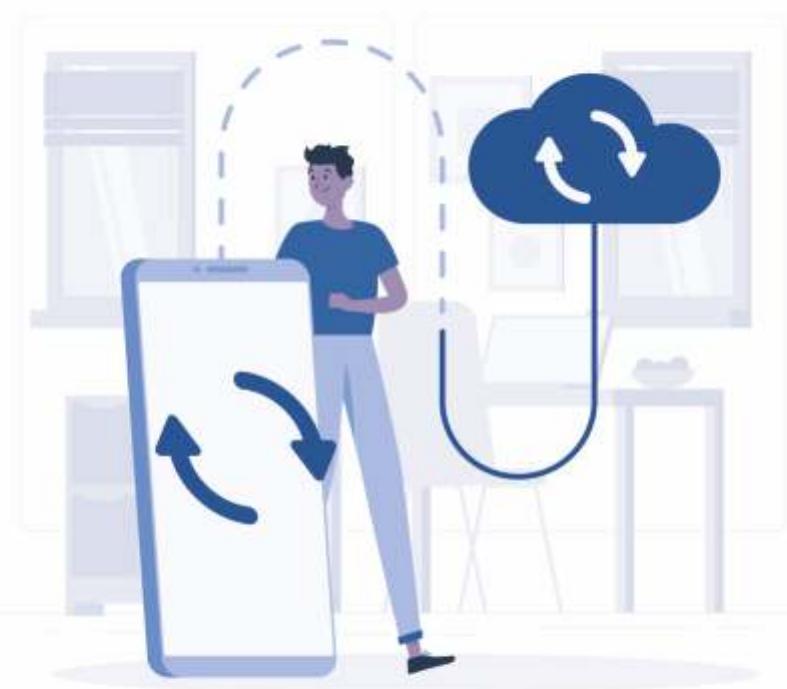

"As the threat of ransomware continues to escalate across the enterprise, we must help customers take control of their data and ensure its security in and out of the enterprise and in any cloud. Veritas has always emphasized the importance and value of a unified solution to the enterprise, which can protect data inside and outside the enterprise. With the launch this year of our Veritas Alta cloud data management platform, this dramatically improves customers' ability to unify, monitor, and protect their overall data estate".

Johnny Karam,
Vice President Sales, International
Emerging Region,
Veritas

Recently, Veritas Technologies, a leader in multi-cloud data management, has won the 2023 CIO Choice Award for "Data Recovery Solutions".

In the recently launched Veritas Alta, Veritas demonstrated its continued innovation in enterprise backup and recovery. As a secure cloud data management platform, Veritas Alta helps customers ensure the security, recoverability, and compliance of their valuable data across all clouds. In addition, Veritas also launched Veritas Alta View, a cloud-based management console, which can provide a unified view and control of all data assets across the edge, data center, and cloud through a unified management platform.

"With its integrated and futuristic approach to data management and protection, while staying committed to neutralizing the impact of cyber attacks, Veritas deserves to win this recognition in the Data Recovery Solutions category.

cubastion®

Ravi Kumar, Co-Founder Cubastion Consulting, and Samrat Guglani, Director - Sales, Cubastion Consulting, receive the recognition trophy from Ganesh Ramachandran, Global CIO, Alkem Laboratories, and Naveen Gulati, Head IT, and Information Security, PolicyBazaar, at the Red Carpet Night.

Cubastion is a technology company for the digital age, with its headquarters located in Gurgaon and offices in Bangalore, Japan, and the US. Cubastion's focus is on helping enterprises reimagine their businesses and customer experience management. With 16 years of innovation, risk-taking, and an unwavering focus on delivery and business certainty, it offers a range of integrated services to our clients.

Its services portfolio includes:

Enterprise Foundations Systems: Cubastion helps you unlock business value by rationalizing your IT estate. The team integrates infrastructure, applications, and operations to create a foundation that adapts to a changing world.

Experience Channels: Cubastion's success starts with your customers. It helps you deliver smart, agile customer touchpoints for a delightful experience.

Data Engineering: Cubastion improves the real-time visibility of your business processes for smarter decisions. From day-to-day operations to long-term strategic decision-making, it provides insights, trends, and science-based analysis.

IT Enablers: Cubastion's team supports you at every stage of innovation. It optimizes the power of IT infrastructure to improve performance and drive maximum productivity using best-in-class technologies.

"We started the journey of Cubastion 16 years ago with a vision to create an organization that is passionate about delivering exceptional services in the customer experience space. Over the years, we have touched the lives of over 500 million people across the globe. I feel that our journey achieved a critical milestone when we were recognized by our clients at the CIO Choice award. I am grateful to my team for putting in the effort required to anticipate every problem our customers could face and solve it even before they realize it. This has been our secret sauce for success".

**Ravi Kumar,
Co-founder,
Cubastion Consulting**

Cubastion is a software vendor that focuses on providing excellent customer relationship management solutions. Our philosophy is centered around creating an elevated customer experience, using new-age design elements that are highly intuitive. The applications are designed to adapt to different customer personas, leading to a high adoption rate, and reducing the need for extensive training.

At Cubastion, the core value is to provide peace of mind to customers, ensuring that their solutions meet go-to-market timelines, offer future-ready technology offerings, and provide lean support models.

Cubastion offers several key solution offerings, including a mobile-first field service offering for a large home appliance organization that uses cloud and microservices architecture to provide flexibility and enable the addition of new features quickly.

For commercial vehicle OEMs in Japan, Cubastion provides a dealer management system that offers containerized instances for each dealer, resulting in optimized infrastructure usage and reduced future support loads.

Cubastion offers a solution for modernizing complex customer hierarchy and customer assurance processes for a large Indian telecommunication service provider. This solution leverages the power of microservices architecture to simplify a complex landscape.

Cubastion also provides a data governance and consolidation solution for passenger vehicle manufacturers in India. The project consolidates data from multiple legacy applications over the last 20 years, creating a single source of truth for the customer.

Overall, Cubastion's solutions are designed to provide an exceptional customer experience, simplify processes, and optimize infrastructure usage. Their focus on meeting customer needs and providing peace of mind sets them apart as trusted software vendors in the industry.

"By helping enterprises reimagine their businesses and customer experience management for the digital age, Cubastion is the deserving organization for recognition in Customer Relationship Management".

Lenovo

Srinivas Rao, Director, Presales and Solutions, Lenovo Global Technology (India), and Pavan Sachdeva, Head ISG Marketing, India, Lenovo Global Technology (India), receive the recognition trophy from Rahul Puri, CIO, Devyani International, and Vinod G, Group CIO, Ashok Leyland, at the Red Carpet Night.

The Data-Centered

Lenovo serves and empowers the Data-Centered. Because we know data does not transform the world. People do.

On its own, data is powerless. It takes smarter, more ambitious, more driven humans to bring it to life. To apply it. To derive its meaning. To give it purpose.

To see its potential to dramatically accelerate their organizations, improve their industries, and solve humanity's greatest challenges. Because numbers add up, but it's the people who make them count.

They are visionaries and tech optimists. Executives and engineers.

Researchers and managers alike.

They are The Data-Centered.

"We have been bestowed with the coveted CIO Choice Recognition 2023 in Hyper-Converged Appliance and Edge Computing Infrastructure categories. CIOs from across the country have shown their trust & belief by voting for us as their technology partner. I am confident about edge computing as the next frontier of digital transformation for businesses across verticals in India and I am sure Lenovo is ready to lead with technology to guide our customer in their business continuity, and achieve economies of scale".

Amit Luthra,
Managing Director,
Lenovo Infrastructure Solutions Group
(ISG) - India

Edge Computing Infrastructure

Solving real-world challenges requires robust infrastructure solutions that generate faster insights. Allowing users to make complex decisions quickly, and with a higher level of confidence.

Powerful computing, when and where it's needed. IT is no longer confined to standalone data centers. It's distributed across a mix of on-premises servers, public cloud, and an increasing share of infrastructure at the edge.

Most analysts predict edge computing to be the fastest growing segment in the industry, with IDC predicting that 50% of new enterprise IT infrastructure will be at the edge by 2023.

One of the most significant opportunities for IT decision-makers is deciding how to harness their data from edge to cloud. This challenge is a shift from the classic data center architecture to a data-centric environment—essentially, bringing the computing to the data vs. the data to the computing.

Lenovo's Think Edge portfolio has purpose-built devices designed to be networked on-premises. Or embedded in solutions, to give you the advantage in performance, security, and scalability.

"Winning the recognition for Hyper-Converged Appliances showcases the exceptional services that Lenovo Global Technology (India) offers its clients in driving innovation across industries".

 Business

Amit Chaudhary, Vice President - IP & Cyber Security, Airtel Business, and Anurag Singh, Circle Business Head - Emerging Business, Airtel Business, receive the recognition trophy from Rahul Puri, CIO, Devyani International and Vinod G, Group CIO, Ashok Leyland, at the Red Carpet Night.

Airtel Business is India's leading and most trusted Information and Communication Technology (ICT) service and solution provider to businesses of all types - be it enterprises, governments, carriers, MNOs, and small and medium businesses.

Airtel's portfolio encompasses a wide range of products and services such as connectivity, voice, data, collaboration, cloud, data centers, security, IoT, network integration, managed services, enterprise mobility, and digital media. With this diverse set of offerings, Airtel is continuously innovating in the realm of digital service delivery to provide an exceptional end-user experience, round-the-clock infrastructure availability, and top-notch service quality.

"We are extremely honoured and delighted to have won the CIO Choice Awards 2023. I would like to extend my heartfelt gratitude to all the CIOs and CTOs who voted for Airtel Dedicated Internet under the "Internet Leased Line" category. Winning the award is a testimony that we are offering the best-in-class dedicated internet solution in the industry, with unmatched speed, reliability, security, and customer service. We are determined to strengthen the foundation of digital India through our cutting-edge connectivity solutions".

Alok Shukla,
SVP Data Products & Business Solutions,
Airtel Business

Airtel Dedicated Internet is a high-performance internet leased line (ILL) solution for all business needs. The ILL connection facilitates business growth and performance through consistent and scalable internet connectivity. Airtel offers blazing-fast speed of up to 100 Gbps with symmetric bandwidth both for upload and download, ensuring uninterrupted workflow. The service is backed by Airtel's unmatched network coverage in India and worldwide through direct Point-of-Presence (POP), strategic alliances, and extensive fiber-leased line networks.

Therefore, Airtel offers future-proof connectivity services for a growing and expanding business.

Digitization and stable internet are the backbones of today's businesses, irrespective of their category. With Airtel Dedicated Internet, businesses get the advantage of a highly-reliable network that assures near-zero downtime, irrespective of the increasing number of users on the network. Airtel values the safety of business-critical information and applications, and thereby, offer a choice of world-class DDoS protection and managed firewall services for internet leased line.

At Airtel, delivering exceptional customer experience is the top priority so the expert assistance is available round-the-clock if businesses face any issues. Airtel guarantees 100% troubleshooting as soon as possible. In addition to that, it also offers Airtel Enterprise Hub, a self-service portal to manage all services in one place, raise service requests, pay bills, and more.

"Being a leading name in the telecom businesses in India and providing stellar customer experience, Airtel Business is the rightful winner of the recognition in the Telecom Carrier (Leased Lines) category".

TATA COMMUNICATIONS

Anurag Mathur, AVP, Tata Communications, and Vikesh Nair, AVP, Tata Communications, receive the recognition trophy from Rahul Puri, CIO, Devyani International, and Vinod G, Group CIO, Ashok Leyland, at the Red Carpet Night.

Tata Communications is a global digital ecosystem enabler powering today's fast-growing digital economy in more than 190 countries and territories. Leading with trust, it enables digital transformation of enterprises globally with mobility, collaboration and connected solutions, network connectivity, cloud hosting and security solutions and media services. About 300 of the Fortune 500 companies are its customers and the company connects businesses to 80% of the world's cloud giants. Its Tier-1 IP network, wholly-owned subsea fibre backbone and consortium cable's global network carries ~30% of the world's internet routes.

"Tata Communications is truly pleased and thankful for this recognition. We would like to dedicate it to all the teams who have worked tirelessly for many years; thus, helping us introduce innovative products, platforms, and services for our loyal customers".

Hari Nair,
Vice President Head of Solution Engineering India & Global Solution Center,
Tata Communications

Tata Communications IZO SDWAN™ managed services platform helps enterprises build a competitive advantage by ascertaining digital-first WAN transformation to enable a business-first value realization. It helps realize the true value of a successful SDWAN deployment through a secure and faster deployment methodology. IZO SDWAN brings together the most innovative networking technologies from best-in-class vendors along

with Tata communication's multi-domain (Network, Cloud, Security) expertise across Day 0, Day 1 & Day 2 Services.

- ✓ **Day 0 services** are created to design and validate the best-fit solution for the customers based on their current and future requirements. This helps in enhancing the Return on Investment with an optimized solution that supports the business outcomes.
- ✓ **Day 1 services** ensure risk-free and time-bound turn up of sites with enhanced visibility through the transition frameworks, capabilities, and tools. This enhances SDWAN time to value while ensuring fast and secure access to cloud applications.
- ✓ **Day 2 services** ensure a simplified management of the steady state ecosystem. Tata communications help enterprises with enhanced network uptime with proactive issue identification & resolution through underlay-overlay correlation. This helps in ensuring business availability & business continuity.

CUSTOMER BENEFITS

- ✓ **Integrated network and security** services leveraging comprehensive portfolio of underlay, overlay and cyber security offerings.
- ✓ **Visibility and timely delivery solutions** across sites through the transition frameworks, capabilities, and tools.
- ✓ **Simplified management of infrastructure** with a single owner of all network assets including BYON.
- ✓ **Enhanced Return on Investment** with optimized and best-fit solution that supports the business outcomes.
- ✓ **Accelerated access to cloud applications** through globally distributed SD-WAN gateways for superior user experience.
- ✓ **Improved network uptime** with proactive issue identification & resolution.

"Introduced with an aim to transform business security and network architecture, Managed SD-Wan Services by Tata Communications has received CIOs' approval for being the best agile, secure, and cloud-first solution in the industry".

Mayur Relekar, Advisory Solution Consultant, ServiceNow, and Vikash Kashyap, Advisory Solution Consultant, ServiceNow, receive the recognition trophy from Rahul Puri, CIO, Devyani International, and Vinod G, Group CIO, Ashok Leyland, at the Red Carpet Night.

ServiceNow is a leading enterprise cloud software company that is dedicated to simplifying complexity and improving work experiences for people. With a cloud computing platform that enables digital workflows for enterprise operations, ServiceNow helps over 7,700 enterprise customers worldwide, including 85% of the Fortune 500, to unlock productivity and create great experiences.

ServiceNow's digital-first business model allows customers to innovate at scale and speed. ServiceNow's innovative solutions help organizations digitize and unify their processes, allowing for smarter, faster, and more agile workflows that connect employees and customers. With expertise in risk management, compliance, machine learning, and artificial intelligence, ServiceNow's platform is state-of-the-art and can be customized for use across industry sectors.

"Being recognised as a "Smart Workflow Platform" by CIO Choice is a reflection of our dedication to driving successful business outcomes for customers. ServiceNow's approach to workflow automation helps empower organizations with the necessary digital support to drive business growth and achieve organizational excellence".

Kamolika Gupta Peres,
Vice President & Managing Director
India/South Asia,
ServiceNow

At ServiceNow's core is the Now Platform, a powerful cross-enterprise integration engine for digital business.

ServiceNow founder, Fred Luddy, had a simple yet powerful vision: to make technology at work, work as well as technology at home. The Now Platform helps optimize processes, connect data and organizational silos, thus, helping accelerate innovation at scale. ServiceNow's platform helps customers drive growth and reduce operational costs due to increased business agility as well as productivity.

The Now Platform is designed to deliver great experiences and unlock opportunities to excel through multiple workflows:

- ✓ **Technology Workflows:** ServiceNow assists businesses in transforming into future workplaces by modernizing operations required to achieve business resilience through tomorrow's IT
- ✓ **Employee Workflows:** ServiceNow contributes to the development of new ways of working that increase employee engagement and productivity while maintaining a safe and efficient workplace.
- ✓ **Customer Workflows:** ServiceNow's digital workflows serve as the foundation for creating modern customer experiences, contributing to frictionless interactions that foster long-term loyalty.
- ✓ **Creator Workflows:** The Now Platform low-code development removes the complexity of app development by providing graphical tools and out-of-the-box components that allow developers of all skill levels to quickly create exceptional mobile, web experiences, and automate workflows.

"Creating processes that empower businesses to be more effective and efficient with end-to-end automation, ServiceNow winning the recognition for Smart Workflow Platform is a testament to their excellent quality of service".

ZERO-TRUST DATA MANAGEMENT

Large Enterprise

Kristine Daniels, Head, India Marketing, Rubrik and Triveni Shetty, Enterprise Sales Director, and Anindya Mukherjee, Senior Sales Engineer, Rubrik, receive the recognition trophy from Sanjay Gupta, President & Business Head - IT, Kotak Mahindra Bank and Kiran Komatla, Group CTO, Restaurant Brands Asia (Formerly Known as Burger King India), at the Red Carpet Night.

While there are many OEMs who provide data backup and restore, Rubrik provides security of backed up data and hence calls itself as a Data Security company.

In 2014, when Rubrik was formed, the intent was to simply modernise data management. While there are heavy security investments made at the perimeter and network end point, it is most important to secure the crown jewels of the organisation that is the data.

It is important to believe that attackers will always find a way out into the system. No matter how tall a wall is built, hackers will build a ladder which is taller. Rubrik's solution was created with the belief that the bad actors have already penetrated into system and data at the backup site needs protection.

Some stats around threats - In 2021, almost 78% of organisations in India were under ransomware attack and globally, survey says that every 8 minutes, there is a ransomware /malware attack. This is in spite of every organisation claiming to be completely secure.

"Heartiest congratulations to the CIO Choice 2023 Winners. On behalf of Rubrik, I wanted to share my deepest gratitude to all the IT and security leaders who rely on Rubrik as your trusted partner. At the heart of why we do what we do, is underpinned by your trust in our capabilities, delivering data security and operational resilience for some of the most esteemed organisations. We are committed to continued innovation and providing data security and data protection for our customers at a time when protecting data and quickly recovering data after cyber incidents has never been more important and business-critical".

Antoine Le Tard,
Vice President - APAC & Japan,
Rubrik

Rubrik India's solution is based on 3 key pillars. Data Resiliency, Data Observability and Data Recovery or Remediation.

Data Resiliency: Rubrik protects every workload - Onprem, Cloud and SaaS app like O365 and ensure that the backed-up data cannot be deleted, compromised or encrypted.

Data Observability: Rubrik provides visibility into what sensitive data is compromised and who has accessed it. We have built AI/ML capability to provide view of what data is compromised, such that a granular level recovery of file can be approached.

In event of a compromise, following questions become extremely important for customers:

- ✓ If the attacker gets in, are our backups protected?
- ✓ If endpoint protection fails, do we know what is the blast radius?
- ✓ If data is exfiltrated, do we know what was exposed?
- ✓ Can we identify a clean recovery point?
- ✓ Can we automate remediation and have we tested it?

Rubrik supports all of the above.

Data Remediation: Backup is of no use without a safe recovery and you can recover single file or entire applications. You can also integrate this into enterprise workflows and tools.

Rubrik appliance is built on a Hyper converged model and security is built grounds up. We have built immutability into the file system which has WORM feature. We always assume that network is compromised and hence no open protocols or Windows are allowed. We provide a complete Zero Trust Architecture. Rubrik does not follow legacy 3 tier architecture where there could be multiple points of compromise. We provide a Google like search for instant recovery. Rubrik also provides a single UI for OnPrem and Cloud for management and visibility.

What are the vantage points:

- ✓ Reduce TCO associated with data protection
- ✓ Increase application availability
- ✓ Provide better RPO and faster RTO
- ✓ Increase effectiveness / productivity

"Providing air-gapped, immutable, access-controlled backups to help businesses prevent cyber-attacks, Rubrik has become the pioneer in Zero-Trust Data Management and is the rightful winner of this recognition."

DAAS (DESKTOP AS A SERVICE)

Large Enterprise

Maneesh Raina, COO, Anunta Technology Management Services and Mitul Rajput, SVP - Solutions Design, Anunta Technology Management Services, receive the recognition trophy from Sanjay Gupta, President & Business Head - IT, Kotak Mahindra Bank and Kiran Komatla, Group CTO, Restaurant Brands Asia (Formerly Known as Burger King India), at the Red Carpet Night.

Anunta is an industry-recognized digital workplace solutions provider with focus on Managed DaaS, Modern Desktop Management, BYOD, and Cloud Transformation, including cloud/data center workload migration. Anunta has successfully migrated 500,000+ remote users to cloud for enhanced workforce productivity and superior end-user experience. Since its inception, Anunta has been empowering its customers globally with sustainable, secure, and scalable managed DaaS offerings for business resilience and workplace transformation.

Anunta is a Top Tier partner with all the major technology OEMs (VMware, Microsoft, and Citrix) and cloud platform providers involved in virtualization technologies, particularly desktop virtualization. Anunta adds value in terms of design, onboarding, migration, and Day 2 offerings for digital workplace technologies across the most complex and varied use-cases.

"As the trusted advisor for our customers in their virtualization journey, Anunta is committed to providing end-to-end customer-centric digital workplace transformation offerings that maximize their ROI. Winning the CIO Choice Award elevates our position as a market leader in Desktop-as-a-Service with a strong customer focus. I would like to thank all our customers for their continued faith in us".

Ajit Aloz,
Head of Cloud Practice & Sales,
Anunta Technology Management
Services

Anunta has served over 500,000 remote desktop users till now, ensuring 99.98% application availability with less than 0.3 incident-to-user ratio.

As the trusted advisor for the customers in their virtualization journey, Anunta is committed to providing end-to-end customer-centric digital transformation products that maximize their ROI. Anunta's customer-first culture is reflected in its CSAT (Customer Satisfaction) score of 86% - against a market average of 71% - and its NPS (Net Promoter Score) of 74.

Anunta's "Enterprise DaaS" is a fully managed custom-built DaaS solution that provides tailored virtual desktops hosted on any public cloud or on-premises infrastructure using Virtual Desktop Infrastructure technology (Microsoft, VMware, Citrix). It is highly secure, compliant, scalable, and resilient, and addresses complex use cases with no or low IT intervention.

It enables digital workspace transformation through a secure work environment that ensures enhanced user productivity and experience.

The Anunta Difference

- ✓ **User Experience:** Consistent and lag-free desktop experience across devices and major virtualization technologies.
- ✓ **Automated, Intelligent DaaS:** Provides abstraction, automation, intelligence, and optimization across the chain.
- ✓ **Deployment Speed:** 2 days onboarding
- ✓ **Cost Effectiveness:** Simplified, subscription-based pricing, which reduces overall IT spend.
Security Best Practices: Scalable, secure and compliant across environments of any size.
- ✓ **Rapid Scalability:** Remote delivery structure with the ability to scale teams in an instant and quickly meet demand fluctuations.

"Anunta Technology Management Services is a leading name in providing custom-built DaaS solution with enterprise-grade security and this win in DaaS (Desktop as a Service) category will inspire the team to introduce more such innovative solutions".

Mobility Plans

Vi Business Plus for Enterprise COCP:

Vi Business Plus plans are Mobility Bundle plans designed for enterprise customers which help in striking the right balance between driving productivity for organizations and simultaneously giving flexibility to employees to operate effectively, thus creating a win-win for the organizations and its employees. The plan benefits include:

- ✓ **Google Workspace** - Productivity & Collaboration tool that provides users access to domain-based business emails; productivity tools like sheets, docs, slides, calendar & messages; secure video/audio meeting; drive access; google forms to schedule surveys across employees and their customers; security by providing phishing & spam protection.
- ✓ **Data Pooling** - Data Pooling brings in spending optimization which makes customers worry-free by creating a combined data quota. Thus, it saves on data wastage by managing employee's surplus data.
- ✓ **Mobile Security** - Comprehensive protection for mobile devices, provides data protection, safeguarding against lost devices and data, viruses, spyware, dangerous and fake websites, and malicious apps.

- ✓ **Location Tracking** - Powerful resource tracking system based on cell sites that a SIM is latched to, allows enterprises to locate and monitor all kinds of resources such as employees, SIM-based devices, or vehicles.

Premium Plans:

REDX is a limited-edition Postpaid Experience which brings in unique and premium experiences to elite customers. REDX comes with Unlimited Voice & Unlimited Data at faster data speeds.

Mobile Call Recording Solution:

Vodafone-Idea's distinctive solution allows fully automated, mobile-based call recording with secure and real-time transfer of the recorded calls. By providing this on mobile phones, it provides any-time, anywhere access, ensuring business continuity, and at the same time, ensuring instant scalability & flexibility, full security and no investment from the enterprise end due to fully OPEX-based model.

Secure Data Connectivity Portfolio:

Enterprises across industries has a demand for a secure mobile data connectivity solution coupled with an agile deployment. As an industry-first, it offers IP & URL whitelisting on Private APN which helps enterprises with a secure connectivity.

VOLTE & Voiceover WiFi for Business:

VOLTE has enabled superior quality voice services with unmatched clarity and simultaneous usage of high-speed data while on voice calls, ensuring seamless business continuity. VoWiFi allows users to make calls over a WiFi connection, hence keeping a customer connected without mobile signals.

Optima Corporate Plus for Enterprises:

Optima Corporate Plus accelerates COCP Postpaid connectivity through a proposition that offers enterprise customer the spend control, predictability & visibility and allows the employee (end user) the convenience and flexibility of prepaid to address their individual needs. Optima Corporate plus is a perfect hybrid between postpaid and prepaid, providing the best of both worlds.

"Vi Business winning the recognition for Telecom Carrier (Mobile Access) speaks volumes of the company's mission and values to provide the best customer service".

INTERNET OF THINGS (IOT)

Large Enterprise

Akhil Garg, CFO & Head - IoT, and Siddharth Talwadekar, Business Head - IoT, Airtel IoT, receive the recognition trophy from Sanjay Gupta, President & Business Head - IT, Kotak Mahindra Bank and Kiran Komatla, Group CTO, Restaurant Brands Asia (Formerly Known as Burger King India), at the Red Carpet Night.

Headquartered in India, Airtel is a global communications solutions provider with over 500 million customers in 17 countries across South Asia and Africa. The company ranks amongst the top three mobile operators globally and its networks cover over two billion people.

Airtel is India's largest integrated communications solutions provider and the second largest mobile operator in Africa. Airtel's retail portfolio includes high speed 4G/5G mobile broadband, Airtel Xstream Fiber that promises speeds up to 1 Gbps with convergence across linear and on-demand entertainment, streaming services spanning music and video, digital payments and Financial services.

For enterprise customers, Airtel offers a gamut of solutions that includes secure connectivity, cloud and data centre services, cyber security, IoT, Ad Tech and CPaaS (Airtel IQ)

"The scale at which Airtel IoT is working with customers today is great! With 15 million+ Airtel IoT-powered devices in the market, I truly believe that our customers have found the true need of automation in today's times and have trusted us with the opportunity to partner with us to empower their businesses! I genuinely believe that in times to come, we are going to see a huge jump in this number, and we hope that a multitude of other businesses in India choose Airtel IoT and truly go 'smart'. Also, with industries like Utilities and EV taking a forward leap now, I am sure that we shall witness the true era of India's innovation."

Akhil Garg,
CFO & Head- IoT,
Airtel Business

Airtel IoT is an integrated platform that offers end-to-end solutions that are powered by a variety of connectivity technologies to suit the business need. With a long-standing legacy of delivering customer satisfaction, Airtel assures of a smooth IoT journey, transforming your business for delivering immediate benefits and setting up for future success.

"Determined to simplify organizations' IoT journey by offering future-ready IoT solutions, Airtel IoT claimed the recognition for the Internet Of Things (IoT) highlighting the success of its solutions and services".

GOVERNANCE RISK & COMPLIANCE

Large Enterprise

Anirban Sengupta, Partner - Risk Consulting, PwC India, and Shah Amber, Director - Risk Consulting, PwC India, receive the recognition trophy from Kersi Tavadia, CIO, Bombay Stock Exchange, and Nayan Desai, CIO, WNS Global Services, at the Red Carpet Night.

At PwC, our purpose is to build trust in society and solve important problems. We're a network of firms in 152 countries with over 328,000 people who are committed to delivering quality in assurance, advisory and tax services.

PwC is a community of solvers coming together in unexpected ways to solve the world's most important problems. As part of its new equation strategy, we combine human ingenuity, experience, and technology innovation to deliver sustained outcomes and build trust. PwC encourages innovative mindsets and smart technologies combined with fresh, diverse perspectives to move beyond the tried and tested and drive toward new ways of delivering transformation with the right business outcomes.

The level of risk you need to manage today would scarcely have been imaginable, even recently. The risks of today erode organizational value, but if managed well they have the potential to present opportunities for gaining a competitive advantage. We can help you navigate this uncertainty by changing the way you predict, prepare, and respond to risk, giving you the confidence to make decisions that make a difference.

At PwC, we endeavour to help our clients experience a smooth and efficient Governance, Risk, and Compliance (GRC) journey, which not only gives them confidence about the posture of their organization but also the assurance to the board and regulators on the robust GRC framework that rides on the technology. We thank our customers for their faith in us and for allowing us to partner with them on their GRC initiatives. We are also grateful to the CIOs for recognising our Governance Risk and Compliance capabilities.

Sivarama Krishnan,
Risk Consulting Leader,
PwC India

In the current volatile world, the business risk landscape is changing and ever evolving. The pandemic has accelerated the pace at which sophisticated risk events occur and the extent to which they spread and influence the regulatory change. Risks that once seemed remote and improbable have now become a norm.

To succeed in an unpredictable environment, organisations must be resilient. But the nature of resilience is changing. It's not just about being secure; it is imperative to understand how evolving risks and regulations impact your industry and your business so you can respond quickly and emerge stronger.

PwC combines our deep experience and industry insights, along with our digital, risk and technology expertise to help our customers manage their cybersecurity programmes, financial and market risks, crisis events, fraud investigations, and impact of regulatory changes. PwC helps clients build resilience, create trust, unlock value, embrace new technologies to navigate risks with confidence and stay protected in challenging times.

PwC works with its clients to identify a scalable solution that enables the client organization to develop a holistic GRC Enablement Model; and has developed a five-step process to help its clients move strongly on their GRC maturity journey:

- ✓ GRC strategy definition at enterprise level
- ✓ GRC framework creation and proof of the design
- ✓ GRC technology strategy
- ✓ Technology evaluation and implementation roadmap definition
- ✓ Process automation, on-demand development, and integrations
- ✓ Support, maintain & training

"When it comes to delivering sustained outcomes with a difference, PwC India is a force to be reckoned with. Winning this recognition for Governance Risk And Compliance is a testament to their dedication to build trust in society and solve important problems".

MANAGED MOBILITY SERVICES

Winning Brand

Large Enterprise

Tarun Sharma, GM- Strategic Marketing, Enterprise, Vi Business, and Apurva Agrawal, EVP - Revenue Growth & Commercial, Enterprise, Vi Business, receive the recognition trophy from Kersi Tavadia, CIO, Bombay Stock Exchange, and Nayan Desai, CIO, WNS Global Services, at the Red Carpet Night.

Vodafone Idea Limited is an Aditya Birla Group and Vodafone Group partnership. It is India's leading telecom service provider. The Company provides PAN- India Voice and Data services across 2G, 3G and 4G platform. With the large spectrum portfolio to support the growing demand for data and voice, the company is committed to deliver delightful customer experiences and contribute towards creating a truly 'Digital India' by enabling millions of citizens to connect and build a better tomorrow.

The Company is developing infrastructure to introduce newer and smarter technologies, making both retail and enterprise customers future-ready with innovative offerings, conveniently accessible through an ecosystem of digital channels as well as extensive on-ground presence. The Company is listed on National Stock Exchange (NSE) and Bombay Stock Exchange (BSE) in India.

"The CIO Choice 2023 recognition for Managed Mobility Services is a validation of our commitment to delivering innovative solutions for our enterprise customers. In our journey from a telco to a tech-co, we continue to expand our services to become a one-stop shop for end-to-end solutions managing business services for our clients in an ever-evolving digital landscape".

Sandeep Agarwal,
VP - Mobility Products & Propositions
Enterprise,
VI Business

Vi's Managed Mobility service is a unique curated solution for enterprise customers to manage their end-to-end mobility operations. This is designed to improve the productivity & security of the enterprise workforce and reduce the total cost of ownership. It comes with an e-portal through which the Enterprise administrator can manage the devices, raise service requests, etc., and control their mobility assets and connections through digital enablement.

Vi's Managed Mobility offering includes an entire gamut of services to address any enterprise's unique needs, from Device Selection & Procurement, Staging & Kitting, Secure Network Connectivity, Mobile Device Management & In-Life Management & Support. This comprises device pick-up and

drops at the doorstep, giving loaner devices to replace devices gone for repair, and providing insurance & extended warranty for the devices purchased. These are available for mobile phones & tablets on a fully-assisted managed service model.

Vi Managed Mobility service comes with an option of adding Vodafone Idea Secure Device Manager (ViSDM), through which enterprises can secure their corporate data, e-mails & apps while ensuring compliance with corporate policies across devices and applications, irrespective of whether they are company-owned or employee-owned. With help of backward integration with OEM platforms, deployment of Mobile Device Manager happens with Zero Touch, which removes in-person configurations totally and provides a seamless & smooth onboarding experience to Enterprise customers.

The key highlight of the offering is the PAN-India support; offered with a faster turnaround time for incident management related to the service. It also comes along with a single touchpoint that allows hassle-free operations and ensures business continuity both for Work from Home and in Hybrid workplaces. Vi's customers get complete visibility of their device inventory, status, and usage through this dedicated Managed Mobility Portal.

Vi's Managed Mobility service thus offers a one-stop shop to meet all mobility requirements of enterprises, thereby enabling them to focus on their core business.

"Vi™ Business provides enterprise mobility solutions for organizations to stay connected to work, anytime, anywhere, and access secure documents in the cloud. With this win in 'Managed Mobility Services', the brand has once again shown the kind of transformation it is capable of delivering even in the remotest setup".

THREAT MANAGEMENT PLATFORM

Small & Medium Enterprise

Aditya Sawant, CEO, Rani Yadav, Customer Success Ambassador, and Sanika Likhite, Aquila I Solutions, receive the recognition trophy from Kersi Tavadia, CIO, Bombay Stock Exchange and Nayan Desai, CIO, WNS Global Services, at the Red Carpet Night.

Aquila I is an ICT leader's Most preferred Threat Management Solution, enabling security teams to gain actionable threat intelligence across critical areas impacting Cyber Security Posture of their organization.

An agile and robust Threat identification and analytical engine of Aquila I helps you deliver detailed visibility of vulnerabilities and security gaps across people, infrastructure, brand, and communication. With a single platform to Assess, Prioritize, Monitor & Prevent modern-day threats, businesses can now have much better insight and control of the rapidly evolving Cyber Security challenges.

"Winning CIO choice recognition is not just a recognition of excellence, it's a testament to the commitment of a business in exceeding customer expectations and building strong, lasting relationships. It's also a reminder that putting the customer first is not just a strategy, but a way of doing business".

Aditya Sawant,
CEO,
Aquila I

For any organization, the infrastructure is the primary spot where they could be vulnerable to real-time threats. Identifying and hunting these gaps in Infrastructure is a much-needed security requirement. Aquila I performs this through an automated VA scan across critical infrastructure for an organizations security postures. Moreover, when it comes to the infrastructure, Aquila I also provides Incident Management and Up-Time Monitoring which gives the clients complete hands-on control of the same.

Aquila I also performs cyberattack stimulations to create a space of awareness amongst people for cyber-security. They compel people to report phishing incidents without any delays. They understand the density of user awareness and use multiple metrics to measure that by performing real-life simulations. Once they identify the vulnerable users who're the soft target of these threats, then they go ahead and educate these users on our platform via comprehensive modules. Apart from this, Aquila I performs deep and dark web monitoring of the client's presence in dark web and identify brand pilferages. It also provides email security solutions.

"Aquila I platform provides one-stop solutions for enterprise security needs and this recognition is about celebrating Aquila's achievement in ensuring ease of threat management application through its comprehensive Threat Management Platform".

Founded in 1991, Sigma-Byte Computers Private Limited is a Mumbai-based leading systems integration company with a presence in UAE and Singapore. The company in the nineties became one of the most sought for coveted systems integrators for AT&T Systimax in structured cabling systems solutions. Today, Sigma-Byte continues to be a responsible company of the first choice in the ELV and ICT domains.

Sigma-Byte designs and build ICT infrastructure solution for enterprises, corporate and internet data centres, collocation facilities, telecom facilities, real estate, and back offices for leading corporates. Sigma-Byte has well-defined processes for design, implementation, testing, and documentation as per global standards and industry guidelines. Over the years, Sigma Bytes has established a strong relationship with its customers and enjoyed continuous patronage. Sigma Bytes provide customers with world-class products and technology solutions in ELV ICT. These are implemented and delivered by its highly trained workforce with quality and adherence to international standards.

"We are deeply honored and humbled to receive the CIO Choice award in the structured cabling category from the CIO Community for the 5th consecutive year. I would like to thank Core Media, our customers, and the CIO community who voted for us, for this honor once again. This award is more special as it is a validation of the faith that our customers have had in us over the last 30 years."

Obviously, this honor wouldn't be possible without the dedication, hard work, and support of my amazing team. They are the true recipients of this award.

This award is not only a recognition of our past achievements but also a challenge for us to keep raising our bar and meeting and exceeding our customers' expectations every time. I and my team look forward to creating more value for our customers in the coming years".

**Ketan Kothari,
Managing Director,
Sigma-Byte Computers**

The demand for the Internet its speed and bandwidth has risen exponentially, and fiber has become essential till the last mile replacing Cat6. Sigma-Byte has worked extensively and invested its resources in building upon its OSP fiber expertise of more than two and half decades onto Fiber To Home Systems. A solution designed to meet the needs of residential apartments, large gated real estate developers and complexes, high-rise buildings, mix-use projects, commercial malls, and offices, and luxurious second home villa campuses, where Fiber To The Home (FTTH) technology is designed and implemented for a truly converged network which supports all IT and ICT services. Equipped by its extensive experience in FTTx architectures, Sigma-Byte offers a complete portfolio of state-of-the-art FTTx products including PON, or active electronics, as well as end-to-end passive infrastructure.

As an innovation-induced Solution Service provider for customers, Sigma-Byte provides complete solutions right from designing, sourcing, and consulting to the integration of high-quality ELV infrastructure.

"By winning recognition for Structured Cabling, Sigma-Byte Computers has proven its mettle for solving ICT Infrastructure challenges for enterprises, corporates, internal data centers, collocation & telecom facilities".

ARCHON
Be always on

Sachin Rao, CEO & MD, Archon Consulting Systems, receive the recognition trophy from Kersi Tavadia, CIO, Bombay Stock Exchange, and Nayan Desai, CIO, WNS Global Services, at the Red Carpet Night.

Archon helps customers by providing the apt IT infrastructure and services to enable their digital transformation journey. The company's objective is to increase profitability for the customers by providing solutions and services which bring operational efficiencies, benchmark IT and provide different business models (Capex, Opex, consumption-based private cloud, and public cloud).

Archon provides solutions in client computing (endpoint), data center (server, storage, networking), security, and software, helping greenfield setup as well as revamping for the new digital age requirements. They have enabled customers to a faster time to market, securing their data, ease of use, and flexible contracts helping traditional customers transform as per today's changing and challenging environment.

"CORE Media's CIO Choice is one of the most prestigious recognitions among the ICT vendor community, and we are pleased to receive this recognition. We would like to thank the CIO Community for nominating us and voting for us in the Infrastructure Transformation Services domain for the fourth year in a row. I want to dedicate this recognition to my team for their efforts".

Sachin Rao,
CEO & MD,
Archon Consulting Systems

We are living in a highly disruptive and fast-changing world where collaboration occurs at every level. Digital leaders need to excel at continuous business innovation and IT departments in enterprises have to cater to disparate demands for various business units as well as employees. There is constant pressure to optimize and streamline data center management and cut costs while ensuring better performance and utilization of the IT ecosystem.

Whether it's real-time analytics, connecting devices at the edge, or protecting apps and data - business leaders now widely prefer to consume the outcomes they want, when they want them, and pay only for what they consume. We at Archon with our technology alliances and skilled resources, including consultants work closely with our customers to manage data, and intelligence from edge to core, redefine security paradigm, build infrastructure that will self-manage and self-service, propose and deploy consumption-based models that will deliver experiences as a service.

Archon Lines of Business

- ✓ Optimizing End-user Devices for Workforce productivity, End Point Governance, and Virtual Desktop Infrastructure
- ✓ Server, Storage, Back Up and Disaster Recovery, Virtualization, Hyper-scale computing, and Converged Infrastructure
- ✓ Datacentre and Cloud
- ✓ Networking, Collaboration, and Security
- ✓ Enterprise Software and Applications
- ✓ IT Infrastructure Support & Services

"Archon Consulting is committed to delivering value-based solutions & services that positively impact business efficiency. Facilitating optimum management of their client's technology investments and resources has won them the recognition in the Infrastructure Transformation Services category".

TRAVEL & EXPENSE MANAGEMENT

Small & Medium Enterprise

Sarika Tiwari, Director, Sales, and Team, Happay, receive the recognition trophy from Jai Prakash Sharma, EVP- Technology Operations, Info Edge India, and Sankarson Banerjee, Consultant-Technology, RBL Bank, at the Red Carpet Night.

Our cloud-based business expense management solutions leverage modern technologies such as Artificial Intelligence, Machine Learning, and Mobility to help businesses automate their expense claims and reimbursement processes, boost time and cost savings, achieve policy compliance and control, and get rich insights into corporate spending. With Happay's business expense card and mobile app, your employees can report expenses automatically, in seconds, on the go. For management, you have visibility and control into how and where your money is spent, in real-time, through the web and mobile. For accountants, you can reconcile expense reports, attached with digitized receipts in minutes. You can even integrate expense data into your accounting software without changing a thing. All this is on one single, centralized platform.

"It is truly rewarding to receive recognition at such a grand platform. CIO Choice is unique because it's the only democratic recognition in India where a CIO chooses the best technology vendor. We thank the CIO community, our customers, and our partners for the trust and the encouragement they continue to give us. Through our AI-powered, highly configurable, and integrated Travel and Expense Management platform, combined with our implementation, change management, and innovation expertise, we will continue to help CIOs transform and shape the future direction of their enterprise".

Varun Rathi,
Chief Operating Officer & Co-founder,
Happay

Happay is a pioneer in Business Travel and Expense Management Automation. We have reinvented the expense workflow from the ground up; we have stripped it off and scrubbed it clean of all its shortcomings, mainly cash, paper, and manual data entry. We have made it uber simple, completely streamlined, and 3 times as fast and efficient as before.

Happay serves 5,000+ customers across 40+ industry verticals—from the largest and most respected business conglomerates to the fastest-growing SMEs and startups.

"Happay – winning this recognition for Travel & Expense Management – with its all-in-one platform that facilitates end-to-end payment integration – demonstrates the company's commitment to keeping its customers in the front".

Anoop Mathur, Founder, CORE Media

SMART RECEIPT

Winning Brand

Small & Medium Enterprise

Siddharth Mishra, Founder & CEO, Carnival, and Prasenjeet Shahi, Co-Founder, Carnival, receive the recognition trophy from Jai Prakash Sharma, EVP- Technology Operations, Info Edge India, and Sankarson Banerjee, Consultant-Technology, RBL Bank, at the Red Carpet Night.

Founded in 2019, Carnival is a SaaS-based platform for retailers and brands to create personalized post-purchase or post-invoicing customer journeys using smart receipts technology. The platform can be used to engage, re-market, retain, re-target, inform them.

Karnival's platform is implemented with over 50 marquee retailers and brands including Aditya Birla Retail Limited, Titan Company Limited, Lulu Group UAE, Spar Hypermarket, Fabindia, and Pantaloons. It is already deployed at 5000+ stores and is generating 4.5 million receipts a month and facilitating more than USD 100 million worth of transactions.

"We are delighted and humbled to receive the CIO Choice recognition for Smart Receipt. Karnival is committed to creating strategic business value for CIOs through technology's unique and innovative use. Our solution has helped businesses across India to streamline their operations and scale up and we will continue to do so in the future".

Siddharth Mishra,
Founder & CEO,
Karnival

A smart receipt is an intuitive receipt technology that has the prime objective of customer engagement with its users and helps brands and retailers to acquire, engage and eventually retain their customers. The high click-open rate of Smart Receipts has encouraged various brands to leverage this for their customer experience and marketing activities through this newly discovered platform. With smart receipts, the post-purchase customer journey can be fixed.

Currently, the NPS system is boring and does not help in completing the customer's journey effectively. In this case, smart receipts can act as a magic potion if retailers tie connected NPS, Feedback & Branching with a customer's profile.

"By claiming this recognition for Smart Receipt, Karnival has proved that smart receipt technologies can create wonders when it comes to making the post-purchase journey seamless and quick for customers".

DNS SECURITY

Winning Brand

Small & Medium Enterprise

iSecureNet Solutions Pvt. Ltd.

Manish Rane, CTO, iSecureNet Solutions, and Shekhar Sharma, CEO, iSecureNet Solutions, receive the recognition trophy from Jai Prakash Sharma, EVP- Technology Operations, Info Edge India, and Sankarson Banerjee, Consultant-Technology, RBL Bank, at the Red Carpet Night.

iSecureNet is one of the leading providers of data, network security, cost-effective IT Solutions, and compliance management solutions to businesses and organizations. iSecureNet has helped thousands of organizations - ranging from Fortune 500 businesses and large financial institutions to small and medium-sized retailers—manage compliance and secure their network infrastructure, data communications, and critical information assets.

Experience - iSecureNet team members have significant experience in designing and delivering enterprise-level information security technologies for businesses in any vertical market including Retail, Financial Services, Healthcare, Manufacturing, Communications, Utilities, and Government.

People - iSecureNet has assembled the most talented professionals in the field of information assurance and network security so that your organization can more securely enjoy the benefits of today's globally networked communications environment.

"CIO Choice is one of the most prestigious recognitions among the ICT vendor community, and we are pleased to receive this recognition. We would like to thank the CIO Community for nominating us and voting for us in the DNS Security category. I want to dedicate this recognition to my team for their efforts".

Shekhar Sharma,
CEO,
iSecureNet Solutions

A DNS AM-Trap is a Purpose-built DNS Server, which is a complete unified security solution and advanced log analytics solution. All it takes to create one is a list of malicious domains or hostnames, which can be added easily to the configuration of the DNS resolver server to automatically block access to those locations.

By utilizing this secure DNS gateway, an enterprise can ensure its employees and IT systems are not routed to destinations that could jeopardize communications, proprietary information, customer's private data, and more.

Another major advantage of a DNS AM-Trap is that you already have the foundation you need in place with your current DNS resolver infrastructure. Thus, there's no hardware to install, major software upgrades, network reconfiguration projects, or other "show-stopper" items that can bog down typical security solution deployments. In fact, a DNS AM-Trap can be deployed in minutes and offer protection from:

- ✓ Phishing/Spear Phishing/Whaling
- ✓ APT Protection
- ✓ Crypto Mining and Cryptojacking
- ✓ DNS Typosquatting
- ✓ DoH & DoTLS protection
- ✓ DNS Tunnelling
- ✓ DNS beacon channels
- ✓ Data Exfiltration
- ✓ DGA Attacks
- ✓ DNS Rebinding attacks

"Providing next-generation Security Information and Event Management solutions with a primary focus on log management and easier compliance reporting, iSecureNet Solutions is a true recognition winner in the DNS Security category".
